WHAT IS THIS PRODUCT?

Type: Algebris Financial Income Fund (the "**Fund**") is a sub-fund of Algebris UCITS Funds PLC (the "**UCITS**"), a public limited company incorporated with limited liability in Ireland with registered number 509801 and established as an umbrella fund with segregated liability between sub-funds and as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended. The Investment Manager of the Fund is Algebris (UK) Limited (the "**Investment Manager**"). Segregated liability between sub-funds means that the assets and liabilities of each sub-fund are segregated by Irish law. The prospectus and periodic reports are prepared for Algebris UCITS Funds plc at umbrella level. You may switch your shares in the Fund to shares in other sub-funds in which you are eligible to invest. Further information is available from BNP Paribas Fund Administration Services (Ireland) Limited.

Objectives: The Fund aims to maximise income and generate superior risk-adjusted returns over an investment cycle of approximately 3 to 5 years by investing in high dividend-yielding equity stocks and bonds. The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies. The Fund intends to invest in the financial sector globally, primarily in shares that pay a high dividend (for example, ordinary shares, depositary receipts and preference shares) and debt securities (for example, government bonds and corporate bonds) with fixed and variable interest rates, which may be rated investment grade or below investment grade. The Fund may also invest in equities and other financial instruments, including convertible securities (bonds that can be converted into shares), hybrid securities (instruments that combine the characteristics of bonds and shares), contingent convertible instruments (**CoCo-Bonds**) (bonds that can be converted into shares or their principal amount may be written down if a pre-specified trigger event occurs), subordinated debt, exchange traded notes (**ETNs**) (a type of debt security, in order to gain exposure to an eligible index, market or asset class), exchange traded funds (**ETFs**) (securities that tracks an index, a commodity or a basket of assets like an index fund, but trades like a stock on an exchange) and other collective investment schemes. During times of high levels of market movements (volatility) the Fund may invest substantially in deposits. The Fund may also enter into financial derivative instruments (**FDI**), including options (securities that give the right to buy or sell another asset), swaps (an instrument that swaps the performance of one asset for another), contracts for difference (a security that returns the difference between the value of an asset at the beginning and the end of the contract), forwards (contracts to exchange foreign currencies or securities at an agreed date in the future) and futures (contracts to exchange a predetermined quantity of another asset at a certain price on a certain future date). In addition, certain financial instruments such as convertible securities, CoCo-Bonds and ETNs, may have embedded leverage or embed a derivatives component. The Fund may invest in FDI for the reduction of risk and/or the generation of additional capital or income. You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). Orders to buy and sell can be made by submitting a request by 12.00p.m. (Irish time), one business day in advance, to the administrator, BNP Paribas Fund Administration Services (Ireland) Limited. Any income that may arise in the Fund will be reinvested in the Fund.

Hedging: The Fund's base currency is Euro and the Fund may use currency hedging (the technique of buying or selling currencies to minimise fluctuations in non-Euro currency investments resulting from foreign exchange movements). There is no guarantee that this will be successful.

Intended Retail Investors: The Fund is suitable for all investors seeking to achieve a high level of income and modest capital growth and who are prepared to accept a moderate level of volatility with a medium to long-term investment horizon. The investors must be able to bear the economic risk of the loss of their investment.

Term: The Fund has no maturity date at which the Fund will automatically terminate. Algebris (UK) Limited is not entitled to terminate the Fund unilaterally nor can the Fund be automatically terminated. More details on the circumstances whereby the Fund may terminate are detailed in the prospectus of the UCITS (the "**Prospectus**") under the heading "Termination".

Depositary of the Fund: BNP Paribas, Dublin Branch.

The prospectus, the half-yearly reports and annual reports of the Fund can be obtained free of charge in English from your financial advisor or distributor. Other practical information such as the latest share prices are available free of charge at <https://www.algebris.com/funds/>.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future

performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator.

The Fund is subject to the following Risk Factors relating to (without limitation):

- Credit and interest rate
- CoCo-Bonds
- Market
- Emerging markets
- Currency
- Sustainability
- Derivatives

This product does not include any protection from future market performance so you could lose some or all of your investment.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 5 years		1 year	5 years (Recommended Holding period)
Investment 10,000 EUR			
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3,270 EUR	3,980 EUR
	Average return each year	-67.31%	-16.81%
Unfavourable	What you might get back after costs	7,570 EUR	8,000 EUR
	Average return each year	-24.34%	-4.37%
Moderate	What you might get back after costs	10,540 EUR	12,510 EUR

Favourable	What you might get back after costs	16,880 EUR	17,090 EUR
	Average return each year	68.82%	11.32%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF ALGEBRIS INVESTMENTS (IRELAND) LIMITED IS UNABLE TO PAY OUT?

Although the assets of the Fund are held in safekeeping and segregated from the assets of the Management Company or of the Depositary, in the event of the insolvency of either of those providers, you may suffer a financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment 10,000 EUR Scenarios	If you exit after 1 year	If you exit after 5 years
Total Costs Annual Cost Impact (*)	135 EUR 1.35%	751 EUR 1.23% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.82% before costs and 4.59% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
