## CT Pan European Focus Fund Retail Accumulation GBP / GB00B01CWZ36 / A0DK15 / Threadneedle Inv. S.

### Investment strategy

The Fund selects companies in which the fund manager has a high conviction that the current share price does not reflect the prospects for that business. These companies may be chosen from any industry or economic sector, with significant sector and share weightings taken at the discretion of the fund manager. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the MSCI Europe Index. The MSCI Europe Index is regarded as providing an appropriate representation of the share performance of large and medium- sized companies within developed market countries across Europe (including the UK), currently with over 400 companies included. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time. The Fund typically invests in fewer than 50 companies, which may include shares of some companies not within the Index. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

### Investment goal

The Fund aims to increase the value of your investment over the long term. It looks to outperform the MSCI Europe Index over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of European (including UK) companies.
