### Investment strategy

The fund is actively managed and invests directly (through physical holdings) and/or indirectly (through derivatives) in bonds, equities, currencies and commodity markets worldwide, as well as in investment funds investing in such instruments. The investment manager has established a sophisticated computerised system that through quantitative analysis identifies trends and price patterns to determine trades which are then placed. The investment manager seeks to exploit opportunities where prices display persistent and identifiable upward or downward trends. Investments in commodity markets will be made indirectly using a combination of linked bonds, options, swaps and/or commodity indices. The fund may use leverage and may hold cash (subject to the restrictions provided in appendix I in the fund's prospectus) and invest in money market investments and liquid assets other than cash. The fund may invest up to 10% of its assets into open ended investment funds.

### Investment goal

The fund aims to provide a positive return after fees have been deducted over a three year period by investing in bonds, equities, currencies and commodity markets.
