SPDR Refinitiv Global Convertible Bond UCITS ETF (Dist) / IE00BNH72088 / A12CZS / State Street Gl. Ad.

Investment strategy

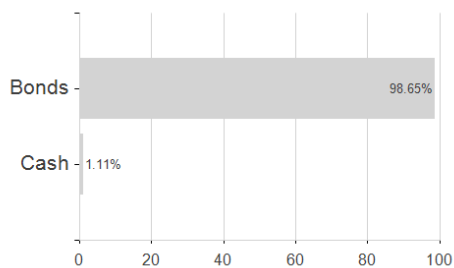

The Fund invests primarily in securities included in the Index. These securities include the investable, global convertible bond market (including mandatory convertible bonds and perpetual convertible bonds). Qualifying fixed income securities may be investment grade (high quality) or non-investment grade or unrated, may be issued with fixed or floating rates and must meet minimum size requirements in their local currency. As it may be difficult to purchase all securities in the Index efficiently, in seeking to track the performance of the Index the Fund will use a stratified sampling strategy to build a representative portfolio.

Investment goal

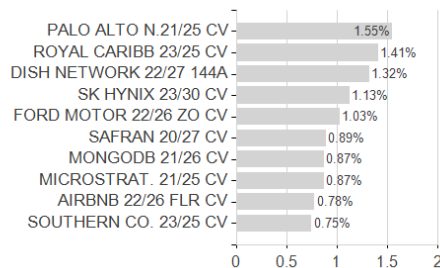

The objective of the Fund is to track the performance of the global convertible bond market. The Fund seeks to track the performance of the Refinitiv Qualified Global Convertible Index (the "Index") as closely as possible. The Fund is an index tracking fund (also known as a passively managed fund).
