## JPM BetaBuilders US Treasury Bond 1-3 yr UCITS ETF - USD (acc) / IE00BD9MMD49 / A2JG3B / JPMorgan AM (EU)

### Investment strategy

The Sub-Fund pursues a passively managed (indextracking) strategy. The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index. The Index consists of US Dollar-denominated fixed rate government bonds that have been issued by the US Treasury with a maturity of between one and three years. The Sub-Fund will use the optimisation methodology to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index. Consequently, the Sub-Fund will only hold a certain sub-set of the Index Securities. The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

### Investment goal

The Sub-Fund aims to provide an exposure to the performance of US Dollar-denominated fixed rate government bonds issued by the US Treasury with a maturity of between one and three years.
