

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Invest Africa, a sub-fund of the SICAV DWS Invest

Share class FC Security code: DWS0QP ISIN: LU0329759921

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

## Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (S&P Africa 40 net Index). In order to achieve this, the fund invests primarily in equities of issuers that have their registered office in Africa or that conduct their principal business activity in Africa or which, as holding companies, hold primarily interests in companies registered in Africa, in particular South Africa, Egypt, Mauritius, Nigeria, Morocco and Kenya.. In addition, the fund may invest in domestic and foreign issuers that do not satisfy the requirements of the preceding sentence. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Invest Africa is EUR, the currency of the FC share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

## Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in financial instruments that are sufficiently liquid but which may reach relatively low liquidity under certain circumstances. This means that normal trade may be temporarily disrupted or impossible. This can cause a considerable loss for your investment. The fund is subject to increased operational risks and risks in relation to holding the securities. The fund's access to the assets held may be removed, to its detriment, partially or in full, in the event of insolvency, infringement of due diligence, or improper conduct on the part of the Custodian.

## Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.
