DWS Top 50 Welt

Security code: 976979 ISIN: DE0009769794

Management Company: DWS Investment GmbH, a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (DJ Global Titans 50). In order to achieve this, the fund invests primarily in equities of domestic and foreign issuers. The number of issuers of equities held in the fund is generally 50. However, this figure may temporarily exceed or fall below 50. The following aspects shall be considered when selecting the 50 equities: the company's strong market position, solid financial ratios and quality corporate management with an orientation toward achieving long-term increases in income. The strategic orientation of the company should be toward long-term growth. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Top 50 Welt is EUR. The fund distributes annually. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high.
