UBS ETF MSCI World UE A / LU0340285161 / A0NCFR / UBS Fund M. (LU)

Investment strategy

There may also be instances where a sub-fund holds securities which are not comprised in its index if the portfolio manager of respective sub-fund believes this to be appropriate considering the sub-fund's investment objective and the investment restrictions or other factors. Exposure to the index through direct replication may be affected by rebalancing costs, while exposure to the index through derivatives may be affected by derivative trading costs. The use of OTC derivatives further engenders counterparty risk which is however mitigated by UBS (Lux) Fund Solutions collateral policy. The sub-fund will invest its net assets predominantly in shares, transferable securities, money market instruments, units of undertakings for collective investment, deposits with credit institutions, structured notes listed or dealt in on a regulated market and other assets eligible under the prospectus.

Investment goal

The UBS (Lux) Fund Solutions - MSCI World UCITS ETF sub-fund is passively managed and will take proportionate exposure on the components of the MSCI World Index (Net Return) either through direct investments in all or substantially all of the component securities and/ or through the use of derivatives in particular where it may not be possible or practicable to replicate the index through direct investments or in order to generate efficiencies in gaining exposure to the index.
