

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DB Portfolio Euro Liquidity, a sub-fund of DB Portfolio

Security code: 986967 ISIN: LU0080237943

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

## Objectives and investment policy

The objective of the investment policy is to generate a return in euro, based on the performance of the benchmark (3M EUR LIBID). In order to achieve this, the fund invests at least 70% in government and corporate bonds denominated in or hedged against the euro. The average duration of the fund is a maximum of 12 months and is achieved by employing suitable derivatives, among other things. Derivatives may also be used for portfolio management. The selection of individual investments is at the discretion of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DB Portfolio Euro Liquidity is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

## Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 1 because its share price generally hardly fluctuates at all and the likelihood of both losses and gains should therefore be relatively low. DWS Investment S.A. may guarantee a particular net asset value per share on a particular date for the fund. This means that the investor will receive a minimum guaranteed NAV per share minus any distributions paid on a particular date (30 December of each year). DWS Investment S.A. intends to set a new guarantee for the fund on an annual basis. If the shares are redeemed before the guarantee date, the fund's NAV per share may be below the guaranteed value. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of default is continuously present and can cause your investment to suffer a loss.

## Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	1,00 %. This is the maximum amount that will be deducted from your investment prior to investment.
<b>Exit charge</b>	No redemption fee
Charges taken from the fund over a year	
<b>Ongoing charge</b>	0,26 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	0,13 % The performance-based fee is equal to 50% of the amount by which the appreciation exceeds the performance of the benchmark. Details can be found in the "Costs" section of the sales prospectus.

The front-end load specified here is a maximum amount. It may be lower in individual cases. To find out the amount that is currently applicable for you, please request it from the office responsible for you or from your financial advisor. The current costs specified here were incurred in the fiscal year of the fund, which ended on 31.12.2011. They may change from year to year. The current costs do not include the performance-based fee and the transaction costs. Additional information on costs can be found under "Costs" in the sales prospectus. Shares may be exchanged for shares in another DB Portfolio sub-fund for an exchange commission which is 0.5% less than the issue surcharge. Details can be found in the "Exchange of shares" section of the sales prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from DB Portfolio Euro Liquidity were deducted during the calculation. Initial sales charges and redemption fees were not taken into account. DB Portfolio Euro Liquidity was launched in 1997. The performance was calculated in EUR.
