INFORMATION ABOUT INVESTMENTS AND MANAGEMENT

Classification "Diversified" UCITS

Investment Objective

The Fund's investment objective is to outperform its benchmark index, the Exane Convertibles Index - Euro (closing price), principally by the active management of convertible bonds in the eurozone.

Benchmark

The benchmark is the Exane Convertibles Index - Euro.

The Exane Convertibles Index - Euro (ECI Euro) is composed of the 50 principal convertible bonds in the eurozone, denominated in euros, weighted by outstanding issue size.

The calculation of the index is explained fully in the detailed memorandum.

The Fund does not seek to replicate the index, but to outperform it. As such, the performance of the index may be different from that of the Fund.

However, the market risk of the Fund is similar to that of the benchmark.

Investment strategy

- Strategy employed

The Fund adopts a risk-controlled active management style aimed at outperforming its benchmark.

To achieve the Fund's investment objective, the manager will use a combination of approaches to select underlying securities based firstly on the potential appreciation of the underlying convertible bonds, and secondly on investment vehicles according to their technical characteristics.

- ▶ The investment universe is principally so-called "mixed" convertibles that benefit from significant sensitivity to equity markets and can benefit from periods of rising value, as well as being able to cushion the impact of a downturn in equity markets.

The portfolio's asset types are described in the detailed memorandum.

- ▶ The Fund's portfolio will also be composed of fixed-rate bonds, EMTNs (Euro Medium Term Notes), negotiable debt securities, fixed-rate annual interest treasury bills, inflation-linked variable-rate bonds, and securitisation vehicles (chiefly via special purpose vehicles) and mortgage-backed bonds. These will be exclusively Investment Grade issues.
- ▶ The duration of the selected securities ensures that the Fund's overall sensitivity is maintained between 1 and 5.
- The Fund may invest up to 10% of net assets in units or shares in coordinated European or French UCITS that have the same characteristics as the securities acquired directly.
- The Fund may deal in derivatives traded on regulated, organised or over-the-counter markets in order to expose or hedge the portfolio in terms of interest rate risk or exchange rate risk up to a maximum commitment of 100% of the Fund's net assets. The manager will use these instruments to deal in markets quickly to adjust exposure to interest rate risk without overexposure in the markets.
- For cash management purposes and for managing exposure to rates markets, up to 10 % of the Fund's net assets may be in trackers (listed index entities).
- For cash management and related purposes, the Fund may make deposits, enter into repurchase agreements, use money market funds and, on an exceptional and temporary basis, borrow cash.

Risk profile

Your money will be invested primarily in financial instruments selected by the financial manager. These instruments will be subject to market fluctuations.

- Interest rate risk

Investors are exposed to interest rate risk. Interest rate risk is the risk that bond market interest rates may rise, which would cause bond prices to fall and consequently the net asset value of the Fund to fall.

- Credit risk

This is the possibility that the issuer's credit rating may fall, which will negatively impact the share price and thus the Fund's net asset value.

- Risk linked to investments in convertible bonds

The value of convertible bonds depends on several factors: the level of interest rates, changes in the prices of the underlying equities, changes in the prices of derivatives incorporated in the convertible bond. These various factors may entail a fall in the Fund's net asset value.

- Equity risk

If the assets underlying the convertible bonds fall, or if the equities held directly in the portfolio or the indices to which the portfolio is exposed fall, the Fund's net asset value will fall.

- Capital risk

Investors will be exposed to the risk of losing their invested capital, since the Fund does not offer a capital guarantee.

- Full details of all the risks that may be faced by the Fund are provided in the detailed memorandum.

FCP GROUPAMA CONVERTIBLES is aimed at investors wishing to enhance their savings by combining the performance of both interest rate and equity markets.

Proportion suitable for investment in the Fund: All equity investments may be subject to significant fluctuations. The amount that might reasonably be invested in FCP GROUPAMA CONVERTIBLES should be determined with reference to the investor's personal situation. To determine this, investors should take into consideration their personal assets, their needs at the present time and over the next three years, and the level of risk they are willing to accept.

Investors are also recommended to adequately diversify their investments to prevent complete exposure to the inherent risks of the Fund.

Investment diversification: This should be achieved by investing in different classes of assets (money market instruments, bonds and equities), and in different specific sectors and geographical regions so as to spread risks more effectively and optimise portfolio management by taking market trends into account.

Recommended minimum investment term

More than three years.

INFORMATION ON FEES, COMMISSIONS AND TAXATION

Fees and commissions

Subscription and redemption fees

Subscription and redemption fees are added to the subscription price paid by the investor or deducted from the redemption price. Fees paid to the Fund are used to compensate the Fund for the expenses for investment or divestment of the Fund's assets. The remaining fees accrue to the management company, distributor, etc.

Operating and management fees

These fees include all fees charged directly to the Fund except for transaction fees. Transaction fees include intermediary fees (e.g. brokerage fees, stock market taxes, etc.) and transaction commission, if any, that may be charged, notably by the custodian and the management company.

The following may be added to the operating and management fees:

- ▶ Outperformance commissions. These reward the management company if the Fund's performance exceeds its objectives. They are therefore charged to the Fund;
- ▶ Transaction commissions charged to the Fund;
- ▶ A portion of the income from transactions involving the temporary acquisition and sale of securities according to a fixed calculation method.

For further details on the fees actually charged to the Fund, please refer to Section B of the Simplified Prospectus.

Operating and management fees include in particular the costs of financial management, administrative and accounting management, and custody, holding and audit fees.

Costs generated by investments in other UCITS and/or investment funds

Some funds may invest in other UCITS or investment funds not governed by French law (known as "target funds"). The acquisition and ownership of units in a target fund will result in two types of costs being incurred by the investing fund:

- Subscription and redemption fees. However, the portion of these fees accruing to the target fund is treated as transaction fees, and is not therefore factored in here.
- Costs charged directly to the target fund, which constitute indirect costs for the investing fund.

In certain cases, the investing fund may negotiate discounts on some of these costs. These discounts reduce the total costs borne by the investing fund.

Other fees charged to the Fund

Other fees may be charged to the Fund, namely: ..

- Outperformance commissions. These reward the management company if the Fund's performance exceeds its objectives.
- Transaction commissions. The transaction commission is charged to the Fund each time a transaction is made in the portfolio. Details of these commissions are provided in the full prospectus. The management company is entitled to such fees under the conditions specified in Section A of the simplified prospectus.

Investors should note that these other fees are likely to vary significantly from year to year and that the figures reported in the prospectus relate to the preceding financial year.

Transaction commissions	..%
Total charged to the Fund during the last financial year	..%

Operating and management fees:

These fees comprise all fees charged directly to the Fund other than transaction fees and, when applicable, outperformance commissions. Transaction fees include intermediary fees (brokerage, stock market taxes, etc.) and transaction commissions.

Operating and management fees include in particular the costs of financial management, administrative and accounting management, and custody, holding and audit fees.

Costs generated by investments in other UCITS and/or investment funds

Some funds may invest in other UCITS or investment funds not governed by French law (known as "target funds"). The acquisition and ownership of units in a target fund will result in two types of costs being incurred by the investing fund:

- Subscription and redemption fees. However, the portion of these fees accruing to the target fund is treated as transaction fees, and is not accounted for separately here.
- Costs charged directly to the target fund, which constitute indirect costs for the investing fund.

In certain cases, the investing fund may negotiate discounts on some of these costs. These discounts reduce the total costs borne by the investing fund.

Other fees charged to the Fund

Other fees may be charged to the Fund, namely: ..

- Outperformance commissions. These reward the management company if the Fund's performance exceeds its objectives.
- Transaction commissions. The transaction commission is charged to the Fund each time a transaction is made in the portfolio. Details of these commissions are provided in the full prospectus. The management company is entitled to such fees under the conditions specified in Section A of the simplified prospectus.

Investors should note that these other fees are likely to vary significantly from year to year and that the figures reported in the prospectus relate to the preceding financial year.
