**GS Global Senior Loans (L)N EUR / LU1023708990 / A14M6E / Goldman Sachs AM BV**

**Investment goal**

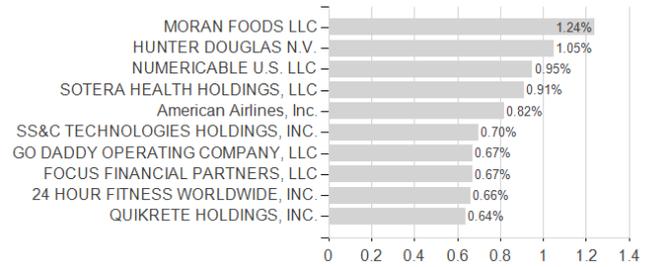

The sub-fund offers investors the opportunity to invest in senior loans – large, ultra-short duration loans made to non-investment grade businesses primarily in the U.S. and Europe. Senior loans are classified as non-investment grade assets, so they typically pay a higher rate of interest than other short-term debt instruments. This rate of interest is based on a fixed spread over a base rate, which floats with market rates and resets every 45-60 days on average. Unlike high yield bonds, senior loans are secured by collateral and hold the highest rank in a borrower's capital structure, giving them priority over other creditors, bonds, and all preferred and common stock. The unique combination of floating rates and secured collateral helps senior loans complement fixed-income portfolios and can provide valuable portfolio diversification for institutional investors.
