Nordea 1 - Alpha 10 MA Fund - HBI - SEK / LU0445387094 / A1CTP9 / Nordea Inv. Funds

Investment goal

The fund uses nine low-correlation investment strategies to provide dynamic exposure to multiple asset classes, within a universe consisting of a subset of equities, fixed income securities and currencies. The fund will implement the different strategies through "pair trades", which combine a long position that is offset by a short position. Over time, the fund is aiming at building a market neutral portfolio. The product employs strict risk management guidelines with focus on risk-adjusted returns. It thereby offers investors a highly diversified portfolio with a high level of downside risk protection and a target return of 1 month Euribor + 7%.
