The Jupiter Global Fund - Jupiter Global Ecology Growth (the 'Fund'), a sub-fund of The Jupiter Global Fund (the 'Company')

Class L GBP A Inc (ISIN - LU0279091325)

The management company is Jupiter Asset Management International S.A. ("the Management Company").

Objectives and investment policy

The Fund's objective is to generate long-term capital appreciation and income investing primarily in global equity securities that focus on making a positive impact towards environmental and sustainable objectives.

The Fund will invest at least 70% of its Net Asset Value in equity and equity-related securities issued by companies based anywhere in the world (including emerging markets). All the Fund's investments (excluding cash and instruments held for liquidity and hedging purposes) are issued by companies considered by the Investment Manager to be addressing environmental and sustainability challenges (including, but not limited to, climate change mitigation and adaptation, natural capital and biodiversity restoration) by being substantially focused on activities generating or enabling a positive impact across any of the following sustainable solution themes: clean energy; green mobility; green buildings and industry; sustainable agriculture and land ecosystems; sustainable oceans and freshwater systems and circular economy.

Investments may be substantially orientated towards the sustainable solution themes (typically by assessing indicators such as the level of revenue related to economic activity that is contributing to the themes). The investment process considers and engages upon adverse impacts of security's economic activity in order to exclude those that significantly harm the sustainable investment objective of the Fund.

The Investment Manager also formally excludes investments in companies that generate more than 5% of revenues from: oil sands or shale extraction; alcohol production; adult entertainment; conventional weapons (small arms and/or military contracting for weapons purposes); gambling; tobacco production; and nuclear energy generation and uranium mining.

The Investment Manager will then screen companies using proprietary and third-party research to exclude investment into activities and operations contradicting the principles of the United Nations Global Compact.

The Fund may also hold up to 30% of its Net Asset Value (in aggregate) in units of collective investment schemes, cash, deposits and money market instruments. The Fund will not invest more than 20% of its Net Asset Value in China A-shares via Stock Connect.

The Fund has a sustainable investment objective coming within scope of article 9 of SFDR.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← | | | | | | | → Typically higher rewards, higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested, even if the share class is hedged against the main currency of the Fund.
- The Fund is dependent upon ESG information and data from third parties (which may include providers for research, reports, screenings, ratings and/or analysis such as index providers and consultants) and that information or data may be incomplete, inaccurate or inconsistent.
- The value of income payments will fluctuate.
