# Authorised Corporate Director's Report

We are pleased to present the Interim Report for First Sentier Investors ICVC (the "Company"), which provides information on each of the 24 sub-funds of the Company (each a "Fund") for the period ended 31 January 2023.

In this document we provide detailed information on each of the Funds. This information includes an investment report, performance summary, top 10 holdings, country breakdowns and financial statements for each Fund.

First Sentier Investors (UK) Funds Limited (the "ACD") is part of First Sentier Investors, a member of the global financial group Mitsubishi UFJ Financial Group ("MUFG").

First Sentier Investors assessed its exposure to Russian, Ukrainian and Belarusian investments, individuals and entities, and determined there was minimum direct impact on the First Sentier Investors group's investment portfolios and business operations. First Sentier Investors monitors for Russian, Ukraine and Belarusian companies held in portfolios that derive a material portion of their revenues/profits from Russian, Ukraine and/or Belarusian business relationships, and actively screens existing and prospective clients. The firm has controls in place to ensure it is, and will remain, compliant with sanctions — these controls include investment restrictions and ongoing monitoring of sanctions from authorities globally — and will adapt risk and control policies as required. It also established a cross-functional taskforce to monitor and internally report on the ongoing situation.

Please note the following developments occurring during the period:

- Stewart Investors Global Emerging Markets Fund and Stewart Investors Global Emerging Markets Leaders Fund had a repositioning of their sustainability approach which came into effect from 30 November 2022.
- the First Sentier Asian Property Securities Fund closed on 23 January 2023.

We hope that you find this report informative and that it answers any questions you may have about your investment with First Sentier Investors.

If you have any additional queries in relation to your investment, or one of the Funds, please contact our Client Services team on 0800 587 3388 (UK investors only) (+44 (0)203 528 4102 if calling from outside the UK).

# Information about the Company

The Company is an Open-Ended Investment Company with variable capital. The Company is structured as an umbrella company currently authorised as a UK UCITS scheme and operates under Chapter 5 of the Collective Investment Schemes Sourcebook (the "COLL").

Different Funds may be established from time to time by the ACD, with the approval of the Financial Conduct Authority (the "FCA") and the agreement of the Company's Depositary, the Bank of New York Mellon (International) Limited. Each Fund may issue different classes of share and, within each class, there may be different types of share. On the introduction of any new Fund or class or type of share, a revised Prospectus will be prepared setting out the relevant details of each Fund or class.

Each Fund is invested as if it were individually authorised as the type of scheme known as a UK UCITS scheme, as specified in the Sourcebook. For investment purposes, the assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. The shareholders are not liable for the debts of the Company.

# Changes to the Prospectus since 1 August 2022

### Inclusions or amendments in the Company's Prospectus dated 30 November 2022:

- 1. Inclusion of a footnote throughout on the termination of First Sentier Asian Property Securities Fund;
- 2. Deletion of the First Sentier Emerging Market Debt Fund throughout, which was terminated on 30 July 2022;
- 3. Deletion of www. from all references to company website, firstsentier.com;
- 4. Language upgrade throughout all equity funds on use of cash /short-term security/debenture articulation;
- 5. Deletion of LIBOR Risk, upgraded to reflect 2022/23 requirements;
- 6. Inclusion of footnote throughout, change to First Sentier Responsible Listed Infrastructure Fund Benchmark from the FTSE Global Core Infrastructure 50/50 Index to FTSE Developed Core Infrastructure ex-Pipelines Index;
- 7. Update to footnote throughout, FSSA Japan Focus Fund benchmark updated to 'Topix' and date of the change from MSCI Japan inserted (9 December 2021);
- 8. Typographical change of investment policy language for all Stewart Investors Sustainability funds from 'benefit from/contribute to' to 'contribute to/benefit from';
- 9. Language change throughout to fund investment policies regarding the use of derivatives for effective portfolio management purposes only, as requested by the FCA;
- 10. Section 10. Annual updates to the Taxation Risks section;
- 11. Section 16.17. Reposition of the Stewart Investors Global Emerging Markets Fund to a Sustainability approach, in light of the St Andrews Partners closure;
- 12. Section 16.18. Reposition of the Stewart Investors Global Emerging Markets Leaders Fund to a Sustainability approach, in light of the St Andrews Partners closure;
- 13. Section 16.5. Addition of disclosure surrounding natural gas and coal for First Sentier Responsible Listed Infrastructure Fund;
- 14. Section 16.5. Investment policy update to remove of 'oil' and replace with 'energy storage and transportation' for First Sentier Responsible Listed Infrastructure Fund;
- 15. Section 11.2.6. Change to directors of the ACD, Adrian Hilderly removed following resignation as director;
- 16. Section 16.21. Change to the Stewart Investors Indian Subcontinent Sustainability Fund AMC fees:
  - a. Reduction to Class A Shares from 1.70% to 1.60%;
  - b. Reduction to Class B Shares from 0.95% to 0.85%:
- 17. Section 16.9. Change to FSSA Global Emerging Markets Focus Fund AMC fees:
  - a. Reduction to Class B Shares from 0.85% to 0.75%;
  - b. Reduction to Class E Shares from 0.65% to 0.55%;
- 18. Section 16.17 Change to Stewart Investors Global Emerging Markets Fund AMC fees:
  - a. Reduction to Class Shares A from 1.65% to 1.50%
  - b. Reduction to Class Shares B from 0.90% to 0.85%.
- 19. Section 9.2.2 AMC accrual changed from prior dealing day to current dealing day;
- 20. Section 5.5. Annual Reports: addition of disclosure on environmental, social and governance information on how well the Fund is meeting stated objectives.
- 21. Annual update of Fund past performance data;

### Inclusions or amendments in the Company's Prospectus dated 23 December 2022:

- 1. Section 7.11.1. Annual update to the dilution adjustment data illustration
- 2. Annual updates to the investment performance illustrations throughout.

# The Investment Manager

As at the date of this Report, First Sentier Investors (UK) IM Limited, the investment manager of the Company (the "Investment Manager"), has delegated the investment management of certain Funds as set out in the following table:

# **Cross Holdings**

There were no cross holdings between Funds as at 31 January 2023.

<sup>[2]</sup> The First Sentier Diversified Growth Fund is in the process of termination.

<sup>[3]</sup> The Stewart Investors Latin America Fund is in the process of termination.

# **ESG/Sustainability Reporting**

Certain Funds pursue responsible or sustainable investment strategies and/or pursue ESG/sustainability characteristics, themes or outcomes. For these Funds (referred to in this section below), we aim to make information readily available on how well each Fund is meeting its stated objectives (i.e. the intended ESG/sustainability characteristics, themes or outcomes) on an ongoing basis to enable investors to monitor whether their expectations are being met. The regulatory environment for these types of funds is rapidly developing in the UK, the EU and elsewhere, including in relation to reporting obligations. We expect our disclosures to develop over time in light of these developments.

Stewart Investors Asia Pacific and Japan Sustainability Fund, Stewart Investors Asia Pacific Leaders Sustainability Fund, Stewart Investors Asia Pacific Sustainability Fund, Stewart Investors Indian Subcontinent Sustainability Fund, Stewart Investors European (ex UK) Sustainability Fund, Stewart Investors Global Emerging Markets Fund, Stewart Investors Global Emerging Markets Leaders Sustainability Fund, Stewart Investors Global Emerging Markets Leaders Fund, Stewart Investors Worldwide Leaders Sustainability Fund and Stewart Investors Worldwide Sustainability Fund (in this section referred to as the "Funds").

The Funds seek to achieve long-term capital appreciation by investing in companies which both contribute to, and benefit from, sustainable development, achieving positive social and environmental sustainable outcomes.

Positive social sustainability outcomes include the enablement of improved health and wellbeing; access to income-generating and enterprise opportunities; fair employment and workplace safety; access to education and learning opportunities; communication and access to information; financial inclusion; sustainable transport and mobility; better access to housing, water, sanitation and electricity; and social inclusion and reduced inequality.

Positive environmental sustainability outcomes include more careful, efficient and productive use of natural resources; reduced waste and improved waste management; the wider adoption of circular economy practices and measures; the adoption of renewable and cleaner energy technologies; reduced greenhouse gas emissions; reduced water, air and other environmental pollution; a slowing in the rate of land degradation, land use change and loss of forests and biodiversity; and measures and technologies that enable climate change adaptation and resilience.

The Funds only invest in companies that are sustainable investments which contribute to a social and/or environmental objective. The contribution of the Funds' investments to the social and environmental objectives are assessed by reference to two framework indicators — the Investment Manager's human development pillars and Project Drawdown's climate change solutions.

### The Investment Manager's human development pillars

The Investment Manager has determined 10 broad pillars which they believe encapsulate the essence of human development and which can be mapped to companies. Each investee company must be contributing in a tangible way to at least one of the following pillars:

- Nutrition
- Healthcare and hygiene
- Water and sanitation
- Energy
- Housing
- Employment
- Finance
- Standard of living
- Education
- Information

# Project Drawdown's climate change solutions

Project Drawdown is a non-profit organisation founded in 2014 which has mapped, measured and modelled over 90 different solutions to global warming, with the ultimate goal of reaching drawdown – i.e. the point in the future when emissions stop increasing and start to steadily decrease. Each Fund investment is mapped by the Investment Manager against the c.90 Project Drawdown solutions (which are captured in eight broader solutions of Buildings, Circular economy / industry, Conservation / restoration, Energy, Food system, Human development, Transport and Water). The Investment Manager's focus is on whether the companies themselves are making a meaningful contribution and will have meaningful involvement with the delivery of any of those solutions.

Note, not all investments will necessarily align with a Project Drawdown climate solution but all companies will be aligned with a human development pillar (with the exception of assets held in order to allow efficient operational exit of positions).

Further information about how the Investment Manager uses the human development pillars and Project Drawdown climate solutions is available on the Investment Manager's website.

### stewartinvestors.com/all/how-we-invest/our-approach.html

These frameworks alongside the Investment Manager's own bottom-up analysis lean on measurable and reportable outcomes as evidence for determining a company's meaningful contribution to sustainable development.

Meaningful company contribution:

- 1. Demonstrates a clear link to the underlying issue and solution, including whether the contribution is direct or enabling/supporting.
- 2. Is relevant for the company either as a revenue/growth driver, as strategic initiatives backed by research and development or capital expenditure, or a function of strong culture or behaviours and 'how they do things' e.g. for equality and diversity.
- 3. Recognises negative impacts from the company, including contradictions and risks of perverse outcomes.

The Investment Manager's Portfolio Explorer tool provides the contribution that each company makes to climate solutions, human development and the Sustainable Development Goals, as well as the investment rationale, key risks and engagement topics. Click on the link below to access the tool.

The reporting information is updated twice a year.

#### First Sentier Responsible Listed Infrastructure Fund ("RLIS")

RLIS promotes the following environmental and social characteristics:

Environmental characteristics:

Climate change mitigation (via a reduction in carbon intensity (measured as carbon emissions per MWh), the establishment of energy infrastructure required for enabling the decarbonisation of energy systems, and the production of clean and efficient fuels from renewable or carbon-neutral sources):

Climate change adaptation (by preventing or reducing the risk of the adverse impact of the current climate and the expected future climate on people, nature or assets); and

The alignment of investee companies with the United Nations' Sustainable Development Goals most relevant to infrastructure companies, namely:

- SDG 6: Clean Water and Sanitation
- SDG 7: Affordable and Clean Energy
- SDG 9: Industry, Innovation and Infrastructure
- SDG 11: Sustainable Cities and Communities
- SDG 12: Responsible Consumption and Production
- SDG 13: Climate Action.

### Social characteristics:

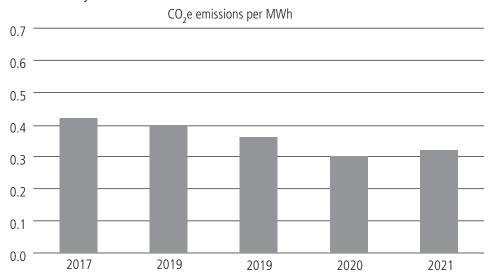

The protection of labour rights, and the provision of safe and secure working environments for all workers.

The following shows the indicators used by the portfolio to measure those characteristics, and the Fund's performance against those indicators, using the most recent date that the relevant data is available for.

Environmental: For utility companies, demonstrating declining carbon intensity (as measured by tons of carbon emitted per MWh of electricity generated) over rolling five year periods; or carbon intensity at least 25% below the industry average.

Power generated by utilities typically represents around 85% of portfolio emissions. Emissions per MWh declined by 23% over the preceding 5 years. Adjusting for changes in corporate structure, each utility in the portfolio reduced their carbon intensity over this period.

### Carbon Intensity

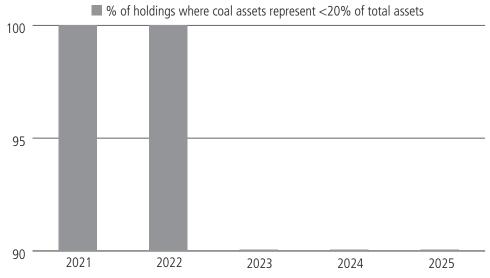

Data as at 31 December 2021.

Source: First Sentier Investors, Bloomberg.

20% limit to coal generation exposure (as measured by the proportion of a company's overall assets that consist of coal-fired generation assets). Each electricity-generating utility held by the portfolio during the reference period was compliant with this sustainability indicator.

### <20% coal assets

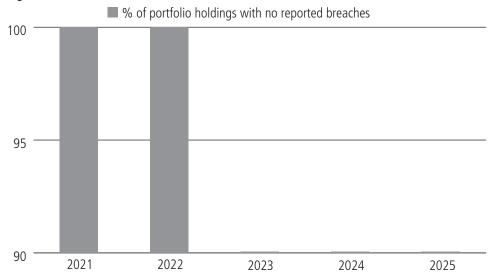

Data as at 31 December 2022

During the period under review, all portfolio holdings contributed to or benefitted from sustainable development, as guided by the UN SDGs. The portfolio's holdings were all compliant with this sustainability indicator during the reference period.

Social: Alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

# Alignment with UN GC and OECD Guidelines

Data as at 31 December 2022

# Statement of the Authorised Corporate Director's Responsibilities in Respect of the Financial Statements of the Company

The Authorised Corporate Director ("ACD") of First Sentier Investors ICVC ("Company") is responsible for preparing the Interim Report and the financial statements in accordance with the Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the Financial Conduct Services Authority's Collective Investment Schemes Sourcebook ("COLL") and the Company's Instrument of Incorporation.

The OEIC Regulations and COLL require the ACD to prepare financial statements for each interim accounting period which:

- are in accordance with United Kingdom Generally Accepted Accounting Practice ("United Kingdom Accounting Standards"), including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Statement of Recommended Practice: "Financial Statements of Authorised Funds" issued by the Investment Management Association ("IMA SORP") in May 2014; and
- give a true and fair view of the financial position of the Company and each of its sub-funds as at the end of that period and the net revenue or expense and the net capital gains or losses on the property of the Company and each of its sub-funds for that period.

In preparing the financial statements, the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards and the IMA SORP have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the applicable IMA SORP and United Kingdom Accounting Standards and applicable law. The ACD is also responsible for the system of internal controls, for safeguarding the assets of the Company and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In accordance with COLL 4.5.8BR, the Interim Report and the unaudited financial statements were approved by the board of directors of the ACD and authorised for issue on 23 March 2023.

# Summary of Significant Accounting Policies Applicable to All Funds

as at 31 January 2023 (unaudited)

# 1. Accounting and distribution policies

### (a) Basis of accounting

The Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with FRS 102 'The Financial Reporting Standards Applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice ("SORP") for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014 (updated in June 2017), and United Kingdom Generally Accepted Accounting Practice.

As described in the Certification of Financial Statements by Directors of the ACD on page 8, the ACD continues to adopt the going concern basis in the preparation of the Financial Statements of the Funds, with the exception of: First Sentier Diversified Growth Fund, which closed 15 September 2021 and is due to terminate once the residual assets and liabilities are settled; Stewart Investors Latin America Fund, which closed on 25 July 2022 and is due to terminate once the residual assets and liabilities are settled; and First Sentier Asian Property Securities Fund, which closed on 24 January 2023 and is due to terminate once the residual assets and liabilities are settled. In applying this basis of preparation, the assets and liabilities of the Funds continue to be stated at their fair values. No adjustments were necessary in the financial statements to reduce assets to their realisable values, to provide for liabilities arising and to reclassify long-term liabilities as current liabilities.

All other accounting and distribution policies used to prepare the interim financial statements are as per the audited financial statements for the year ended 31 July 2022.

#### 2. Other matters

### (a) High Court Claim

The European Court of Justice has held that the UK tax regime in respect of income from portfolio investments contravened the EU right to free movement of capital. Until 2009, income from portfolio investments in the UK was exempt from corporation tax, whilst dividend income from foreign portfolio investments was taxable with limited relief for foreign tax paid. The Company has made claims against HMRC for repayment of tax paid on dividend income from foreign portfolio investments in these circumstances. The claims form part of the CFC and Dividend Group Litigation, in which there are various test cases, including the Prudential dividend test case, in which a Supreme Court judgement was delivered on 25 July 2018. Some Funds in the Company received payments from HMRC under this litigation which were reflected in those Funds' financial statements as at 31 July 2020. Further litigation and tax tribunal actions are still ongoing in relation to various remaining issues. The value that each Fund has in these ongoing claims has not been recognised in the Financial Statements as the timing and amount of any benefit is uncertain. In the event that the remaining claims are successful, any monies awarded by the court will be paid to the relevant Funds as a windfall to those shareholders who remain in the Funds at the date of payment of the claims.

#### (b) Foreign retrospective tax claims

A number of Funds are in the process of reclaiming refunds of dividend withholding tax on the basis of free movement of capital provisions in the European Union. Upon receipt, these amounts will be treated as windfall amounts in the Funds and will form part of any distributable income.

# Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a portfolio of equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China that are listed, traded or dealt in on Regulated Markets worldwide.

The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 40-60 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

### Risks and reward profile

Share class B Accumulation
Share class E Accumulation
Share class B Accumulation (USD share class)

← Lower Risk Higher Risk					gher Risk 👈		
	Potentially Lo	ower Rewards		Potentially Hig	her Rewards		
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

# Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 10.9% in sterling terms over six months and provided a cumulative return of 35.0% and 54.9% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tencent**, as profits returned to year-on-year growth based on strong demand for online games and certain advertising segments. New game approvals have accelerated, signalling an easing of the regulatory overhang from 2021. **China Merchants Bank** (**CMB**) gained on revenue and net profit growth, driven by higher interest income, solid loan growth and decreasing non-performing loans. On the negative side, **Shanghai Liangxin Electrical** declined due to increasing cost pressure from rising raw materials prices and short-term concerns about sales. **NetEase** was among the weaker performers over the period.

#### Portfolio changes

Significant new purchases over the period included **Greentown Management**, a leading property project management company in China. Despite the sector being under pressure, the company has found a way to generate growth by providing third-party property project management services, such as planning, construction and sales. The Fund also bought **Weichai Power**, a China market leader in diesel engines for heavy-duty trucks, on attractive valuations.

The Fund divested Alibaba on concerns about tightening regulations and increasing competition posing ongoing challenges for the business.

#### Outlook

China's steps towards reopening should be positive for growth in the coming year, though it will take some time to normalise and there is still uncertainty ahead. Though restrictions have largely been lifted, factory and business closures due to pandemic lockdowns over the past three years have affected household income and weakened spending power. In the longer term, it is believed that China's structural growth drivers remain intact. Rising wealth and incomes should continue to drive the shift towards a consumption-led economy and increase demand for better quality (and higher-priced) goods and services. Meanwhile, China's growing sophistication in technology and innovation in manufacturing should help its domestic champions move up the value chain and benefit from the growing preference for home-grown goods and components.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	39.7	10.9	2.0	35.0	54.9	N/A	61.6
Benchmark return %	31.0	3.4	(2.3)	9.2	0.5	N/A	2.7
					· ·		

Diceroto	norformoneo	ac at 21	January 2023
Discrete	performance	as at 31	January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	2.0	(16.3)	58.2	25.5	(8.6)
Benchmark return %	(2.3)	(20.6)	40.8	11.7	(17.6)

Benchmark: MSCI China All Shares Index.

IA Sector: China / Greater China.

Performance is based on share class B Accumulation (GBP share class), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

This share class is in deficit and therefore not making a distribution.

# Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

# Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in equity or equity-related securities of companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

### Risks and reward profile

	←	_ower Ri	sk						I	lighe	er Risk →
	Pote	Potentially Lower Rewards					Potentially Higher Rewards				
Share class B Accumulation		1		2		3	4	5	6		7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

# **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 7.0% in sterling terms over six months and provided a cumulative return of 25.0% and 26.2% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tencent**, as profits returned to year-on-year growth based on strong demand for online games and certain advertising segments. New game approvals have accelerated, signalling an easing of the regulatory overhang from 2021. **Ping An Insurance** benefitted from positive sentiment around China's reopening. On the negative side, **Naver** declined on weaker online advertising spending and e-commerce traffic in South Korea. **ENN Energy** detracted from performance as gas volumes and new connections slowed.

#### Portfolio changes

Significant new purchases over the period included Shenzhen Mindray Bio-Medical Electronics, China's largest manufacturer of domestic medical devices. The company has a strong track record and has been gaining market share from global leaders as it expands overseas. The Fund also purchased Godrej Industries, the listed holding company for the Godrej family businesses, including Godrej Consumer Products and Godrej Properties. While Godrej Consumer Products' growth has been weak in recent years, performance is expected to improve under new CEO Sudhir Sitapati. Meanwhile, Godrej Properties is benefiting from the consolidation in India's fragmented real estate industry, as poor-quality local developers lose out to leading brands like Godrej.

The Fund divested Dabur India on expensive valuations and sold ACE Hardware Indonesia to fund better ideas elsewhere.

#### Outlook

Despite positive news around China and Hong Kong reopening borders and easing restrictions, investors still face a growing assortment of headwinds. That said, there are grounds for longer-term optimism. While the outlook for Asian equities is uncertain, high degrees of pessimism and low valuations are often a harbinger of higher future returns.

Sharply higher rates and tougher trading conditions typically favour stronger companies as they stand to gain share from weaker players. Indeed, high-quality equities are still one of the best ways of preserving and growing wealth. The enduring emphasis on financial strength, alongside quality of company leadership and franchises, means that the portfolio of businesses should continue to perform resiliently.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	18.3	7.0	1.1	25.0	26.2	N/A	92.7
Benchmark return %	18.9	5.0	1.8	18.5	18.3	N/A	89.9

#### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	1.1	0.5	23.1	7.6	(6.1)
Benchmark return %	1.8	(7.8)	26.3	6.7	(6.5)

Benchmark: MSCI AC Asia Pacific ex Japan Index.

IA Sector: Asia Pacific Excluding Japan.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Group 2	(p)	(p)	(p)	(p)
Interim	0.0998	0.8547	0.9545	0.0642

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

# **Authorised Fund Manager's Report**

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies established or having a majority of their economic activities in the Asia Pacific region (excluding Japan) that are listed, traded or dealt in on Regulated Markets worldwide, and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may invest up to 20% of its Net Asset Value in equity or equity-related securities which are not described above and which are listed, traded or dealt in on Regulated Markets worldwide.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

# Risks and reward profile

Share class B Accumulation
Share class B Accumulation (EUR share class)
Share class B Accumulation (USD share class)

<b>←</b> Lower Ri	sk		Hig	jher Risk 👈		
Potentially L	ower Rewards	F	Potentially Hig	her Rewards		
1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for the B Accumulation (USD share class)), has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 or higher might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Single country/specific region risk:** Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

# Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 7.7% in sterling terms over six months and provided a cumulative return of 25.5% and 37.8% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tencent**, as profits returned to year-on-year growth based on strong demand for online games and certain advertising segments. New game approvals have accelerated, signalling an easing of the regulatory overhang from 2021. **Ping An Insurance** benefitted from positive sentiment around China's reopening. On the negative side, **Naver** declined on weaker online advertising spending and e-commerce traffic in South Korea. **ENN Energy** detracted from performance as gas volumes and new connections slowed.

#### Portfolio changes

Significant new purchases over the period included **Shenzhen Mindray Bio-Medical Electronics**, China's largest manufacturer of domestic medical devices. The company has a strong track record and has been gaining market share from global leaders as it expands overseas. The Fund also purchased **Unilever Indonesia**, a leading fast-moving consumer goods business in Indonesia that is 85% owned by Unilever. After years of being complacent as the market leader, the company is making positive changes such as investing in its brands, focusing on market share and consolidating its distributors.

The Fund divested **Dabur India** on expensive valuations and sold **Unicharm** to consolidate the portfolio and raise cash to purchase other companies with better risk-reward.

#### Outlook

Despite positive news around China and Hong Kong reopening borders and easing restrictions, investors still face a growing assortment of headwinds. That said, there are grounds for longer-term optimism. While the outlook for Asian equities is uncertain, high degrees of pessimism and low valuations are often a harbinger of higher future returns.

Sharply higher rates and tougher trading conditions typically favour stronger companies as they stand to gain share from weaker players. Indeed, high-quality equities are still one of the best ways of preserving and growing wealth. The enduring emphasis on financial strength, alongside quality of company leadership and franchises, means that the portfolio of businesses should continue to perform resiliently.

### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	18.4	7.7	2.0	25.5	37.8	n/a	143.2

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	2.0	(0.2)	23.2	11.2	(1.2)
Benchmark return %	1.8	(7.8)	26.3	6.7	(6.5)

Benchmark: MSCI AC Asia Pacific ex Japan Index.

IA Sector: Asia Pacific Excluding Japan.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in equity or equity-related securities issued by companies established or having a majority of their economic activities in the People's Republic of China, Hong Kong and Taiwan which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation
Share class B Accumulation
Share class A Accumulation (EUR share class)

← Lower Risk Higher							gher Risk →
	Potentially Lo	Potentially Hig	her Rewards				
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 11.0% in sterling terms over six months and provided a cumulative return of 33.9% and 43.5% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tencent**, as profits returned to year-on-year growth based on strong demand for online games and certain advertising segments. New game approvals have accelerated, signalling an easing of the regulatory overhang from 2021. **Ping An Insurance** benefitted from positive sentiment around China's reopening. On the negative side, **ENN Energy** detracted from performance as gas volumes and new connections slowed. **Zhejiang Chint Electrics** weakened after missing earnings expectations due to lacklustre demand in its low-voltage electrical appliances business.

### Portfolio changes

Significant new purchases over the period included **Jardine Matheson**, a family-controlled conglomerate with businesses such as Dairy Farm and Mandarin Oriental. It is trading at the lowest valuations since 2008, and its alignment is good based on increasing buy-backs and dividends. The Fund also purchased **NetEase**, the second-largest gaming company in China. The company has gradually developed a portfolio of mid-sized games with high user stickiness and longevity, and has a strong pipeline that should support decent growth prospects of 10-15%.

The Fund divested **Alibaba** on concerns about tightening regulations and increasing competition posing ongoing challenges for the business, and sold **China Vanke** on portfolio consolidation.

#### Outlook

China's steps towards reopening should be positive for growth in the coming year, though it will take some time to normalise and there is still uncertainty ahead. Though restrictions have largely been lifted, factory and business closures due to pandemic lockdowns over the past three years have affected household income and weakened spending power. In the longer term, it is believed that China's structural growth drivers remain intact. Rising wealth and incomes should continue to drive the shift towards a consumption-led economy and increase demand for better quality (and higher-priced) goods and services. Meanwhile, China's growing sophistication in technology and innovation in manufacturing should help its domestic champions move up the value chain and benefit from the growing preference for home-grown goods and components.

### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	35.7	11.0	(2.0)	33.9	43.5	176.0	1,238.7
Benchmark return %	35.0	5.4	(3.9)	12.4	10.9	112.1	456.4

### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	(2.0)	(3.9)	42.1	14.3	(6.3)
Benchmark return %	(3.9)	(15.0)	37.6	8.6	(9.2)

Benchmark: MSCI Golden Dragon Index.

IA Sector: China/Greater China.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

Group 2

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

(c)

(c)

(c)

(c)

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities issued by companies that are established, operating or have their economic activity mainly in the Indian subcontinent, and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to the Indian subcontinent.

The Fund will invest across all market capitalisations.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

At times, the Fund's portfolio may be concentrated in a small number of holdings.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

#### Risks and reward profile

Share class B Accumulation	
Share class E Accumulation	
Share class E Accumulation (EUR share class)	
Share class F Accumulation (USD share class)	

<b>←</b> Lowe	r Risk				Hig	her Risk 👈
Potentiall	y Lower Rewards			ŀ	Potentially Hig	her Rewards
1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Indian subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

**Single country/specific region risk**: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 0.1% in sterling terms over six months and provided a cumulative return of 31.0% over three years to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included Mahindra & Mahindra, which rose after an improvement in performance across the core passenger and commercial vehicles business. Mahindra CIE Automotive climbed after profits and sales growth remained strong. On the negative side, Colgate Palmolive India and Kotak Mahindra Bank were among the weaker performers as investors rotated away from India, after last year's strong performance, into North Asia.

#### Portfolio changes

Significant new purchases over the period included **Hindustan Unilever**, the largest fast-moving consumer goods company in India. We believe the company's management is likely to use the current period of input cost inflation to its advantage and gain share from peers. The Fund also purchased **Axis Bank**, one of India's largest private banks. Axis has a strong deposits franchise and should benefit from the structural trend of private sector banks taking market share from the state-owned sector.

The Fund divested **KEI Industries** on expensively valuations and sold **Mahindra and Mahindra Financial Services** as the risk-reward was no longer attractive.

#### Outlook

In late 2021, a bubble had been witnessed in initial public offerings (IPOs) in India. That mania has since subsided and a different type of bubble is considered to be inevitable. In these cases, the business is often a proven one, with a strong track record and high return profile. As in the case of the IPO bubble, the Fund is staying disciplined. It is believed there is substantial downside in these companies if shareholders head for the exits. The important difference with these "high-quality bubbles" is that the Fund would happily own them for the long term after the valuations come back to earth. That said, the market is huge (over 5,000 listed stocks) and the watch-list of companies that meet the Fund's quality criteria keeps growing (over 200 now), leading to a confident feeling about the portfolio's prospects.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yr	yr	yr	launch
Fund return %	(6.3)	0.1	3.3	31.0	n/a	n/a	31.8

Discrete per	formance as	at 31	January	2023
--------------	-------------	-------	---------	------

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	3.3	20.6	5.1	9.1	n/a
Benchmark return %	(1.3)	30.5	9.2	8.6	n/a

Benchmark: MSCI India Index.

IA Sector: Specialist.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 80% of its Net Asset Value in a portfolio of equity or equity-related securities of large and mid-capitalisation companies which are established or have a majority of their economic activities in Japan and which are listed, traded or dealt in on Regulated Markets worldwide and in equity-related securities listed, traded or dealt in on Regulated Markets worldwide which provide exposure to Japan.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

At times, the Fund's portfolio may be concentrated in a small number of holdings.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

Higher Risk →

### Risks and reward profile

2 201101 111511						, 2	
	Potentially Lower Rewards						her Rewards
Share class B Accumulation	1	2	3	4	5	6	7
Share class E Accumulation	1	2	3	4	5	6	7

Share class B Accumulation (USD share class)	1	2	3	4	5	6	7
Share class E Accumulation (USD share class)	1	2	3	4	5	6	7

← Lower Risk

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 3.1% in sterling terms over six months and provided a cumulative return of 12.5% and 26.9% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included Lasertec, as the company confirmed its steady equipment order trend, generally an indication of strong sales growth in a year's time. BayCurrent Consulting, a strategic IT consulting firm, benefitted from the growing trend of digital transformation in Japan. On the negative side, Olympus fell after higher material costs impacted profits, and the company lowered its full-year guidance. MonotaRO detracted from performance after reporting weaker-than-expected sales and new accounts growth.

#### Portfolio changes

Significant new purchases over the period included **Makita**, a Japanese power tool maker focused on the professional market. Durability, functionality and after-sales support are highly valued by professional users, thus they tend to be stickier and loyal to Makita products. As a defensive cyclical company, Makita's valuations seemed attractive with price-to-book hovering close to 10-year lows. The Fund also purchased **Zozo**, the top online fashion specialty store in Japan, after it de-rated to attractive valuations. It has a strong franchise with a loyal user base and exceptional returns based on its first-mover advantage, good reputation and customer-centric approach.

The Fund divested Kotobuki Spirits and Harmonic Drive Systems on expensive valuations.

#### Outlook

Given the uncertainties around the global outlook, the portfolio is positioned predominantly towards companies with exposure to domestic demand. The companies the Fund likes to own are managed by strong management teams and can generate sustainable earnings growth and return on equity without relying on leverage or the macro environment. The Fund also owns regional consumer companies, global industrials and medical equipment/ services companies with dominant franchises, strong balance sheets and steady cash flow. These businesses should remain relatively defensive in the event of a recession.

Benchmark return %	2.9	(0.2)	10.3	11.0	(4.5)

Benchmark: TOPIX Index\*.

IA Sector: Japan.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

<sup>\*</sup>The benchmark changed from MSCI Japan on 09/12/2021.

Distribution Tables (continued)

for the period ended 31 January 2023 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Stewart Investors Asia Pacific and Japan Sustainability Fund

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (including Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

### Risks and reward profile

Share class A Accumulation Share class A Income Share class B Accumulation Share class B Income

	<b>←</b> Lower Ri	Hig	gher Risk →					
	Potentially Lower Rewards Potentially Higher Rewards							
	1	2	3	4	5	6	7	
ľ	1	2	3	4	5	6	7	
Ï	1	2	3	4	5	6	7	
Ī	1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

**Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country/specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 5.7% in sterling terms over the 6 months and has provided cumulative returns of 32.0% and 24.6% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tube Investments of India** which delivered attractive growth thanks to a return of the Indian manufacturing cycle, Hong Kong-listed beverage producer **Vitasoy International** which demonstrated growing cash flows, and family-owned Indian conglomerate **Mahindra & Mahindra** which has been investing to build a more robust franchise.

Detracting from performance were Indian consumer group Tata Consumer Products which was impacted by weakened demand, South Korean search engine provider Naver as internet companies were de-rated globally, and Japanese-listed business-to-business platform MonotaRO declined on reduced sales towards the end of 2022.

### Portfolio changes

Major purchases over the period included **Advanced Energy**, a Taiwanese company providing battery packs to the e-bike, data server and electric vehicle markets, and **Shift**, a Japanese-listed provider of outsourced software-testing services run by a high-quality steward. The Fund also purchased **Aavas Financiers**, a leading provider of mortgages in rural India with a reputation for conservative lending.

Major disposals over the period included Indian IT outsourcer **Infosys** on valuation concerns. The Fund also sold **Naver** as a disappointing meeting resulted in a lack of conviction in the company's quality and sustainability positioning.

#### Outlook

The Asian region is home to some of the highest-quality stewards and first-rate franchises globally, with many avenues for long-term growth. The Fund continues to look for companies with sustainability tailwinds combined with high-quality business models as a powerful formula for long-term success. Paired with a disciplined, independent investment approach, the Fund expects to continue to protect and grow clients' investments over the long term.

### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	4.1	5.7	6.5	32.0	24.6	118.2	1,169.1

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	6.5	2.6	20.8	(2.0)	(3.6)
Benchmark return %	1.7	(5.4)	21.1	6.7	(6.5)

Benchmark: MSCI AC Asia Pacific Index.

IA Sector: Asia Pacific Including Japan.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation that are incorporated or listed, or where a majority of their economic activities take place, in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

### Risks and reward profile

Share class A Accumulation Share class A Income Share class B Accumulation Share class B Income

	← Lower Risk					Hig	gher Risk →
Potentially Lower Rewards Potentially Hi						otentially Hig	her Rewards
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
-	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2023 (unaudited)

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 1.5% in sterling terms over the 6 months and has provided cumulative returns of 30.2% and 42.3% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Contributing to performance was family-owned, Indian conglomerate Mahindra & Mahindra which has been investing to build a more robust franchise. Singaporean Oversea-Chinese Banking gained under the governance of a quality steward and a competent management team, and New Zealand-listed leader in humidification for respiratory systems Fisher & Paykel Healthcare provided solid earnings growth towards the end of 2022.

Detracting from performance was Indian Tata Consumer Products on weakened consumer demand. South Korean search engine provider Naver lagged as internet companies were de-rated globally, and the performance of Kotak Mahindra Bank was subdued on no particular news. The growth outlook for loans in India remains strong and the company's net interest margins continue to improve.

#### **Portfolio Changes**

The Fund initiated a position in healthcare company **ResMed**, a global leader in sleep and breathing solutions, and China's **Yifeng Pharmacy Chain** which is helping to meet the country's growing demand for accessible medicines.

Major disposals included **Naver** and Japanese **Nippon Paint** after disappointing company meetings resulted in a lack of conviction in the companies' quality and sustainability positioning. The Fund also sold Chinese manufacturer **Estun Automation** on valuation concerns.

#### Outlook

The Asian region is home to some of the highest-quality stewards and first-rate franchises globally, with many avenues for long-term growth. The Fund continues to look for companies with sustainability tailwinds combined with high-quality business models as a powerful formula for long-term success. Paired with a disciplined, independent investment approach, the Fund expects to continue to protect and grow clients' investments over the long term.

Benchmark: MSCI AC Asia Pacific ex Japan Index.

*IA Sector: Specialist.* 

This Fund was previously part of the IA Asia Pacific excluding Japan sector. Due to the changing geographical nature of the earnings of the stocks in this portfolio, this Fund was then reclassified by the IA as IA Specialist sector during 2017. The performance ranking of funds within the IA Specialist sector is not viewed as a fair comparison given the diverse nature of the funds within the sector. Performance statistics are therefore noted versus the benchmark rather than the IA sector. The Specialist sector constituents are defined by the IA as funds that have an investment universe which is not accommodated by the other IA mainstream sectors.

### **Authorised Fund Manager's Report**

(continued)

for the period ended 31 January 2023 (unaudited)

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Asia Pacific region (excluding Japan) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation	
Share class B Accumulation	
Share class A Accumulation (EUR share class)	)
Share class B Accumulation (EUR share class)	)

<b>←</b> Lower R	isk		Hig	gher Risk →		
Potentially Lower Rewards Pc					Potentially Hig	her Rewards

1	2	3	4	5	6	7
1	2	3	4	5	6	7
1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk**: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 5.4% in sterling terms over the 6 months and has provided cumulative returns of 36.8% and 55.3% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Tube Investments of India** which delivered attractive growth thanks to a return of the Indian manufacturing cycle, family-owned Indian conglomerate **Mahindra** & **Mahindra** which has been investing to build a more robust franchise, and Hong Kong-listed beverage producer **Vitasoy International**, which demonstrated growing cash flows.

Detracting from performance were South Korean search engine provider **Naver** as internet companies were de-rated globally, and Indian consumer groups **Tata Consumer Products** and **Marico** which were impacted by weakened consumer demand.

#### Portfolio Changes

Major purchases over the period included **Advanced Energy Solution**, a Taiwanese company providing battery packs to the e-bike, data server and electric vehicle markets, and **Aavas Financiers**, a leading provider of mortgages in rural India with a reputation for a conservative lending culture. The Fund also purchased **KPIT Technologies**, an Indian software developer supporting the manufacture of electric powertrains, autonomous/assisted-driving vehicles and vehicle connectivity.

Major disposals over the period included **Naver**, as a disappointing meeting resulted in a lack of conviction in the company's quality and sustainability positioning. The Fund also sold Indian online platform **Info Edge** and Chinese manufacturer **Estun Automation** on valuation concerns.

#### Outlook

The Asian region is home to some of the highest-quality stewards and first-rate franchises globally, with many avenues for long-term growth. The Fund continues to look for companies with sustainability tailwinds combined with high-quality business models as a powerful formula for long-term success. Paired with a disciplined, independent investment approach, the Fund expects to continue to protect and grow clients' investments over the long term.

Benchmark: MSCI AC Asia Pacific ex Japan Index.

*IA Sector: Specialist.* 

This Fund was previously part of the IA Asia Pacific excluding Japan sector. Due to the changing geographical nature of the earnings of the stocks in this portfolio, this Fund was then reclassified by the IA as IA Specialist sector during 2017. The performance ranking of funds within the IA Specialist sector is not viewed as a fair comparison given the diverse nature of the funds within the sector. Performance statistics are therefore noted versus the benchmark rather than the IA sector. The Specialist sector constituents are defined by the IA as funds that have an investment universe which is not accommodated by the other IA mainstream sectors.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

This share class is in deficit and therefore not making a distribution.

### Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Indian subcontinent and which are listed, traded or dealt in on Regulated Markets worldwide.

Countries of the Indian subcontinent include India, Pakistan, Sri Lanka and Bangladesh.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation
Share class B Accumulation
Share class A Accumulation (EUR share class)
Share class B Accumulation (EUR share class)
Share class B Accumulation (USD share class)

	<b>←</b> Lower Ri	sk		Higher Risk →			
Potentially Lower Rewards				F	Potentially Hig	her Rewards	
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 (apart from share classes A Accumulation EUR, B Accumulation EUR and B Accumulation USD which have a rating of 6) due to its past performance and the nature of its investments. Shares with a rating of 5 or 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. The Fund might also experience the following risks:

Indian Subcontinent risk: Although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 0.9% in sterling terms over the 6 months and has provided cumulative returns of 54.3% and 62.9% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included **Crompton Greaves** and **Tube Investments of India**, both of which delivered attractive growth thanks to a return of the Indian manufacturing cycle. Family-owned Indian conglomerate **Mahindra & Mahindra** also performed well, benefitting from its recent investment to build a more robust franchise.

Detracting from performance was courier services provider **Blue Dart Express** which was impacted by increased expenses and inflation. **Aavas Financiers** declined on no particular news. The growth outlook for loans in India remains strong and Aavas continues to expand in rural India. **Tata Consumer Products** also lagged over the period in the face of weakened consumer demand.

#### Portfolio changes

The Fund purchased **KPIT Technologies**, an Indian software developer supporting the manufacture of electric powertrains and vehicles, and **Indian Hotels** which is India's largest hospitality company. The Fund also initiated a position in **Tata Chemicals**, one of the world's leading producers of soda ash; a component used in a wide variety of end applications, including the renewables supply chain.

The Fund sold **VST Tillers Tractors** due to increased competition and long-term sustainability headwinds. The Fund also sold engineering company **Voltas** and paint manufacturer **Indigo Paints** due to both companies operating in hyper-competitive environments at full valuations.

#### Outlook

In a scenario of rising geopolitical tensions and macroeconomic uncertainty, the Fund continues to carry out bottom-up company analysis, maintaining a focus on fundamental quality and sustainable growth tailwinds with the aim of tapping into the opportunities, and protecting against the risks of investing in the Indian subcontinent.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch

Benchmark return %	(1.3)	30.5	9.2	8.6	(5.0)

Benchmark: MSCI India Index.

IA Sector: Specialist.

The performance ranking of funds within the IA Specialist sector is not viewed as a fair comparison given the diverse nature of the funds within the sector. Performance statistics are therefore noted versus the benchmark rather than the IA sector. The Specialist sector constituents are defined by the IA as funds that have an investment universe that is not accommodated by the other IA mainstream sectors.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

## Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place, in the European region\* (excluding the UK) and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund is not managed to a benchmark and may have exposure to developed markets or Emerging Markets whilst maintaining its geographical diversity.

The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 30 to 45 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

\*The European region includes the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, The Czech Republic, Greece, Hungary, Poland, Russia, Turkey, Croatia, Estonia, Lithuania, Kazakhstan, Romania, Serbia, Slovenia, Bosnia Herzegovina, Bulgaria, Malta, Iceland and Ukraine.

### Risks and reward profile

Share class B Accumulation
Share class E Accumulation

Higher Risk 👈	
ally Higher Rewards	
5 7	
5 7	
	ally Higher Rewards 7 7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

## Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 0.4% in sterling terms over the 6 months to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

At a stock level, the main contributors to performance included Swiss-listed healthcare business **Tecan** which benefitted from an increased focus on lab automation post covid-19. Swiss-listed IT company **Inficon** also performed well due to semi-conductor capacity expansion, and conservative Danish bank **Ringkjøbing Landbobank** rose on increased earnings expectations derived from solid growth achieved in the last part of 2022.

Detracting from performance was key contributor to electric energy solutions **Alfen** which was impacted by concerns of a slowdown in EV charging in a weaker economic environment. Swiss-listed healthcare company Roche declined after some delays in its drug pipeline, and allergy immunotherapy company **ALK-Abello** lagged on reduced tablet sales growth.

### **Portfolio Changes**

The Fund's main aim throughout the year was on improving portfolio diversification and defensiveness. To this end, the Fund initiated a position in French industrial company **Nexans**, the world's second-largest cable producer involved in energy generation and transmission, and **Svenska Handelsbanken**, a conservative Scandinavian full-service bank with a reputation for integrity. The Fund also purchased **Teqnion**, a diversified industrial group with a varied and niche product portfolio.

The Fund took profits on **Nibe Industries** following a stretched valuation. The Fund also sold Danish company **Vestas Wind Systems** and Danish utility company **Ørsted** to ensure portfolio robustness going forward.

#### Outlook

The Fund is fortunate to have slightly elevated cash levels and is well placed to increase positions in some of the highest-quality, best sustainability companies in Europe, at more reasonable valuations going forward.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	Since
period	mths	mths	yr	launch
Fund return %	5.7	0.4	(3.2)	(1.2)
Benchmark return %	14.2	11.0	4.2	6.5

#### Discrete performance as at 31 January 2023

Time	12 mths to
period	31/01/23
Fund return %	(3.2)
Benchmark return %	4.2

Benchmark: MSCI Europe ex UK Index

IA Sector: Europe ex UK

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

## **Authorised Fund Manager's Report**

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the medium to long-term (at least three years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies in Emerging Markets, which are listed, traded or dealt in on Regulated Markets worldwide, and in those of companies listed on developed market exchanges a majority of whose economic activities take place in Emerging Markets.

Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion at the time of investment.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

The Fund might also experience the following risks:

**Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 10.4% in sterling terms over six months and provided a cumulative return of 20.2% and 24.5% over three and five years respectively to the end of January 2023 (net of fees and tax for the B GBP Accumulation share class).

## Authorised Fund Manager's Report

(continued)

24 | | 2022

for the period ended 31 January 2023 (unaudited)

#### Portfolio changes

Significant new purchases over the period included **Glodon**, a leading construction software provider in China, with 70-80% market share and no meaningful competitors. The company has demonstrated a strong track record of growth and innovation and is expanding into parallel applications such as construction management and design software.

There were no complete disposals over the period.

#### Outlook

One of the key attributes in the search for quality companies is sustainable business models that are attractive not only from a one to two year perspective, but throughout the business cycle. The Fund continues to invest in quality businesses that have proven management teams and competitive advantages that allows them to capitalise on the long-term secular trends that continues to exist across emerging markets. Whether it is the formalisation of the Indian economy, the continued financialisation of the South African population or the growing adoption of enterprise resource planning software by small-to-medium-size Brazilian companies, the investment opportunities are plenty. Yet, these kinds of businesses are often not well represented in broader indices and therefore a bottom-up active investment approach has much value to add. The portfolio of businesses is a good example. It is believed the holdings offer attractive compounding opportunities over the long term.

### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

## Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least five years).

The Fund invests in equity or equity-related securities of companies that are incorporated or listed in Emerging Markets, or those of companies listed on developed market exchanges where a majority of their activities take place in Emerging Market countries.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- (i) the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- (ii) the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- (iii) the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	← Lower Risk					Higher Risk 👈		
	Potentially Lower Rewards					Potentially Higher Rewards		
Share class A Accumulation	1	2	3	4	5	6	7	
Share class B Accumulation	1	2	3	4	5	6	7	

S SI

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

Emerging Market risk: Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets that are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

## Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

#### Performance

The Fund rose by 6.1% in sterling terms over the 6 months and has provided cumulative returns of 12.9% and 1.5% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included Mexican convenience store operator **Fomento Economico Mexicano ADR** which benefitted from increased sales. Chilean Luksic family holding company **Quinenco** and Mexican-based processed food company **Herdez** provided solid earnings growth over the period.

Detracting from performance was manufacturer **Tube Investments of India** which declined in the short term on slowed exports and reduced demand. Payment services provider **Network International** lagged in the short term in the face of inflationary pressure, and Taiwanese **Voltronic Power Technology** also experienced a short-term dip on lowered revenue growth expectations.

#### Portfolio Changes

On 30 November 2022 the investment policy of the Fund was changed to reflect the sustainability approach taken by the investment team; investing in the shares of high-quality companies which are well positioned to contribute to, and benefit from, sustainable development. A significant portion of the portfolio was turned over during the latter part of the year in order to align the Fund with its new sustainability mandate.

### Outlook

The Fund's focus remains on finding high-quality stewards who can nurture franchises that are resilient through economic booms and busts, based on solid fundamentals and financial strength. The Fund continues to seek to invest in high-quality companies at sensible prices in order to create robust portfolios that deliver strong, absolute returns for clients over the long term.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

## Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in equity or equity-related securities of large and mid-capitalisation companies that are incorporated or listed in Emerging Markets, or those of companies listed on developed market exchanges where a majority of their activities take place in Emerging Market countries.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation
Share class B Accumulation
Share class B Income
Share Class B Accumulation (USD share class)

← Lower Risk Higher Risk →						gher Risk 👈	
	Potentially Lo	wer Rewards	Potentially Hig	her Rewards			
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for Share Class B Accumulation (USD share class) has a rating of 6) has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 or 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

## Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 4.1% in sterling terms over the 6 months and has provided cumulative returns of an increase of 9.7% and a decrease of 3.0% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included Mexican convenience store operator Fomento Economico Mexicano ADR which benefitted from increased sales over the period, family-owned Indian conglomerate Mahindra & Mahindra which has been investing to build a more robust franchise, and global banking group BBVA which performed well on the back of rising interest rates.

Detracting from performance, payment-services provider **Network International** lagged in the short term in the face of inflationary pressure. Indian IT outsourcer **Tech Mahindra** declined. While demand has slowed, the company's underwhelming share price performance seems more related to valuation than anything fundamental. The performance of **Kotak Mahindra Bank** was also subdued on no particular news. The growth outlook for loans in India remains strong and the company's net-interest margins continue to improve.

#### **Portfolio Changes**

On 30 November 2022 the investment policy of the Fund was changed to reflect the sustainability approach taken by the investment team; investing in the shares of high-quality companies which are positioned to contribute to, and benefit from, sustainable development. A significant portion of the portfolio was turned over during the latter part of the year in order to align the Fund with its new sustainability mandate.

#### Outlook

The Fund's focus remains on finding high-quality stewards who can nurture franchises that are resilient through economic booms and busts, based on solid fundamentals and financial strength. The Fund continues to seek to invest in high-quality companies at sensible prices in order to create robust portfolios that deliver strong, absolute returns for clients over the long term.

Cumulative performance as at 31 January 2023

Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	3.0	5.0	1.5	(7.4)	(4.5)
Benchmark return %	(4.2)	(5.0)	22.8	3.6	(7.3)

Benchmark: MSCI Emerging Markets Index.

IA Sector: Specialist.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

This share class launched on 25 January 2023 hence no comparatives shown.

This share class is in deficit and therefore not making a distribution.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long-term (at least 5 years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies that are incorporated or listed, or where a majority of their economic activities take place in Emerging Markets and which are listed, traded or dealt in on Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is at or above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 35 to 50 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class B Accumulation Share class E Accumulation Share class Z Accumulation

	Lower Ri	SK		Higner Risk →			
Potentially Lower Rewards Potentially Higher Rewar						her Rewards	
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Concentration risk: the Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 3.1% in sterling terms over the 6 months to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

At a stock level, the main contributors to performance over the period included **Mercadolibre**, Latin America's leading online marketplace which continued to execute well in the areas of ecommerce and fintech. Family-owned Indian conglomerate **Mahindra & Mahindra** gained from recent investment to build a more robust franchise, and Brazilian drug store retailer **Raia Drogasil** performed well as it continued to invest with a focus on increasing customer loyalty and taking market share from competitors.

Detracting from performance was South Korean search engine provider **Naver** as internet companies were de-rated globally, Indian group **Marico** which was impacted by weakened consumer demand, and **Kotak Mahindra Bank** which was subdued on no particular news. The growth outlook for loans in India remains strong and the company's net-interest margins continue to improve.

#### **Portfolio Changes**

The Fund initiated a position in German-listed **Infineon Technologies**, a leading tech company servicing digital economy applications, and quality Argentinian IT franchise **Globant** which earns hard currency exporting services to the developed world.

The Fund sold **Naver** and Japanese **Nippon Paint** after disappointing company meetings resulted in a lack of conviction in the companies' quality and sustainability positioning. The Fund also sold Indian online platform **Info Edge** on valuation concerns.

#### Outlook

The Fund's focus remains on finding high-quality stewards who can nurture franchises that are resilient through economic booms and busts, based on solid fundamentals and financial strength. The Fund continues to seek to invest in high-quality companies at sensible prices in order to create robust portfolios that deliver strong, absolute returns for clients over the long term.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	Since
period	mths	mths	yr	launch
Fund return %	3.9	3.1	(0.2)	(6.2)
Benchmark return %	14.2	3.7	(4.2)	(6.9)

Discrete performance as at 31 January 2023

Districte performance as at 51 sandary 2025	
Time	12 mths to
period	31/01/23
Fund return %	(0.2)
Benchmark return %	(4.2)

Benchmark: MSCI Emerging Markets Index.

IA Sector: Global Emerging Markets

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Share class Z Accumulation was launched on 2 December 2021 and therefore no distribution was payable 31 March 2022.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least 5 years).

The Fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in Emerging Markets and which are listed, traded or dealt in on Regulated Markets worldwide.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation
Share class B Accumulation
Share class A Accumulation (EUR share class)

← Lower Ris	sk				Hi	gher Risk →	
Potentially Lo	wer Rewards				Potentially Hig	gher Rewards	_
1	2	3	4	5	6	7	
1	2	3	4	5	6	7	
1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

China market risk: Although China has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 4.8% in sterling terms over the 6 months and has provided cumulative returns of 13.9% and 18.5% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

At a stock level, the main contributors to performance were Hong Kong-listed plant-based beverage producer **Vitasoy International** which demonstrated growing cash flows over the period, family-owned Indian conglomerate **Mahindra** & **Mahindra** which has been investing to build a more robust franchise, and manufacturer **Tube Investments of India** which provided consistent profitability.

Detracting from performance were South Korean search engine provider **Naver** as internet companies were de-rated globally, Indian group **Marico** which was impacted by weakened consumer demand, and UK-listed laboratory services provider **Integrated Diagnostics** which experienced a significant drop in revenue as COVID-19 testing wanes.

#### **Portfolio Changes**

Major purchases included **Advanced Energy Solution**, a Taiwanese company providing battery packs to electric bike and vehicle markets, and **Aavas Financiers**, a leading provider of mortgages in rural India with a reputation for conservative lending. The Fund also purchased **KPIT Technologies**, an Indian software developer supporting the manufacture of electric vehicle components.

Major disposals included **Naver** and Japanese **Nippon Paint** after disappointing company meetings resulted in a lack of conviction in the companies' quality and sustainability positioning. The Fund also sold Indian online platform **Info Edge** on valuation concerns.

#### Outlook

The Fund's focus remains on finding high-quality stewards who can nurture franchises that are resilient through economic booms and busts, based on solid fundamentals and financial strength. The Fund continues to seek to invest in high-quality companies at sensible prices in order to create robust portfolios that deliver strong, absolute returns for clients over the long term.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	3.8	4.8	1.0	13.9	18.5	85.4	311.5
Benchmark return %	14.2	3.7	(4.2)	11.6	7.2	58.1	180.1

#### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	1.0	(4.5)	18.0	6.0	(1.8)
Benchmark return %	(4.2)	(5.0)	22.8	3.6	(7.3)

Benchmark: MSCI Emerging Markets Index.

IA Sector: Specialist.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

This share class is in deficit and therefore not making a distribution.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim -0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities of large and mid-capitalisation companies which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The word "Leaders" in the name of the Fund refers to the focus on large and mid-capitalisation companies. Large and mid-capitalisation companies are currently defined for the purposes of this policy as companies with a minimum market capitalisation of US\$1 billion and a minimum free float of US\$500 million at the time of the Fund's first investment. This represents a minimum threshold; the Manager generally targets companies with a free float market capitalisation of at least US\$5 billion at the time of the Fund's first investment. The Manager will only establish an initial position in a company when it is above these threshold levels but, if market movements drive the company below the thresholds, the Manager is not forced to sell and is able to increase the holding in the company if, in the Manager's opinion, this presents an opportunity to add to the position.

The Fund is not managed to a benchmark and may have exposure to developed or Emerging Markets whilst maintaining its geographical diversity.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund rose by 0.3% in sterling terms over the 6 months and has provided cumulative returns of 27.9% and 41.2% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Key contributors to performance included family-owned Indian conglomerate Mahindra & Mahindra which has been investing to build a more robust franchise. Leading German-listed Infineon Technologies performed well on strong demand for its products in the renewable energy and automation sectors, and Brazilian industrial company WEG continued to deliver growth on the back of powerful sustainability tailwinds relating to electrification and low-carbon technologies.

Detracting from performance was US-listed maker of cybersecurity hardware and software Fortinet on fears economic slowdown would impact demand for their products. US healthcare company, with a focus on cardiovascular products, Edwards Lifesciences lagged due to a reduction in hospital procedures, especially in those countries still imposing COVID restrictions, and French diagnostics company bioMérieux declined on weakened demand, including a slowing in COVID test sales.

#### Portfolio Changes

Major purchases included German-listed maker of personal-care products **Beiersdorf**, a family-controlled company founded 140 years ago. The Fund also bought **Roper Technologies**, a diversified US industrial holding company supplying vertical software, medical and water products, and high-quality US insurance company **Markel** trading at a reasonable valuation.

The Fund sold US-listed software supplier Adobe Systems due to a lack of conviction in the franchise amid ongoing succession concerns.

#### Outlook

The Fund continues to analyse and reassess the corporate quality and sustainability positioning of its holdings and potential investments, examining the quality of management, franchise and financials, as well as a company's role in serving society and its ecological footprint. The Fund continues to focus on high-quality companies that contribute to, and benefit from, a more sustainable future.

#### Cumulative performance as at 31 January 2023

#### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	1.8	8.3	16.0	9.0	1.4
Benchmark return %	0.3	15.9	12.3	15.8	0.0

Benchmark: MSCI AC World Index.

IA Sector: Global.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Group 2	(c)	(c)	(c)	(c)

This share class is in deficit and therefore not making a distribution.

#### Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund invests in a diversified portfolio of equity or equity-related securities which are listed, traded or dealt in on any of the Regulated Markets worldwide.

The Fund is not managed to a benchmark and may have exposure to developed markets or Emerging Markets whilst maintaining its geographical diversity.

The Fund invests in quality companies which are positioned to contribute to, and benefit from, sustainable development.

The Manager assesses quality by understanding:

- i. the quality of management which includes integrity, attitude to environmental and social impacts, corporate governance, long-term performance, attitude to risk and alignment with minority shareholders. The Manager has a preference for stable, long-term (often multiple generational) stewards leading the company;
- ii. the quality of the franchise which includes the social usefulness of the products or services, their environmental impacts and efficiency, and responsible business practices; and
- iii. the quality of the financials which includes financial performance over the economic cycle, cash flows and debt, with a preference for net cash balance sheets (i.e. companies whose cash resources exceed their debt).

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Emerging Markets are defined as countries which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

Share class A Accumulation
Share class A Income
Share class B Accumulation
Share class B Income
Share class A Accumulation (EUR share class)
Share class A Accumulation (USD share class)
Share class B Accumulation (USD share class)

	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7
	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for share classes A Accumulation USD and B Accumulation USD which have a rating of 6) has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 or 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 0.4% in sterling terms over the 6 months and has provided cumulative returns of 18.8% and 34.8% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

At a stock level, the main contributors to performance were Hong Kong listed, plant-based beverage producer Vitasoy International which boosted cash flows with the return of its stock to retail shelves in China. German-listed power management, semi-conductor company Infineon Technologies performed well on strong demand for the company's products in the renewable energy and automation sectors, and Brazilian industrial company WEG continued to deliver strong growth on the back of powerful sustainability tailwinds relating to electrification and low-carbon technologies.

Detracting from performance was US-listed maker of cybersecurity hardware and software Fortinet. The company's share price performance was impacted by fears about how an economic slowdown would impact demand for their products. Swiss-listed healthcare company Roche declined after some delays in its drug pipeline and Italian-listed healthcare company DiaSorin declined as COVID test sales continue to fall as a proportion of total company test sales.

#### **Portfolio Changes**

The Fund took advantage of more attractive valuations during the period to purchase Swiss-listed **Roche**, a well-stewarded pharmaceutical and diagnostic company, and US speciality insurance company **Markel**.

The Fund did not make any full disposals over the period.

#### Outlook

Looking ahead brings cautious optimism, unveiling some exciting, long-term opportunities to invest in high-quality companies at more reasonable valuations. However, multiple risks still dominate the economic picture. The Fund's focus in the months ahead will be on portfolio resilience and diversification.

#### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	(2.3)	0.7	20.8	13.6	(0.1)
Benchmark return %	0.3	15.9	12.3	15.8	0.0

Benchmark: MSCI AC World Index.

IA Sector: Global.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim – 0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return from income and capital growth over the medium to long term (at least three years).

The Fund invests in a diversified portfolio of equity securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes, but is not limited to, utilities (e.g. water and electricity), highways and railways, airports, marine ports and oil and gas storage and transportation.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

#### Risks and reward profile

	<b>←</b> Lower Ris	sk				Hi	gher Risk 👈
	Potentially Lower Rewards					Potentially Hig	gher Rewards
Share class A Accumulation	1	2	3	4	5	6	7
Share class A Income	1	2	3	4	5	6	7
Share class B Accumulation	1	2	3	4	5	6	7
Share class B Income	1	2	3	4	5	6	7
Share class B Hedged Accumulation	1	2	3	4	5	6	7
Share class B Hedged Income	1	2	3	4	5	6	7
Share class A Income (EUR share class)	1	2	3	4	5	6	7
Share class B Income (EUR share class)	1	2	3	4	5	6	7
Share class B Hedged Accumulation (EUR share class)	1	2	3	4	5	6	7
Share class B Accumulation (USD share class)	1	2	3	4	5	6	7

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), the B Hedged Accumulation, B Hedged Income, B Hedged Accumulation (EUR) and B Accumulation (USD) share classes had a rating of 6 due to their past performance and the nature of their investments. Shares with a rating of 6 might have higher risks, but also higher returns; on a scale of 1 (less risky) to 7 (riskier), the remaining share classes have a rating of 5 due to their past performance and the nature of their investments. Shares with a rating of 5 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Single-sector risk:** Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors, such as natural disasters, operational disruption and national and local environmental laws.

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

**Smaller companies risk:** Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies. For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The First Sentier Global Listed Infrastructure Fund decreased by 2.1% in sterling terms over the six months. It has provided cumulative returns of 12.2% and 45.4% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

Aena (Spain: Airports) and Grupo Aeroportuario del Sureste (Mexico: Airports) gained on positive passenger volume trends. Promotora y Operadora de Infraestructura (Mexico: Toll roads) advanced as investors were drawn to its high quality assets, conservatively managed (net cash) balance sheet and appealing valuation multiples.

American Tower (US: Towers) detracted from performance, owing to investor concerns for higher interest rates. Dominion Energy (US: Utilities/Renewables) lagged following the unexpected announcement of a "top-to-bottom" strategic review of the company. NextEra Energy (US: Utilities/Renewables) underperformed after announcing disappointing December quarter earnings numbers.

#### Portfolio Changes

**Duke Energy** (US: Utilities/Renewables) was added to the portfolio on the appeal of its predictable earnings and defensive attributes. **Union Pacific** (US: Railroads) was added to the portfolio after a period of underperformance moved the stock to a higher position within the investment process. A position was also initiated in **Crown Castle International** (US: Towers/Data Centres), which is well-positioned to benefit from positive mobile tower leasing trends.

Sempra Energy (US: Utilities/Renewables) was sold after strong share price gains since the position was established in late 2021. SBA Communications (US: Towers/Data Centres) was sold on the view that peers with lower levels of borrowing on their balance sheets appear to be better positioned in the current higher interest rate environment. Norfolk Southern (US: Railroads) was divested on concerns that weaker volumes and pricing may weigh on earnings in 2023.

#### Outlook

Global listed infrastructure consists of assets that provide essential services, and which exhibit strong pricing power, high barriers to entry, structural growth and predictable cash flows. These characteristics are likely to remain attractive to investors against a potentially challenging economic backdrop in 2023.

Cumulative performance as at 31 Janua	arv 2023

Benchmark: FTSE Global Core Infrastructure 50/50 Index.

IA Sector: Infrastructure \*.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

<sup>\*</sup>The sector changed from IA Global on 13/09/2021.

Distribution Tables (continued)

for the period ended 31 January 2023 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### **Authorised Fund Manager's Report**

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return from income and capital growth over the long term (at least 5 years).

The Fund invests at least 70% of its Net Asset Value in a diversified portfolio of equity or equity-related securities issued by companies in the infrastructure sector that are listed, traded or dealt in on Regulated Markets worldwide. The infrastructure sector includes, but is not limited to, utilities (e.g. gas, water and electricity), highways and rail tracks, airports and energy storage and transportation.

The Manager intends to invest in a portfolio which is diversified by infrastructure sector, country and asset type / business model. The Fund has no set target for the number of companies it will invest in but the Manager anticipates that typically the Fund will invest in around 35 to 45 stocks. This does not represent a constraint on the number of holdings which may from time to time fall outside of that range.

Starting with all investible assets, the Fund's investment universe will be determined by removing:

- companies with a market capitalisation of less than US\$500m;
- those companies that do not exhibit the targeted infrastructure characteristics, namely high barriers to entry, strong pricing power, predictable cashflows and sustainable long term growth; and
- those companies with excessive leverage (being borrowing levels that either in the past have proved difficult to service or which exceed those that the Manager considers prudent for a company of that type) or which operate in unfavourable legal and regulatory environments which are either subject to change at short notice, that have proved inconsistent in the past and / or face higher risk of political interference.

Within this investment universe, the Manager assesses and researches companies and their ability, and measures taken, to contribute to, or benefit from moves to implement, the UN Sustainable Development Goals. The research and analysis may be obtained through company reports and filings, government research, industry studies, broker research reports, financial reports and direct contact with the companies; for example engagement with company management or a company board to highlight concerns or areas of potential improvement and to promote change or improvement, including on environmental, social and governance (ESG) issues. This is supplemented with third party specialist research when appropriate.

The Fund will seek to invest through a selection process which assesses companies by valuation and quality criteria and which also incorporates a ranking of broader ESG issues. The Fund then applies an assessment process focussed only on ESG factors which provides additional information with which investment decisions are made. This assessment process can be thought of in three stages:

- Sustainability ranking
  - Stocks are ranked using six ESG factors; namely Environmental, Social, Governance, Alignment of Interests, Board and Disruption. This shows which stocks fare best from a sustainability perspective alone.
- Identify companies that are positively repositioning their business to becoming more sustainable

  The Manager seeks to identify those companies it believes are repositioning themselves to be more sustainable. It is looking for companies that are committed to sustainable development.
- Continuous engagement
  - Engagement is an ongoing process of outreach to companies, regulators and other stakeholders. It provides the Manager with a way of driving change, as well as giving it a better understanding of how companies are performing.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund will only use derivatives for efficient portfolio management purposes, and only in limited circumstances where the Manager deems this to be in the best interests of investors.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund (except for the Share class E Accumulation Hedged which has a rating of 6) has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 or 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back less than you originally invested.

The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Single-sector risk: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a fund that invests in a large number of companies.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed infrastructure risk: The infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws.

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The First Sentier Responsible Listed Infrastructure Fund decreased by 6.3% in sterling terms over the six months to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class). The Fund was established in February 2021.

Positive drivers of performance included **Grupo Aeroportuario del Sureste** (Mexico: Airports) and Vinci (France: Toll Roads), which gained on positive passenger volume trends. **Promotora y Operadora de Infraestructura** (Mexico: Toll Roads) advanced as investors were drawn to its high quality assets, conservatively managed (net cash) balance sheet and appealing valuation multiples.

**Dominion Energy** (US: Utilities/Renewables) lagged following the unexpected announcement of a "top-to-bottom" strategic review of the company. **American Tower** (US: Towers) detracted from performance, owing to investor concerns for higher interest rates. **NextEra Energy** (US: Utilities/Renewables) underperformed after announcing disappointing December quarter earnings numbers.

#### Portfolio Changes

**Union Pacific** (US: Railroads) was added to the portfolio after a period of underperformance moved the stock to a higher position within the investment process. A position was initiated in **Crown Castle International** (US: Towers / Data Centres), which appears well-positioned to benefit from positive mobile tower leasing trends. Enel (Italy: Utilities/Renewables) was also added to the portfolio after share price underperformance created a mispricing opportunity.

Promotora y Operadora de Infraestructura (Mexico: Toll Roads) and American States Water Company (US: Water/Waste) were divested after respective share price gains moved both stocks to lower positions within the investment process. West Japan Railway (Japan: Railroads) was sold after the easing of travel restrictions for tourists and business travellers entering Japan, along with falling COVID case numbers, led to a period of share price outperformance.

#### Outlook

Global listed infrastructure consists of assets that provide essential services, and which exhibit strong pricing power, high barriers to entry, structural growth and predictable cash flows. These characteristics are likely to remain attractive to investors against a potentially challenging economic backdrop in 2023.

Benchmark: FTSE Developed Core Infrastructure ex-Pipelines Index.\*

IA Sector: Infrastructure.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

Distribution Tables (continued)

for the period ended 31 January 2023 (unaudited)

#### Corporate tax for all share classes (unaudited)

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 100.00% of the dividend is received as franked investment income.

Interim -0.00% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

Interim – 0.00% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Fund Termination**

Stewart Investors Latin America Fund closed on 25 July 2022. Termination will be completed once all assets and liabilities have been realised which is expected to be by 30 July 2023.

#### Risks and reward profile

### Authorised Fund Manager's Report

for the period ended 31 January 2023 (unaudited)

#### **Investment Objective and Policy**

The Fund aims to achieve an investment return from income and capital growth over the long-term (at least five years).

The Fund invests at least 70% of its Net Asset Value in a broad selection of equity or equity-related securities issued by real estate investment trusts or companies that own, develop or manage real property located worldwide and which are listed, traded or dealt in on Regulated Markets worldwide.

The investment policy of the Fund may be achieved by investing up to 10% of its Net Asset Value in other collective investment schemes, including in collective investment schemes managed by the ACD or its associates, and/or other Funds of the Company.

Where the Manager is unable to identify investment opportunities at appropriate valuations from time to time, the Fund may hold cash and Near Cash Assets in different currencies.

The Fund may use derivatives for efficient portfolio management purposes only.

1	2	3	4	5	6	7	

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment, but describes how much the value of the Fund went up and down in the past;
- The SRRI rating is based on historical data, which may not be a reliable indication of the future risks and rewards of the Fund;
- The Manager cannot guarantee that the rating of the Fund will remain the same; it may change over time;
- Even the lowest rating of 1 does not mean a risk-free investment;
- On a scale of 1 (less risky) to 7 (riskier), this Fund has a rating of 6 due to its past performance and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns;
- Risk is taken in order to make a higher potential return; the more risk a Fund takes, the higher the potential return, but the greater the risk of loss; and
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. The Fund might also experience the following risks:

**Emerging Market risk:** Emerging Markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Single-sector risk: Investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

**Property securities risk:** The Fund invests in the shares of companies that are involved in property (such as real estate investment trusts) rather than in property itself. The value of these investments may fluctuate more than the underlying property assets.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Currency hedged share class risk: Hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.

### Authorised Fund Manager's Report

(continued)

for the period ended 31 January 2023 (unaudited)

Smaller companies risk: Investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Concentration risk: The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Single country/specific region risk: Investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

For further information on risks, please refer to the Risk Factors section in the Company's Prospectus.

#### Performance

The Fund decreased by 10.3% in sterling terms over the 6 months and has provided cumulative returns of a decrease of 1.2% and an increase of 30.6% over three and five years respectively to 31 January 2023 (net of fees and tax for the B GBP Accumulation share class).

#### Portfolio Changes

The Fund initiated a position in US self-storage REIT **Public Storage** in December. The rationale for the purchase was driven by its exposure to key US markets, with the most notable being Los Angeles. The Fund also initiated a position in Japanese hotel REIT **Orix JREIT**. Orix is set to benefit from the recovery of its resort hotels in Osaka and Tokyo as Japan emerges from the Covid pandemic. The Fund also introduced **Rexford Industrial Realty** to the portfolio in September. Rexford offers the best internal growth in the sector in a tight Los Angeles market.

The manufactured housing exposure was repositioned by selling **Sun Communities** REIT and recycling the proceeds into **Equity LifeStyle Properties** REIT in October. The Fund also reduced its holding in **Ventas** in the period. The rationale for the sale is driven by a revised outlook on the ultimate recovery within Ventas's seniors housing portfolio. The Fund also reduced its position in the self-storage REIT **Life Storage** in the period. The partial sale was driven by growth peaking, the return to normal seasonality in operating trends and the growing impact a slowing U.S. housing market will likely have on near term storage demand.

#### Outlook

Increases in the cost of debt and lower levels of debt availability are expected to place pressure on real estate values, however the Fund is optimistic on property types that are able to continue to demonstrate continued pricing power going into an economic slowdown.

The Fund is particularly constructive on sectors that are able to maintain pricing power.

#### Cumulative performance as at 31 January 2023

Time	3	6	1	3	5	10	Since
period	mths	mths	yr	yrs	yrs	yrs	launch
Fund return %	3.3	(10.3)	(9.1)	(1.2)	30.6	87.1	169.8
Benchmark return %	5.7	(5.7)	(5.6)	(0.6)	24.4	88.3	160.6

#### Discrete performance as at 31 January 2023

Time	12 mths to				
period	31/01/23	31/01/22	31/01/21	31/01/20	31/01/19
Fund return %	(9.1)	21.1	(10.3)	20.9	9.4
Benchmark return %	(5.6)	22.6	(14.1)	10.7	13.1

Benchmark: FTSE EPRA Nareit Developed Index.

IA Sector: Property Other.

Performance is based on share class B Accumulation (GBP), as this is considered to be the Fund's primary share class.

Performance data is calculated on a net basis by deducting fees incurred at Fund level (e.g. the management fee and other Fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis.

Past performance should not be used as a guide to future performance, which is not guaranteed.

#### Corporate tax for all share classes (unaudited)

Interim

A shareholder liable to corporation tax receives this distribution, excluding equalisation, as follows:

Interim – 18.36% of the dividend is received as franked investment income.

Interim – 20.14% of the dividend is received as an annual payment (non-foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. The tax deemed to be deducted is treated as income tax.

1.0396

0.5986

1.6382

1.1352

Interim – 61.5% of the dividend is received as an annual payment (foreign element) received after the deduction of income tax at the lower rate and is liable to corporation tax. It is treated as foreign income in the hands of the corporate investor and is liable to corporation tax. The associated deemed tax is treated as foreign tax in the hands of the investor, who may be able to claim double tax relief. Investors cannot reclaim any of this deemed tax on the foreign element from HM Revenue & Customs.

Shareholders should consult their professional advisers for any advice regarding their tax position.
