The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

db x-trackers MSCI KOREA TRN INDEX ETF

Share Class: 1C (ISIN: LU0292100046), (WKN: DBX1K2), (Currency: USD)

a sub fund of db x-trackers. The Fund is managed by DB Platinum Advisors, part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the MSCI Total Return Net Korea Index which is designed to reflect the performance of the shares of certain companies in Korea.

The companies making up the Index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. The Index aims to represent 85% of the readily available shares in each industry sector in the Korean market. A company's weighting on the Index depends on its relative size. The Index is calculated on

a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The Index is reviewed and rebalanced at least quarterly.

To achieve the aim, the Fund will enter into a financial contract (derivative) with Deutsche Bank to swap most subscription proceeds for the return on the Index.

No dividends will be paid on your shares.

You may redeem your shares on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 7 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as promoter, distributor, derivative

counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is exposed to stock market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.

The MSCI indexes are the exclusive property of Morgan Stanley Capital International Inc. ("MSCI"). MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use by the Fund. The Fund is not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to the Fund.

The financial contract (known as a derivative) used to gain exposure to the Index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs associated with the counterparty's hedging position. These index replication costs may lead to your investment suffering losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
