## Invesco Global Investment Grade Corporate Bond Fund S (GBP hedged) quarterly distribution - gross income /

### Investment strategy

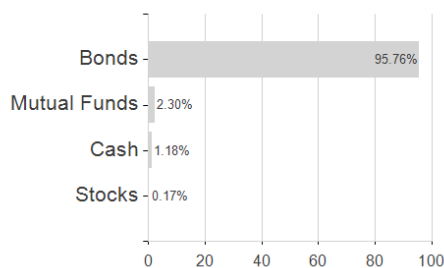

The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund). The Fund is actively managed and is not constrained by its benchmark, the Bloomberg Global Aggregate Corporate Index USD-Hedged (Total Return), which used for comparison purposes. However, as the benchmark is a suitable proxy for the investment strategy, it is likely that the majority of the issuers in the Fund are also components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.

### Investment goal

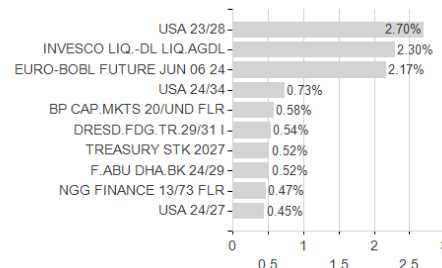

The objective of the Fund is to achieve income and long-term capital growth. The Fund will invest primarily in high quality debt instruments issued by companies worldwide, including contingent convertibles. The Fund is, however, permitted to invest in debt instruments issued by non-investment grade or unrated companies.
