What is this product?

Type

This product is an investment fund.

Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

Objectives

Portfolio Flexible Bonds belongs to the category of Funds of Mandates.

The Fund seeks to increase the value of its assets over the medium term by investing predominantly and discretionary in debt securities of issuers (with no rating constraints) located throughout the world including emerging markets and high yield bonds (between 0% and 100% of the Fund's net assets). The Fund may also make use of a variety of instruments / strategies in order to achieve the Fund's objective including, but not limited to, money market instruments, convertible bonds, forward rate notes, forward foreign exchange contracts (including non-deliverable forwards), interest rate futures, bond futures and OTC swaps such as interest rate swaps and credit default swaps.

The minimum asset allocation in such securities on a consolidated basis (direct and indirect investments) will be of 60% of the Fund's net assets.

The Fund will respect within the remaining 40% of its total net assets and on a consolidated basis all the following limitations for investments in the below securities/instruments:

- (i) a maximum of 10% of the total net assets of the Fund may be invested in transferable equity securities;
- (ii) a maximum 10% of its net assets in funds that have been selected in accordance with a number of qualitative and quantitative criteria. The qualitative analysis assesses the stability and strength of the investment manager, as well as its investment process and philosophy. The quantitative selection process aims to select only funds with proven risk-adjusted performance.

The Fund may not invest in defaulted assets but may invest in Distressed Assets up to 10% of the Fund's net assets.

The Fund may use derivatives on this type of asset for investment, hedging and efficient portfolio management purposes.

Sustainable Investment Policy The Fund promotes environmental and social characteristics and qualifies as an investment product in

accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector as set out in Book I.

In that respect, the eligible universe is determined by criteria such as but not limited to exclusion filters, as set out in Book I. The extra-financial analysis covers at least 70% of the portfolio.

The Fund may invest up to 10% of its total net assets in external Passive or Quantitative Funds and/or ETF that are classified Art.6 under SFDR for which the investable investment universe complies with the Management Company's Art.6 set of exclusions. External funds may deviate from the Sustainability Investment Policy of the Management company applying to direct investments.

The derivative instruments are not covered by the ESG analysis.

Relation to the Reference Portfolio This Fund is actively managed and is compared to composite index 50% Bloomberg Global High Yield Corporate EUR Hedged + 25% JP Morgan EMBI Global Diversified Composite EUR + 25% JP Morgan CEMBI Broad Diversified Composite EUR for performance and risk level indicator purposes. However, the reference to this Reference Portfolio does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the Reference Portfolio's components.

Therefore, returns may deviate materially from the performance of the Reference Portfolio.

The base currency of the Fund is EUR.

Income is systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

What are the risks and what could I get in return?

Risks

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of ABN AMRO Investment Solutions to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.abnamroinvestmentsolutions.com.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between August 2021 and October 2023.

Moderate: this type of scenario occurred for an investment between August 2016 and August 2019.

Favourable: this type of scenario occurred for an investment between August 2018 and August 2021.

What happens if ABN AMRO Funds Portfolio Flexible Bonds is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	731 EUR	994 EUR
Annual cost impact*	7.3%	3.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and -1.0% after costs.
