

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz Global Investors Fund - Allianz Emerging Markets Short Duration Bond Share Class W2 (USD)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1698894653
WKN: A2H5US

Objectives and Investment Policy

Long-term capital growth and income by investing in short duration bonds of Emerging Bond Markets denominated in USD.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Min. 70% of Sub-Fund assets are invested in bonds of Emerging Markets with a rating of B- (Standard & Poor's) or better and/or in bonds of countries which are constituents of the JP Morgan Emerging Market Bond Index Global Diversified or the JP Morgan Corporate Emerging Market Bond Index and which are denominated in USD. Max. 30% of Sub-Fund assets may be invested in bonds other than described in the investment objective. Max. 15% of Sub-Fund assets may be invested in PRC Bond Markets. Sub-Fund assets may be invested in High-Yield bonds bearing a typically higher risk and higher potential of gains. Sub-Fund assets are not invested in ABS and/or MBS. All bonds and money market instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. Max. 100% Sub-Fund assets may be

held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% of Sub-Fund assets may be invested in UCITS and/or UCI. Duration of Sub-Fund assets should be between one and three years.

Benchmark: SOFR (in USD).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommended Holding Period: 3 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

SFDR Category – Article 6 (a financial product that does not consider the EU criteria for environmentally sustainable economic activities)

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.

A significant portion of the Fund may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.38%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 30.09.2022. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

You will find more details about the calculation of the charges by checking the respective part of the prospectus.

Past Performance

■ Percentage growth of the fund
■ Benchmark: starting 29.11.2019 LIBOR USD 3-Month (in USD), starting 01.10.2021 SOFR (in USD)

Past performance is not a reliable guide to future performance.

The fund's performance is not related to the Benchmark's performance since we do not replicate or reproduce the Benchmark.

The past performance shown here takes account of all charges and costs with the exception of the entry, switching and exit charge.

The fund was launched in 2014. This share class was launched in 14.11.2017.

The performance of the fund is calculated in USD.
