GQG Partners Global Equity Fund (the "Fund")

a sub-fund of GQG Global UCITS ICAV (the "ICAV"); Manager: Bridge Fund Management Limited.

Class I EUR Accumulating (IE00BH480S68)

OBJECTIVE AND INVESTMENT POLICY

The Fund's investment objective is to seek long term capital appreciation.

The Fund may invest in Equity and ELS of companies with any market capitalisation and in any sector located anywhere in the world including, but not limited to, Emerging Market Countries and the United States. The ELS in which the Fund will invest include depositary receipts, which are certificates typically issued by a bank or trust company that represent ownership interests in securities of non-U.S. companies. The Fund will typically hold between 40 and 60 investments with no single portfolio holding anticipated to exceed 7% of the portfolio value.

The Fund will exclude investments in companies that derive more than 25% of their revenue from tobacco. In addition, no investments will be made in companies associated with the production of controversial weapons such as anti-personnel mines, cluster munitions, depleted uranium and biological or chemical weapons (i.e. companies screened out by the MSCI ex-Controversial Weapons Index).

The Fund may use the following FDIs for investment purposes: participation notes or participatory notes (which do not embed leverage) and/or LEPOs to gain access to inaccessible securities.

Investments may also include securities listed on the Russian market (up to 30% of NAV) and China A Shares purchased using the StockConnect. On an ancillary basis the Fund may invest up to 10% of its NAV in other UCITS and exchange traded funds.

For Accumulating classes, any income or gains of the Fund (net of expenses) will be accumulated and reinvested into the NAV of the Fund. For

Distributing classes, any income less expenses earned will be distributed in accordance with the distribution policy in the prospectus.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

Investors can buy or sell shares on any day on which banks are open for business in Dublin and London.

Recommendation: This Fund is not suitable for investors unable to maintain a long term investment.

Equities: securities representing an equity instrument in a company.

ELS: equity linked securities such as depositary receipts, participatory notes and LEPOs.

Emerging Market Countries: every country except the U.S., Canada, Japan, Australia, New Zealand, and most of the countries in Western Europe.

LEPOs: Low Exercise Price Options, an FDI where the price to exercise the option to buy/sell the underlying asset is close to zero.

FDIs: a derivative contract between two or more parties whose value depends on the rise and fall of the relative value/price of an underlying asset.

NAV: net asset value of the Fund.

RISK AND REWARD PROFILE

The Fund is in category 6 as assets it holds have historically been subject to moderate to high levels of price fluctuation. This indicator above is based on partially simulated data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Emerging Market Countries Risk: developing country securities are subject to greater social, political, regulatory, and currency risks than developed market securities. Certain countries, such as Russia and China, may also have greater risks of lack of investor protection, criminal activity and unclear tax regulations. There is also a heightened risk that monies from the Fund's investments may be subject to government restrictions on payments outside of the issuers' country. These factors may impact the liquidity and value of such securities and, consequently, the value of the Fund.

Liquidity Risk: the Fund may have difficulty buying or selling certain securities readily which may have a financial impact on the Fund.

Currency Risk: changes in exchange rates may reduce or increase the value of non-U.S. Dollar denominated assets held by the Fund.

Class Currency Risks: (Hedged Classes) Currency hedging may not be successful in mitigating the effects of exchange rate fluctuations on non-USD

classes. (Unhedged Classes) performance of unhedged classes may be affected by changes in exchange rates between the class currency and the US Dollar.

Equities & ELS Risk: the values of Equities and securities based on them are subject to changes in the issuing (or related for ELS) company's financial condition and overall market and economic condition as well as market perception.

Investment Management Risk: the Fund may not achieve its investment objective. Loss of one or more Investment Manager employees could impair the Fund's ability to realise its investment objectives.

Volatility Risk: prices of investments are volatile and affected by many factors, including changing supply and demand relationships, interest and exchange rate fluctuations, international events and government policies and actions with respect to economic, exchange control, trade, monetary, military and other issues.

FDI and Leverage Risk: FDI may fluctuate in value rapidly and leverage embedded in FDI may cause losses that are greater than the original amount paid for the FDI.

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

These risk factors are not exhaustive. Please review the "Investment Risks and Special Considerations" sections in the prospectus and supplement.
