BGF US Dollar High Yield Bond F.A4 GBP H / LU0706698544 / A1JPDL / BlackRock (LU)

Investment strategy

At least 70% of the Fund's total assets will include investments with a relatively low credit rating or which are unrated. The remainder may include investments which are investment grade (i.e. meet a specified level of credit worthiness) at the time of purchase. The fixed income securities may be issued by: the United States (US) government and its government agencies, non-US governments and government agencies, and companies and supranationals (e.g. the International Bank for Reconstruction and Development). The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the Bloomberg US Corporate High Yield 2% Constrained Index (the "Index") when constructing the Fund's portfolio, and for risk management purposes as further described in the prospectus. The IA is not bound by the components or weighting of the Index and may also use its discretion to invest in securities not included in the Index. However, the currency requirements of the investment objective and policy may limit the extent to which the portfolio holdings will deviate from the Index.

Investment goal

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets and invest in a manner consistent with the principles of environmental, social and governance (ESG) investing. The Fund invests at least 70% of its total assets in fixed income securities denominated in US dollars. These include bonds and money market instruments (i.e. debt securities with short term maturities).
