

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

AL DWS GlobalAktiv+

Security code: DWS0PR ISIN: LU0327386487

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustainable capital growth. In order to achieve this, the fund follows a dynamic capital-preservation strategy, where investments are reallocated, depending on the market, between the growth components (comprising higher-risk investments, such as equity investments and as well as higher-risk fixed income funds and direct investments) and the capital preservation components (comprising lower-risk investments, such as open bond/money-market funds and direct investments and/or derivatives such as interest-rate futures). The objective of this is to ensure a minimum value while also achieving the greatest possible participation in price increases of the growth components. The goal is to enable investors to participate in rising markets while limiting the risk of losses in the event of falling markets. The preservation of the minimum value with simultaneous participation in opportunities to gain from price increases is realized through the reallocation of investments between growth components and the capital preservation components. The fund regularly also uses derivative transactions to protect against extreme losses within a very short period. The selection of individual investments is at the discretion of the fund management. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of AL DWS GlobalAktiv+ is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. DWS Investment S.A. guarantees that the net asset value per share of the fund plus any distributions paid during the monthly hedging period will not be less than 80% of the net asset value per share determined on the last valuation date of the previous hedging period. The guaranteed value is determined respectively on the last valuation date of a month and is valid for the respective following calendar month. If the shares are redeemed before the guarantee date, the fund's NAV per share may be below the guaranteed value. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund concludes derivative transactions with various contractual partners to a significant extent. If the contractual partner cannot afford any payments (e.g. due to insolvency), this can cause your investment to suffer a loss. The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate within a short period of time.
