Investment strategy

Development of the international stock markets as well as the foreign exchange rates against the euro, corporate- and sector-specific development

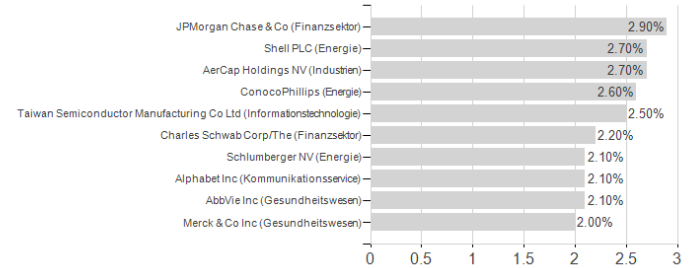

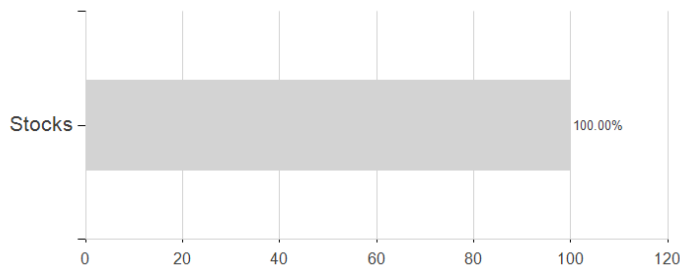

Investment goal

DWS Global Value offers investors a selection of global equities that we consider to be favorably valued and thus to have the potential to outperform. Fund management focuses on companies whose share prices are viewed by other market participants to be too low and whose valuations investors have given too short a horizon. DWS Global Value – stock-picking with a long-term orientation and a focus on equities we consider undervalued.
