

KEY INVESTOR INFORMATION - NON-BINDING TRANSLATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ACATIS Value Event Fonds - Unit class C

WKN / ISIN: A1T73W / DE000A1T73W9

This Fund is managed by the investment management company ACATIS Investment Kapitalverwaltungsgesellschaft mbH.

Objectives and investment policy

The fund is actively managed.

The investment objective of the Fund is to achieve the greatest possible capital appreciation.

To achieve this aim, the Fund invests in various investment classes. With "value investing", company-specific events ("event-driven value") such as changes to the capital or shareholder structure should be taken into consideration when selecting fund positions. Focusing on companies with high business quality (companies that stand out owing to their sustainability, willingness to safeguard a competitive advantage and their ability to generate high and free cash flows) should reduce fundamental risks when selecting fund positions. Various types of events and different holding periods for individual investments should diversify the portfolio. Interest-bearing securities and bonds may be added, whereby 35% of the Fund's value may be invested in debentures and bonded loans issued by the Federal Republic of Germany. This Fund promotes environmental and/or social characteristics under Article 8 of the Disclosure Regulation (Regulation (EU) 2019/2088). Further information can be found in the section "Investment Principles and Policies" of the Fund's Prospectus.

The benchmark for the fund is: 50% ESTR TR (EUR), 50% MSCI World GR (EUR). This benchmark is determined for the fund by the investment management company and may be changed. The fund does not aim to reproduce the benchmark. The portfolio manager may invest at their own discretion in securities or industries not included in the benchmark in order to capitalise on specific investment opportunities. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the benchmark. This deviation may be material.

The fund may perform derivative trades in order to hedge positions or to increase its returns.

Within this scope, the choice of the individual assets is performed by the fund manager.

The investment policy is the policy being pursued at the time this document was prepared. However, it may change at any time within the limits imposed by the Fund Rules (see section "Special Terms and Conditions of Investment" in the prospectus).

Returns from the Fund (where applicable, of this unit class) will be distributed; interim distributions are possible.

Investors may, in general, redeem their units with the investment management company on each exchange trading day. The investment management company may, however, suspend redemptions when extraordinary circumstances exist which, taking into consideration the interests of the unitholders, make a suspension appear necessary.

The Fund is suitable for investors with a medium- or long-term investment horizon.

Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The fund has been placed in category 5 because its unit value fluctuates relatively strongly and therefore the chance of profit but also the risk of loss can be relatively high.

It may be that due to the calculation model not all risks are accounted for when placing the fund in a risk category. An extensive description of the risks is included in the section "Notes on Risks" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the fund:

- Credit risks: The fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Risks from the use of derivatives: The fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the investment management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.

Charges

One-off charges taken before or after you invest:

Entry charge / Exit charge: 5.00% (currently 5.00%) / 0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over the year:

Ongoing charge: 1.80%

Charges taken from the fund under certain specific conditions:

Performance fee: Up to 20% of the return generated by the Fund during the accounting period in excess of the reference value (previous maximum unit value at the end of the five previous accounting periods + 6%). In the past financial year, this excess return amounted to 1.74%. For more information see section "Administrative and other Costs" in the prospectus.

The ongoing management and custody of the fund's assets as well as the distribution of the units are financed through the fees and other costs. Arising costs decrease the chances of return for the investor.

The entry / exit charge listed here is a maximum figure. In individual cases it may be lower. You may inquire about the figure applicable to you with the distributor of the units.

The ongoing charge mentioned here was incurred in the preceding financial year of the fund which ended on September 2021. The effective charge may vary from year to year. The ongoing charges figure does not include Performance fees and charges for the purchase and sale of assets (Portfolio transaction costs). The annual report for each financial year includes details of the exactly calculated costs. Further information about costs can be found in the Section "Administrative and other Costs" in the prospectus.

Past performance

Past performance is not a guarantee for the future.

In this calculation, all costs and fees with the exception of the entry charge have been deducted.

The fund was set up on 15.12.2008. This share class was set up on 10.07.2013.

The past performance was calculated in Euro.

Practical information

Depository of the fund is Hauck Aufhäuser Lampe Privatbank AG.
