Investment strategy

Although a portion of the portfolio may be invested in the same instruments and at the same weightings as the benchmark, the Portfolio Manager is not bound by the benchmark when selecting instruments. In particular, the Portfolio Manager may, at its discretion, invest in bonds of issuers not included in the benchmark and/or structure the proportion of investments in sectors differently from their weighting in the benchmark in order to take advantage of investment opportunities. In times of high market volatility, the sub-fund's performance may therefore deviate significantly from the benchmark.

Investment goal

The actively managed sub-fund invests primarily in government and corporate bonds denominated in US dollars or local currencies of borrowers from Asia excluding Japan. The sub-fund uses the benchmark JP Morgan Asia Credit Index (JACI) USD as a reference for portfolio construction, performance assessment, sustainability profile comparison and risk management purposes.
