Investment strategy

The fund invests in corporate bonds from emerging markets, using a benchmark-relative approach. The portfolio manager uses a credit strategy as is consistent with global macroeconomic views and credit market conditions. The main drivers of performance will be individual security selection, sector allocation, country allocation and sensitivity to changes in government bond yields.

Investment goal

To provide a return of capital growth and income. To achieve the investment objective, the Fund will invest primarily in a portfolio of bonds and other fixed and floating rate securities (including, but not limited to, asset-backed securities and mortgage-backed securities) denominated in various currencies and issued by governments, government agencies, supra-national and corporate issuers from the emerging markets. Asset-backed securities and mortgage-backed securities will not exceed 20% of the net assets of the Fund. A maximum of 20% of the net assets of the Fund will be held in securities issued by governments.
