⁴ Investment Manager for Federated Hermes Emerging Markets Debt Fund

The Directors of Federated Hermes Investment Funds Public Limited Company (the "Company") present their Annual Report and the Audited Financial Statements of the Company for the financial year ended 31 December 2022.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the Financial Statements in accordance with the Companies Act 2014 and the applicable regulations.

Irish company law requires the Directors to prepare Financial Statements for each financial year. Under the law, the Directors have elected to prepare the Financial Statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("relevant financial reporting framework"). Under Irish company law, the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014.

In preparing those Financial Statements, the Directors are required to:

- select suitable accounting policies for the Financial Statements and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the Financial Statements and Directors' Report comply with the Companies Act 2014 and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and enable the Financial Statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal Activity

The Company was incorporated on 23 October 2008 under the laws of Ireland as an open ended umbrella type investment company with variable capital and limited liability, having segregated liability between its sub-funds, in which different sub-funds may be created from time to time. The Company is authorised by the Central Bank of Ireland as an investment company pursuant to the Central Bank UCITS Regulations.

Business Review

Please refer to the Investment Manager Reports on pages 12 to 55 for a review of business.

The principal risks and uncertainties faced by the Company are the investment risks associated with the portfolio of investments held for the account of each sub-fund (the term "Sub-Fund" relates to the Sub-Funds listed on pages 281 to 288) and the operational risks associated with their management and administration (see note 8).

Accounting Records

The measures taken by the Directors to secure compliance with the requirements of sections 281 to 285 of the Companies Act 2014 with regard to the keeping of accounting records are the use of appropriate systems and procedures and employment of competent persons. The accounting records of the Company are maintained by Northern Trust International Fund Administration Services (Ireland) Limited, at Georges Court, 54-62 Townsend Street, Dublin 2, Ireland.

Transactions Involving Directors

There were no contracts or agreements of any significance in relation to the business of the Company in which the Directors had any interest, as defined in the Companies Act, 2014, at any time during the financial year, other than those set out in note 6 to the Financial Statements.

Revenue

The results of operations for the financial year are set out in the Income Statement on pages 248 to 253.

Directors' Interests in Shares of the Company

No Director, nor the Company Secretary, had any beneficial interest in the shares of the Company throughout the financial year.

Distributions

Details of distributions paid and proposed are set out in note 14 to the Financial Statements.

Independent Auditor

The independent auditor, Deloitte Ireland LLP ("Deloitte"), has indicated its willingness to continue in office in accordance with section 383(2) of the Companies Act, 2014.

Directors

The Directors who served at any time during the financial year are stated below:

Joseph Kagan (British/South African) Gregory Dulski (American) Ronan Walsh (Chairman) (Irish) Peter Germain (American) (resigned 8 April 2022) Michael Boyce (Irish) Sylvie McLaughlin (Irish)

Connected Persons

The Central Bank UCITS Regulations require that any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the year complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

Significant Events During the Financial Year

On 1 January 2022, there were management fee reductions on Federated Hermes Global High Yield Credit Fund, Federated Hermes SDG Engagement High Yield Credit Fund, and Federated Hermes Climate Change High Yield Credit Fund on the following share classes:

Class	Management Fee (Max.)	New Management Fee (Max.)
А	1.15%	1.10%
F	0.65%	0.60%
I	0.65%	0.60%
P	0.65%	0.60%
R	1.30%	1.20%

An updated side letter to the Administration agreement was issued on 25 January 2022. A 10% reduction of fees was agreed with a retrospective effect from 1 January 2022.

An updated side letter to the Depositary agreement was issued on 27 January 2022. A 10% reduction of fees was agreed with a retrospective effect from 1 January 2022.

On 28 January 2022, the Federated Hermes Global Small Cap Equity Fund and Federated Hermes US SMID Equity Fund Supplements were updated to enhance ESG wording.

Significant Events During the Financial Year (continued)

Events arising in Ukraine, as a result of military action being undertaken by Russia in Ukraine in February 2022, may impact on securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange. While certain of the Company's sub-funds did have some exposure to Russian equity securities at the time Russia commenced its military action these have since been sold and as at the Financial Statements date there is now no exposure to Russian equity securities in any of the Company's sub-funds. Certain of the Company's sub-funds also had exposure to Russian bonds and have been selling down these positions since March 2022. As at 31 December 2022, the Federated Hermes Emerging Markets Debt Fund held one Russian Bond which was worth 0.06% of the net assets attributable to holders of redeemable participating shares of the sub-fund (31 December 2021: three securities worth 1.75%). The Directors continue to monitor developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia.

The Federated Hermes Biodiversity Equity Fund launched on 21 March 2022.

On 1 April 2022, Hermes Fund Managers Limited (HFML), the parent of Hermes Fund Managers Ireland Limited (the manager of the Company) changed its name to Federated Hermes Limited (FHL) as part of a rebranding exercise. The name change followed completion on 14 March 2022 of the acquisition by Federated Hermes, Inc. (FHI) of the remaining 10% stake in HFML held by certain senior management. FHL is now a wholly owned (indirect) subsidiary of FHI.

Effective 8 April 2022, Peter Germain resigned as Director.

On 5 May 2022, an extraordinary general meeting ("EGM") of the Federated Hermes Sustainable Global Equity Fund was convened, where Shareholders of the sub-fund were asked to consider passing an ordinary resolution approving an increase of the sub-fund's exposure to emerging markets from 20% to 30%. The resolution was passed and the changes took effect from 5 August 2022.

On 14 June 2022, the Federated Hermes Impact Opportunities Equity Fund and Federated Hermes Sustainable Global Equity Fund Supplements were updated to reflect a reduction to the restriction on investments that generate revenue from Tobacco, from 10% to 5%.

On 14 June 2022, the Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund Supplements were updated to remove reference to Russia and Turkey from the Investment Policy.

On 14 June 2022, the Company's Prospectus and Supplements were updated to reflect the non-material changes detailed below:

- The Company and the manager of the Company's new registered address 7/8 Upper Mount Street, Dublin 2, Ireland, D02 FT59;
- the change in name of Hermes Fund Managers Limited to Federated Hermes Limited;
- the addition of Federated Investment Counseling ("FIC") in the Prospectus as an appointed investment manager for the Federated Hermes Emerging Markets Debt Fund only and to amend the relevant Supplements accordingly;
- the inclusion of a definition of "Controversial Weapons" in the Prospectus and to update each Supplement accordingly;
- expanding the Health Pandemic Risk statement;
- the inclusion of a new Thematic Risk statement in the Prospectus with a cross reference included in the Federated Hermes Impact Opportunities Equity Fund and Federated Hermes Biodiversity Equity Fund Supplements only;
- moving the list of investment exclusions, previously outlined in the investment policy of the Federated Hermes Global Small Cap Equity Fund, Federated Hermes US SMID Equity Fund and Federated Hermes SDG Engagement Equity Fund Supplements, to the investment strategy section;
- · updating the taxation section of the Prospectus for legislative changes; and
- the inclusion of Qatar as an eligible market for the Company.

Federated Hermes China Equity Fund launched on 20 July 2022.

Significant Events During the Financial Year (continued)

On 11 November 2022, the Company's Prospectus and Supplements were updated to reflect the below:

- Added risk relating to (i) reliance on third party providers and (ii) ESG
- Inclusion of Kuwait as an eligible market
- Amend the conflict of interest statement to reflect the integration of sustainability risk.
- Change the description of the limited share classes to allow access to such share classes in exceptional circumstances, with Director approval;
- Exclusions below added to Federated Hermes Asia ex-Japan Equity Fund and Federated Hermes China Equity Fund:
 - Companies that generate revenue from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of conventional weapons;
 - Companies that generate revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
 - Companies that generate over 5% of their revenue from the mining or energy generation of thermal coal;
 - Companies that generate over 5% of their revenues from adult entertainment products

On 1 December 2022, all Supplements were updated to include SFDR annex (pre-disclosure).

On 1 December 2022, the Federated Hermes SDG Engagement Equity Fund and the Federated Hermes SDG Engagement High Yield Credit Fund were reclassified from Article 9 to Article 8 under SFDR.

The Federated Hermes New China Equity Fund was approved by the Central Bank of Ireland on 21 December 2022.

Subsequent Events

On 17 February 2023, Federated Hermes Absolute Return Credit Fund Supplement was updated to clarify the use of Climate Change Impact ("CCI") scores during the investment process.

On 17 February 2023, Federated Hermes Biodiversity Equity Fund Supplement was updated with exclusion increased from 5% to 10% for companies that receive revenues from alcohol distribution.

Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

On 21 March 2023, the Class Y USD Accumulating Share class and the Class Y JPY Accumulating Hedged Share class of The Federated Hermes SDG Engagement High Yield Credit Fund were listed on Euronext Dublin.

The Federated Hermes Emerging Markets Debt Fund Supplement was updated on 19 April 2023 to reflect changes to the sustainability indicators and the policy on assessing companies for good governance.

Up to the date of approval of these Financial Statements there have been no other significant events affecting the Company subsequent to the financial year end, which would impact on the Financial Statements for the financial year ended 31 December 2022.

Corporate Governance Statement

The Board of Directors has voluntarily adopted the Corporate Governance Code for Irish domiciled Collective Investment Schemes as published by Irish Funds, as the Company's corporate governance code.

Directors' Compliance Statement

The Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations as set out in section 225 of the Companies Act 2014.

The Directors confirm that:

- 1) A compliance policy document has been drawn up that sets out policies that in their opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations.
- 2) Appropriate arrangements or structures are in place that are, in their opinion, designed to secure material compliance with the Company's relevant obligations, and
- 3) During the financial year, the arrangements or structures referred to in (2) have been reviewed.

Directors' Statement on Relevant Audit Information

The Directors confirm that:

- 1) so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware, and
- 2) the Directors have taken all the steps they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Federated Hermes Investment Funds Public Limited Company Investment Manager Information (Unaudited)

Hermes Investment Management Limited

Responsibility: a core value

Hermes Investment Management Limited is an active asset manager working to deliver excellent, long-term, risk adjusted performance – responsibly. We strive to lead the debate and contribute to the transformation of the investment industry for the benefit of our clients, their stakeholders and, ultimately, society at large.

Our agenda and activities are driven by the long term objectives of our clients' beneficiaries and we act in their interests.

Responsibility in practice

We have a comprehensive programme to ensure our responsibility approach and activities are integrated seamlessly in our funds and stewardship service. This includes:

- Delivering sustainable performance within the terms of the mandate and within the clients' risk appetite
- Taking into account all material investment factors including environmental, social and governance (ESG) ensuring that we are informed though not constrained by these considerations
- Acting as a responsible, engaged, long-term steward of investments encompassing constructive dialogue and taking action where necessary
- Engaging with public policy makers and industry bodies to encourage a sustainable economy beyond the timeframe of a specific mandate

At Federated Hermes Limited ("FHL"), the parent company of Hermes Investment Management Limited, we integrate ESG considerations and engagement insights into our investment processes in all of our products, across all asset classes. The public-equities and fixed-income teams supplement fundamental financial analysis with information provided through a range of proprietary ESG and engagement tools. Through these tools, along with additional EOS engagement insights, the teams have access to third-party ESG data, such as MSCI, Sustainalytics, Trucost, ISS and Bloomberg, as well as insights on engagement carried out by EOS with investee companies and the broader investable universe. These sources are a valuable input to the investment process, as well as to the ongoing monitoring of and engagement with companies.

For public markets, FHL's proprietary ESG tools are of particular note:

- Our ESG Dashboard includes our proprietary Quantitative ESG (QESG) Score and identifies stocks
 with positive ESG characteristics and/or stocks demonstrating positive ESG change. The QESG score
 captures how a company manages its ESG risks.
- Our Carbon Tool enables fund managers and engagers to identify carbon risks in portfolios and companies
 that currently exist or may develop in the future. Importantly, the tool incorporates our stewardship activity
 and intelligence and is able to identify companies that are priorities for engagement and their progress
 against environmental objectives.
- The Portfolio Snapshot allows us to observe the aggregate ESG risks across our portfolios relative to their benchmarks. It also examines ESG ratings and controversies and identifies contingent risks. Our portfolio managers use this tool to evaluate a strategy's ESG performance over time. It also provides insights into engagement and the progress made, and our voting choices relative to the benchmark.
- Our Corporate Governance Tool provides a breakdown of corporate governance characteristics, such as
 information on board independence, diversity and audit tenure, etc. This tool compares the governance
 of companies to the expectations we have set and flags any companies that do not meet the expected
 standard.
- Our Environmental Tool assesses both portfolios and companies on their carbon, water and waste performance. It also looks to quantify the environmental cost of the impact via the following six lenses; carbon, water, waste, air pollutants, land/water pollutants and natural resource use. In addition, we have incorporated the temperature alignment of portfolios and companies alongside exposures to carbon intensive sectors; namely fossil fuels, mining and thermal coal.

Federated Hermes Investment Funds Public Limited Company Investment Manager Information (Unaudited) (continued)

Hermes Investment Management Limited (continued)

Responsibility in practice (continued)

ESG is integrated into the investment strategy and working practices of all of our real-estate portfolios. A consideration of ESG principles is embedded into the property selection and investment process, including through initial screening and due diligence and as part of the investment decision. For our Real Estate team's indirect and international investments, we carry out active engagement on governance matters and on ESG policies and strategies with property developers, property management teams, tenants, lawyers and agents. We include commitments to develop a joint ESG strategy on acquisitions for jointly managed assets.

EOS at FHL which provides stewardship services, is a global market leader in voting and engagement with both companies and public policy makers. The team makes voting recommendations over 13,000 company meetings and actively engages with more than 1,100 (core engagement programme for 2022 is around 325) companies a year at executive and board level on a range of issues including board governance, executive remuneration, risk management, business strategy, corporate culture, carbon, pollution, water stress, labour and community rights. We are also active participants in a wide range of public policy discussions and our Chief Executive, Saker Nusseibeh, founded the 300 Club, an independent forum for discussion and debate about the responsibilities of the investment industry.

Whilst the responsibility for implementation resides with all FHL personnel, the ESG and engagement integration programme is led, coordinated and supported by the FHL Responsibility Office: a head of Responsibility reporting to FHL CEO, a policy and advocacy team and an ESG integration team. The Head of Responsibility also leads EOS at Federated Hermes, Federated Hermes third party stewardship service. This team is further supported by the Responsibility Working Group, which meets quarterly, to have oversight of FHL policy and lead initiatives. The Responsibility Working Group includes investment, product development, marketing, legal, compliance, human resources and responsibility representatives as members.

Federated Investment Counseling

About the Investment Manager

Federated Investment Counseling and other subsidiaries of Federated Hermes combined, advise approximately 174 equity, fixed-income and money market mutual funds as well as a variety of other pooled investment vehicles, private investment companies, and customised separately managed accounts (including non-U.S./offshore funds), which totaled approximately \$668.9 billion in assets as of 31 December 2022. Federated Hermes was established in 1955 as Federated Investors, Inc., and is one of the largest investment managers in the United States with nearly 2,000 employees. Federated Hermes provides investment products to more than 11,000 investment professionals and institutions. The Investment Manager advises approximately 129 institutional separate accounts, private investment companies, separately managed accounts and other pooled investment vehicles (including sub-advised funds and non-U.S./offshore funds) which totaled approximately \$184.6 billion in assets as of 31 December 2022.

Additional information regarding the security selection process

As part of analysis in its security selection process, among other factors, the Investment Manager also evaluates whether environmental, social and governance factors could have positive or negative impact on the risk profiles of many issuers or guarantors in the universe of securities in which the Fund may invest. The Investment Manager may also consider information derived from active engagements conducted by its in-house stewardship team with certain issuers or guarantors on environmental, social and governance topics. This qualitative analysis does not automatically result in including or excluding specific securities but may be used by the Investment Manager as an additional input in its primary analysis.

Federated Hermes Investment Funds Public Limited Company Investment Manager Information (Unaudited) (continued)

Voting

Throughout 2022, for all sub-funds of Federated Hermes Investment Funds plc, we voted at 581 shareholder meetings (6,486 resolutions). At 318 of those meetings we opposed one or more resolutions. We voted with management by exception at 48 meetings and abstained at 3 meeting. We supported management on all resolutions at the remaining 212 meetings.

Federated Hermes Global Emerging Markets Equity Fund

Market Review

The benchmark MSCI Emerging Markets Index returned -20.09% over the period, in US dollar terms (-10.02% in sterling terms), moderately trailing developed markets as measured by the MSCI World Index (-19.5%). 2022 was a torrid year for investors as risk assets were jolted by surging global inflation and monetary policy tightening in response, the Russia-Ukraine crisis and the 'zero-Covid' policy in China. The path of expected rate increases was the primary driver of the sharp rise in bond yields and sell-off in stocks, the biggest repricing for long-duration assets. Value outperformed Growth, largely explained by the high starting valuations for growth stocks, some growth disappointments, and the effect of rising interest rates. Emerging market (EM) central banks raised rates 93 times in 2022, and most are close to having completed their rate hike cycle. Recession fears rose due to the squeeze on consumers from higher prices and higher borrowing costs, as central banks prioritised the fight against inflation over growth. US dollar strength weighed on returns as nearly all EM currencies depreciated and currency volatility hit highs not seen since the beginning of the pandemic.

Regionally, EM Asia fell substantially over the year (-21.1%), where all markets were down except Indonesia (+3.6%) and Thailand (+5.0%). China finished the period down -21.9% due to muted economic growth, despite stimulus, with consumer sentiment weighed down by Covid-19 policy uncertainties and weakness in the real estate market. EMEA lagged the most (-28.3%) dragged down by Russia, which was removed by MSCI from the benchmark index in March. The energy-exporting Middle East energy markets outperformed on elevated energy prices. Latin America (8.9%) was the best-performing region in EM last year by some way. Brazil (14.2%) emerged as a key beneficiary of the new commodity world order, with considerable export similarity to Ukraine and Russia. All EM sectors were in negative territory over the year, with Information Technology (-33.4%) the worst performer, while Utilities (-4.5%) performed best, followed by Financials (-7.9%).

Investment Strategy

The portfolio continues to undergo significant changes to reflect the shifts happening around the world. In the second half of the year, we raised the allocation to China, taking advantage of the market volatility to add Meituan, China's dominant food-delivery service provider. Meituan cleverly uses high-frequency, low-margin food-delivery services (>70% market share) to attract traffic and cross-sell to low-frequency, high-margin, in-store travel and hotel services. We added Airtac, the second-largest pneumatics component supplier in China, which is benefitting from China's acceleration of process automation, and Chailease, which provides financial leasing services to small manufacturers in China and Taiwan, which we expect to benefit from China's reopening. We exited Zhongji Innolight, a Chinese manufacturer of optical communication transceivers, given our governance concerns and the company's weak performance. We sold contract drug research and manufacturing organisation Wuxi Biologics, due to our concern that it could be added to the US's entity list, and Autohome, a Chinese auto e-commerce platform whose franchise is weakening.

In Brazil, we added Itaúsa – the largest investment holding company, whose main asset is Itaú, the largest bank in Brazil – and Localiza, a leading car rental company with high growth potential. We exited Magazine Luiza, due to the headwinds from the prolonged monetary tightening cycle, and reduced Hapvida, until we see credible signs of macroeconomic recovery supporting healthcare prices. The portfolio adjustments reduced the volatility in the portfolio and added quality and defensive franchises. In India, we bought Pidilite Industries – a specialty chemicals manufacturer of consumer-focused products including adhesives, sealants, waterproofing, tile adhesives and speciality industrial products – and Nykka (FSN), an Indian online beauty and personal care business. We reduced our overall allocation to India to an underweight, trimming ICICI Bank, SBI, Bajaj Finserv, Tech Mahindra and Motherson into strength. We maintained our overweight to Financials, adding Abu Dhabi Commercial Bank in Q3, one of the UAE's largest banks, benefiting from a strong economy, high energy prices and peg to the US dollar. We recently sold Bank Central Asia into strength, funding increases in our holdings in KB Financial and China Merchants Bank.

Performance Review

The Fund returned -14.28% in sterling terms, net of fees, during the period, underperforming the benchmark index by 4.73%. Asset allocation detracted the most, notably the Fund's overweight allocation to China, which underperformed, and the associated exposure to the Renminbi, which depreciated. Non-exposure to the Middle East's outperforming energy-exporting markets detracted, and the underweight to Brazil also weighed on relative returns. The Fund's underweight to the Russia market, and our exit by the end of February, contributed to relative returns. Stock selection detracted from relative returns, notably in Brazil, Russia, Malaysia and India, eclipsing gains from stronger selection in China, Korea and Mexico.

Federated Hermes Global Emerging Markets Equity Fund (continued)

Performance Review (continued)

AIA, a leading insurer in the Asia ex Japan region, was the largest individual contributor on faster-than-expected business recovery on mainland China's and Hong Kong's border reopening. Banco de Chile outperformed as the political uncertainty of the 2021 presidential election subsided amid the prospect of strong economic growth driven by increased mobility and high copper prices. Banorte, Mexico's largest listed bank, rose on strong results supported by rising rates.

Hapvida, a Brazilian provider of low-cost health insurance, detracted the most, due to rising medical care costs driven by a pick-up in elective procedures, COVID-related illnesses, and rising wages. Techtronic Industries, a manufacturer of cordless power tools mainly sold in the US, fell in part due to the rotation from growth to value and on concern of a US housing-activity slowdown, potential recession and a high valuation base in 2021. Shares in Sberbank plummeted following Russia's invasion of Ukraine. We exited the Fund's Russian holdings before February month-end.

Outlook

With central bank actions suppressing demand, we expect the world to emerge from the initial inflation shock and markets to rebound in 2023. We expect emerging markets to do well, initially driven by the reopening of China, rebounding markets in Korea, Taiwan and Brazil, and the stability of India, Indonesia and Mexico. In addition to trough valuations and underweight investor positioning in emerging markets, we expect the growth differential between emerging and developed markets to expand, driven by emerging markets' favourable demographics, manufacturing capability, availability of critical resources and focus on supply-side reforms and infrastructure investment. We expect several emerging markets to benefit substantially from the relocation in supply chains that has already begun. In contrast, the developed world is learning to adjust to high inflation and is distracted by structural challenges that investors are only now considering.

Federated Hermes Global Equity Fund

Market Review

The US Federal Reserve (Fed) set the tone for markets at the start of 2022, and for much of the remaining period, after it was revealed that the board had called for a more aggressive tightening as inflation continued to increase. The Fed's hawkishness led many to believe that rates would increase further and faster than previously anticipated, leading to the strongest swing to Value since the Great Financial Crisis.

The preference for Value continued largely unabated for much of H1, except for a couple of brief interludes, most notably following Russia's invasion of Ukraine towards the end of February as investors switched towards more defensive areas of the market. However, the invasion amplified many of the existing inflationary pressures, highlighted by rising energy costs, and the expected trajectory of interest rate rises steepened.

It also resulted in growing fears of recession and, midway through the year, the relative safety of capital structure, alongside positive sentiment, was preferred. However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and profitability. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that the Fed would accelerate its tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 restrictions. This was further bolstered by a better-than-expected US inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the Fed, and other central banks, made it clear that tightening would continue while inflation remained substantially above target. The year ended as it started, with the debate around inflation overshadowing everything else and investors showing a strong preference for Valuation.

Investment Strategy

Our investment approach remains focused on stock selection, with neutral sector and regional biases. The Global Equity Fund uses systematic fundamental analysis to assess the attractiveness of over 5,000 stocks on a daily basis. This analysis involves a disciplined bottom-up stock-selection process, which is based on well-documented anomalies and trends in investor behaviour. The Fund aims to take advantage of the systematic behavioural biases of market participants, while remaining cognisant of the risks associated with modelling such behaviour.

We determine a stock's fair value using metrics from a company's financial statements. Our modelling looks at a wide variety of stock characteristics (often referred to as factors) and is designed to proxy expected investment returns and the behaviour of market participants. The Fund's multi-factor approach ensures it remains exposed to a range of styles, and it aims to generate outperformance in all market environments. We closely monitor the performance of each factor and aim to build stock-selection models that deliver consistent and sustainable excess returns.

Portfolio modelling is used in the portfolio-construction process to develop a trade-off between expected return and portfolio risk, allowing for both portfolio constraints and transaction costs. The process is further supplemented by portfolio-exposure analysis using our proprietary risk-modelling system, MultiFRAME, which allows us to assess the Fund's exposure to any quantifiable risk factor.

Unlike traditional quantitative strategies, we also undertake analysis on a disciplined and subjective stock-level basis. The team uses its extensive experience to challenge the output of the investment model and remove trades that are subject to significant non-quantifiable factors or unreliable inputs.

Performance Review

The Fund returned -9.41% during the year, underperforming the benchmark index by 1.72%. From a sector viewpoint, the main contributors were our underweight In Information Technology and stock selection in Communication Services, Consumer Discretionary and Energy. The largest detractions came from stock selection in Information Technology, Industrials and Health Care. From a regional viewpoint, contributions were modest, while selection in Japan and Europe detracted the most, Europe primarily due to currency.

Federated Hermes Global Equity Fund (continued)

Performance Review (continued)

Marathon Petroleum, Hess and Merck contributed the most to relative returns, while not owning Tesla and Meta Platforms also benefited the Fund. Marathon Petroleum and Hess both benefited from the preference for Value and the rising oil price, which favoured the Energy sector for much of the year. In addition, Marathon Petroleum reported better-than-expected results in both its refining and midstream businesses. Hess also reported strong results and raised its dividend. Merck shares rose in Q4 after reporting better-than-expected earnings and raising guidance.

The largest detractors were Walt Disney, CrowdStrike and Alphabet A share class. Walt Disney reported decent results, but sentiment was affected by concerns over Disney+ after Netflix reported a decline in subscriptions. Later in the period, the company reported disappointing earnings, driven by weakness in advertising revenue and higher-than-expected losses in streaming. CrowdStrike declined alongside higher multiple growth software names in Q2 and then issued disappointing Q4 revenue guidance towards the year-end. Alphabet A share class underperformed earlier in the year alongside higher multiple names. It also reported disappointing earnings in Q4, due to declining ad revenues. However, not owning the C share class, which has a similar benchmark position, offset much of the impact.

Outlook

Looking ahead, inflation, and its impact on interest rates and the global economy, is likely to continue to significantly influence global equity markets in 2023. The policy-relevant debate about the persistency of inflationary pressure hinges on both a discussion of the likely trajectory of several factors — Covid-related supply shocks, a tight labour market and the impact on energy and food prices from Russia's invasion of Ukraine — as well as arguments about whether workers and firms are developing more entrenched expectations of higher future inflation. As long as the labour markets remain strong, central banks will not hesitate to increase interest rates further to curb inflation, even if the result is a recession.

However, while CPI is still substantially above what central banks would be comfortable with, there are signs that inflation may have peaked. We are not out of the woods yet though, and, with the macroeconomic backdrop deteriorating, we expect that interest rates will peak in 2023 at a higher level than investors previously envisioned, before declining. This is important because stock prices have historically adjusted 12-18 months ahead of interest rates, which could provide a boost for stocks with both high expected earnings growth and a sustainable focus.

The continued uncertainty around the global macro environment means that it will continue to be important to take a broad view, which is a consistent feature of our approach. This is also true from a sustainability viewpoint, and echoes our ESG research that, over many years, has highlighted the importance of identifying not just the current leaders, but also the improvers. For many, the current opportunities surround companies that have strategies to grow the sustainable areas of their businesses, but we believe there are also very attractive long-term opportunities to invest in companies with transition potential too. This is also consistent with our view that, over the longer term, sustainability will affect all corners of the market and provide a diverse range of opportunities.

Federated Hermes Sustainable European Equity Fund

Market Review

2022 proved to be difficult for investors as the MSCI Europe Index returned -4.36%. The year commenced with markets declining against a backdrop of rising inflation and increasing interest rate expectations that resulted in the strongest swing to Value since the Great Financial Crisis. The market sell-off was further amplified by Russia's invasion of Ukraine in February, which added to the inflationary pressures. In turn, consumer confidence indices fell in the second quarter due to the expected squeeze on the consumer from higher prices and borrowing costs. Understandably, risk aversion remained high as markets continued to decline towards the end of H1.

However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and Quality. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that central banks would accelerate their tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 policy restrictions. This was further bolstered by a better-than-expected inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the US Federal Reserve (Fed) and other central banks made it clear that tightening would continue while inflation remained substantially above target.

Investment Strategy

Over the year, we opened new positions in SIG Combibloc and Rentokil, and closed our Adidas, Siemens Gamesa, Valeo and Fresenius positions. SIG Combibloc is a leading supplier of aseptic packaging, an industry that should benefit from the structural shift away from plastic, while the company should continue to take market share due to its filling machines, which are more flexible, faster and produce less waste than competitors' products. Rentokil provides pest control and hygiene services to government, commercial and residential customers globally. The acquisition of Terminix will transform Rentokil's North American business by catapulting it from number three to the market leader, provide significant opportunity for cost and revenue synergies, and increase its exposure to the structurally growing pest-control market.

Adidas was sold due to concerns about the impact of inflation on consumer spending power, while Siemens Gamesa has also been affected by rising materials prices, which could impact the company further as prices have continued to rise. Valeo was closed following a period of strong relative share-price performance and fears that the increased likelihood of recession left it vulnerable to a slowdown in discretionary spending. Fresenius offers less-stable earnings and has seen sentiment affected by headwinds facing its dialysis business.

The structure of the Fund has remained broadly the same over the period. The largest overweight positions remain in Information Technology, Industrials and Health Care, while Consumer Staples, Energy, Financials and Utilities remain the largest underweights. From a style perspective, the structure also looks similar to how it appeared at the beginning of 2022, with a bias away from Value and towards Growth and Quality. The Fund's largest exposures are to a lower book-to-price ratio, market cap and dividend yield. The Fund also has higher sales growth and return on equity and a notable tilt towards companies with higher net profit margins.

Performance Review

The Fund returned -11.99%, underperforming the benchmark index by 7.98%, in 2022. The underperformance was primarily due to the macro-driven market that had adopted a more short-term outlook: an environment not suited to a strategy that has a long-term fundamental focus. Selection in Information Technology contributed the most, but this was offset by detractions from an overweight position in Information Technology, an underweight in Energy (zero weighting) and stock selection in Materials.

On an individual basis, the largest contributors were Novo Nordisk, Edenred and Sodexo. Novo Nordisk announced strong earnings for the first quarter and raised full-year guidance for revenue and earnings. Edenred reported better-than-expected earnings, with management striking a confident tone on the company's ability to manage economic slowdown and its long-term prospects. Sodexo reported better-than-expected results with organic growth strong. It also benefited from the preference for companies with stable, defendable earnings towards the end of the Q3.

Federated Hermes Sustainable European Equity Fund (continued)

Performance Review (continued)

Sika, Lonza Group and Pandora were the largest detractors. Sika reported better-than-expected sales and reiterated guidance, but it was impacted by the Value rotation. Pandora also reported solid results, driven by robust sales in Europe and the US, but it declined during the Value rotation, while recession fears also weighed on sentiment. Lonza Group had performed strongly during the pandemic, but its share price declined alongside higher multiple names as bond yields increased.

Outlook

Uncertainty remains high and debates about recession or 'soft landings' seem futile. Despite the rhetoric from the European Central Bank, we believe that inflation will likely fall by more than expected, and that yields will stabilise as peak rates comer ever closer. As such, markets are likely to become more discriminating at the company level and less factor driven. Focus should return to companies and markets should start to be determined by what corporates deliver in cash and earnings.

We will continue to 'kick the tyres' of our portfolio holdings to ensure investment theses remain intact and avoid the elephant traps of profit warnings. And, following a year where we have seen a highly negative correlation between Growth and Value, there will be more opportunities to invest in high quality, sustainable companies that can grow irrespective of the macro environment. After a year where markets have been factor-driven, 2023 could herald the return of a stock pickers market.

Federated Hermes Global High Yield Credit Fund

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2 which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index. At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year with Fed Chair Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

Over the period, we remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors, as interest rate volatility remained a key driver of returns. As valuations turned more attractive following the market correction observed in H1, we extended duration (a measure of sensitivity of a bond's price to a change of interest rates)in issuers we liked, ensuring we remained in the best part of the curve and within the best capital structures.

As a general trend, from the third quarter onwards, we reinforced our exposure to higher quality issuers, increasing our overall exposure to crossover bonds. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance in the region for most of the year (although our small exposure to Chinese property issuers did benefit from the rebound seen in Q4 as the country changed its stance on Covid-19 restrictions). In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe. This was because spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) on the longer end of the curve had compressed further.

Performance Review

The Federated Hermes Global High Yield Credit Fund (F Accumulation EUR net) generated a return of -12.88% in 2022, outperforming its benchmark by 0.82%.

The Fund's underweight positioning in Energy, Health Care and leisure were the top contributors to overall performance. In contrast, overweight positioning in capital goods, telecommunications and banking were the biggest detractors on a sectoral basis. At the individual holdings level, the Fund's underweight positioning in Pemex (Energy), Bausch (Health Care) and Ford (automotive) boosted relative returns the most, while the overweight positioning in Enterprise Products Partners (Energy), Medical Properties Trust (Real Estate) and Ardagh Glass (capital goods) detracted the most.

At the regional level, the Fund's overweight positioning in North America and Eastern Europe, and its underweight positioning in Asia EM were the top contributors to relative performance. In contrast, an overweight positioning in Western Europe and the UK detracted the most.

From a ratings perspective, the Fund's underweight positioning in B and below rated issues positively impacted performance the most, while the overweight positioning in BB and higher rated issues detracted the most.

Federated Hermes Global High Yield Credit Fund (continued)

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow soon. Fundamentals remain strong with leverage ratios low and interest coverage high. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increase in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and as rates volatility normalises, we would expect this part of the credit market to outperform. In contrast we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going into 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Federated Hermes Sustainable Europe ex-UK Equity Fund

Market Review

2022 proved to be difficult for investors as the MSCI Europe ex UK Index returned -7.62%. The year commenced with markets declining against a backdrop of rising inflation and increasing interest rate expectations that results in the strongest swing to Value since the Great Financial Crisis. The market sell-off was further amplified by Russia's invasion of Ukraine in February, which added to the inflationary pressures. In turn, consumer confidence indices fell in the second quarter due to the expected squeeze on the consumer from higher prices and borrowing costs. Understandably, risk aversion remained high as markets continued to decline towards the end of H1.

However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and Quality. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that central banks would accelerate their tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 policy restrictions. This was further bolstered by a better-than-expected inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the US Federal Reserve (Fed), and other central banks, made it clear that tightening would continue while inflation remained substantially above target.

Investment Strategy

Over the year, we opened new positions in Adyen, CFE, DNB and NXP Semiconductor, and closed several positions, including Universal Music Group, Idorsia, KION Group and Pandora.

Adyen is a data and transaction processing company. Through new product launches, the company has won new business from major clients, such as Amazon Japan. Moreover, the competitive backdrop looks favourable, with its biggest competitor seemingly relying on cryptocurrencies and gambling for growth. There is an ongoing debate about whether electronic payments are more environmentally friendly than cash. Adyen has been climate-neutral since 2019. The company's services also combat fraud and theft, providing a benefit to society.

CFE is the world's leading offshore windfarm installer, as well as a member of the quasi-oligopoly of free dredgers. Both markets are set to experience very strong growth in the coming years, and CFE also offers optionality on seabed mining in the longer term. DNB, Norway's largest financial services group, should benefit from rising interest rates at a time of relative economic strength for Norway. It is also one of the most sustainability-focused banks in Europe with strong green-finance initiatives.

NXP was originally the semiconductor division of Philips (and later acquired Motorola's semiconductor division). It is a leading producer of microcontroller units (MCUs), which are used across a variety of industries and applications that are experiencing structural growth. For example, the amount of electronics in cars is set to rapidly increase through electrification of drivetrains, safety enhancements (including autonomous driving) and passenger comfort.

We closed our position in Universal Music Group on concerns that it will be impacted by negative consumer subscription trends. We sold Idorsia after we became concerned that its insomnia treatment was not gaining the traction we expected. KION we closed due to the expectation that the global recession will hurt the industrial trucks market, combined with higher input costs. We also closed Pandora, reflecting our concerns over weakening consumer demand due to recession, higher interest rates and inflation.

The structure of the Fund has remained broadly the same over the year. The largest overweight positions remain in Information Technology and Industrials, while the Consumer Discretionary sector, Energy, Financials and Utilities remain the largest underweights. From a style perspective, the structure also looks similar to how it appeared at the beginning of 2022, with a bias away from Value and towards Growth and Quality. The Fund's largest exposures are to a lower earnings yield, book-to-price ratio, market cap and dividend yield. The Fund also has higher sales growth, forecast growth and a notable tilt towards companies with higher net profit margins.

Performance Review

The Fund returned -16.96%, underperforming the benchmark index by 10.11% in 2022. The underperformance was primarily due to the macro-driven market that had adopted a more short-term outlook: an environment not suited to a strategy that has a long-term fundamental focus.

Federated Hermes Sustainable Europe ex-UK Equity Fund (continued)

Performance Review (continued)

Stock selection in Information Technology provided the largest contribution to relative returns. However, this was offset by detractions from selection in Industrials, Consumer Discretionary and Materials and not owning any Energy companies.

On an individual basis, the largest contributors were Novo Nordisk, Edenred and Deutsche Boerse. Novo Nordisk benefited from accelerating uptake of its diabetes and obesity treatments. More recently, supply constraints of its obesity drug, Wegovy, have eased, while the international launches of the drug have boosted sentiment. Deutsche Boerse reported above-consensus results and a positive outlook, driven by ongoing market volatility. Edenred reported better-than-expected earnings, with management striking a confident tone on the company's ability to manage economic slowdown and its long-term prospects.

KION Group, Kingspan and ASM International were the largest detractors. KION Group declined after one of its competitors, Jungheinrich, lowered guidance, citing higher materials costs. KION reported strong revenue growth, but margins were lower due to input-cost inflation and supply-chain disruption, leading the company to withdraw guidance. Sentiment was further hit due to expectations that global recession would hurt the industrial trucks market, and we closed the position. Kingspan released a positive trading update in April, but has since fallen due to concerns over inflation and an expected slowing of the housing/construction market, which the company subsequently warned of. ASM International was impacted by the Value rotation and China's 'zero-Covid' policy. Nevertheless, the company reported decent results and also raised guidance towards the end of the year.

Outlook

Uncertainty remains high and debates about recession or 'soft landings' seem futile. Despite the rhetoric from the European Central Bank, we believe that inflation will likely fall by more than expected, and that yields will stabilise as peak rates come ever closer. As such, markets are likely to become more discriminating at the company level and less factor driven. Focus should return to companies and markets should start to be determined by what corporates deliver in cash and earnings.

We will continue to 'kick the tyres' of our portfolio holdings to ensure investment theses remain intact and avoid the elephant traps of profit warnings. Following a year where we have seen a highly negative correlation between Growth and Value, there will be more opportunities to invest in high-quality, sustainable companies that can grow irrespective of the macro environment. After a year where markets have been factor driven, 2023 could herald the return of a stock picker's market.

Federated Hermes US SMID Equity Fund

Market Review

The Russell 2500 Index declined in 2022, returning -8.28% in sterling terms (-18.37% in US dollar terms). Geopolitical tensions heightened as Russia invaded Ukraine in February, which saw energy prices soar shortly after the invasion. Inflation accelerated to a near 40-year high which led to a tightening monetary environment. The US Federal Reserve (Fed) steeply increased interest rates to 4.5% – which was higher than investors had expected at the start of the year – in an attempt to bring down inflation. Energy was the best performing, and only, sector to end the year in positive territory, with Utilities declining the least. Health Care and Telecommunication Services were the weakest performing sectors.

Investment Strategy

The Fund continued to seek high-quality companies with attractive upside potential, and trim positions in what we believed were fully valued stocks, or stocks that were set to be negatively impacted by the changing landscape.

Over the year, the Fund initiated four new positions in high-quality stocks. These included Equifax, which is a provider of credit and risk-management solutions to businesses and consumers, and the second largest US credit bureau. Equifax has high-quality data assets, a strong monopolistic position and the ability to maintain EPS growth despite a decline in mortgage volumes. We also initiated a position in Boralex. Boralex develops and operates renewable energy projects, predominantly onshore wind farms and has built a reputation as a trusted player in the transition to renewable energy. The recent moves in oil prices and the Ukraine crisis have underpinned the green transition as a way to ensure energy security. Currently, our portfolio has no direct exposure to the energy sector and Boralex represents an opportunity to gain exposure to the structural growth in renewables.

These trades were funded by selling four positions and trimming others where we saw less relative upside. Three of the positions were sold due to M&A activity; these included Terminix (bought by Rentokil) and Abiomed (bought by Johnson & Johnson).

Performance Review

The Fund returned -6.06% in net sterling terms (-15.70% in gross US dollar terms), outperforming the benchmark by 2.41% in geometric terms over the year. Stock selection was the primary driver of the outperformance, with strong selection in the Consumer Discretionary and Financials sectors. Sector allocation was a drag on relative returns due to our zero-weight to Energy and our overweight to Technology, which offset the positive contribution from our overweight to Industrials. Strong relative performance can also be attributed to the Fund's bias towards companies with higher quality characteristics.

The top individual contributor to performance was speciality insurance conglomerate Alleghany, which is no longer held in the Fund. Alleghany outperformed after it announced that it was to be acquired by Warren Buffett's Berkshire Hathaway at a 25% premium. Axon Enterprise, a global public-safety technology company, rallied after it reported strong quarterly results which beat expectations and raised full-year guidance. Axon has seen strong domestic demand for its products, including a contract with the Department of Veterans Affairs. The contract has the ability to increase over time and highlights Axon's ability to respond to the requirements of the federal market. Reinsurance Group of America saw share-price gains following strong Q1, Q2 and Q3 results, as it has benefited from a modest tailwind due to the drop in Covid-19 claims.

Teradyne, a semiconductor-testing equipment company, and a strong performer in 2021, was the largest detractor over the period. The stock declined, alongside other semiconductor names, following concerns over a slowdown in global demand. Bio-Rad, a clinical diagnostic laboratory-research and medical-testing company, declined after Q3 results missed expectations. Azenta, a cryogenic equipment company, declined following a pre-announced Q3 top-line earnings miss which was exacerbated by a strong US dollar and its acquisition of a cold chain manufacturer.

Federated Hermes US SMID Equity Fund (continued)

Outlook

The economic outlook is challenged by rising interest rates, as the Fed treads the fine line between quashing inflation and avoiding a recession. Hawkish rhetoric still prevails, although there is now wide market acceptance that we may be nearing the peak of the current rate cycle. Valuations, in many instances, appear to be pricing in a deeply negative economic outcome, which may prove overly pessimistic. We continue to believe that this new environment of tighter liquidity will prove supportive to the high-quality, cashflow-generative companies that this Strategy invests in.

Federated Hermes Asia ex-Japan Equity Fund

Market Review

The MSCI AC Asia ex Japan IMI Index fell by 19.76%, in US dollar terms (-9.65% in sterling terms), in a difficult year for investors. In 2022, risk assets were jolted by surging global inflation and synchronised monetary policy tightening in response, the Russia-Ukraine crisis and China's 'zero-Covid' policy.

Higher rates, geopolitical tensions and the prospects for a recession were the main drivers of falling asset prices. Value outperformed Growth, largely explained by the high starting valuations for growth stocks, some earnings disappointments, and (mainly) the effect of rising interest rates.

In its quest to tame inflation, the US Federal Reserve (Fed) raised the federal funds rate by 75bps four times in 2022, following two smaller hikes. Fears of a recession rose due to the squeeze on consumers from higher prices and higher borrowing costs as central banks prioritised the fight against inflation over growth. US dollar strength weighed on returns as most Asian currencies depreciated and currency volatility hit highs not seen since the beginning of the Covid-19 pandemic.

Asian equities fell, except Thailand (+1.8%) and Indonesia (+0.2%). China ended the period down 22.0% due to muted economic growth, despite stimulus, with consumer sentiment weighed down by Covid policy uncertainties and weakness in the real estate market. Geopolitical tensions over Taiwan and reduced appetite toward global risk assets hurt the region, though a sudden end to China's 'zero-Covid' policy helped sentiment in the fourth quarter.

Growth-sensitive markets Korea (-29.8%) and Taiwan (-29.1%) lagged as the outlook for global trade deteriorated. Rising inflation, supply chain issues, and demand and recession fears fanned a tech sell-off which dealt a blow to their respective heavyweight semiconductors and technology hardware sectors. The ASEAN region was a relative bright spot.

All sectors were down during the year, except for Energy. Information Technology (-33.5%) was the worst performer, followed by Communication Services (-29.3%) and Health Care (-24.9%), while Energy (+3.6%) performed best, followed by Financials (-5.1%).

Investment Strategy

We remain overweight in China and South Korea – the overweight in Korea now larger than our overweight in China – and we retain a large underweight in India.

In the first quarter, we trimmed our positions in China Overseas Land & Investment and CK Hutchison and sold China Development Financial Holdings and LG Corp into strength. We added to Samsung Electronics and JD.Com on weakness and opened a position in Hon Hai Precision Industry, a Taiwanese electronics manufacturer. We believe its electric vehicle manufacturing business could be a major growth driver.

We increased our overweight to Korea, given the attractive valuations on offer, and reopened a position in E-Mart, the largest retailer in South Korea. We also switched some of our holding in Hyundai Steel into Posco following a safety incident at Hyundai Steel.

In the second quarter, we sold Ping An Insurance and exited Tencent Music Entertainment, preferring other technology firms, which we added to on weakness. We opened a position in Inner Mongolia Yili, one of the largest dairy producers in China. Yili is well positioned to benefit from secular growth in high-end milk products and its recent share price weakness offered an attractive entry point.

We sold our positions in Naspers and Prosus after both companies rallied following an announcement by management of a sell-down of the stake in Tencent, with the proceeds generated to be used to repurchase shares. The announcement led to a sharp rerating of Naspers and Prosus relative to Tencent.

In the second half of the year, we sold China Overseas Land & Investment, following its strong performance, and added to Chinese ADRs amid weakness and volatility. We reopened a small position in Tencent.

We sold Anhui Conch Cement, and cut Cosco Shipping Ports, China South Publishing & Media Group and Hansoh Pharmaceutical into strength. We also sold PetroChina, partly informed by ESG concerns.

We added to Universal Scientific and opened a position in Cathay Pacific, a Hong-Kong-based airline, as we expect a resumption in international travel to more than offset declines in its profitable cargo business.

Federated Hermes Asia ex-Japan Equity Fund (continued)

Investment Strategy (continued)

We also reopened a position in Trip.Com, a Chinese online travel platform that should also benefit from a resumption of Chinese travel, and we continued to build a position in Inner Mongolia Yili and Chow Tai Fook Jewellery, which may benefit from a recovery in consumer consumption.

We cut AP Thailand, after strong performance, and Taiwan Semiconductor Manufacturing Company and Lite-On Technology on concerns about the semiconductor cycle peaking.

We sold Nexon and added to attractively priced Korean companies Hyundai Motors and E-Mart. We added to our positions in Samsung Electronics and Samsung Fire & Marine and opened a position in Samsung SDS, a Korean company that provides IT services and logistics. Its logistics services have benefitted from higher freight charges as a result of supply disruptions and prolonged lockdowns in China, while its cloud business continues to grow. We also reopened a position in Korea Investment Holding, a Korean broker, after its valuation had become more attractive.

Performance Review

The Fund returned -0.02% in sterling terms, net of fees, over the period, outperforming the benchmark by 10.66%. Relative returns were helped by stock selection in China, Korea and Taiwan, which outweighed the negative impact from our overweight to China and underweight to India. Stock selection in Thailand and India also contributed.

China Overseas Land & Investment, China Oilfield Services and Sinopharm Group contributed the most. China Overseas Land & Investments rose sharply in January, along with other Chinese property developers, on reports that the government would ease debt rules and make it easier for state-backed property developers to buy up distressed assets of debt-laden private peers. China Oilfield Services, an integrated oilfield services provider, rose with the oil price, following concerns of global supply constraints resulting from Russia's invasion of Ukraine, and it was further supported by China's much-awaited 'zero-Covid' policy pivot and reopening prospects. Sinopharm, a Chinese pharmaceutical group, outperformed from a cheap valuation.

Allocations to Samsung Electronics and Baidu, and not owning AIA Group, detracted the most. Samsung Electronics fell on expectations that demand and pricing for memory would weaken due to declines in PC/smartphone shipments, a result of geopolitics, inflation and supply disruptions. Baidu, China's leading search company, fell with other ADRs amid broad weakness among Chinese technology stocks – particularly those listed in the US. Weak consumption, exacerbated by Covid-related lockdowns across multiple cities, further hurt sentiment, while cuts to company expenditure impacted advertising revenues. Not owning AIA Group, a leading regional insurer, detracted, after it outperformed along with Financials, following expectations for a faster-than-expected business recovery under a mainland China and Hong Kong border re-opening scenario.

Outlook

For at least two years, we have identified five key risks involved in investing in China: tensions with the US; the potential for delisting of US-listed Chinese ADRs; the 'zero-Covid' policy, potential spillover from the property market; and 'common prosperity' (anti-business) policies. All of these risks have reduced over the last two months of 2022 – some significantly. We expect Chinese equities to continue to rerate in response, and for the positive sentiment to boost other North Asian markets.

Federated Hermes Global Equity ESG Fund

Market Review

The US Federal Reserve (Fed) set the tone for markets at the start of 2022, and for much of the remaining period, after it was revealed that the board had called for a more aggressive tightening as inflation continued to increase. The Fed's hawkishness led many to believe that rates would increase further and faster than previously anticipated, leading to the strongest swing to Value since the Great Financial Crisis.

The preference for Value continued largely unabated for much of H1, except for a couple of brief interludes, most notably following Russia's invasion of Ukraine towards the end of February as investors switched towards more defensive areas of the market. However, the invasion amplified many of the existing inflationary pressures, highlighted by rising energy costs and the expected trajectory of interest rate rises steepened.

It also resulted in growing fears of recession and, midway through the year, the relative safety of capital structure alongside positive sentiment, was preferred. However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and profitability. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that the Fed would accelerate its tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 restrictions. This was further bolstered by a better-than-expected US inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the Fed, and other central banks, made it clear that tightening would continue while inflation remained substantially above target. The year ended as it started, with the debate around inflation overshadowing everything else and investors showing a strong preference for Valuation.

Investment Strategy

The investment approach remains focused on stock selection, with neutral sector and regional biases. The Global Equity ESG Fund uses systematic fundamental analysis to assess the attractiveness of over 5,000 stocks on a daily basis. This analysis involves a disciplined bottom-up stock selection process, which is based on well-documented anomalies and trends in investor behaviour. The strategy aims to take advantage of systematic behavioural biases of market participants while remaining cognisant of the risks associated with the modelling of such behaviour.

We determine fair value for a stock by using metrics from the full range of a company's financial statements, and our modelling employs a wide variety of stock characteristics (often referred to as factors) designed to proxy expected investment returns and the behaviour of market participants. ESG is embedded in the Alpha model, using the team's proprietary QESG Score, which enables the team to identify stocks that have good or improving ESG characteristics. The Fund's multi-factor approach ensures we remain exposed to a range of styles and it aims to generate consistent outperformance over the long term. We closely monitor the performance of each factor with the aim of building stock selection models that deliver consistent and sustainable excess returns.

Portfolio modelling is utilised in the portfolio construction process to trade-off between expected return and portfolio risk, allowing for both portfolio constraints and transaction costs. The process is further supplemented by portfolio exposure analysis using our proprietary risk modelling system, MultiFRAME, which allows us to assess the Fund's exposure to any quantifiable risk factor.

Unlike traditional quantitative strategies, analysis is also completed on a disciplined, subjective, stock-level basis. The team uses its extensive experience to challenge the output of the investment model and remove trades subject to significant non-quantifiable factors or unreliable inputs. The team also works closely with Federated Hermes EOS, our in-house stewardship team, which votes on and engages with companies on our behalf, and works with us to further understand the ESG risks and opportunities facing a company.

Performance Review

The Fund returned -13.30% during the year, underperforming the benchmark index by 5.68%. The preference for Value was perhaps best reflected in the stellar performance of the Energy sector: the only sector to produce a positive return over the year. It also highlighted a difficulty for funds with more of a sustainable bias: value was being driven by areas of the markets that were typically off limits. And, while our diversified approach provided a degree of protection, the headwinds were ultimately too strong.

Federated Hermes Global Equity ESG Fund (continued)

Performance Review (continued)

From a sector viewpoint, the main contributions came from Consumer Discretionary, by virtue of stock selection and our underweight position. Selection in Communication Services was also successful. The largest detractions came from selection in Health Care, Industrials, Consumer Staples and Financials, as well as our underweight in Energy and overweight in Information Technology.

Within the Fund, Hess, Novo Nordisk and Travelers contributed the most to relative returns, while not owning Tesla and Meta Platforms also benefited the Fund. Hess reported strong results and raised its dividend as it benefited from the rising oil price, while the preference for Value favoured the Energy sector. Novo Nordisk benefited from accelerating uptake of its diabetes and obesity treatments and, while there have been some supply issues for Wegovy, its new obesity treatment, they have been resolved, putting the company on a strong footing as we enter 2023. Travelers reported solid results, which highlighted an improved combined ratio, particularly across business and homeowner insurance and better-than-expected catastrophe losses and top-line growth from net premiums.

The largest detractors were Walt Disney, Nvidia and Lonza Group. Walt Disney reported decent results, but sentiment was affected by concerns over Disney+ after Netflix reported a decline in subscriptions. Later in the period, the company reported disappointing earnings, driven by weakness in advertising revenue and higher-than-expected losses in streaming. Nvidia fell victim of the rotation to Value at the start of the year. In addition, sentiment towards the company was hit by near-term volatility in gaming, primarily due to China, which offset continued strength in its data centres business. Lonza Group has continued to report solid results in 2022 with growth trends in the biologics space remaining resilient. However, the share price has been impacted by the rotation towards cheaper names.

Outlook

Looking ahead, inflation, and its impact on interest rates and the global economy is likely to continue to significantly influence global equity markets in 2023. The policy-relevant debate about the persistency of inflationary pressure hinges on both a discussion of the likely trajectory of several factors — Covid-related supply shocks, a tight labour market and the impact on energy and food prices from Russia's invasion of Ukraine — as well as arguments about whether workers and firms are developing more entrenched expectations of higher future inflation. As long as the labour markets remain strong, central banks will not hesitate to increase interest rates further to curb inflation, even if the result is a recession.

However, while CPI is still substantially above what central banks would be comfortable with, there are signs that inflation may have peaked. We're not out of the woods yet though, and, with the macroeconomic backdrop deteriorating, we expect that interest rates will peak in 2023 at a higher level than investors previously envisioned, before declining. This is important because stock prices have historically adjusted 12-18 months ahead of interest rates, which could provide a boost for stocks with both high expected earnings growth and a sustainable focus.

The continued uncertainty around the global macro environment means that it will continue to be important to take a broad view, which is a consistent feature of our approach. This is also true from a sustainability viewpoint, and echoes our ESG research that over many years has highlighted the importance of identifying not just the current leaders, but also the improvers. For many, the current opportunities surround companies that have strategies to grow the sustainable areas of their businesses, but we believe there are also very attractive long-term opportunities to invest in companies with transition potential too. This is also consistent with our view that, over the longer term, sustainability will affect all corners of the market and provide a diverse range of opportunities.

Federated Hermes Multi-Strategy Credit Fund

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2, which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index. At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year with Fed Chair Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

At the start of the year, we progressively increased our hedge overlay, as market catalysts and sentiment turned negative given the rising inflationary pressures and unfolding geopolitical conflict. Within both high yield and investment grade, we ensured we were positioned in the optimal security types within the capital structures. We remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors. As interest rates volatility remained a key driver of returns during the year, we maintained a short exposure to US treasuries via futures. We also continued adding option protection given the implied market volatility as well as our overall risk appetite. As valuations turned more attractive following the market correction observed in H1, we extended duration (a measure of sensitivity of a bond's price to a change of interest rates) in issuers we liked, ensuring we remained in the best part of the curve and within the best capital structures. As a general trend, from the third quarter onwards, we reinforced our exposure to higher quality issuers, increasing our overall exposure to investment grade bonds. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance in the region for most of the year (although our small exposure to Chinese property issuers did benefit from the rebound seen in Q4 2022 as the country changed its stance on Covid-19 restrictions). Within the structured credit space, we remained focused on high quality collateralised loan obligations (CLOs), as we viewed them as attractive in an environment of higher inflation, although we remained extremely selective in our exposure. In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe. This was because spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) on the longer end of the curve had compressed further.

Performance Review

The Federated Hermes Multi-Strategy Credit Fund (Class F, USD, Accumulation) returned -10.01% in 2022, a year when many fixed income assets suffered large losses, driven by interest rate volatility, inflationary pressures, growth concerns, as well as the geopolitical conflict between Russia and Ukraine

From a sector's perspective, the strategy's exposure to Financials detracted the most from absolute returns due to high interest rate volatility and sanctions put on some banks following Russia's invasion of Ukraine. The strategy's exposure to telecoms detracted as issuers within the sector were more impacted by interest rates hikes due to higher refinancing risks. The strategy's exposure to Real Estate also detracted from returns as China's restrictive Covid-19 policy impacted liquidity and added to existing restructuring pressures. Nonetheless, the strategy's exposure to sovereign debt (via short exposure to US treasuries) contributed positively to performance as these suffered large losses over the year.

Federated Hermes Multi-Strategy Credit Fund (continued)

Performance Review (continued)

From a rating's perspective, the strategy's exposure to BB and BBB-rated issues detracted the most as lower quality issuers outperformed for most of the period, while AAA-rated issuers contributed the most via short exposure to US treasuries.

From a regional perspective, Europe and North America detracted the most from absolute returns, with all regions in negative territory.

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow soon. Fundamentals remain strong with leverage ratios low and interest coverage high. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increase in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near-term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and as rates volatility normalises, we would expect this part of the credit market to outperform. In contrast we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going into 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Federated Hermes Global Small Cap Equity Fund

Market Review

The MSCI World Small Cap Net Index returned -8.52%, in sterling terms, over 2022. Both equity and bond markets struggled during the year as the war in Ukraine raged and central banks battled to bring down stubbornly high inflation, raising interest rates by far more than investors had expected at the start of the year.

Developed market small caps underperformed their large-cap peers. With regard to regions, Asia Pacific fell the least (-13.25% in US dollar terms), followed by North America (-17.26%), while Israel was the worst performing region (-27.68%). At a sector level, Energy materially outperformed the broader market and was the only sector to end the year in positive territory (40.80%). Utilities (-4.96%) and Consumer Staples (-10.70%) fell the least, while Communication Services (-30.63%) and Health Care (29.12%) were the worst performing sectors.

Investment Strategy

Global Small Cap Equity is a bottom-up, stock-picking strategy, and we aim to invest in high-quality stocks over the long term. We look for stocks that have high returns on equity and/or high sustainability of revenue and returns. We take a bottom-up, fundamental investment approach. We believe that excess returns are best and most consistently generated by concentrating on stock-specific risk and not having significant regional and industry exposures.

We initiated two new positions and exited two holdings over the year.

Our new positions were in Maximus and ICU Medical. Maximus provides process services to government health agencies, primarily in the US but also in Australia and the UK. The company delivers strong returns and cash generation, and we believe it should benefit from Medicaid enrolment and increased outsourcing of related government programmes.

ICU Medical is a leading provider of infusion-therapy (IV) equipment and supplies, used in vascular procedures and critical-care settings. It operates within a consolidated industry with high barriers to entry and recurring revenues, and we believe it is a high-quality company with sticky consumables, wide moats and secular growth drivers. Net cash on the balance sheet can be deployed in value-creating M&A, and the stock is trading at an attractive valuation.

We funded these trades by selling CACI, an IT solutions and service provider, primarily to US military agencies, and CAE, a pilot training company.

Performance Review

The Fund returned -14.23% in sterling, underperforming the benchmark by 6.24% in geometric terms. The underperformance was driven by both stock selection and sector allocation. The largest detractors from relative performance on a sector level were the Fund's zero-weight to Energy and stock selection in Health Care, which offset the positive contributions from our stock selection and underweight positions in the Real Estate and Consumer Discretionary sectors. The Fund also has a strong tilt towards the Quality factor, and that factor underperformed the market in 2022 on the back of strong performance by the Value factor.

The top individual contributor to performance over the year was Burckhardt Compression, a manufacturer of reciprocating compressors, which rose after it reported an exceptional increase in order intake for its components and services that are used in transporting, storing and refining gases. The ongoing gas crisis in Europe has driven strong demand for LNG as an alternative to Russian supply. WEX, a payments business, rose in the fourth quarter after it reported earnings that beat expectations. WEX has benefitted from a strong recovery in travel, higher fuel prices and elevated fee revenue. Management remained positive on the macro outlook and raised guidance for the full year; in Q4, they announced a share buyback programme. Clean Harbors, which is involved in environmental remediation and industrial waste management, outperformed on a strengthening US economy and some parts of its business having oil price exposure; the regulatory environment is also supportive and the company will benefit from spending relating to the Inflation Reduction Act.

Federated Hermes Global Small Cap Equity Fund (continued)

Performance Review (continued)

CarGurus, a passenger-vehicle research and shopping platform, detracted the most over the period. The share price fell following disappointing results and softening consumer demand, particularly within the company's dealer-dealer offerings. Thule Group, which owns a collection of brands related to outdoor transportation products, declined due to margin pressure driven by rising costs, including raw material and freight cost inflation. Molten Ventures shares declined, alongside other growth stocks, due to the effect of tightening monetary policy on the valuations of its European tech investments (and investors' perceptions as to the potential for write-downs of those valuations).

Outlook

The de-rating of the market in 2022 has brought better value, but some parts of the market are still expensive as investors seek safe havens. However, with the most recent economic data suggesting that economies are proving more resilient than expected, with the quantum of interest rate rises seemingly tailing off and inflation peaking, the backdrop for equities is supportive. A rosier outlook will help the market see through shorter term concerns such as consumer spending and the cost-of-living crisis, both of which garner much media attention.

The Strategy is well positioned for the current environment with its tilt towards quality and stability measures, and should also benefit from the longer term growth potential of its holdings.

Federated Hermes Absolute Return Credit Fund

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2, which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index. At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year, with Fed Chair Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises, and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease.. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

At the start of the year, we progressively increased our hedge overlay, as market sentiment turned negative given the rising inflationary pressures and unfolding geopolitical conflict. Within both high yield and investment grade, we ensured we were positioned in the optimal security types within the capital structures. We remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors. As interest rates volatility remained a key driver of returns, we maintained a short exposure to US treasuries via futures. We also continued adding option protection given the implied market volatility, as well as our overall risk appetite. As valuations turned more attractive following the market correction observed in H1, we extended duration (a measure of sensitivity of a bond's price to a change of interest rates) in issuers we liked, ensuring we remained in the best part of the curve and within the best capital structures. As a general trend, from the third quarter onwards, we reinforced our exposure to higher-quality issuers, increasing our overall exposure to investment grade bonds. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance in the region for most of the year (although our small exposure to Chinese property issuers did benefit when the country changed its stance on Covid-19 restrictions). Within the structured credit space, we remained focused on high quality collateralised loan obligations (CLOs), as we viewed them as attractive in an environment of higher inflation, although we remained extremely selective in our exposure. In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe. This was because spreads (the difference in yield between corporate bonds and their equivalent governmentissued bonds)on the longer end of the curve had compressed further.

Performance Review

The fund returned -4.89% (net FUSD accumulating share class) in 2022, a year when many fixed income assets suffered large losses, driven by interest rate volatility, inflationary pressures, growth concerns, as well as the geopolitical conflict between Russia and Ukraine.

From a sector perspective, the strategy's exposure to Financials detracted the most from absolute returns due to high interest rate volatility and sanctions put on some banks following Russia's invasion of Ukraine. The strategy's bias towards more defensive sectors such as capital goods and basic industry also detracted from performance. The strategy's exposure to telecoms also detracted as issuers within the sector were more impacted by interest rates hikes due to higher refinancing risks. Nonetheless, the strategy's exposure to sovereign debt (via short exposure to US treasuries) contributed positively to performance as these suffered large losses over the year.

From a ratings perspective, the strategy's exposure to BB and BBB rated issues detracted the most as lower quality issuers outperformed for most of the period, while AAA-rated issuers contributed the most via short exposure to US treasuries.

Federated Hermes Absolute Return Credit Fund (continued)

Performance Review (continued)

From a regional perspective, Europe and North America detracted the most from absolute returns, with all regions in negative territory.

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow soon. Fundamentals remain strong, with leverage ratios low and interest coverage high.. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increase in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near-term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and, as interest rate volatility normalises, we would expect this part of the credit market to outperform. In contrast, we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going into 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Federated Hermes SDG Engagement Equity Fund

Market Review

The MSCI ACWI SMID Cap Net Index returned -8.48%, in sterling terms, over 2022. Both equity and bond markets struggled during the year as the war in Ukraine raged and central banks battled to bring down stubbornly high inflation, raising interest rates by far more than investors had expected at the start of the year.

Global small cap markets underperformed their large cap peers, except in emerging markets. With regards to the SMID Cap Index, Latin America was the best performing region and the only one to record a positive return, while Europe and the Middle East was the worst performing region. Energy was the strongest performing sector and the only sector to end the year in positive territory, with Utilities falling the least among other sectors, posting returns of 42.12% and -2.49% respectively. Communication Services and Information Technology were the weakest in the period, both falling over 30%.

Investment Strategy

The SDG Engagement Equity Fund is a small- and mid-cap investment product that aims to produce above-benchmark investment returns while also delivering a social return.

The investment team seeks to invest in higher quality stocks over long time periods and runs a high active-share portfolio. The team also analyses companies to establish which of the UN's Sustainable Development Goals (SDGs) apply to each potential investment, and what else a company could do in order to contribute to those goals.

The team will then engage with the management teams of companies selected for the Fund to encourage companies to, for example, change business practices, manage their supply chains better, or develop new products, in order to contribute to the delivery of the SDGs. The team, in conjunction with EOS at Federated Hermes, our stewardship service, will help facilitate this by communicating industry best practice, advising on reporting and disclosure, and, where relevant, introduce third parties to assist companies in their efforts.

The investment approach is bottom-up and fundamental. The team believes that excess returns are best and most consistently generated by concentrating on stock-specific risk and not having significant regional and industry exposures. The risk profile of the Fund seeks to maximise investors' exposure, to the extent practically possible, to the achievements of individual stocks and related SDG impact. The investment team has extensive local market knowledge and operates on a regional basis.

Full due diligence on a potential holding will include both an investment thesis and an engagement one. The engagement thesis will detail the proposed ongoing engagement activity, with appropriate milestones, which will then be further enhanced and form a plan once assessed and agreed with the company. The outcomes from engagement will be measured and reported on a semi-annual basis.

Performance Review

The Federated Hermes SDG Engagement Equity Fund returned -8.41% in sterling terms, outperforming the benchmark index by 0.07%. Stock selection was strongest in the Consumer Discretionary and Information Technology sectors, but was weak in Industrials. However, it was the Fund's zero weight in Energy, a result of its mandated exclusions, that had the most significant impact, namely a 2.40% detraction from relative performance. From a regional perspective, stock selection contributed the most in emerging market Asia and North America.

Several stocks saw significant outperformance, benefiting from the market rotation from growth to value, whereas others suffered due to pressures from higher inflation and interest rates. In an attempt to bring down inflation, central banks had to raise interest rates which resulted in a sharp decline in government bond prices. This led to a large sell-off in government bonds and a falling stock market. In this environment, the Fund's bias towards higher quality companies was beneficial.

Luggage manufacturer and distributor, Samsonite, was the strongest contributor, with the share price rising nearly 30%, and with the Fund benefiting from prior top-ups to the stock. Given its luggage business, it is a clear reopening beneficiary. Varun Beverages, a beverages producer and distributor, rose following better-than-expected results, and the company entered into an agreement to manufacture a snack brand for PepsiCo India. Burckhardt Compression rallied after it reported an exceptional increase in order intake for its components and services that are used in transporting, storing and refining gases. The ongoing gas crisis in Europe has driven strong demand in LNG as an alternative to Russian supply.

Federated Hermes SDG Engagement Equity Fund (continued)

Performance Review (continued)

The largest detractor from relative performance was Molten Ventures, a European Tech venture capital business, which fell alongside other technology stocks due to the impact of rising interest rates. West Pharmaceutical Services fell due to a decline in Covid-19-related demand after strong performance in prior years. Techtronic Industries fell alongside other housing-related names; it was a Covid (stay at home) beneficiary and had previously attracted a high rating from its impressive execution and market-share gains.

The Fund's management team continued to make progress through engagement with investee companies. More than 150 engagements actions took place, often discussing several issues and objectives. We continue to see greater progress from investee companies that we have held for a longer period of time, supporting our view that constructive engagement requires patience.

Outlook

The Fund's focus on engaging for impact towards the UN SDGs causes our positioning to diverge from the benchmark in certain sectors. Engagement opportunities are often more abundant in companies with higher capital requirements, such as personnel and manufacturing facilities, whereas low capital-intensive tech companies have less opportunity for productive engagement; therefore, the Fund is less exposed to these businesses.

The de-rating of the market in 2022 has brought better value, but some parts of the market are still expensive as investors seek safe havens. However, with the most recent economic data suggesting that economies are proving more resilient than expected, and with the quantum of interest rate interest rate rises seemingly tailing off and inflation peaking, the backdrop for equities as a whole is supportive. A rosier outlook will help the market see through shorter term concerns such as consumer spending and the cost-of-living crisis, both of which garner much media attention.

The Strategy is well positioned for the current environment with its tilt towards quality and stability measures, and should also benefit from the longer term growth potential of its holdings.

Hermes Investment Management Limited February 2023

Federated Hermes Impact Opportunities Equity Fund

Market Review

The MSCI All Country World IMI Index returned -8.12%, in sterling terms. The year commenced with markets declining, against a backdrop of rising inflation and increasing interest rate expectations that resulted in the strongest swing to Value since the Great Financial Crisis. The market sell-off was further amplified by Russia's invasion of Ukraine in February, which added to the inflationary pressures. In turn, consumer confidence indices fell in the second quarter due to the expected squeeze on the consumer from higher prices and borrowing costs. Understandably, risk aversion remained high as markets continued to decline, and H1 ended with developed markets having posted one of the worst returns over the past 50 years.

However, early in Q3 there was a change in market leadership, as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and Quality. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again, and expectations that the US Federal Reserve (Fed) would accelerate its tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 policy restrictions. This was further bolstered by a better-than-expected US inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the Fed, and other central banks, made it clear that tightening would continue while inflation remained substantially above target.

Investment Strategy

The Hermes Impact Opportunities Fund is a high-conviction global equity strategy. It aims to generate attractive financial returns by only investing in companies creating positive impact for people and the planet.

Investors have become increasingly aware that incorporating sustainability and ESG factors will often help them avoid companies that destroy shareholder value. Our Impact investment strategy goes beyond risk mitigation to invest in companies that are tackling underserved needs of society and the environment, and so are exposed to sources of enduring demand.

We take a thematic approach and seek to capture opportunities which are created by mega trends. Through assessing the UN Sustainable Development Goals' underlying targets, we have alighted on nine key impact themes which are investable.

Several new holdings were purchased in 2022, which included Grocery Outlet, STMicroelectronics, Workiva and Tetra Tech. US grocery chain Grocery Outlet sells packaged and fresh food at a significant discount to traditional grocers and helps avoid food waste. With inflationary pressures rising and recession increasingly likely, the company should benefit from the trading down effect. STMicroelectronics is an analogue semiconductor producer, which is an attractively valued leader in several high structural-growth areas. It is directly exposed to the electrification of our world and is leading innovation in fields, such as Silicone Carbide, which are generating efficiency improvements that promise to significantly reduce global emissions. Workiva is a US financial-reporting, cloud-based software as a service (SaaS) vendor with global ambitions. It also has the potential to be a leader in the nascent ESG/sustainability reporting market that is being driven by regulation. Tetra Tech is a high-quality business with strong defensive qualities. The company is a major beneficiary of increasing US environmental regulation (particularly around waste, water treatment and freshwater provision), through its governmental and non-governmental consultancy business.

Chegg was sold due to the relatively strong US labour market (negatively affecting higher education enrolment), coupled with growing execution concerns with respect to international expansion. A position in The RealReal was closed following a meeting with the company where some of the milestones we had expected to be reached did not materialise.

The Fund continues to be actively managed and, throughout the period, we have trimmed positions that have performed particularly well and topped up positions elsewhere as appropriate.

Performance Review

The Fund returned -19.55% in 2022, in GBP terms, underperforming the benchmark by 12.44%. The underperformance was primarily due to the macro-driven market that had adopted a more short-term outlook: an environment not suited to a strategy that has a long-term fundamental focus.

Federated Hermes Impact Opportunities Equity Fund (continued)

Performance Review (continued)

In attribution terms, stock selection was the main driver for the fund's relative performance. The largest detractors from relative performance came from stock selection in Health Care, Materials, Industrials and Financials. Sector allocation contributed to relative performance. The Fund's overweight in Health Care was supportive of relative returns, as were the underweights in Communication Services and Information Technology. However, the Fund's zero weight in Energy detracted.

Novo Nordisk benefited from accelerating uptake of its diabetes and obesity treatments. More recently, supply constraints of its obesity drug, Wegovy, have eased, while the international launches of the drug have boosted sentiment. AECOM benefited from solid underlying demand, reflected in a healthy order backlog and pipeline, as infrastructure investment, energy transition and sustainability projects increase. Bank Rakyat Indonesia also saw share-price strength in the period; The Indonesian economy is performing strongly, aided by higher commodity prices, and the company has seen higher lending activity and has reported strong earnings ahead of expectations.

Kingspan released a positive trading update in April, but has since fallen due to concerns over inflation and an expected slowing of the housing/construction market, which the company subsequently warned of. TCS saw significant share-price weakness due to the Russian invasion of Ukraine, at which point we sold our entire holding. Tomra Systems saw share-price weakness at the start of the year during the Value rotation. It then reported earnings that were weaker than expected, driven by cost inflation.

Outlook

Following a tumultuous 2022, where the S&P posted the seventh-worst annual return since 1929, we expect to see a less volatile market environment in 2023. Market sentiment was extremely bearish after the Fed reiterated that it would stick with its restrictive policy stance for some time. However, we believe that risk appetite may return as we enter H2 2023. Cash balances are at record highs; inflation will have continued to ease; the Fed will have completed +500bps of hikes (at current estimates); and valuations have fallen significantly. We also believe that recessionary pressures will be mild, given that consumers still have a high savings rates and corporates are well capitalised.

As fundamental investors, we are maintaining our long-term focus on impactful companies that are exposed to mega trends. The Covid pandemic has emphasised the importance of improving food and water security, health care systems and the resilience of supply chains, as well as highlighting the issues of climate change and biodiversity loss. We remain confident that companies that provide innovative solutions to unmet needs of the environment and society should be exposed to enduring sources of demand, providing secular growth opportunities for the companies and positive impact for people and the planet.

Hermes Investment Management Limited February 2023

Federated Hermes Unconstrained Credit Fund

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2, which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index. At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year with Fed Chairman Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

At the start of the year, we progressively increased our hedge overlay, as market sentiment turned negative given the rising inflationary pressures and unfolding geopolitical conflict. Within both high yield and investment grade, we ensured we were positioned in the optimal security types within the capital structures. We remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors. As interest rates volatility remained a key driver of returns, we maintained a short exposure to US treasuries via futures. We also continued adding option protection given the implied market volatility, as well as our overall risk appetite. As valuations turned more attractive following the market correction observed in H1, we extended duration (a measure of sensitivity of a bond's price to a change of interest rates) in issuers we liked, ensuring we remained in the best part of the curve and within the best capital structures. As a general trend, from the third quarter onwards, we reinforced our exposure to higher quality issuers, increasing our overall exposure to investment grade. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance in the region for most of the year (although our small exposure to Chinese property issuers did benefit when the country changed its stance on Covid-19 restrictions). Within the structured credit space, we remained focused on high quality collateralised loan obligations (CLOs), as we viewed them as attractive in an environment of higher inflation, although we remained extremely selective in our exposure. In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe. This was because spreads (the difference in yield between corporate bonds and their equivalent governmentissued bonds) on the longer end of the curve had compressed further.

Performance Review

The Federated Hermes Unconstrained Credit Fund (Class F, USD, Accumulating) returned -12.87% in 2022, a year when many fixed income assets suffered large losses, driven by interest rate volatility, inflationary pressures, growth concerns, as well as the geopolitical conflict between Russia and Ukraine.

From a sector perspective, the strategy's exposure to Financials detracted the most from absolute returns due to high interest rate volatility and sanctions put on some banks following Russia's invasion of Ukraine. The strategy's bias towards more defensive sectors such as capital goods and basic industry hurt performance. The strategy's exposure to Real Estate also detracted from returns as China's restrictive Covid-19 policy impacted liquidity and added to existing restructuring pressures. Nonetheless, the strategy's exposure to sovereign debt (via short exposure to US treasuries) contributed positively to performance as these suffered large losses over the year.

From a ratings perspective, the strategy's exposure to BB and BBB-rated issues detracted the most as lower quality issuers outperformed for most of the period, while AAA-rated issuers contributed the most via short exposure to US treasuries.

Federated Hermes Unconstrained Credit Fund (continued)

Performance Review (continued)

From a regional perspective, Europe and North America detracted the most from absolute returns, with all regions in negative territory.

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow soon. Fundamentals remain strong with leverage ratios low and interest coverage high. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increases in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. In contrast, we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going into 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Hermes Investment Management Limited February 2023

Federated Hermes Global Emerging Markets SMID Equity Fund

Market Review

The benchmark MSCI Emerging Markets SMID Net TR Index returned -17.11% over the period, in US dollar terms (-6.66% in sterling terms), to finish ahead of the broader MSCI Emerging Markets Index (-20.09%), which moderately trailed developed markets as measured by the MSCI World Index (-19.5%). 2022 was a torrid year for investors as risk assets were jolted by surging global inflation and monetary policy tightening in response, the Russia-Ukraine crisis and the 'zero-Covid' policy in China. The path of expected rate increases was the primary driver of the sharp rise in bond yields and sell-off in stocks, the biggest repricing for long-duration assets. Value outperformed Growth, largely explained by the high starting valuations for growth stocks, some growth disappointments, and the effect of rising interest rates. Mid-caps (>\$5bn-10bn) returned -15.7%, outperforming the large caps (>\$20bn) in the MSCI Emerging Markets (EM) Index, which posted -20.2%. Small caps lagged the most; the sub \$1 billion market cap benchmark fell 26.7%. US dollar strength weighed on returns as nearly all EM currencies depreciated and currency volatility hit highs not seen since the beginning of the pandemic.

Regionally EM Asia fell substantially over the year (-20.8%), where all markets were down. China finished down -22.2% due to muted economic growth, despite stimulus, with consumer sentiment weighed down by Covid-19 policy uncertainties and weakness in the real estate market. Growth-sensitive markets Korea (-28.2%) and Taiwan (-27.5%) lagged as the outlook for global trade deteriorated. EMEA outperformed (-10.0%), despite the drag down from Russia which was removed by MSCI from the benchmark index in March. The energy-exporting Middle East markets outperformed on elevated energy prices. Latin America (0.4%) eked out a positive return to finish the best-performing region in EM by some way, with Peru (10.7%) one of the best performing EM markets. At a sector level, there was a wide spread in returns, with Energy (18.7%) finishing at the top and the only sector in positive territory, while Information Technology (-34.4%) was at the bottom.

Investment Strategy

In the second half of the year, we opened several new positions. These included: Bermaz Auto, the distributor of Mazda cars in Malaysia; Pidilite Industries, an Indian specialty chemicals company manufacturing adhesives and sealants; Tarsons, an Indian manufacturer of reusable labware plastics for use in molecular biology, genomics and immunology; and MTAR-Technologies, an Indian precision-engineering company and preferred supplier of hot boxes for Bloom Energy (BE US), a leading player in Solid Oxide Fuel Cells. In the fourth quarter, we added: Airtac, the second-largest pneumatics component supplier in China; Localiza, a leading car rental company in Brazil; Nykka (FSN E-commerce Ventures), an Indian online beauty and personal care business; Chacha Food, a Chinese manufacturer of packaged nuts and seeds, which is gaining more traction in the country due to increasing health awareness; Ariana (Arna), the largest ceramic tile company in Indonesia, serving an underpenetrated market; and Locaweb, a provider of software that helps Brazilian SMEs sell online.

We exited Zhongji Innolight, a Chinese manufacturer of optical communication transceivers, given our governance concerns and lack of progress at a business level. We sold Autohome – a Chinese e-commerce platform for car manufacturers and consumers, as its franchise is weakening – and Accton Technology into strength. We also sold Genomma Lab due to concerns about the lack of visibility of its business in Argentina, weak results in Mexico and delays to plant permits. We switched into Kimberly Clarke de Mexico, which makes personal care products.

Performance Review

The Fund returned -17.36% in sterling terms, net of fees, over the year, underperforming the benchmark index by 11.46%. Stock selection detracted the most from relative returns, notably in Brazil, Korea, Taiwan and Poland, eclipsing gains from stronger selection in Chile and China. Asset allocation also detracted from relative returns, notably underweights to outperforming markets Turkey, Thailand (no exposure), the UAE, Saudi Arabia (non-exposure), and Brazil. The Fund's overweight allocation to China, which underperformed, and the associated exposure to the Renminbi, which depreciated, also detracted. However, our exit from the Russia market by the end of February and the Fund's overweight allocations to outperforming markets Chile, Peru, and Mexico contributed to relative returns.

Federated Hermes Global Emerging Markets SMID Equity Fund (continued)

Performance Review (continued)

Quinenco, a Chilean holding company owning subsidiaries in a variety of industries, was the biggest individual contributor, given strong earnings contributions across all its business segments, including from Hapag-Lloyd, a shipping and transportation business, and Banco de Chile. Grupo Aeroportuario del Pacifco (GAP), an airport operator in Mexico, rose on solid results, well ahead of management guidance, driven by the strong recovery in air traffic. Ferreycorp, a Peru-based company leasing and selling industrial equipment in Latin America, rose on results which saw profits up 35% year-on-year, led by strong CAT machine sales for non-mining sectors, and other lines.

Win Semi, which accounts for around 80% of the compound semiconductor market, fell as fab utilisation was lower than expected as consumer end-demand was weak, notably due to China's smartphone market and inventory adjustment by Chinese manufacturers. Sentiment has been poor due to the overall weakness for technology stocks, driven by the hawkish US Federal Reserve policy and the rotation from growth to value. Silergy, a Chinese power-management IC provider, fell as supply issues have eased, giving way to market speculation on oversupplies, inventory adjustment and margin normalisation amid heightened geopolitical concerns. Beijiing Sinohytec, a Chinese manufacturer of hydrogen fuel-cell engine systems, fell due to the market rotation from Growth to Value assets that significantly weighed on the alternative energy sector.

Outlook

With central bank actions suppressing demand, we expect the world to emerge from the initial inflation shock and markets to rebound in 2023. We expect emerging markets to do well, initially driven by the reopening of China, rebounding markets in Korea, Taiwan and Brazil, and the stability of India, Indonesia and Mexico. In addition to trough valuations and underweight investor positioning in emerging markets, we expect the growth differential between emerging and developed markets to expand, driven by emerging markets' favourable demographics, manufacturing capability, availability of critical resources and focus on supply-side reforms and infrastructure investment. We expect several emerging markets to benefit substantially from the relocation in supply chains that has already begun. In contrast, the developed world is learning to adjust to high inflation and is distracted by structural challenges that investors are only now considering.

Hermes Investment Management Limited February 2023

Federated Hermes SDG Engagement High Yield Credit Fund

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. = This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2, which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index. At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year with Fed Chairman Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

The Fund achieved its goal of 100% engagement of all issuers in 2022, a total of 441 engagements. This was supported by Aaron Hay (Director of Engagement & Strategy), Jake Goodman (Engagement Manager), Bertie Nicholson (Engagement & ESG Associate) and Federated Hermes EOS senior engagers. Dedicated fixed income engagers drove 262 engagements, and 29 EOS senior engagers supported the Fund with 179 engagements. In 2022, our engagement activity touched on 731 identified issues and objectives at 123 companies (this excludes companies divested in 2022).

We provide a comprehensive bi-annual report on our website featuring in-depth analysis of our engagement activity, including which UN Sustainable Development Goals (SDGs) have been focused on, the scores assigned, the rationale for inclusion and our process around re-evaluation. As an example, we exited our positions in Logan, Longfor and Shimao as we downgraded these issuers to our lowest score of SDG 5 due to their lack of willingness to engage.

We remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors, as interest rate volatility remained a key driver of returns. Valuations turned more attractive following the market correction in H1, so we extended duration (a measure of sensitivity of a bond's price to a change of interest rates) and ensured we remained in the best part of the curve and within the best capital structures. From the third quarter onwards, we reinforced our exposure to higher quality issuers, increasing our overall exposure to crossover bonds. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance (although our small exposure to Chinese property issuers did benefit from the rebound seen in Q4). In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe.

Performance review

The Federated Hermes SDG Engagement High Yield Fund (Class F, USD, Accumulating) generated a net return of -10.04% (in US dollar terms) for 2022, outperforming its benchmark by 1.51%.

The Fund's underweight positioning in Energy, media and leisure were the top contributors to overall performance. In contrast, overweight positioning in capital goods, telecommunications and banking were the biggest detractors on a sectoral basis. At the individual holding level, the Fund's underweight positioning in Pemex (Energy), Bausch (Health Care) and Ford (automotive) boosted relative returns the most, while the overweight positioning in Liberty Global (telecommunications), SBB (Real Estate) and Ardagh Glass (capital goods) detracted the most.

At the regional level, the Fund's overweight positioning in North America and underweight positioning in Asia emerging markets and Eastern Europe were the top contributors to relative performance. In contrast, the overweight positioning in Western Europe and the UK detracted the most.

Federated Hermes SDG Engagement High Yield Credit Fund (continued)

Performance review (continued)

From a ratings perspective, the Fund's underweight positioning in BB and below rated issues positively impacted performance the most, while the overweight positioning in BBB-rated issues detracted the most.

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow. Fundamentals remain strong with leverage ratios low and interest coverage high. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long-term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increases in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. In contrast, we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going in to 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Hermes Investment Management Limited February 2023

Federated Hermes Sustainable Global Equity Fund

Market Review

The MSCI All Country World Index returned -8.08%, in sterling terms. The year commenced with markets declining against a backdrop of rising inflation and increasing interest rate expectations that resulted in the strongest swing to Value since the Great Financial Crisis. The market sell-off was further amplified by Russia's invasion of Ukraine in February, which added to the inflationary pressures. In turn, consumer confidence indices fell in the second quarter due to the expected squeeze on the consumer from higher prices and borrowing costs. Understandably, risk aversion remained high as markets continued to decline and H1 ended with developed markets having posted one of their worst returns over the past 50 years.

However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and Quality. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that the US Federal Reserve (Fed) would accelerate its tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 policy restrictions. This was further bolstered by a better-than-expected inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the Fed, and other central banks, made it clear that tightening would continue while inflation remained substantially above target.

Investment Strategy

The Hermes Sustainable Global Equity Fund is a high-conviction global equity strategy. It aims to generate attractive financial returns by investing in companies helping to create a more sustainable future. As a concentrated, high-active share fund that follows a 'best ideas' strategy, the Fund benefits from three key sources of alpha: (ESG) leaders, impactful companies and improvers.

We only invest in companies that make a difference. This is reflected in the strategy holdings, which are all aligned with, and facilitating progress on, one or several of the UN's Sustainable Development Goals (SDGs). Essentially, sustainable investments should be companies with a business model creating value for society, a positive or improving ESG profile, and whose activities have an overall positive impact through their products and services.

The Fund's overall structure is divided into four sustainable themes with each having a variety of investible subthemes. Two of the overarching themes relate to the environment – Environmental Preservation and Efficient Production and Resource Usage – and two relate to society – Health and Wellbeing and Social Inclusion.

The market volatility has provided opportunities to open several new positions, including in ICICI Bank, Fuyao Glass Industry Group and Republic Services Group. ICICI Bank is a leading franchise in India with strong financial inclusion credentials. Moreover, it is winning market share, while benefiting from an attractive macro-economic backdrop. Fuyao Glass Industry Group is a leading global electric vehicle (EV) glass producer, with durable market-share gains and growing positive product impact as EVs mature. Republic Services Group is the second-largest player in the North American Waste management industry, operating 71 recycling centres and due to open a fully-integrated plastics recycling facility. It has through-the-cycle stability and pricing power.

We closed the position in PayPal post results, following weak guidance and the abandonment of its 2025 target of 750 million users. This was a key part of our investment thesis and suggests increasing customer acquisition costs and an increasingly competitive backdrop. We also closed the remaining holding in Adidas, owing to concerns around strategic execution and loss of market share in a deteriorating consumer environment. We sold Natura due to concerns over a lack of synergies from Avon.

Performance Review

The Fund returned -9.90% in 2022, underperforming the benchmark by 1.98%. The underperformance was primarily due to the macro-driven market that had adopted a more short-term outlook: an environment not suited to a strategy that has a long-term fundamental focus. However, 2022 demonstrated the Strategy's ability to weather a choppy market. The Strategy's broader view of sustainability, which includes transitional names and exposure to financial inclusion, offers diversification and an ability to have a broader style exposure. Indeed, the value stocks in the portfolio added considerable alpha, while the inherent quality bias also proved to be a key characteristic.

Federated Hermes Sustainable Global Equity Fund (continued)

Performance Review (continued)

In attribution terms, stock selection detracted from relative returns, while sector allocation added value. The largest contributions came from stock selection in Information Technology and Financials, being underweight in Communication Services and Consumer Discretionary, and overweight in Industrials. These positive effects were offset by detractions from selection in Health Care, Consumer Discretionary and Materials, and from not owning Energy companies (a hard exclusion for this strategy).

Novo Nordisk, Deere & Co and Grupo Banorte were the largest individual contributors. Novo Nordisk benefited from accelerating uptake of its diabetes and obesity treatments. More recently, supply constraints of its obesity drug, Wegovy, have eased, while the international launches of the drug have boosted sentiment. Deere & Co rose after reporting better-than-expected earnings and upgrading its guidance in Q4. The company is seeing strong demand and gaining market share in all regions for large farm and precision agriculture equipment. Grupo Banorte shares rallied in Q3 as the company benefited from positive profitability trends, helped by better NIM and healthy asset quality.

Nvidia, Adobe and Lonza Group were the largest detractors from stocks held in the Fund. Nvidia had performed extremely well during the pandemic and fell victim to rotation. Sentiment was also hit by near-term volatility in gaming, primarily due to China, which offset continued strength in its data-centre business. Adobe fell after the company agreed to buy the design platform Figma at a price that the market deemed to be expensive. However, it should improve the overall functionality of Adobe's Creative Cloud business. Lonza Group is another company that performed strongly during the pandemic, but its share price declined alongside higher multiple names as bond yields increased.

Outlook

China's reopening gave markets a timely boost, given how bearish sentiment had become. When coupled with falling energy prices, a weakening dollar, and fewer profit warnings in the early days of January, there are some glimmers of hope for equity investors. At the same time, visibility remains low, and growth is increasingly scarce. Against this backdrop, high-quality, resilient companies that continue to invest through the cycle will be rewarded.

We maintain our long-term focus and continue to believe that sustainable companies enjoy a more favourable long-term risk/reward and are more likely to benefit from changing consumer trends, future policy and legislation. We see aggregate spending increasingly being directed towards more sustainable initiatives. Moreover, increasing awareness of issues such as climate change, biodiversity, inclusion and health and wellbeing provides a source of enduring demand for companies helping to address these issues. We believe this focus puts the portfolio in a good position to deliver strong performance for clients as economic conditions tighten.

Market Review

Continued and persistent inflation, a theme that would remain present for the entire year, saw central banks pivot in a hawkish direction during January. This was exacerbated by the Russian invasion of Ukraine, which caused commodity prices to surge. High inflation numbers persisted during Q2, which prompted the US Federal Reserve (Fed) to increase the pace of interest rate hikes to 75bps, resulting in more than 10% losses for the S&P 500 Index, At the same time the 10-year US treasury yield rose to 3.50%, the highest level in over a decade.

The Fed continued its hawkish rhetoric into the second half of the year with Fed Chair Jerome Powell indicating that getting back to price stability would "likely require maintaining a restrictive policy stance for some time". The European Central Bank (ECB) also started raising rates for the first time in over a decade, with a 50bps hike in July and 75bps in September. The gas price increases during Q3 intensified fears about a potential recession, which led European governments to step in to protect consumers and businesses from the energy price impact. Another element of volatility was added after the UK government unveiled the biggest package of tax cuts in half a century. This caused sterling to drop, gilt yields to spike and the Bank of England to intervene.

Financial markets rebounded in the fourth quarter. October's market performance was largely driven by a slower pace of interest rate rises and a decline in European natural gas prices. The other major driver of this rebound was the hope that Covid-19 restrictions in China would ease.. With inflation falling back, both the Fed and the ECB stepped down to 50bps hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Investment Strategy

The strategy has dual, self-reinforcing investment and climate objectives. It targets investment returns by focussing on companies with strong fundamentals that also demonstrate the potential to decarbonise and transition to a low-carbon world. We use our proprietary framework, the Climate Change Impact (CCI) score, to help assess the progress and impact that potential holdings are making towards decarbonisation. The portfolio had zero exposure to companies that focus on the fossil fuel sector.

Over the period, we remained positioned in higher quality assets, with a significant exposure to Western Europe, as well as more defensive sectors, as interest rates volatility remained a key driver of returns. As valuations turned more attractive following the market correction observed in H1, we extended duration (a measure of sensitivity of a bond's price to a change of interest rates) in issuers we liked, ensuring we remained in the best part of the curve and within the best capital structures. As a general trend, from the third quarter onwards, we reinforced our exposure to higher quality issuers, increasing our overall exposure to crossover bonds. Within emerging markets, we remained extremely selective as restrictions related to China's Covid-19 policy had knock on effects on asset performance in the region for most of the year (although our small exposure to Chinese property issuers did benefit from the rebound seen in Q4 as the country changed its stance on Covid-19 restrictions). In the last few months of the year, we shifted our exposure towards the front/middle of the curve, especially in Europe. This was because spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) on the longer end of the curve had compressed further.

Performance Review

The Federated Hermes Climate Change High Yield Credit Fund (Class F, USD, Accumulation, net) generated a return of -13.32% in 2022, underperforming its benchmark by 2.19%.

The Fund's underweight positioning in Energy (no exposure), Health Care and leisure (no exposure) were the top contributors to overall performance. In contrast, the overweight positioning in capital goods, insurance and banking were the biggest detractors on a sectoral basis. At the individual holdings level, the Fund's underweight positioning in Pemex (Energy – no exposure), Bausch (Health Care – no exposure) and Ford (automotive) boosted relative returns the most, while its overweight positioning in Credit Suisse (banking), SBB (Real Estate) and Country Garden (Real Estate) detracted the most.

At the regional level, the Fund's overweight positioning in North America and underweight positioning in MEA and Eastern Europe were the top contributors to relative performance. In contrast, overweight positioning in Western Europe and the UK detracted the most.

From a ratings perspective, the Fund's underweight positioning in B and below rated issues positively impacted performance the most, while an overweight positioning in BB and higher rated issues detracted the most.

Federated Hermes Climate Change High Yield Credit Fund (continued)

Outlook

Our outlook for credit markets has improved based on valuations, fundamentals and the balance of risks we will potentially face during 2023. Our Multi Asset Credit Strategy Meeting (MACSM) score reflects the overall improvement in market conditions and increased from -1 to 0. Although central banks are approaching the end of their tightening cycles, persistently above target inflation could mean though that rates remain higher for longer.

Recessionary worries are increasing, with the IMF forecasting one third of the global economy will be in recession in 2023, with Europe likely already there and the US and the UK to follow soon. Fundamentals remain strong with leverage ratios low and interest coverage high =. Defaults ended 2022 at extremely low levels vs. history but are expected to increase this year and return close to their long term average of circa 3% due to rising corporate fundamental headwinds, restrictive rates and a year-on-year increase in distressed exchange activity.

Valuations are attractive, especially as yields remain elevated. Near term catalysts are more balanced, with policy support, global recession risks, geopolitical tensions and China's Covid-19 policy some of the key drivers we are monitoring closely.

Finally, supply and liquidity remain low in credit markets. Our near term outlook favours exposure to higher quality bonds and low exposure to B/CCC credit. Yields are attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. In contrast we expect to see some stress in the lower quality part of the market which has not sold off yet. We prefer exposure to defensive sectors going into 2023, especially in Europe where valuations are attractive relative to the US. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long term performance.

Hermes Investment Management Limited February 2023

Federated Hermes Emerging Markets Debt Fund

Market Review

A large issue affecting global markets was the Russian invasion of Ukraine. The invasion, and subsequent ripples that resulted in markets, stressed commodity prices, and supplies in agricultural items and oil. This occurred at a time when central bankers were already concerned with inflation. Russia's invasion prompted harsh sanctions by the international community. The invasion, which Russia likely projected as a swift military incursion, was met with stiff resistance and has continued throughout the year. The sanctions levied against Russia punished their industrial sector and increased petrochemical prices globally. Similarly, agricultural supply chains suffered from sanctions placed on Russia and lost output that had previously been exported from Ukraine.

Central banks spent the year aggressively raising rates in response to price pressures. While economic data remained robust, this further goaded bankers to raise rates. Sticky inflation, strong jobs data and higher metal prices, pointed to a resilient inflation picture. The constant rate hikes, and the overwhelming suspicion that growth rates would fall as rates remained high, prompted a strong sell-off in risk assets. Central banks, led by the US Federal Reserve (Fed), continued as stalwarts in their battle against rising prices via hawkish monetary policy manoeuvres.

High prices and market stress was not lost on the voting populaces. Although global stress has centered attention on the rhetoric of popular candidates, polls and elections have been hotly contested with conservative candidates appealing to a need for fiscal restraint and thoughtful investment as a long term remedy for rising global price levels. Initiatives by socialist/leftist leaning leaders have been tempered by strong checks and balances of diverse branches of government throughout the developing world.

Investment Strategy

The Fund continues to invest in resilient issuers, in countries where production capabilities and export profiles allow them to withstand weak commodity prices and global market stress. Furthermore, the issuers in our portfolio exhibit governance standards that put them in the best-in-class categories for emerging market issuers.

In 2022, we deftly avoided the crises in Eastern Europe because of the strict lens we use to screen investments. For example, this lens led to underweights in the volatile Asia market. As we take a view of which regions can outperform moving forward, we see opportunities in Africa and Latin America, as global supply chains will fuel commodity prices.

As we select issuers that have the wherewithal to withstand downturns, we see opportunities for rallies in commodity prices that will benefit our issuers, however, we are not concerned if we see dips in commodity prices. Our portfolio is comprised of through the cycle market survivors.

Performance Review

The Fund was underweight in China and Eastern Europe at the beginning of the year and employed a significant overweight to Latin America and Africa in the last quarter of the year.

For the year, the Fund returned -16.94% versus an index return of -17.78%. This was driven by initial underweights to Eastern Europe and then overweight positions in Latin America and Africa, which captured the rebound in commodities markets. An underweight to Asia also benefitted the portfolio.

The Fund remains well positioned in relation to Latin American and African sovereigns, with further price appreciation expected in 2023.

Outlook

During 2023, we expect a recovery to develop during the second half of the year. As a result, the presence of economic growth and greater confidence will propel undervalued securities. Even in the absence of an economic rebound, our team feels comfortable in our security selection. Specifically, our securities provide a healthy carry and consist primarily of industry leaders in respect to production mix, export volumes and an overall cost perspective.

Our conviction is that regions such as Latin America and India are primed for several productive upcoming years. In Latin America, sovereign and corporate governance remains robust with bond spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) failing to reflect the resilience that was demonstrated during 2022. India remains poised for domestic consumer and government infrastructure driven growth.

Federated Hermes Emerging Markets Debt Fund (continued)

Outlook (continued)

At the same time, distressed sovereigns (including a number of names in Africa) are trading at or near recovery values and will most likely see support as abating inflation and less hawkish central banks allow for investors to become more comfortable with risk assets.

Our team has maintained some positions in corporate securities. Corporate securities, generally in emerging markets (EM), are underleveraged relative to similar rated developed market peers. Additionally, EM corporates maintain immense asset and sales exposure in developed markets. Such attributes result in many having business profiles that are similar to much tighter trading peers that are domiciled in the United States or Europe. Through time, our belief is that a convergence in spreads between emerging market and developed market corporates will emerge. Our small corporate positions will augment the value we primarily harvest by buying undervalued sovereigns. We generally buy sovereigns that can withstand market dislocations and when buying distressed sovereigns, we wait for their market prices to fall to, or near, recovery value levels.

Federated Investment Counseling February 2023

Federated Hermes Biodiversity Equity Fund

Market Review

The MSCI All Country World IMI Index returned -3.82%, in sterling terms, in 2022. The year commenced against a backdrop of rising inflation and increasing interest rate expectations, that led to weakness in global equity markets and also resulted in the strongest swing to Value since the Great Financials Crisis. In turn, consumer confidence indices fell in the second quarter due to the expected squeeze on the consumer from higher prices and borrowing costs. Understandably, risk aversion remained high as markets continued to decline, and H1 ended with developed markets having posted one of their worst returns over the past 50 years.

However, early in Q3, there was a change in market leadership as expectations that inflation had peaked grew and bond yields started to fall, leading to a sharp rotation into Growth and Quality. Hopes of a peak proved to be unfounded as inflation subsequently printed higher. Yields started to climb again and expectations that the US Federal Reserve (Fed) would accelerate its tightening became reality as the Growth rally fizzled out and markets resumed their declines.

Q4 brought some respite as markets reacted positively to news that China was going to ease its Covid-19 restrictions. This was further bolstered by a better-than-expected inflation print, but renewed confidence that rates would fall as a result were dealt a blow after the Fed, and other central banks, made it clear that tightening would continue while inflation remained substantially above target.

Investment Strategy

The Federated Hermes Biodiversity Equity Fund is a high-conviction global equity strategy. The Fund aims to achieve capital growth over a rolling five-year period by investing in companies that are helping to protect and restore biodiversity, or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of: land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

The strategy takes a bottom-up, unconstrained approach to the management of equities. Stocks are selected for the long term, with a holding period that is intended to be over five years, as the team believes that, the longer a position is held, the more the price reflects the merits of the business and less the noise of distracting short-term sentiment.

We believe that companies that include biodiversity within their business strategies, and/or as part of their risk mitigation strategies, should have better long-term, risk-adjusted profiles, given the huge systemic risk biodiversity loss poses to the world. With increasing awareness and regulation around biodiversity, companies providing solutions, or leading the way through their operations, to reduce harm and protect biodiversity should benefit from material tailwinds, such as increased spending by governing bodies and the private sector as the theme comes further into focus.

The unconstrained nature of the team's approach means it will inevitably lead to significant deviations at the sector, country and factor level from the reference index. As a consequence, the Fund is expected to have a high tracking error (ex post and ex ante).

We added several new holdings to the portfolio in the period: Bioceres, Sunnova, Grocery Outlet and Fortune Brands Innovations. Bioceres is a provider of a variety of crop productivity technologies designed to help growers and other stakeholders adopt more environmentally-friendly agriculture practices. The company provides patented technologies for seeds and microbial aggregate-inputs, as well as nutrition and protection solutions. Sunnova is a full-service solar panel provider in the US. The company's products and services help towards our energy transition theme by providing clean energy and reducing the users' needs for unsustainable energy sources. US grocery chain, Grocery Outlet sells packaged and fresh food at a significant discount to traditional grocers and helps avoid food waste. With inflationary pressures rising and recession increasingly likely, the company should benefit from the trading down effect. Fortune Brands Innovations is a leader in home water and built environment plumbing solutions. We see this as a play on water and energy efficiency. The protection of freshwater for human consumption is imperative, with the creation of new reservoirs, basins, and catchments of freshwater bearing material biodiversity risk.

Federated Hermes Biodiversity Equity Fund (continued)

Investment Strategy (continued)

We closed three positions: CubicFarm Systems, Tattooed Chef and The RealReal. CubicFarm Systems was impacted by several factors, including supply constraints, divestment from a major shareholder and a change in CEO. Interest in its products remains high, but these factors ultimately led to our decision to exit the position. Tattooed Chef was closed after a conversation with the company highlighted that margins were being squeezed significantly more than anticipated and there was no respite in sight. In addition, recent expenditure had weakened its balance sheet, which raised the possibility of a capital raise (something that the company subsequently signalled). The RealReal was closed following a meeting with the company where some of the milestones we had expected to be reached did not materialise.

Performance Review

The Fund returned -14.14% since its inception until the end of December 2022 in GBP terms, underperforming the benchmark by 10.73%. The underperformance was primarily due to the macro-driven market that had adopted a more short-term outlook: an environment not suited to a strategy that has a long-term fundamental focus. In attribution terms, stock selection was the main driver for the Fund's relative performance, due primarily to selection in Consumer Staples, Materials, Consumer Discretionary and Financials. Sector allocation contributed to relative returns,6 despite a sizeable headwind from not owning any Energy names. However, we saw notable contributions from being underweight Communication Services and Information Technology, and having an overweight stance in Industrials.

The three largest individual contributors were AECOM, Biffa and Brambles. AECOM reported solid results with margins higher than anticipated. Moreover, the company has a large order backlog, highlighting robust demand across its key end-markets. Biffa shares rose significantly following a bid for the company from Energy Capital Partners. Brambles shares appreciated, following bid speculation and an announcement of better-than-expected guidance. The company also announced that it would not be developing plastic pallets for Costco.

The three largest detractors were CubicFarm Systems, Kingspan and Ball Corp. CubicFarm Systems experienced component shortages in its supply chain that impacted its ability to complete orders and deploy equipment. In addition, a major investor recently stated its intention to divest some of its stake, which placed further pressure on the share price. Subsequent to this, there was a change in CEO, with a view of implementing a recapitalisation plan. We have exited this position. Kingspan released a positive trading update in April, but has since fallen due to concerns over inflation and an expected slowing of the housing/construction market, which the company subsequently warned of. Ball Corp was adversely hit by dramatic price-taking by the beverage makers, sacrificing volume for price, which surprised the market. Overall corporate growth targets remained unchanged, but expectations around the US business were reduced.

<u>Outlook</u>

Following a tumultuous 2022, where the S&P posted the seventh-worst annual return since 1929, we expect to see a less volatile market environment in 2023. Market sentiment was extremely bearish after the Fed reiterated that they would stick with their restrictive policy stance for some time. However, we believe that risk appetite may return as we enter H2. Cash balances are at record highs; inflation will have continued to ease; the Fed will have completed 5% of hikes (at current estimates); and valuations have fallen significantly. We also believe that recessionary pressures will be mild, given that consumers still have high savings rates and corporates are well capitalised.

We are looking to invest in quality businesses trading at attractive valuations that also have a sustainable competitive advantage through their positive action towards biodiversity. With increasing awareness and regulation around biodiversity, we believe companies that are leading the way and helping protect and replenish biodiversity through their operations, products or services should benefit from material tailwinds. Furthermore, our portfolio is well diversified across sectors and our companies benefit from secular and scalable sources of demand.

Hermes Investment Management Limited February 2023

Federated Hermes China Equity Fund

Market Review

The benchmark MSCI China All Shares Index fell 9.3% over the period in US dollar terms (-9.55% in sterling terms). 2022 was a difficult period for investors as challenges relating to China's 'zero-Covid' and common prosperity policies, property market concerns and geopolitical tensions compounded on one another.

Value outperformed Growth, largely explained by the effects of global rising interest rates, high starting valuations for growth stocks and some growth disappointments.

A sudden end to China's 'zero-Covid' policy helped sentiment in the fourth quarter as investors responded positively to China's much awaited policy pivot, new measures to support its beleaguered property sector, and a lessening of tensions with the US, as signs emerged that China appears to be tempering its 'wolf warrior' approach to the rest of the world.

All sectors were down over the period with Materials (-18.0%) the worst performer, followed by Information Technology (-13.7%), Industrials (-13.3%) and Consumer Discretionary (-11.8%), while Financials (-1.2%) performed best, followed by Energy (-2.7%) and Communication Services (-4.4%).

Investment Strategy

Following the launch in July 2022, and after building the Fund, we sold China Overseas Land & Investment, following its strong performance, and added to Chinese ADRs amid weakness and volatility.

We added to several companies on prospects for reopening, including Cathay Pacific, an airline, Trip.Com, an online travel platform and SinoTruk International, which manufactures trucks used for long and short transportation. We also added ZTE, a leading Chinese telecom equipment and solutions provider and Qingdao Haier Biomedical, a low-temperature storage-equipment manufacturer for biomedical samples.

More recently, we sold Wuxi Biologics, a biologics technology platform, and Hang Zhou Great Star, a power-tool manufacturer, and trimmed JD.Com, Tencent, Alibaba and CK Hutchison into strength.

Performance Review

The Fund returned -5.1%, in sterling terms, over the period (-4.6% in US dollar terms), outperforming the benchmark on a relative (geometric) basis by 4.9%. Relative returns were helped by stock selection in Industrials, Consumer Discretionary and Information Technology, which outweighed the underweight to an outperforming Financials sector.

China Oilfield Services, Swatch Group and Shandong Weigao GP Medical contributed the most. China Oilfield Services, an integrated oilfield services provider, rose with the oil price, following concerns of global supply constraints resulting from Russia's invasion of Ukraine, and was further supported by China's much-awaited Covid-19 policy pivot and reopening prospects. Swatch Group, a leading Asian-focused luxury watch and jewellery group, rose sharply amid China's reopening prospects and a potential boost to sales. Shandong Weigao GP Medical, which develops and produces medical supplies, outperformed amid an abandonment of China's 'zero-Covid' policy and on expectations for an increase in demand for its products.

Not owning Pinduoduo, and owning Guangzhou Automobile Group and Baidu, detracted the most. Not owning Pinduoduo, an ecommerce platform, detracted, as it outperformed along with other internet companies as investors responded positively to China's Covid policy pivot and seemingly more pro-growth policies. Guangzhou Automobile Group, a Chinese automobile manufacturer, declined on weakened demand amid continued Covid lockdowns in China. Baidu, China's leading search company, fell with other ADRs amid broad weakness among Chinese technology stocks – particularly those listed in the US. Weak consumption, exacerbated by Covid-related lockdowns across multiple cities, further hurt sentiment, while cuts to company expenditure impacted advertising revenues.

Federated Hermes China Equity Fund (continued)

Outlook

For at least two years, we have identified five key risks involved in investing in China: tensions with the US; the potential for delisting of US-listed Chinese ADRs; the 'zero-Covid' policy, potential spillover from the property market; and 'common prosperity' (anti-business) policies. All of these risks have reduced over the last two months of 2022 – some significantly. We expect Chinese equities to continue to rerate in response, and for the positive sentiment to boost other North Asian markets.

Hermes Investment Management Limited February 2023

Federated Hermes Investment Funds Public Limited Company Depositary's Report to the Shareholders For the financial year ended 31 December 2022

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed Depositary to Federated Hermes Investment Funds Public Limited Company ("the Company") provide this report solely in favour of the shareholders of the Company for the year ended 31 December 2022 ("Annual Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, which implemented Directive 2009/65/EU into Irish Law ("the Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Company for this Annual Accounting Period and we hereby report thereon to the shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Annual Accounting period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

For and on behalf of Northern Trust Fiduciary Services (Ireland) Limited 20 April 2023

Independent auditor's report to the members of Federated Hermes Investment Funds plc

Report on the audit of the financial statements

Opinion on the financial statements of Federated Hermes Investment Funds plc (the 'company')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2022 and of the loss for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting frameworks and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Balance Sheet;
- the Income Statement:
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Cash Flow Statement; and
- the related notes 1 to 19, including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation are the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our audit approach

Key audit matters	 The key audit matters that we identified in the current year were: Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss Existence of Financial Assets and Liabilities at Fair Value Through Profit or Loss
Materiality	The materiality that we used in the current year was 1% of Average Net Assets determined in respect of each sub-fund.

Scoping	Our audit is a risk-based approach taking into account the structure of the company, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the company operates.
Significant changes in our approach	No significant changes in our approach were made in the current year.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the company and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the annual accounts, for evidence of any discussions and/or decisions that could impact the company's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the annual accounts.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the [group and parent company] 's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Deloitte.

Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the company of \$15.9bn make up 98.9% of total net assets of \$16.1bn.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Balance Sheet and had the greatest effect on our overall audit strategy.

There is a risk that financial assets and liabilities at fair value through profit or loss are valued incorrectly, that inappropriate valuation methodologies are applied, and that the use of inappropriate assumptions as part of management's estimate reflects inappropriate bias which could result in the valuation being materially misstated.

Refer also to note 8 in the financial statements.

How the scope of our audit responded to the key audit matter

- We obtained the Northern Trust International Fund Administration Services
 (Ireland) Limited SOC 1 Report in order to gain an understanding of and evaluate the
 design, implementation and operating effectiveness of key controls over the
 valuation process for financial assets and liabilities at fair value through profit or
 loss.
- We considered the valuation basis used in light of the valuation policy as stipulated in the company's Prospectus documents and the requirements of IFRS.
- We independently valued the financial assets and liabilities by using independent market feeds. We compared the prices published by independent pricing sources to the investment portfolio
- We ensured the relevant disclosures were included in the financial statements.

Existence of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

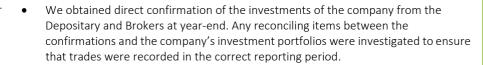

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the company of \$15.9bn make up 98.9% of total net assets of \$16.1bn.

There is a risk that investments recorded might not exist or might not be owned by the company. Investments are considered to be a key driver for the company's performance. Therefore, due to the significance of investments to the company's financial statements, we have determined this as a key audit matter.

Refer also to note 8 in the financial statements.

How the scope of our audit responded to the key audit matter

We obtained the Northern Trust International Fund Administration Services
(Ireland) Limited SOC 1 Report in order to gain an understanding of and evaluate the
design, implementation and operating effectiveness of key controls over the
existence for financial assets and liabilities at fair value through profit or loss

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Basis for determining materiality	1% of Average Net Assets of each Sub-Fund.
Rationale for the benchmark applied	We have considered the average net assets to be the critical component for determining materiality because the main objective of each sub-fund is to provide investors with a total return. We have considered quantitative and qualitative factors such as understanding the company and its environment, history of misstatements, complexity of the company, and reliability of the control environment.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 80% of materiality for the 2022 audit. In determining performance materiality, we considered the following factors:

- our understanding of the company and the industry in which it operates;
- our risk assessment procedures;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to the Board of Directors all audit differences in excess of 5% of materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk-based approach taking into account the structure of the company, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the company operates. The company was incorporated on 23 October 2008 under the laws of Ireland as an open-ended umbrella type investment company with variable capital and limited liability. The company is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities.

The company is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of Northern Trust International Fund Administration Services (Ireland) Limited, Georges Court, 54-62 Townsend Street, Dublin 2, Ireland.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the company's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - o detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - o the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the annual accounts and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud being the valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the company operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the Irish Companies Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we identified Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland;
- in addressing the risk of fraud in revenue recognition, completing the procedures as set out in our Valuation of Financial Assets and Liabilities at Fair value Through Profit or Loss Key Audit Matter and completing an unrealised gain/loss reconciliation; and
- in addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Corporate Governance Statement required by the Companies Act 2014 We report, in relation to information given in the Corporate Governance Statement on page 6 that:

- In our opinion, based on the work undertaken during the course of the audit, the information given in the Corporate Governance Statement pursuant to subsections 2(c) of section 1373 of the Companies Act 2014 is consistent with the company's statutory financial statements in respect of the financial year concerned and such information has been prepared in accordance with the Companies Act 2014. Based on our knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in this information; and
- In our opinion, based on the work undertaken during the course of the audit, the information required pursuant to section 1373(2)(a),(b),(e) and (f) of the Companies Act 2014 is contained in the Corporate Governance Statement.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Other matters which we are required to address

We were appointed by the Board of Directors in 2008 to audit the financial statements for the financial year ended 31 December 2008. The period of total uninterrupted engagement with the company meeting the definition of a public interest entity including previous renewals and reappointments of the firm is 2 years, covering the years ending 31 December 2021 to 31 December 2022.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the company in conducting the audit.

Our audit opinion is consistent with the additional report to the audit committee we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Jim Meegan

For and on behalf of Deloitte Ireland LLP Chartered Accountants and Statutory Audit Firm Deloitte & Touche House, Earlsfort Terrace, Dublin 2 28 April 2023

Notes: An audit does not provide assurance on the maintenance and integrity of the website, including controls used to achieve this, and in particular on whether any changes may have occurred to the financial statements since first published. These matters are the responsibility of the directors but no control procedures can provide absolute assurance in this area.

Legislation in Ireland governing the preparation and dissemination of financial statements differs from legislation in other jurisdictions.

^{*} Federated Hermes Sustainable Global Equity Fund launched on 28 June 2021.

^{**} Federated Hermes Climate Change High Yield Credit Fund launched on 7 September 2021.

^{***} Federated Hermes Emerging Markets Debt Fund launched on 21 September 2021.

^{****} Euro and US Dollar denominated sub-funds are converted to Sterling in the company total column using the year end exchange rates of 1.19104 and 1.35446 respectively. Please note that the figures for "Purchase of financial assets" and "Proceeds from sales of financial assets" on the Cash Flow Statement differ from the figures used in the Schedule of Significant Portfolio Movements, as the Cash Flow Statement is adjusted for any receivable or payable for financial assets at the year end.

1. Incorporation and Principal Activity

Federated Hermes Investment Funds Public Limited Company (the "Company") was incorporated on 23 October 2008 under the laws of Ireland as an open-ended umbrella type investment company with variable capital and limited liability, having segregated liability between its sub-funds, in which different sub-funds may be created from time to time. The Company was authorised as an Undertaking for Collective Investment in Transferable Securities on 24 November 2008 by the Central Bank of Ireland in accordance with the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended ("the UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "Central Bank UCITS Regulations").

As at 31 December 2022 there were 21 sub-funds launched with the following share classes:

Investment Objective, Investment Policy and Dealing Information

Federated Hermes Global Emerging Markets Equity Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets Index.

^{**} The Class Y USD Accumulating share class of the Federated Hermes SDG Engagement High Yield Credit Fund was listed on the Euronext Dublin Global Exchange Market in March 2023.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI World Index or equity securities of companies listed in the countries referenced in this index. The MSCI World Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Index.

Federated Hermes Sustainable European Equity Fund - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe Index).

The sub-fund is an Article 9 fund for the purpose of regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and/or equity related securities of, or relating to, companies in, or companies that derive a large proportion of their revenues from, the developed and emerging European market region. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this Fund is the MSCI Europe Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global High Yield Credit Fund - The investment objective of the sub-fund is to generate a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global High Yield Constrained Index.

Federated Hermes Sustainable Europe ex-UK Equity Fund - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe ex UK Index).

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and equity-related securities of, or related to companies in, or companies that derive substantial revenues from, the developed and emerging European market region, but excluding the United Kingdom. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund the MSCI Europe ex UK Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes US SMID Equity Fund - The investment objective of the sub-fund is to provide long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in equity and/ or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in the US, or companies that derive a large proportion of their income from US activities, and that the Investment Manager has identified as being, in its view, undervalued. These companies will be listed or traded on a Regulated Market worldwide (primarily in the US or Canada).

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the Russell 2500 Index.

Federated Hermes Asia ex-Japan Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a portfolio of equity and equity-related securities of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from, the Asia ex-Japan region. These companies will be listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country Asia ex Japan Investable Market Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Equity ESG Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation by investing in worldwide equity securities with favourable environmental, social and governance ("ESG") characteristics.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI All Country World Index or equity securities of companies listed in the countries referenced in the MSCI All Country World Index. The MSCI All Country World Index is a free float adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

Federated Hermes Multi-Strategy Credit Fund - The investment objective of the sub-fund is to generate a high level of income targeting a high proportion of high yield returns while exhibiting lower volatility relative to the global high yield market.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Small Cap Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small capitalisation companies domiciled in, or that derive a large proportion of their income from, developed markets. The sub-fund may (but is under no obligation to) invest in component securities of the MSCI World Small Cap Index or in securities of companies listed in the countries referenced in this index. The MSCI World Small Cap Index measures the performance of small capitalisation companies across developed markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Small Cap index.

Federated Hermes Absolute Return Credit Fund - The investment objective of the sub-fund is to target a positive investment return (absolute return) over a rolling 12 month period irrespective of market conditions, but there is no guarantee that this will be achieved and your capital is in fact at risk.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes SDG Engagement Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation alongside positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in, or that derive their income from, developed and emerging markets. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World SMID Index.

Federated Hermes Impact Opportunities Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation by investing in companies which will benefit from meeting the world's environmental and social challenges.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation, as more particularly described in the annex to this Supplement.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted and/or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Unconstrained Credit Fund - The investment objective of the sub-fund is to generate capital growth and a high level of income over the long term.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund will manage and adapt its market exposures dependent on market conditions, and the view of where markets will move to in the short, medium and long term. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may choose to reduce the market-related risks within the sub-fund by using FDIs to create a Synthetic Short Exposure to credit indices. In other market conditions, the Investment Manager can also seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long or short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market related risks with the sub-fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

Federated Hermes Global Emerging Markets SMID Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to small and mid capitalisation companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide. The sub-fund will follow a long only equity strategy.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets SMID Cap Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes SDG Engagement High Yield Credit Fund - The investment objective of the sub-fund is to provide total return, through a combination of income and capital growth over a rolling period of any five years, whilst delivering positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Below Investment Grade debt securities on a global basis. The portfolio will be actively managed where all holdings within the sub-fund will have both an investment and an engagement thesis. Each holding will also be aligned with at least one of the United Nations Sustainable Development Goals (the "UN SDGs"). The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs.

The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global High Yield Constrained Index.

Federated Hermes Sustainable Global Equity Fund - The investment objectives of the sub-fund are to: (i) achieve capital growth over a rolling five year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity and equity-related securities. These companies will be listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Climate Change High Yield Credit Fund - The investment objectives of the sub-fund are to (i) provide total return, (through a combination of income and capital growth) over a rolling period of any five years; and (ii) delivering a carbon footprint lower than the Benchmark through investment in debt securities of companies that are adapting their business models to reduce their environmental impact on Climate Change.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of Financial Derivative Instruments ("FDIs"). The securities in which the sub-fund may invest will be selected on a global basis by reference to the Investment Manager's proprietary Climate Change Impact ("CCI") scoring system that indicate how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. The Investment Manager invests on a global basis, however investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries and will be capped at 20% of the sub-fund.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the ICE BofA Global High Yield Constrained USD Hedged Index.

Federated Hermes Emerging Markets Debt Fund - The investment objective of the Fund is to deliver capital growth and a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling five year period, by investing at least 80% in a diversified portfolio of foreign currency denominated debt securities issued by governments, government agencies and other quasi-governmental institutions issued in or by global emerging market countries, or issued by emerging market companies. Exposure to global emerging markets will be primarily obtained by the subfund through foreign currency sovereign and corporate bonds, but the Sub-fund may invest opportunistically into locally denominated debt securities to a maximum of 20%. The sub-fund may invest up to 100% into Below Investment Grade securities, however it will typically invest no more than 75% in such securities during periods of normal market activity. From time to time, the sub-fund may invest into debt securities issued by supranational institutions.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the JP Morgan EMBIGD Global Diversified.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Biodiversity Equity Fund (launched on 21 March 2022) - The investment objectives of the sub-fund are: (i) to achieve capital growth over a rolling five year period; and (ii) to invest in companies that are helping to protect and restore biodiversity or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation, climate change adaptation and the protection and restoration of biodiversity and ecosystems under the Taxonomy Regulation.

The sub-fund will seek to achieve its investment objectives by investing at least 80% in a diversified portfolio of equity and equity-related securities listed or traded on a Regulated Market worldwide. The sub-fund may invest up to 30% of its net assets in emerging markets.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

Federated Hermes China Equity Fund (launched on 20 July 2022) - The investment objectives of the sub-fund is to achieve capital growth over a rolling period of any five years.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Equity and Equity related of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from China or Hong Kong. These companies will be listed or traded on a Regulated Market worldwide. The Investment Manager will seek exposure to securities which it expects to rise in value (known as a long-only strategy).

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI China All Shares Index.

2. Significant Accounting Policies

The significant accounting policies applied in the preparation of these Financial Statements are set out below.

Basis of Preparation

The Financial Statements have been prepared in accordance with the Companies Act 2014, International Financial Reporting Standards ("IFRS") as adopted by the European Union and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

These Financial Statements have been prepared on a going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss.

The preparation of Financial Statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the year. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The main areas of estimation are discussed in this note under the heading "Financial assets and liabilities at fair value through profit or loss".

(a) Standards and amendments to existing standards effective 1 January 2022

There are no new accounting standards or amendments issued and effective which had a material impact on the Financial Statements of the Company.

(b) New standards, amendments and interpretations effective after 1 January 2023 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023, and have not been early adopted in preparing these Financial Statements. None of these are expected to have a material effect on the Financial Statements of the Company.

Foreign exchange translation

(a) Functional and presentation currency

Items included in the Company's Financial Statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). The functional currency of the Federated Hermes Global High Yield Credit Fund, the Federated Hermes Sustainable European Equity Fund and the Federated Hermes Sustainable Europe ex-UK Equity Fund is Euro, which reflects the fact that a large number of the investments in their portfolios are denominated in Euro. The functional currency of all other sub-funds is US Dollar which reflects the fact that a large number of the investments in their portfolios are denominated in US Dollar. All sub-funds denominated in Euro and US Dollar have been converted to Sterling in the total columns. The presentation currency of the Company is Sterling.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency of each sub-fund using the exchange rates prevailing at the dates of the transactions. Assets and liabilities are translated into the functional currency of each sub-fund using exchange rates in effect at the Balance Sheet date.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Income Statement.

Translation differences on financial instruments held at fair value through profit or loss are reported as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement.

2. Significant Accounting Policies (continued)

Foreign exchange translation (continued)

(c) Foreign exchange adjustments on aggregation

For the purpose of aggregating the Financial Statements of the sub-funds, Euro and US Dollar denominated sub-funds in the Financial Statements have been translated to Sterling at the average rate of exchange for the financial year on the Income Statement and at the financial year end rate on the Balance Sheet. The exchange adjustment arising from the difference between the average rate and the year end rate, in addition to the notional exchange adjustment arising from the translation of the opening net assets are shown in the Statement of Changes in Net Assets. The method of translation has no effect on the Net Asset Value per share attributable to the individual sub-funds.

The notional adjustment translation of the Cash Flow movements at the average rate opposed to the financial year end rate is shown in the Cash Flow Statement.

Financial assets and liabilities at fair value through profit or loss

(a) Classification

(i) Assets

In accordance with IFRS 9, the Company classifies its investments based on both the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Company has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Company's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Company's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

As such, the Company classifies its entire investment portfolio as financial assets or liabilities at fair value through profit or loss.

(b) Recognition/derecognition

Purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred all risks and rewards of ownership. Gains and losses on the disposal of financial assets and liabilities are computed on a FIFO basis and are included in the Income Statement. Changes in unrealised gains and losses on financial assets and liabilities are recognised in the Income Statement.

(c) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "financial assets or financial liabilities at fair value through profit or loss" category are presented in the Income Statement in the period in which they arise.

2. Significant Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(c) Measurement (continued)

IFRS 13 Fair Value Measurement requires the sub-funds to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level I Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The type of investments which would generally be included would include equities, american depositary receipts, REITS, warrants and derivatives listed on a securities exchange.
- Level II Quoted prices in markets that are not considered to be active or financial instruments priced
 using inputs other than quoted prices and for which all significant inputs are observable, either directly or
 indirectly (including quoted prices for similar investments in active markets, interest rates and yield curves,
 credit risks, etc.). The type of investments which would generally be included in this category would include
 corporate bonds, government bonds, P-Notes, bank debt and certain over-the-counter derivatives.
- Level III Prices or valuations that require inputs that are both significant to the fair value measurement
 and unobservable (including the Investment Manager's own assumptions and assumptions used by the
 Board of Directors about what market participants would use in determining the fair value of investments).
 The type of investments which would generally be included in this category would include private or debt
 securities issued by private entities and investments priced by the Investment Manager. The inputs or
 methodology used for valuing securities are not necessarily an indication of the risks associated with
 investing in those securities.

(d) Fair value estimation

IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities, warrants, floating rate notes, P-Notes, REITS, american depositary receipts, asset backed securities and bonds) is based on quoted market prices at the Balance Sheet date. The Company utilises the last traded market price for both financial assets and financial liabilities where the last traded price falls within the bid-ask spread. IFRS 13 allows the use of midmarket pricing or other pricing conventions (including last traded price) that are used by market participants as a practical expedient for the exit price. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value. No investments have been valued in this way at year end.

Derivatives

Derivative contracts ("derivatives") are either exchange-traded or over-the-counter ("OTC") contracts. Exchange-traded derivatives are standard contracts traded on a regulated exchange. OTC contracts are private contracts negotiated with counterparties. Derivatives are comprised of futures, forward currency contracts, credit default swaps, swaptions and warrants.

Derivatives are recorded at fair value. The sub-fund values exchange-traded derivative contracts at their official settlement price on the exchange where they are primarily traded. OTC derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to model, model calibration to market-clearing transactions, brokers or dealers quotations, or alternative pricing sources with reasonable levels of transparency.

Futures

Futures contracts are valued at the last reported settlement or closing price as supplied by the exchange on which the contracts are traded and are recorded on a trade date basis. Cash balances held with Morgan Stanley are used as collateral for the futures contracts and are identified as variation margin receivable and payable in the Balance Sheet. Variation margin is valued at face value plus accrued interest which approximates fair value.

2. Significant Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(d) Fair value estimation (continued)

Futures (continued)

Gains or losses from futures contracts are considered realised for accounting purposes on the trade date of the transaction closing or the open position.

Realised gains or losses are included in the Income Statement. Unrealised gains or losses, representing the difference between the future rate and contract rate of open futures positions, are included in the Balance Sheet and the movement in the financial year is included in the Income Statement.

Forward currency contracts

Forward currency contracts are valued at the forward rate and are marked to market on the valuation date. The change in value is included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement. When the contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Warrants

Warrants are securities providing a return generated by a specified underlying equity or basket of equities. Investments in warrants are valued at the last reported trade price of the underlying security as of close of business at the reporting date. The resulting unrealised gains and losses for the financial year are included in the Balance Sheet and Income Statement. Realised gains and losses are included in the Income Statement.

Credit Default Swaps

Credit default swaps are OTC contracts in which the sub-fund pays or receives an interest flow in return for the counterparty accepting all or part of the risk of default or failure to pay off a reference entity on which the swap return is written. Where the sub-fund has bought protection the maximum potential loss is the value of the interest flows the sub-fund is contracted to pay until maturity of the contract. Where the sub-fund has sold protection the maximum potential loss is the nominal value of the protection sold. The credit default swaps are marked to market at each valuation point by a third party vendor and the change, if any, is recorded as a movement in unrealised gain or loss. Payments received or made as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

Swaptions

Swaptions combine the features of two other financial instruments, namely an option and a swap. A swaption involves writing/purchasing options to enter into a swap. When a sub-fund writes/purchases a swaption, a premium is received/paid by the sub-fund and the swaption is initially recognised at the amount of the premium.

The swaption is subsequently "marked to market" to reflect the fair value of the swaption, which is reported within the financial assets/liabilities at fair value through profit or loss on the Balance Sheet and Portfolio Statement. The difference between the premium and the fair value reported on the Balance Sheet gives rise to an unrealised gain/loss which is reported in the Income Statement.

Asset Backed Securities

An asset-backed security is a security that is primarily serviced by the cash flows of a discrete pool of receivables or other financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period plus any rights or other assets designed to ensure the servicing or timely distribution of proceeds to the security holders. The investment characteristics of asset-backed securities are such that principal payments are made more frequently than traditional debt securities. The principal may be repaid at any time because the underlying asset loans or other assets generally may be repaid at any time. The sub-funds record these principal repayments as they arise and realise a gain or loss in the net gains/(losses) on financial assets/ (liabilities) at fair value through profit or loss in the Income Statement in the period in which they occur. Asset Backed Securities are valued at fair value based on their quoted market price at the Balance Sheet date.

2. Significant Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(d) Fair value estimation (continued)

Contingent Convertible Bonds

A contingent convertible bond ("CoCo"), also known as an enhanced capital note ("ECN") is a fixed-income instrument that is convertible into equity if a pre-specified trigger event occurs. A CoCo bond is defined by two elements: a trigger activation and a loss-absorption mechanism. The trigger activation is the pre-specified event that causes the loss-absorption process. It can be either based on a mechanical rule or on supervisors' discretion. The loss-absorption mechanism consists either of conversion into a pre-specified amount of equity or of writing-down the nominal value of the CoCo bond. The trigger, which can be bank specific, systemic, or dual, has to be defined in a way ensuring automatic and inviolable conversion. A possibility of a dynamic sequence exists - conversion occurs at different pre-specified thresholds of the trigger event. Since the trigger can be subject to accounting or market manipulation, a commonly used measure has been the market's measure of bank's solvency. The design of the trigger and the conversion rate are critical in the instrument's effectiveness. CoCo Bonds are valued at fair value based on their quoted market price at the Balance Sheet date.

Income from investments

Bank and bond interest income and expense are recognised in the Income Statement using the effective interest rate method.

Dividends are credited to the Income Statement on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any withholding taxes, which is disclosed separately in the Income Statement, and net of any tax credits.

Cash and cash equivalents

Cash and cash equivalents are valued at their face value together with interest accrued, where applicable. Cash and cash equivalents comprise of cash balances and short term bank overdrafts and short-term highly liquid investments that are readily convertible to known amounts of cash.

Cash received as collateral for derivative positions

Broker cash received as collateral is recorded as an asset on the Balance Sheet as "Cash received as collateral for derivative positions" and a related liability to repay the collateral is disclosed within liabilities as "Cash due to counterparties for derivative positions". Cash received as collateral is valued at face value plus accrued interest which approximates fair value.

Cash pledged as collateral for derivative positions

Cash pledged as collateral to brokers for derivative positions on the initiation of derivative trades and additional collateral posted on these trades are identified in the Balance Sheet as "Cash pledged as collateral for derivative positions". Cash pledged as collateral for derivative positions is not included as a component of cash and cash equivalents in the Balance Sheet and is not available to the sub-funds on demand. Cash pledged as collateral is valued at face value plus accrued interest which approximates fair value.

Net assets attributable to holders of redeemable participating shares

International Accounting Standard 32 "Financial Instruments: Presentation" ("IAS 32") requires entities that issue financial instruments to classify such instruments as liabilities or equity in accordance with the substance of the contractual arrangement and the definitions contained within IAS 32. In this regard, IAS 32 requires that financial instruments that give the holder the right to put the instrument back to the issuer for cash or another financial asset be classified as a liability of the issuer.

2. Significant Accounting Policies (continued)

Net assets attributable to holders of redeemable participating shares (continued)

The redeemable participating shares issued by the Company provide the redeemable participating shareholders with the right to redeem their shares for cash equal to their proportionate share of the Net Asset Value of the Company. Within the context of IAS 32 and IFRS 7 'Financial Instruments: Disclosures' ("IFRS 7"), the existence of the option for the redeemable participating shareholders to put the shares back to the Company in exchange for cash requires the Company to classify the redeemable participating shares as liabilities.

The liability to redeemable participating shareholders is presented on the Balance Sheet as "net assets attributable to holders of redeemable participating shares" and is determined based on the residual assets of the Company after deducting the Company's other liabilities and management share capital.

Operating expenses

The Company is responsible for all normal operating expenses including audit fees, stamp and other duties and charges incurred on the acquisition and realisation of investments. Operating expenses are recognised on an accrual basis.

Income equalisation

Income equalisation is accrued income included in the price of shares purchased and redeemed during the accounting year. The subscription price of shares is deemed to include an equalisation payment calculated by reference to the accrued income of the relevant sub-fund and the distribution in respect of any share will include a payment of capital usually equal to the amount of such equalisation payment. The redemption price of each share will also include an equalisation payment in respect of the accrued income of the relevant sub-fund up to the date of redemption. As a result, equalisation may be positive or negative. Income equalisation is accounted for in the Income Statement.

Taxation

The sub-funds may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

Dilution Adjustments

In the event of a sub-fund being in a Net Subscription or Net Redemption Position that exceeds a predetermined threshold on any Dealing Day, the Company may make a Dilution Adjustment to the Net Asset Value per Share of the relevant Share Classes to cover the Duties and Charges and Spreads, being the costs involved in rebalancing the Fund's portfolio in respect of the net issue of Shares on that Dealing Day. The level of the Dilution Adjustment is determined by the Company and is estimated based on historic information concerning the costs incurred in trading the relevant securities in the relevant markets. If a Fund levies a Dilution Adjustment which is insufficient to discharge all of the costs incurred in the purchase or sale of Investments, the difference will be paid out of the assets of a Fund, which will result in a reduction in the value of a Fund (and a corresponding reduction in the value of the holding of all Shareholders).

During the year ended 31 December 2022, swing pricing adjustments affected the net asset value per share of the following sub-funds, table overleaf shows the total adjustments applied for the year ended 31 December 2022 and 31 December 2021:

2. Significant Accounting Policies (continued)

Dilution Adjustments (continued)

These amounts are included within 'Issue of redeemable participating shares for the year' and 'Redemption of redeemable participating shares for the year' in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

Investment Management Fee Rebate

Where applicable, the investment manager, will pay a rebate to the sub-funds to cap all operating expenses (excluding management fees and share class hedging fees) at or below 20 basis points. The sub-funds accrue these rebates on a daily basis.

3. Cash and Cash Equivalents

Substantially all of the cash assets of the sub-funds are held with The Northern Trust Company ("TNTC"), which is a 100% indirect wholly owned subsidiary of Northern Trust Corporation which has a Standard & Poor's credit rating of A+ and A2 from Moody's.

Northern Trust Fiduciary Services (Ireland) Limited has appointed TNTC as its Global Sub-Custodian.

The cash held with TNTC at 31 December 2022 and 31 December 2021 is detailed in the table below:

	31 December 2022	31 December 2021
Federated Hermes Global Emerging Markets Equity Fund	\$76,496,524	\$48,301,086

Total	£347,062,093	£153,169,926

^{*} Fund launched on 21 March 2022.

Please note that within the cash and cash equivalents balance there is a restricted cash amount of \$6,463,162 (31 December 2021: \$6,463,162) that is applied pro rata to each fund by reference to its individual liability and is set aside for a potential IRS liability for underpaid US Withholding tax, whereby the treaty rate of 15% was being claimed by the Fund instead of the standard rate of 30%, covering a period from January 2013 to March 2018. The Fund has not recorded a liability in the financial statements, as it is not probable that the Fund will have to settle the liability, as per the advice from the Fund's US tax advisors. The Fund has submitted a self-declaration and this is under consideration with the IRS at the date of this report. It is uncertain as to when the IRS will opine on the self-declaration as no set timelines are provided.

^{**} Fund launched on 20 July 2022.

3. Cash and Cash Equivalents (continued)

Federated Hermes Limited, the parent of Hermes Fund Managers Ireland Limited (the "Manager"), has agreed to absorb any potential liability on Federated Hermes Global Equity Fund. If no liability is to be paid, Federated Hermes Limited can claim the restricted cash balance attributable to Federated Hermes Global Equity Fund. With the exception of Federated Hermes Global Equity Fund, the Fund retains the rights and ownership of the restricted cash held.

The standard US withholding rate of 30% has been applied since March 2018.

For a breakdown of the restricted cash by sub-fund, please refer to note 13.

4. Cash Collateral for Derivative Positions

Where derivatives are held on a sub-fund, the sub-funds may pledge/receive collateral as required with the derivative counterparty.

The collateral pledged and received at 31 December 2022 and 31 December 2021 is detailed in the tables below and overleaf:

^{**} The Federated Biodiversity Equity Fund launched on 21 March 2022. The Federated Hermes China Equity Fund launched on 20 July 2022.

Management fees of £97,620,294 (2021: £111,661,677) were charged during the financial year and fees of £14,241,771 (2021: £9,316,329) were payable at year end.

For Federated Hermes Biodiversity Equity Fund, the Investment Manager commits to donating 5% (minus any tax cost) of the annual management fee received (net of rebates and retrocessions) to charities that it believes are helping in the drive to protect and restore biodiversity.

On 1 January 2022, there were management fee reductions on Federated Hermes Global High Yield Credit Fund, Federated Hermes SDG Engagement High Yield Credit Fund and Federated Hermes Climate Change High Yield Credit Fund on the following share classes: A, F, I, P and R.

(b) Advisory Fees (voting and engagement services)

The fee payable to the Advisor on all Share Classes is 0.008% per annum calculated on the value of the subfund at the Commencement Date and each quarter thereafter, payable quarterly in arrears commencing on the Commencement Date. VAT will be added where appropriate.

(c) Administration Fees

The Company has engaged the services of Northern Trust International Fund Administration Services (Ireland) Limited, an indirect wholly-owned subsidiary of Northern Trust Corporation, to provide administration services for a fee. An updated side letter to the Administrator agreement was issued on 25 January 2022. A 10% reduction of fees has been agreed with a retrospective effect from 1 January 2022.

5. Fees and Other Expenses (continued)

(c) Administration Fees (continued)

In respect of the Federated Hermes Global High Yield Credit Fund, the Federated Hermes Multi-Strategy Credit Fund, the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund, the Federated Hermes SDG Engagement High Yield Credit Fund, Federated Hermes Emerging Markets Debt Fund and Federated Hermes Climate Change High Yield Credit Fund, the Administrator is entitled to an annual fee (plus any applicable value added tax) of:

- 0.045% of the Net Asset Value on each of the sub-fund(s) on the first £300,000,000;
- 0.027% of the Net Asset Value on each of the sub-fund(s) on £300,000,000 to £700,000,000;
- 0.0203% of the Net Asset Value of the relevant sub-fund for any amounts in excess of £700,000,000.

In respect of the Federated Hermes Global Emerging Markets Equity Fund, the Federated Hermes Global Equity ESG Fund, the Federated Hermes Global Equity Fund, the Federated Hermes Sustainable European Equity Fund, the Federated Hermes Sustainable Europe ex-UK Equity Fund, the Federated Hermes US SMID Equity Fund, the Federated Hermes Asia ex-Japan Equity Fund, the Federated Hermes Global Small Cap Equity Fund, the Federated Hermes SDG Engagement Equity Fund, the Federated Hermes Impact Opportunities Equity Fund, the Federated Hermes Global Emerging Markets SMID Equity Fund, the Federated Hermes Sustainable Global Equity Fund, the Federated Hermes Biodiversity Equity Fund and the Federated Hermes China Equity Fund the Administrator is entitled to an annual fee (plus any applicable value added tax) of:

- 0.036% of the Net Asset Value on each of the sub-fund(s) on the first £300,000,000;
- 0.018% of the Net Asset Value on each of the sub-fund(s) on £300,000,000 to £500,000,000;
- 0.0113% of the Net Asset Value of the relevant sub-fund(s) for any amounts in excess of £700,000,000.

Administration fees of £2,947,163 (2021: £3,483,524) were charged during the financial year and fees of £634,526 (2021: £716,930) were payable at year end.

(d) Depositary and Sub-Custodian Fees

Northern Trust Fiduciary Services (Ireland) Limited acts as a Depositary of the Company. The Depositary is a Private Limited Company incorporated in Ireland on 5 July 1990 and is an indirect wholly-owned subsidiary of Northern Trust Corporation. On 27 January 2022 a 10% discount on the Depositary's fee was agreed with a retrospective effect from 1 January 2022.

The Depositary is entitled to an annual fee (plus any applicable value added tax) of:

- 0.0099% of the Net Asset Value of the relevant sub-fund on the first £500,000,000;
- 0.00675% of the Net Asset Value of the relevant sub-fund on £500,000,000 to £700,000,000;
- 0.0054% of the Net Asset Value of the relevant sub-fund for any amounts in excess of £700,000,000.

In addition, the Depositary and any relevant Sub-Custodian shall be entitled to recover safekeeping and transaction charges as set out in the Depositary Agreement.

Depositary fees of £1,028,305 (2021: £1,216,753) were charged during the financial year and fees of £226,062 (2021: £227,616) were payable at year end.

Sub-Custody fees of £3,529,879 (2021: £4,181,500) were charged during the financial year and fees of £872,481 (2021: £720,786) were payable at year end.

(e) Directors' Fees

The Company shall pay to the Directors such annual fees for acting as Directors of the Company as the Directors may from time to time agree, provided however that the annual fees of each Director shall not exceed €50,000 without the approval of the Board of Directors. Directors' fees will total not more than €110,000 on a per annum basis. No other remuneration will be payable by the Company to the Directors except for out-of-pocket expenses reasonably incurred by them. Gregory Dulski, Peter Germain, Joseph Kagan and Sylvie McLaughlin do not receive Director's fees from the Company.

5. Fees and Other Expenses (continued)

(e) Directors' Fees (continued)

Directors fees of £36,456 (2021: £35,127) were charged during the financial year and fees of £201 were payable at year end (2021: £450).

(f) Director Support Services

Director Support Services fees of €Nil (2021: €Nil) were charged during the year and fees of €Nil were payable at year end (2021: €Nil).

(g) Remuneration For Audit, Audit Related And Non Audit Work

Deloitte Ireland LLP, as statutory auditors, received €155,875 + VAT (2021: €123,900 + VAT) in relation to the audit of the Company's Financial Statements. There were no other assurance, tax advisory or non audit services provided by the statutory auditors during 2022 or 2021.

(h) Other Fees and Expenses

In addition, each sub-fund will pay the costs and expenses incurred in its operation, including, without limitation, stamp duties, taxes, the fees and expenses of the auditor covered in (g), listing fees, legal expenses, the costs of printing and distributing reports, accounts and any Prospectus, any costs incurred as a result of a change in law or the introduction of any new law (including any costs incurred as a result of compliance with any applicable code, whether or not having the force of law).

All fees and expenses will be charged to the sub-fund in respect of which they were incurred, or where an expense is not considered by the Directors to be attributable to any one sub-fund, the expense will normally be allocated to classes of all sub-funds pro rata to the Net Asset Value of the relevant sub-funds. Details of each of the fees payable at the year end in respect of each sub-fund are disclosed in the Balance Sheet on pages 236 to 242. Details of each of the fees incurred at the year end in respect of each sub-fund are disclosed in the Income Statement on pages 248 to 253.

(i) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. Transaction costs for the year of £12,980,315 (2021: £15,772,582) are expensed in the Income Statement as part of the net fair value gain/loss on financial assets and liabilities at fair value through profit or loss. Only transaction costs which are separately identifiable are disclosed. These include identifiable brokerage charges and commissions, identifiable transaction related taxes and other market charges and separately identifiable transaction costs related to Financial Derivative Instruments.

6. Related Party Disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

(a) Management

The Company has appointed Hermes Fund Managers Ireland Limited as manager (the "Manager"). The Manager has delegated the investment management of the Company to Hermes Investment Management Limited, who also acts as distributor of the Company, and to Federated Investment Counseling. Hermes Investment Management Limited is a wholly-owned subsidiary of Federated Hermes Limited which was wholly owned since March 2022 by Federated Hermes, Inc. Federated Investment Counseling is an indirect subsidiary of Federated Hermes, Inc.

Hermes Investment Management Limited is incorporated under the laws of England and Wales and was established on 1 February 1990. Federated Investment Counseling is a US domiciled company regulated by the US Securities and Exchange Commission, to act as an investment adviser. The investment management fee rates for each of the sub-funds are disclosed in note 5(a).

6. Related Party Disclosures (continued)

(a) Management (continued)

One of the Directors of the Company who served during the financial year, Joseph Kagan, is an employee of Federated Hermes Limited. Peter Germain (resigned as director on 8 April 2022) was an employee of Federated Hermes, Inc. Gregory Dulski was an employee of Federated Hermes, Inc until 1 November 2022 when he became an employee of Federated Hermes Limited. ^{*} Fund launched on 21 March 2022.

(b) Advisor

Federated Hermes Limited has appointed EOS at Federated Hermes Limited as Advisor to provide voting and engagement services. The Advisor is a wholly-owned subsidiary of Federated Hermes Limited, which was 100% owned by Federated Hermes, Inc. The fees for these services are being paid by Hermes Investment Management Limited on the behalf of the Company.

The Advisory fees rate for each of the sub-funds is disclosed in note 5 (b).

(c) Directors Fees

Please see note 5(e) above for details of the Directors fees, the amounts charged for the financial year and the amounts payable at the financial year end.

(d) Director Support Services

Please see note 5(f) above for details of the Director Support Services fees, the amounts charged for the financial year and the amounts payable at the financial year end.

7. Share Capital

On incorporation the authorised share capital of the Company was £1,000,000 divided into 1,000,000 Subscriber Shares of a par value of £1 each and 500,000,000,000 shares of no par value initially designated as participating shares.

^{**} Fund launched on 20 July 2022.

7. Share Capital (continued)

Each sub-fund may issue classes, each of them Distributing or Accumulating shares, in one of the following currencies: Sterling, Euro, US Dollars, Australian Dollar, Canadian Dollar, Chinese Yuan, Japanese Yen, Swiss Franc, Swedish Krona, Norwegian Krone, Danish Krone, Hong Kong Dollar and Singapore Dollar.

Federated Hermes Global Equity ESG Fund may issue Class F, L and R Portfolio Hedged Shares and Federated Hermes SDG Engagement Equity Fund may issue Class F, R, W and X Portfolio Hedged Shares, each of them Distributing or Accumulating shares in all the currencies above.

Federated Hermes Impact Opportunities Equity Fund, Federated Hermes Sustainable Global Equity Fund and Federated Hermes Biodiversity Equity Fund may issue Class F, P, R and X Portfolio Hedged Shares, each of them Distributing or Accumulating shares in all the currencies above.

Federated Hermes Global Emerging Markets Equity Fund may issue Class A, F, G, I, K, L, P, R and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Global Equity Fund may issue Class A, F, I, P, R, and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity may issue Class A, F, I, K, L, M, P, R, W, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged EUR shares are not available for these sub-funds.

Federated Hermes Global High Yield Credit Fund may issue Class A, F, I, K, L, M, P, R and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged EUR shares are not available for this sub-fund.

Federated Hermes US SMID Equity Fund may issue Class A, F, I, K, L, P, R and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Asia ex-Japan Equity Fund may issue Class A, C, F, I, P, R, RC, and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Global Equity ESG Fund may issue Class A, D, F, I, K, L, P, R and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Multi-Strategy Credit Fund may issue Class A, F, I, K, L, P, R and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Global Small Cap Equity Fund may issue Class A, F, I, K, L, P, R, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Absolute Return Credit Fund may issue Class A, F, I, M, P, R, and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes SDG Engagement Equity Fund may issue Class A, F, I, K, L, M, P, R, W, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Impact Opportunities Equity Fund and Federated Hermes Unconstrained Credit Fund may issue Class A, F, I, K, L, M, P, R, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for these sub-funds.

7. Share Capital (continued)

Federated Hermes Global Emerging Markets SMID Equity Fund may issue Class A, F, I, K, L, P, R, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes SDG Engagement High Yield Credit Fund may issue Class A, D, F, I, K, L, M, P, R, W, Y and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Sustainable Global Equity Fund may issue Class A, F, I, K, L, M, P, R, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for these sub-funds.

Federated Hermes Climate Change High Yield Credit Fund may issue Class A, D, F, I, K, L, M, P, R and Z Shares, each of them Distributing or Accumulating with hedged with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Emerging Markets Debt Fund may issue Class A, F, I, K, L, M, P, R, X, and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes Biodiversity Equity Fund may issue Class A, F, I, K, L, M, P, R, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

Federated Hermes China Equity Fund may issue Class A, F, I, K, L, M, P, R, T, W, X and Z Shares, each of them Distributing or Accumulating with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

In addition to the above, all sub-funds may issue Class T Shares and Class T Hedged Shares, each of them Distributing or Accumulating shares, in Sterling, Euro and USD, except for the hedged class in the base currencies of the sub-funds.

Accumulating Share Classes are not intended to distribute dividends to Shareholders. The income and other profits will be accumulated and reinvested on behalf of Shareholders. Dividends, if paid, may be paid out of the net income of each sub-fund including interest and dividends earned by the sub-fund less expenses of the sub-fund.

Distributing Share Classes are intended to declare dividends on the Shares of the Distributing Classes of the sub-fund out of the net income of the sub-fund including interest and dividends earned by the sub-fund less expenses of the sub-fund.

The holders of Shares are entitled to one vote per whole Share and to such dividends as the Directors may from time to time declare.

^{*} Federated Hermes SDG Engagement Equity Fund and Federated Hermes China Equity Fund only.

The Company has the power to redeem the remaining holding of any Shareholder who redeems his/her Minimum Holding of Shares to below the Minimum Holding or its foreign currency equivalent.

Every Shareholder will have the right to require the Company to redeem his/her Shares in the sub-fund on any Dealing Day (save during any period when the calculation of the Net Asset Value is suspended in the circumstances set out in the Prospectus) on furnishing to the Administrator a redemption request. All redemption requests are dealt with on a forward pricing basis, i.e. by reference to the price for Shares calculated at the Valuation Point on the relevant Dealing Day. The request for redemption of Shares must be received before 9.30 am (Irish time) on the relevant Dealing Day.

All the Shares of the sub-fund may be redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the sub-fund, the Net Asset Value of the sub-fund falls below £250,000,000 for any period of time.

The movement in the number of redeemable participating shares during the financial year ended 31 December 2022 was as follows:

8. Financial Risk Management

Strategy in Using Financial Instruments

The sub-funds are exposed to a variety of financial risks in pursuing their stated investment objectives and policies. These risks are defined in IFRS 7 as including credit risk, liquidity risk and market risk (which in turn includes currency risk, interest rate risk and other price risk). The sub-funds take exposure to certain of these risks to generate investment returns on their portfolios, although these risks can also potentially result in a reduction in the sub-fund's net assets.

The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on the sub-funds' performance where it can do so while still managing the investments of the sub-funds in ways that are consistent with each sub-fund's investment objectives and policies.

The risks, and the measures adopted by the Company for managing these risks, are detailed below.

Market Price Risk

Market price risk is defined in IFRS 7 as the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices.

The sub-funds' assets consist principally of bonds, equities, P-notes, american depositary receipts, REITS, floating rate notes, futures, forward currency contracts, credit default swaps, swaptions and asset backed securities.

The values of these instruments are determined by market forces and there is accordingly a risk that market prices can change in a way that is adverse to a sub-funds' performance.

The Company has adopted a number of investment restrictions which are set out in the individual sub-funds' Supplements to the Company's Prospectus and which limit the exposure of the sub-funds to adverse changes in the price of any individual financial asset.

In accordance with Company's policy, the Investment Manager monitors the sub-funds' positions on a regular basis and reports regularly to the Board of Directors. The Board reviews the information on each sub-funds' overall market exposure provided by the Investment Manager at its periodic meetings.

In addition, the Investment Manager manages the exposure of the portfolios to the risk of adverse changes in the general level of market prices through adhering to its formal risk management process, which includes the use of systems and technology to monitor overall market and position risk on a regular basis.

The maximum risk arising from an investment in a financial instrument is determined by the fair value of the financial instruments, or in the case of certain derivatives the nominal value of the underlying assets, except for short positions in derivatives and securities where the loss may potentially be unlimited.

As at 31 December 2022 and 31 December 2021 the overall market exposure for each sub-fund is as shown in the Portfolio Statements, other than for derivatives where the exposure could be greater.

At 31 December 2022 and 31 December 2021, market price risks defined by IFRS 7 applying to each sub-fund are affected by two main components: changes in market prices and currency exchange rates. The sub-funds which hold bonds will be affected by a third component, bond interest rates. IFRS 7 requires a sensitivity analysis showing how the Net Asset Values of the sub-funds would be affected by changes in each of these factors.

Market price and currency exchange rate movements primarily affect the fair values of equity securities and related instruments held on account for each sub-fund.

For details of market price risk sensitivity analysis please refer to market price and sensitivity analysis on pages 373 to 376.

Currency Risk

Currency risk is defined in IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The sub-funds are exposed to currency risk as the assets and liabilities of the sub-funds may be denominated in a currency other than the functional currency of the relevant sub-funds.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset. The Investment Manager may attempt to mitigate these risks through the use of financial derivative instruments.

In accordance with Company policy, the Investment Manager monitors the sub-funds' currency exposure on a regular basis and reports regularly to the Board of Directors.

At 31 December 2022 each sub-fund's currency exposure was as follows:

Monetary Assets are cash and time deposits and Non-Monetary Assets are all other assets.

Interest Rate Risk

Interest rate risk is defined in IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The majority of the sub-funds' financial assets and liabilities are non-interest bearing and any excess cash and cash equivalents are invested at short term market interest rates. As a result, most of the sub-funds are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

The Federated Hermes Global High Yield Credit Fund, the Federated Hermes Multi-Strategy Credit Fund, the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund, the Federated Hermes SDG Engagement High Yield Credit Fund, the Federated Hermes Climate Change High Yield Credit Fund and the Federated Hermes Emerging Markets Debt Fund have/had interest-bearing financial assets and liabilities. As a result, the sub-funds are/were subject to the risk of potentially adverse movements in the prevailing levels of market interest rates. The Investment Manager may from time to time enter into contracts on behalf of the funds that seek to mitigate the effects of these movements.

In accordance with the sub-fund's policy, the Investment Manager monitors the sub-funds interest rate exposures on a regular basis and reports regularly to the Board of Directors, which reviews the information provided by the Investment Manager on significant exposures at its periodic meetings.

Interest Rate Risk (continued)

As at 31 December 2022 the sub-funds' interest rate exposures based on the maturity date were as follows:

Federated Hermes Global High Yield Credit Fund	Up to 1 year €	1-5 5 years €	Over 5 years €	Non interest bearing €	Total €

8. Financial Risk Management (continued)

Credit Risk

Credit risk is defined in IFRS 7 as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Transactions in securities are generally settled or paid for on delivery, or cleared through the appropriate clearing system for the market on which the securities are traded. The risk of default is not considered to be material, as delivery of securities sold is only made once the Depositary has received confirmation of payment. Payment is also only made on a purchase once confirmation of delivery of the securities has been received by the Depositary. The trade will fail if either party fails to deliver the required confirmations.

At 31 December 2022 and 2021 none of the sub-funds' financial assets were past due or impaired.

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Fund, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year-end date 31 December 2022, NTC had a long term credit rating from Standard & Poor's of (A+) (2021: A+).

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Fund's ownership of Other Assets, (as defined under Other Assets in Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Fund holds the ownership based on information or documents provided by the Fund or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Fund, clearly identifiable as belonging to the Fund, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

In addition TNTC, as banker, holds cash of the Fund on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Fund will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Fund's rights with respect to its assets to be delayed.

The Investment Manager (or its delegate) manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of sub-custodian appointments.

To mitigate the risks the sub-funds are exposed to from the use of the counterparties, the Investment Manager employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Investment Manager. The sub-funds only transact with counterparties that are regulated entities subject to prudential supervision, or with credit-ratings assigned by international credit-rating agencies. In addition, the sub-funds' securities are maintained by the sub-custodian in segregated accounts. Cash is also held with the following brokers/counterparties (see note 4):

Barclays	(S&P: A)	Goldman Sachs	(S&P: A+)

Cash held with brokers/counterparties may be subject to counterparty risk and may not be recoverable in the event of an insolvency of the broker/counterparty.

8. Financial Risk Management (continued)

Credit Risk (continued)

The Investment Manager monitors the credit quality and financial position of the Depositary and reviews the SOC 1 of the Custodian. The Company is additionally exposed to credit risk arising from the counterparties used in OTC derivatives. This risk is mitigated by the Company only engaging with counterparties which meet the Central Bank's UCITS regulatory requirements and are approved by the Investment Manager and are continually monitored.

The Company has credit risk exposure to issuers of debt securities and P-Notes held as part of the Company's investment portfolio. The Company limits its exposure to individual issuers of debt securities and P-Notes in accordance with the investment restrictions set out in the Company's Prospectus. Impairment provisions are provided for any losses that have been incurred by the balance sheet date. There were no impairment provisions required as at 31 December 2022 (2021: None).

The Federated Hermes Global Emerging Markets Equity Fund, the Federated Hermes Global High Yield Credit Fund, the Federated Hermes Multi-Strategy Credit Fund, the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund, the Federated Hermes Global Emerging Markets SMID Equity Fund, the Federated Hermes SDG Engagement High Yield Credit Fund, the Federated Hermes Climate Change High Yield Credit Fund and the Federated Hermes Emerging Markets Debt Fund invest in debt securities and P-Notes at the financial year end date. As at 31 December 2022 and 31 December 2021, the exposure to credit risk on the Portfolio Statements to debt securities and P-Notes using ratings from S&P are shown as follows:

^{*} Fund launched on 21 March 2022.

Liquidity Risk

Liquidity risk is defined in IFRS 7 specifically as the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The sub-funds are exposed to daily cash redemptions of redeemable participating shares. The sub-funds invest the majority of their assets in securities and other instruments that are traded on an active market and which are considered to be liquid, as under normal market conditions they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses.

In accordance with Company policy, the Investment Manager monitors the sub-funds' liquidity on a regular basis and reports regularly to the Board of Directors.

The maturities of the relevant financial assets and liabilities at fair value through profit or loss are set out in the individual sub-fund portfolio statements. All the sub-funds' other liabilities had maturities of up to one month after year end.

^{**} Fund launched on 20 July 2022.

Fair value measurement

The following is a summary of the inputs used to value each sub-funds assets and liabilities carried at fair value as at 31 December 2022, as discussed in note 2.

8. Financial Risk Management (continued)

Fair value measurement (continued)

Transfers between levels are deemed to occur at the beginning of the year.

No investments were transferred between Level I and Level II during the year ended 31 December 2022 (2021: Nil). The valuation techniques used by the Company are explained in the accounting policies in note 2. There were no changes in valuation technique during the financial year. At 31 December 2022, there was one security on the Federated Hermes Emerging Markets Debt Fund classified at level 3.

Sensitivity analysis

Some limitations of sensitivity analysis are:

- markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

The portfolios as at 31 December 2022 were stress tested using a risk based model by applying a 20% movement to their benchmark (100bps for interest rate risk) to determine the percentage change disclosed below:

	Change (%)	Net Asset Value resulting from stress test	Per Share

Methodology for Calculating Global Exposure and Leverage

The sub-funds are required by the Prospectus to calculate their exposure to derivatives on a daily basis using one of two alternate methods, the Commitment Approach or Value at Risk (VaR). The table below details the approach each sub-fund takes.

Sub-Fund Name	Approach
Federated Hermes Global Emerging Markets Equity Fund	Commitment Approach
Federated Hermes Global Equity Fund	Commitment Approach
Federated Hermes Sustainable European Equity Fund	Commitment Approach
Federated Hermes Global High Yield Credit Fund	Commitment Approach
Federated Hermes Sustainable Europe ex-UK Equity Fund	Commitment Approach
Federated Hermes US SMID Equity Fund	Commitment Approach
Federated Hermes Asia ex-Japan Equity Fund	Commitment Approach
Federated Hermes Global Equity ESG Fund	Commitment Approach
Federated Hermes Multi-Strategy Credit Fund	VaR
Federated Hermes Global Small Cap Equity Fund	Commitment Approach
Federated Hermes Absolute Return Credit Fund	VaR
Federated Hermes SDG Engagement Equity Fund	Commitment Approach
Federated Hermes Impact Opportunities Equity Fund	Commitment Approach
Federated Hermes Unconstrained Credit Fund	VaR
Federated Hermes Global Emerging Markets SMID Equity Fund	Commitment Approach
Federated Hermes SDG Engagement High Yield Credit Fund	Commitment Approach
Federated Hermes Sustainable Global Equity Fund	Commitment Approach
Federated Hermes Climate Change High Yield Credit Fund	Commitment Approach
Federated Hermes Emerging Markets Debt Fund	Commitment Approach
Federated Hermes Biodiversity Equity Fund	Commitment Approach
Federated Hermes China Equity Fund	Commitment Approach

The commitment conversion methodology for standard derivatives is the market value of the equivalent position in the underlying asset. This may be replaced by the notional value or the price of the futures contract where this is more conservative. Please refer to the relevant portfolio statements for the notional value of the futures contracts.

VaR is a method of estimating potential loss due to market risk, rather than a statement of leverage, using a given confidence level, or probability, over a specific time period and assuming normal market conditions. The VaR is calculated using a Historical Simulation model carried out in accordance with regulatory guidelines.

Value at Risk (VaR)

The table below provides an analysis of the VaR measures and leverage levels* for the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund and the Federated Hermes Multi-Strategy Credit Fund which are the only sub-funds to use the VaR approach.

	Federated Hermes Absolute Return Credit Fund		Federated Hermes Unconstrained Credit Fund		Federated Hermes Multi-Strategy Credit Fund	
Fund Risk Characteristics	2022	2021	2022	2021	2022	2021
VaR as at the year end	2.28%	0.88%	3.03%	1.71%	2.99%	1.62%
Lowest leverage level employed during the year	144.30%	164.00%	158.70%	142.10%	119.30%	193.30%
Highest leverage level employed during the year	221.20%	240.20%	186.50%	197.10%	130.40%	228.10%
Average leverage level employed during the year	168.50%	206.90%	169.00%	181.80%	125.40%	213.80%
Lowest VaR utilised during the year**	0.78%	0.85%	1.78%	1.30%	1.60%	1.08%
Highest VaR utilised during the year**	2.88%	1.12%	4.80%	2.02%	4.61%	2.19%
Average VaR utilised during the year**	1.88%	0.94%	3.50%	1.68%	3.37%	1.42%

Some limitations of this VaR analysis are listed below:

- The models are based on historical data and cannot take account of the fact that the future market price movements, correlation between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- The market price information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of the probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- Future market conditions could vary significantly from those experienced in the past.
- * The leverage has been calculated using the sum of the notionals of the derivatives used.

Offsetting Financial Assets and Liabilities

The sub-funds enter into derivative transactions under International Swaps and Derivatives Association (ISDA) master agreements.

In general, under ISDA master agreements the amounts owed by each counterparty on a single day in respect of a single transaction outstanding in the same currency are aggregated into a single net amount that is payable by one party to the other. In certain circumstances — e.g. when a credit event such as a default occurs, all outstanding transactions (or certain transactions, specified as "Affected Transactions") under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of such transactions.

ISDA master agreements can be amended to allow for multi-transactional, cross currency or cross product netting.

The above agreements do not meet the criteria for offsetting in the Balance Sheet. This is because the Company does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the counterparty or other credit events.

^{**} The VaR utilised during the year is based on the 20% absolute VaR limit.

Offsetting Financial Assets and Liabilities (continued)

10. Soft Commission Arrangements

There were no soft commission arrangements affecting the Company during the financial year ended 31 December 2022 or 31 December 2021.

11. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

11. Taxation (continued)

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of redeemable participating shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; and
- (b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

12. Net Asset Value Per Redeemable Participating Share

The Net Asset Value per redeemable participating share of each sub-fund of the Company is determined by dividing the value of the net assets of the sub-fund by the total number of redeemable participating shares in issue.

13. Contingent liabilities and outstanding commitments

Contingent liabilities at the balance sheet date related to restricted cash held to settle any potential US Withholding tax liability per sub-fund. These were as follows:

Federated Hermes Global Equity Fund Federated Hermes US SMID Equity Fund Federated Hermes Asia ex-Japan Equity Fund Federated Hermes Global Equity ESG Fund Federated Hermes Multi-Strategy Credit Fund Federated Hermes Global Small Cap Equity Fund Federated Hermes SDG Engagement Equity Fund Federated Hermes Impact Opportunities Equity Fund	WHT as at 31 Dec 2022 (2,075,404.54) (3,864,510.76) (46,922.42) (361,273.61) (1,096.89) (106,637.91) (4,772.58) (2,542.85)
	(6,463,161.56)
	WHT as at 31
	Dec 2021

^{*} Fund launched on 21 March 2022.

16. Efficient Portfolio Management

The Company may, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments relating to transferable securities and money market instruments, provided that such techniques and instruments are used for efficient portfolio management purposes. Such techniques and instruments may also, on behalf of each sub-fund, include foreign exchange transactions which alter the currency characteristics of transferable securities held by the Company. The Company may also, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities.

The actual techniques employed by the relevant sub-funds are as follows:

- Northern Trust hedging across all portfolios
- Currency Hedging within the credit portfolios
- Rates hedging within the credit portfolios
- Market exposure management within the credit portfolios (Options on Index and Index positions)

Realised gains and losses on financial instruments used for efficient portfolio management are included in the Income Statement.

^{**} Fund launched on 20 July 2022.

17. Significant Events During The Financial Year

On 1 January 2022, there were management fee reductions on Federated Hermes Global High Yield Credit Fund, Federated Hermes SDG Engagement High Yield Credit Fund and Federated Hermes Climate Change High Yield Credit Fund on the following share classes:

Class	Management Fee (Max.)	New Management Fee (Max.)
Α	1.15%	1.10%
F	0.65%	0.60%
I	0.65%	0.60%
Р	0.65%	0.60%
R	1.30%	1.20%

An updated side letter to the Administration agreement was issued on 25 January 2022. A 10% reduction of fees was agreed with a retrospective effect from 1 January 2022.

An updated side letter to the Depositary agreement was issued on 27 January 2022. A 10% reduction of fees was agreed with a retrospective effect from 1 January 2022.

On 28 January 2022, the Federated Hermes Global Small Cap Equity Fund and Federated Hermes US SMID Equity Fund Supplements were updated to enhance ESG wording.

Events arising in Ukraine, as a result of military action being undertaken by Russia in Ukraine in February 2022, may impact on securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange. While certain of the Company's sub-funds did have some exposure to Russian equity securities at the time Russia commenced its military action these have since been sold and as at the date of approval of these Financial Statements there is no exposure to Russian equity securities in any of the Company's sub-funds. Certain of the Company's sub-funds also had exposure to Russian bonds and have been selling down these positions since March 2022. As at 31 December 2022, the Federated Hermes Emerging Markets Debt Fund held one Russian Bond which was worth 0.06% of the net assets attributable to holders of redeemable participating shares of the sub-fund (31 December 2021: three securities worth 1.75%). The Directors continue to monitor developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia.

The Federated Hermes Biodiversity Equity Fund launched on 21 March 2022.

On 1 April 2022, Hermes Fund Managers Limited (HFML), the parent of Hermes Fund Managers Ireland Limited (the "Manager") changed its name to Federated Hermes Limited (FHL) as part of a rebranding exercise. The name change followed completion on 14 March 2022 of the acquisition by Federated Hermes, Inc. (FHI) of the remaining 10% stake in HFML held by certain senior management. FHL is now a wholly owned (indirect) subsidiary of FHI.

Effective 8 April 2022, Peter Germain resigned as Director.

On 5 May 2022, an extraordinary general meeting ("EGM") of the Federated Hermes Sustainable Global Equity Fund was convened, where Shareholders of the sub-fund were asked to consider passing an ordinary resolution approving an increase of the sub-fund's exposure to emerging markets from 20% to 30%. The resolution was passed and the changes took effect from 5 August 2022.

On 14 June 2022, the Federated Hermes Impact Opportunities Equity Fund and Federated Hermes Sustainable Global Equity Fund Supplements were updated to reflect a reduction to the restriction on investments that generate revenue from Tobacco, from 10% to 5%.

On 14 June 2022, the Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund Supplements were updated to remove reference to Russia and Turkey from the Investment Policy.

17. Significant Events During The Financial Year (continued)

On 14 June 2022, the Company's Prospectus and Supplements were updated to reflect the non-material changes detailed below:

- The Company and the manager of the Company's new registered address 7/8 Upper Mount Street, Dublin 2. Ireland. D02 FT59:
- the change in name of Hermes Fund Managers Limited to Federated Hermes Limited;
- the addition of Federated Investment Counseling ("FIC") in the Prospectus as an appointed investment manager for the Federated Hermes Emerging Markets Debt Fund only and to amend the relevant Supplements accordingly:
- the inclusion of a definition of "Controversial Weapons" in the Prospectus and to update each Supplement accordingly;
- expanding the Health Pandemic Risk statement;
- the inclusion of a new Thematic Risk statement in the Prospectus with a cross reference included in the Federated Hermes Impact Opportunities Equity Fund and Federated Hermes Biodiversity Equity Fund Supplements only;
- moving the list of investment exclusions, previously outlined in the investment policy of the Federated Hermes Global Small Cap Equity Fund, Federated Hermes US SMID Equity Fund and Federated Hermes SDG Engagement Equity Fund Supplements, to the investment strategy section;
- · updating the taxation section of the Prospectus for legislative changes; and
- the inclusion of Qatar as an eligible market for the Company.

Federated Hermes China Equity Fund launched on 20 July 2022.

On 11 November 2022, the Company's Prospectus and Supplements were updated to reflect the below:

- Added risk relating to (i) reliance on third party providers and (ii) ESG
- Inclusion of Kuwait as an eligible market
- Amend the conflict of interest statement to reflect the integration of sustainability risk.
- Change the description of the limited share classes to allow access to such share classes in exceptional circumstances, with Director approval;
- Exclusions below added to Federated Hermes Asia ex-Japan Equity Fund and Federated Hermes China Equity Fund:
- Companies that generate revenue from the manufacture of Controversial Weapons or by providing either an essential and/or tailor-made product or service to the manufacturers of Controversial Weapons and companies that generate over 5% of their revenues from production of conventional weapons;
- Companies that generate revenues from the production of tobacco products and companies that receive over 10% of their revenues from tobacco distribution;
- Companies that generate over 5% of their revenue from the mining or energy generation of thermal coal; and
- Companies that generate over 5% of their revenues from adult entertainment products

On 1 December 2022, all Supplements were updated to include SFDR annex (pre-disclosure).

On 1 December 2022, the Federated Hermes SDG Engagement Equity Fund and the Federated Hermes SDG Engagement High Yield Credit Fund were reclassified from Article 9 to Article 8 under SFDR.

The Federated Hermes New China Equity Fund was approved by the Central Bank of Ireland on 21 December 2022.

18. Subsequent Events

On 17 February 2023, Federated Hermes Absolute Return Credit Fund Supplement was updated to clarify the use of Climate Change Impact ("CCI") scores during the investment process.

On 17 February 2023, Federated Hermes Biodiversity Equity Fund Supplement was updated with exclusion increased from 5% to 10% for companies that receive revenues from alcohol distribution.

18. Subsequent Events (continued)

Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

On 21 March 2023, the Class Y USD Accumulating Share class and the Class Y JPY Accumulating Hedged Share class of The Federated Hermes SDG Engagement High Yield Credit Fund were listed on Euronext Dublin.

The Federated Hermes Emerging Markets Debt Fund Supplement was updated on 19 April 2023 to reflect changes to the sustainability indicators and the policy on assessing companies for good governance.

Up to the date of approval of these Financial Statements there have been no other significant events affecting the Company subsequent to the year end, which would impact on the Financial Statements for the financial year ended 31 December 2022.

19. Approval Of Financial Statements

The Financial Statements were approved by the Board of Directors on 20 April 2023 for filing with the Central Bank of Ireland and circulation to shareholders.

Federated Hermes Investment Funds Public Limited Company Unaudited Manager Remuneration Disclosure

Hermes Fund Managers Ireland Limited ("HFMIL") is the appointed management company of Federated Hermes Investment Funds Plc (the "Company") and has established a remuneration policy (the "Remuneration Policy") in such capacity in accordance with the UCITS V Directive ("UCITS V") and related guidance, including, in particular, the European Securities and Markets Authority ("ESMA") Guidelines on sound remuneration policies under UCITS V Directive (ESMA/2016/575) (the " UCITS ESMA Guidelines").

Remuneration

The Remuneration Committee of HFMIL has established a Remuneration Philosophy and policy, the purpose of which is to ensure that the remuneration arrangements of the "Identified Staff" (Board of Directors, Designated Persons and control functions and risk takers), are

- (i) consistent with and promote sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of the UCITS managers or the Company; and
- (ii) consistent with HFMIL's business strategy, objectives, values and interests and includes measures to avoid conflicts of interest.

HFMIL complies with the UCITS remuneration principles in a way and to the extent that is appropriate to the size, internal organisation, nature, scope and complexity of the Company's activities.

HFMIL has appointed Hermes Investment Managers Limited ("HIML"), a UK domiciled company regulated by the UK Financial Conduct Authority, and Federated Investment Counseling ("FIC"), a US domiciled company regulated by the US Securities and Exchange Commission, to act as investment managers of certain sub-funds of the Company. HFMIL has not paid remuneration to staff of any delegate to whom investment management functions have been delegated by HFMIL. Instead, the Company pays HFMIL a management fee as referred to in Note 5 to these financial statements and out of this fee HFMIL discharges the fees of the investment manager.

HFMIL's Remuneration Policy is reviewed annually as required under Regulation 24B(1)(b)(c) and (d) of the UCITS Regulations and remains appropriate having regard to the nature, scale and complexity of the manager and its activities.

Sustainable Wealth Creation

HFMIL is committed to its business purpose of Sustainable Wealth Creation that enriches investors, society and the environment and being at the forefront of and developing industry best practice. Part of this is ensuring that its Remuneration Policy incorporates consideration of stewardship and the integration of sustainability performance and risk in both HFMIL's investment activities and its wider operations. The Remuneration Policy is intended:

- To incentivise senior management to drive HFMIL's strategy and initiatives in line with HFMIL's business
 purpose of sustainable wealth creation and ensure that through appropriate stewardship HFMIL's strategy
 and initiatives are at the heart of all the firm's key business and operational processes.
- To promote best practice integration of Investor Stewardship and ESG (Environmental, Social and Governance) factors including the delivery of sustainable outcomes in the investment process and decision making.
- To provide HFMIL's employees with performance objectives relating to responsibility as appropriate for their role.
- To ensure that sustainability risks are considered as part of HFMIL's risk reporting and performance against risk appetite.

All employees are assessed against responsibility related objectives and behaviours in their annual performance assessment which informs annual bonus outcomes. This is supported by the co-investment of deferred bonuses in funds to align employees to longer term investment performance after the bonus has been awarded.

Federated Hermes Investment Funds Public Limited Company Unaudited Manager Remuneration Disclosure (continued)

Employee remuneration disclosure

The table below provides an overview of aggregate total remuneration paid by HFMIL to all employees that support the Company.

Remuneration and headcount includes 2022 Leavers.

	Headcount	Total Remuneration (£'000s)
Employees of HFMIL	19	2,475
Total remuneration of employees of HFMIL		
of which		
Fixed remuneration		1,588
Variable remuneration		887

Consistent with ESMA's Guidelines on sound remuneration policies under the UCITS Directive the information disclosed above is in a way and to the extent that it is appropriate to the size, internal organisation and the nature, scope and complexity of its activities of HFMIL.

Information for investors in Switzerland

The Company is an umbrella investment company with variable capital incorporated with limited liability in Ireland. It has appointed ACOLIN Fund Services AG, Leutschenbachstrasse 50, CH-8050 Zurich as representative and NPB Neue Privat Bank AG, Limmatquai 1/am Bellevue, P.O. Box, CH-8024 Zurich as paying agent for Switzerland. The prospectus, the key information documents or the key investor information documents, memorandum and articles of association and a list of the purchases and sales as well as the annual and semi-annual reports can be obtained free of charge from the representative, ACOLIN Fund Services AG.

Performance Record

Unaudited Performance Record for the year ended 31 December 2022 and for the last five calendar years (2021 – 2017).

¹ On 2 June 2021, classes J and S converted to class L.

- 2 On 2 December 2021, classes A and B converted into classes I and A respectively.
- 3 This share class launched in 2022 therefore the performance record was calculated based on the period from date of launch to the year ended 31 December 2022. Please refer to Note 1 on page 281 of these financial statements for further details.
- 4 The R USD Accumulating Class of the Hermes Global Small Cap Equity Fund was launched on 15 May 2015. The Class was fully redeemed on 10 August 2017 and was subsequently relaunched on 20 June 2018. As a result, there is no performance data available for the year ended 31 December 2017.
- * The Hermes SDG Engagement Equity Fund launched on 29 December 2017 which was the final day of that financial year. As a result, there is no data available for this sub-fund for 2017.
- ^ This share class was fully redeemed during 2020 therefore there is no performance record included for 31 December 2020.

Source: The returns stated above are annualised and calculated from the NAV per share as disclosed in the financial statements of the Company for the year ended 31 December 2022.

Past performance is not a guide to current or future performance. The value of an investment can fall as well as rise resulting from fluctuations and investors may not get back the amount originally invested. This performance data does not take account of the commissions and costs incurred on the issue and redemption of redeemable participating shares.

For further details of share classes launches, please refer to Note 1 and 6 of these financial statements.

The information was established by the Administrator, Northern Trust International Fund Administration Services (Ireland) Limited and is based on the data contained in the Income Statement for the financial statements for the year ended 31 December 2022 and for the year ended 30 December 2021 (Fund management fees, administration fees, custodian fees, taxes and duties, all other commissions and expenses appearing as per the breakdown of the Income Statement and not already included in any of the foregoing categories).

The total expense ratio (TER) was calculated based on the version currently applicable of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association Switzerland (AMAS).
