# Allianz Europazins

## Activity report

The fund invests primarily in bonds denominated in a European currency. Securities acquired must have a good credit rating (investment-grade rating). The investment objective is to achieve market-oriented returns while promoting investments that take environmental, social and governance characteristics into account. Relevant information on the ESG strategy can be found in the appendix to the report.

The fund's securities investments continued to focus on government bonds during the year under review. In addition to a core portfolio of government securities from countries with a high credit rating, such as Germany, the United Kingdom and France, issuers from Italy and Spain were also represented to a considerable extent. The mix of bank and corporate bonds was largely maintained. Covered bonds and emerging market bonds were still only represented on a selective basis. The average credit rating of the securities portfolio (in accordance with the Standard & Poor's system) remained unchanged on balance and was A+ at the end of the year. Exposure in the maturity segment of 7 to 10 years was reduced, in particular in favour of 1- to 3-year maturities. As a result, the most recent total duration of the portfolio fell to just over four years. In terms of currency, the fund continued, in addition to core investments in the euro, to invest in Pound Sterling, which remained mostly within a stable range. The liquidity ratio remained at a low level on balance.

As a result of this investment structure, the fund declined considerably in value, with slightly weaker performance than its benchmark. The negative earnings reflected the significant increase in market yields resulting from accelerated inflation and the raising of key interest rates by the European Central Bank and the Bank of England. This led to considerable price declines, particularly for previously extremely low or negative interest-bearing government securities with high credit ratings and medium to long maturity, around which the fund is structurally orientated. The addition of corporate bonds and covered securities was not able to escape the pronounced downward trend. Taking into account ongoing costs, it therefore lagged slightly behind the benchmark index in the current environment.

The Fund promotes environmental and/or social characteristics as defined in Article 8(1) of Regulation (EU) 2019/2088 (Regulation on sustainability-related disclosures in the financial services sector – hereinafter "Disclosure

Regulation"). The information required to be disclosed for regular reports for financial products as defined in Article 8(1) of the Disclosure Regulation and Article 6 of Regulation (EU) 2020/852 (hereinafter "Taxonomy Regulation") can be found in the annex to the report.

The performance, which was calculated according to the BVI method, amounted to -12.39% for unit class A (EUR) and to -12.14% for unit class R (EUR) during the reporting period. The J.P. MORGAN Government Bond (GBI) 1-10 Year Total Return (in EUR) performance benchmark over the same period was -11.81%.

The COVID-19 pandemic caused considerable volatility and uncertainty on the international capital markets. As a result of this situation, it is only possible to make extremely limited general forecasts about capital market trends and future effects. At the current time, as the annual report is being prepared, it is therefore not possible to definitively assess the direct impact of the COVID-19 pandemic on the Fund.

The attack on Ukraine by the Russian army has created volatility and uncertainty on the global capital markets. Given the uncertainty about how the attack will progress, it has become even more difficult to make general forecasts about the performance of the capital markets and future effects. At the current time, as the annual report is being prepared, it is therefore not possible to definitively assess the direct impact of the attack on the Fund.

In order to quantify the market price risks achieved during the reporting year, the Company calculates the volatility of the value of the fund units during this period. The calculated volatility is compared to the volatility of a global mixed equity/bond index portfolio. If the achieved volatility of the fund is significantly higher than that of the index portfolio, the market price risk of the fund is classified as "high". If the volatility of the fund is similar to that of the index portfolio, the risk is classified as "medium". And if the fund's volatility is considerably lower than that of the index portfolio, the market price risk is classified as "low".

The fund Allianz Europazins achieved a low market price risk during the reporting period.

Any effects which the exchange-rate movements of a foreign currency versus the fund's base currency may have had on the

fund's value are assessed on the basis of the extent to which the fund had invested in assets denominated in foreign currencies during the reporting year, including any hedging transactions.

During the reporting period, a moderate proportion of the fund Allianz Europazins was invested in assets whose value is directly affected by movements of the foreign currency versus the fund's base currency.

The liquidity risks taken by the fund during the reporting period are assessed according to the proportion of assets which may not be easy to sell or which may possibly be sold only at a lower price.

The fund Allianz Europazins was subject to a low liquidity risk during the reporting period.

In order to quantify the risks of settlement default taken during the reporting period the Company analyses the proportion of assets for which a default risk exists and their default potential. If a considerable proportion of the fund's money was invested in assets with a high default risk and high default potential, the fund's risk of settlement default is classified as "high". If the proportion of assets with a high default risk was moderate or if the default potential is medium, the risk is classified as "medium". If the fund invested only a small proportion in assets with a high default risk or if the default potential was low, the risk of settlement default is classified as "low".

During the reporting period, the fund Allianz Europazins had invested a moderate proportion of its money in assets with a high default risk.

In order to quantify the risk of interest-rate changes taken during the reporting year, the Company calculates the fund's sensitivity to changes in the current rate level (via the duration-weighted proportion of rate-sensitive positions). If the fund

shows a considerable sensitivity to changes in the current rate level, the risk of interest-rate changes is classified as "high" for the fund. If the fund's rate sensitivity is moderate, the risk is classified as "medium". And if the fund's rate sensitivity is low, the risk of interest-rate changes is classified as "low".

During the reporting period, the fund Allianz Europazins showed medium sensitivity to interest rate risks.

In order to assess the operational risks of the Company's procedures, the Company conducts detailed risk assessments for relevant processes identified by a risk-oriented overview, identifies weaknesses and defines measures to remedy these weaknesses. If clearly defined services are outsourced to external suppliers, the Company monitors these suppliers by regular quality controls and reviews. Any operational risk events identified are immediately remedied, recorded, analysed and prevention measures are defined. If an operational risk event affects the fund, any relevant losses will be compensated by the Company on principle.

While, during the reporting period, the fund Allianz Europazins was basically subject to operational risks stemming from the Company's procedures, it was not subject to elevated operative risks.

The main sources of the performance during the reporting period are as follows:

Realised gains were due mainly to the trading of bonds and similar securities and the trading of forward exchange contracts.

Realised losses resulted mainly from trading bonds and similar securities.

# Annex

## Unit classes

Different unit classes within the meaning of section 16 sub-section 2 of the “General Terms and Conditions” may be created for the fund. These unit classes may differ in terms of profit allocation, front-end load, redemption fee, the currency of the unit value including the use of currency hedging transactions, the all-in fee, minimum investment amount, or any combination of the features mentioned. Unit classes may be created at any time at the discretion of the Company.

During the reporting period, the unit class(es) listed in the following table was/were created.

Unit class	Currency	All-in fee in % p.a.		Front-end load in %		Redemption fee in %	Minimum investment	Allocation of income
		maximum	current	maximum	current			
A	EUR	0.94	0.80	3.00	3.00	--	--	distributing
R	EUR	0.94	0.50	--	--	--	--	distributing

**Information according to Section 7 No. 9 KARBV and Section 37 Para. 1 and 2 DerivateV**

The exposure that is obtained through derivatives	EUR 18,572.09 <sup>1)</sup>

**Potential market risk amount (pursuant to Section 37 of the German Derivatives Regulation (DerivateV))**

Pursuant to the Derivatives Regulation [Derivateverordnung], the degree to which the upper limit for the market risk potential was reached (according to Sections 10 and 11 of DerivateV) was determined for this fund using the qualified method based on a benchmark fund.

The fund is monitored in accordance with Section 7 Paragraph 1 of the Derivatives Ordinance on the basis of the relative VaR method. The potential market risk amount is limited relative to a derivative-free benchmark.

Information based on the qualified method:

smallest potential value at risk	0.87%
largest potential value at risk	2.60%
average potential value at risk	1.74%

Risk model used pursuant to Section 10 of DerivateV:

Delta-normal method

Parameters used pursuant to Section 11 of DerivateV:

assumed holding period: 10 days  
one-sided forecast interval with a probability of 99%  
effective historic observation period of 250 days

Leverage from the use of derivatives during the period from 01/01/2022 to 31/12/2022	99.89%
--	--------

The expected leverage effect of the derivatives is calculated as the expected total sum of the nominal values of the derivatives, excluding offsetting effects. The actual total sum of the nominal values of the derivatives may occasionally exceed the expected total sum of the nominal values of the derivatives or change in future.

Derivatives may be employed by the Company with different objectives in mind, including hedging or speculative purposes. The nominal values of the derivatives are aggregated with no differentiation between the different purposes for using derivatives. As a result, the expected sum of the nominal values of the derivatives does not give any indication of the risk content of the fund.

#### Information on the procedures for valuing assets

The valuation is conducted by the investment management company (IMC).

Equities, subscription rights, exchange-traded funds (ETFs), participation certificates, bonds and exchange-traded derivatives are valued at their market price, provided that a market price is available.

Bonds for which no market price is available are valued at validated broker prices or with the help of regularly reviewed models on the basis of relevant market information.

Participation certificates for which no market prices are available are valued at the mean of the bid-ask spread.

Derivatives and subscription rights which are not traded on the market are valued with the help of regularly reviewed models on the basis of relevant market information.

Investment fund units are valued at the redemption price published by the relevant investment company.

Bank deposits and other assets are valued at their nominal value, term deposits at their current value and liabilities at the repayment value.

Unlisted equities and shareholdings are valued at the current value, which is carefully determined with the help of suitable valuation models, taking account of the current market situation.

The methods used to value the Fund factor in the market effects resulting from the COVID-19 pandemic and the Russia-Ukraine war. No further adjustments were necessary at the time of preparation of the annual report.

The investments reported in this annual report, 98.30% are fund assets valued at stock market trading prices or market prices and 0.00% at imputed current market values and/or verified brokers' quotations. The remaining 1.70% of fund assets consists of other assets, other liabilities and cash.

**Information on transparency and on the total expense ratio (TER)**Total Expense Ratio (TER)<sup>\*)</sup>

Allianz Europazins -A-	0.80%
Allianz Europazins -R-	0.50%

The total expense ratio (TER) is a measurement that compares the total expenses incurred by the fund to the fund assets. The following costs are considered: the all-in-fee and, if applicable, additional costs incurred, except for transaction costs incurred in the fund, interest on borrowing and any performance-related fees. Costs incurred will not be subject to cost compensation. In addition, costs that may be incurred at the level of target funds are not taken into account. The total of the expenses incurred in the indicated time frame is divided by the average fund assets. The resulting percentage is the TER. The calculation complies with the method recommended in CESR Guideline 10-674 in conjunction with EU Commission Regulation 583/2010.

**Information on the performance fee**

A performance fee is levied by the Management Company based on the procedures defined in the Prospectus. The reporting period for a performance fee may differ from the financial year of the Fund. The Management Company receives a performance fee for the reporting period in question only if the amount calculated from a positive benchmark deviation exceeds the negative amount from the previous reporting period at the end of the reporting period. In this case, the Management Company's claim to a fee consists of the difference between the two amounts. The scope of the performance-based management fee for the current reporting period is regularly determined during the course of the financial year – including at the end of the financial year – and is defined in the Fund as a liability.

The performance fee amount calculated for the financial year thus consists of two periods:

1. The difference between the scope at the end of the previous year's financial year and the end of the reporting period.
2. The scope for the current reporting period as at the end of the financial year.

Accordingly, the reported performance fee calculated may be negative, as is the case in this financial year. At the end of the last financial year, liabilities were defined in the Fund that at the end of this financial year were suspended either entirely (no performance fee was paid at the end of the reporting period) or partially (a performance fee was paid at the end of the reporting period).

The performance fee reported here may deviate from the amounts reported in the statement of operations due to income equalisation.

## The actual amount of the performance fee calculated

#### **Further information necessary for understanding the report**

##### **Explanation of net change**

The net change in unrealised gains and losses is determined by comparing, in each reporting period, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Based on the accounting system for unit class funds, which each day calculates the change in unrealised gains and losses at fund level for the previous day and spreads them according to the ratio of the unit classes, daily adverse changes may outweigh the daily positive changes over the reporting period within the unit class to show negative unrealised gains, or vice versa, to show positive unrealised losses.

##### **Annex according to Regulation (EU) 2015/2365 with regard to Securities Financing Transactions and Total Return Swaps**

This Fund was not invested in any securities financing transactions pursuant to Regulation (EU) 2015/2365 during the reporting period, therefore the following contains no information on this type of transaction.

**Disclosures relating to employee remuneration (all figures in EUR) of Allianz Global Investors GmbH for the financial year from 01/01/2022 to 31/12/2022**

The following table shows the total amount of remuneration actually paid to the employees of Allianz Global Investors GmbH in the past financial year divided into fixed and variable components. It is also broken down by members of management, risk takers, employees in controlling positions and employees whose total remuneration puts them in the same remuneration category as members of management and risk takers.

**AllianzGI GmbH, remuneration 2022**

All values in EUR / actual remuneration paid (cash flow 2022)

		thereof Risk Taker	thereof Board Member	thereof Other Risk Taker	thereof with Control Function	thereof with Comparable Compensation
Number of employees 1,710						
Fixed remuneration	174,302,493	7,269,792	985,960	2,207,677	390,480	3,685,675
Variable remuneration	121,033,472	16,763,831	1,483,410	4,459,440	377,612	10,443,368

The information on employee remuneration does not include remuneration paid by delegated managers to their employees.

**Setting the remuneration**

AllianzGI is subject to the supervisory requirements applicable to investment management companies with regard to structuring the remuneration system. Company management is usually responsible for decision-making about determination of employee remuneration. Decisions about the remuneration of the management itself are taken by the shareholder.

The company has set up a remuneration committee to perform the duties required by law. This committee consists of two members of the company's Supervisory Board, each of whom is appointed by the Supervisory Board, where one member should be an employee representative.

Working in close cooperation with the Risk Management and Legal & Compliance departments as well as with external advisers and in conjunction with the management, the Human Resources department has developed the company's remuneration policy under the requirements of the UCITS and AIFM Directives. This remuneration policy applies to the company domiciled in Germany and to its branches.

**Remuneration structure**

The primary components of monetary remuneration are the basic salary, which typically reflects the scope, responsibilities and experience required in a particular role, and an annual variable remuneration.

The total amount of the variable remuneration payable throughout the Company depends on the performance of the business and on the Company's risk position and will therefore vary every year. In this respect, the allocation of specific amounts to particular employees will depend on the performance of the employee and their departments during the period under review.

Variable remuneration includes an annual bonus paid in cash following the end of the financial year. In the case of employees whose variable remuneration exceeds a certain threshold, a substantial portion of the annual variable remuneration is deferred for a period of three years.

The deferred portions increase in line with the level of the variable remuneration. Half of the deferred amount is linked to the performance of the company, and the other half is invested in the funds managed by AllianzGI. The amounts ultimately distributed depend on the company's business performance or the performance of shares in certain investment funds over several years.

In addition, the deferred remuneration elements may be withheld under the terms of the plan.

#### **Performance evaluation**

The level of pay awarded to employees is linked to both quantitative and qualitative performance indicators.

For Investment managers, whose decisions make a real difference in achieving our clients' investment goals, quantitative indicators are geared towards sustainable investment performance. For portfolio managers in particular, the quantitative element is aligned with the Benchmark of the client portfolios they manage or with the client's expected return, measured over a period of one year and three years.

For client-facing employees, goals also include client satisfaction, which is measured independently.

The remuneration of employees in controlling functions is not directly linked to the business performance of individual departments monitored by the controlling function.

#### **Risk takers**

The following groups of employees were qualified as risk carriers: Members of management, risk takers and employees in controlling positions (as identified in current organisational charts and job profiles and as assessed in terms of the influence on the risk profile) as well as all employees whose total remuneration puts them in the same remuneration category as members of management and risk takers and whose activities have a significant effect on the risk profiles of the company and the investment funds managed by it.

#### **Risk avoidance**

AllianzGI has comprehensive risk reporting in place, which covers both current and future risks of our business activities. Risks which exceed the organisation's risk appetite are presented to our Global Remuneration Committee, which will decide, if necessary, on the adjustments to the total remuneration pool.

Individual variable compensation may also be reduced or withheld in full if employees violate our compliance policies or take excessive risks on behalf of the company.

#### **Annual review and material changes to the remuneration system**

The Remuneration Committee did not find any irregularities during the annual review of the remuneration system, including a review of the existing remuneration structures as well as implementation of the regulatory requirements and compliance with them. In the course of this centralised and independent review, it was also found that the remuneration policy had been implemented in accordance with the remuneration regulations stipulated by the Supervisory Board. Furthermore, no material changes were made to the remuneration policy in the past financial year.

## Environmental and / or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

 Yes

 No

 It made **sustainable investments with an environmental objective**: \_\_\_\_%

 in economic activities that qualify as environmentally sustainable under the EU Taxonomy

 in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

 It made **sustainable investments with a social objective**: \_\_\_\_%

 It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 3,30% of sustainable investments

 with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

 with a social objective

 It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Allianz Europazins (the "Fund") promoted environmental and/or social characteristics through integrating environmental, social, human rights, governance, and business behaviour factors (this domain does not apply for sovereigns issued by a Sovereign Entity) through integration of a best-in-class approach into the Fund's investment process. This encompasses the evaluation of corporate or sovereign issuers based on an SRI Rating which is used to construct the portfolio.

In addition, sustainable minimum exclusion criteria were applied.

No reference benchmark had been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund as the Fund does not use a sustainability benchmark nor has defined its binding elements in comparison to the benchmark. However, sustainability indicators are partly reported in comparison to the benchmark in order to increase the informative value.

## ● How did the sustainability indicators perform?

To measure the attainment of the environmental and/or social characteristics the following sustainability indicators are used and which performed as follows:

- The actual percentage of the Fund's Portfolio (Portfolio in this respect does not comprise non-rated derivatives and instruments that are non-rated by nature (e. g., cash and deposits)) assets invested in best-in-class issuers (issuers with a minimum SRI Rating of 2 out of a scale from 0-4; 0 being the worst rating and 4 the best rating) was 98,84 %
- The actual percentage of the benchmarks best-in-class issuers was 100 %.
- The Principal Adverse Impacts (PAIs) of investment decisions on sustainability factors were considered through the adherence to the exclusion criteria applied for direct investments. The following sustainable minimum exclusion criteria for direct investments were applied:
  - securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption,
  - securities issued by companies involved in controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, biological weapons, depleted uranium, white phosphorus, and nuclear weapons),
  - securities issued by companies that derive more than 10% of their revenues from weapons, military equipment, and services,
  - securities issued by companies that derive more than 10% of their revenue from thermal coal extraction
  - securities issued by utility companies that generate more than 20% of their revenues from coal,
  - securities issued by companies involved in the production of tobacco, and securities issued by companies involved in the distribution of tobacco with more than 5% of their revenues.

Direct investments in sovereign issuers with an insufficient freedom house index score are excluded.

The sustainable minimum exclusion criteria were based on information from an external data provider and coded in pre- and post-trade compliance. The review was performed at least half yearly.

## ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainable investments contributed to environmental and/or social objectives, for which the Investment Managers used as reference frameworks, among others, the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy.

The assessment of the positive contribution to the environmental or social objectives was based on a proprietary framework which combined quantitative elements with qualitative inputs from internal research. The first step was the application of the methodology which led to quantitative break-down of an investee company into its business activities. The second step involved the qualitative element of the framework to assess if business activities contributed positively to an environmental or a social objective.

The positive contribution on the Fund level was calculated by considering the revenue share of each issuer attributable to business activities which contributed to environmental and/or social objectives, provided the issuer satisfied the Do No Significant Harm ("DNSH") and Good Governance principles. In the second step, asset-weighted aggregation was performed.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Moreover, for certain types of securities, for e.g., finance specific projects contributing to environmental or social objectives, the overall investment was considered to contribute to environmental and/or social objectives. Further, in these cases, a DNSH as well as a Good Governance check for issuers was performed.

### ● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that Sustainable Investments did not significantly harm any other environmental and/or social objective, the Investment Manager of the Fund leveraged the PAI indicators, whereby significance thresholds have been defined to identify significantly harmful issuers. Issuers not meeting the significance threshold were engaged for a limited period to remediate the adverse impact. Otherwise, if the issuer did not meet the defined significance thresholds twice subsequently or in case of a failed engagement, it did not pass the DNSH assessment. Investments in securities of issuers which did not pass the DNSH assessment were not counted as sustainable investments.

#### ● *How were the indicators for adverse impacts on sustainability factors taken into account?*

PAI indicators were considered either as part of the application of the exclusion criteria or through thresholds on a sectorial or absolute basis. Significance thresholds have also been defined referring to qualitative or quantitative criteria.

Recognising the lack of data coverage for some of the PAI indicators, equivalent data points were used, when relevant, to assess PAI indicators when applying the DNSH assessment for the following indicators for corporates: share of non-renewable energy consumption and production, activities negatively affecting biodiversity-sensitive areas, emissions to water, lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises; the following indicators were applied for sovereigns: GHG Intensity Investee countries subject to social violations. In case of securities which finance specific projects contributing to environmental or social objectives equivalent data at project level might be used to ensure that Sustainable Investments do not significantly harm any other environmental and/or social objective.

#### ● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager's sustainable minimum exclusion list screened out companies based on their involvement in controversial practices against international norms. The core normative framework consists of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and are embedded in the Sustainable Development Goals. Sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as Securities issued by companies having a severe violation of these frameworks were restricted from investment universe.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objective*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company joined the Net Zero Asset Managers Initiative and considered PAI indicators through stewardship including engagement, both of which were relevant to mitigate potential adverse impact as a company.

Due to the commitment to the Net Zero Asset Managers Initiative, the Management Company reduced greenhouse gas emissions in partnership with asset owner clients on decarbonisation goals, consistent with an ambition to reach net zero emission by 2050 or sooner across all assets under management. As part of this objective AllianzGI had set an interim target for the proportion of assets to be managed in line with the attainment of net zero emissions by 2050 or sooner.

The Fund's Investment Manager considered PAI indicators regarding greenhouse gas emission, biodiversity, water, waste as well as social and employee matters for corporate issuers, and, where relevant, the freedom house index was applied to investments in sovereigns. PAI indicators were considered within the Investment Manager's investment process through the means of exclusions.

Moreover, the data coverage for the data required for the PAI indicators were heterogenous. The data coverage related to biodiversity, water and waste is low and the related PAI indicators were considered through exclusion of securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues.

Additionally, PAI indicators among other sustainability factors were applied, to derive the SRI Rating. The SRI Rating was used for the portfolio construction.

The following PAI indicators were considered:

Applicable to corporate issuers:

- GHG Emissions
- Carbon footprint
- GHG Intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Violation of UN Global compact principles
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles
- Board gender diversity
- Exposure to controversial weapons

Applicable to sovereign and supranational issuers:

- Investee countries subject to social violations.

## What were the top investments of this financial product?

During the reference period, the majority of the investments of the financial product contained equity, debt and target funds. A portion of the financial product contained assets which did not promote environmental or social characteristics. Examples of such assets are derivatives, cash and deposits. As these assets were not used to attain the environmental or social characteristics promoted by the financial product, they were excluded from the determination of top investments. The main investments are the investments with the largest weight in the financial product. The weight is

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 01.01.2022-31.12.2022

calculated as an average over the four valuation dates. The valuation dates are the reporting date and the last day of every third month for nine months backwards from the reporting date.

No direct sector allocation is possible for investments in target funds, as a target fund may invest in securities of issuers from different sectors.

## What was the proportion of sustainability-related investments?

Sustainability-related investments refer to all investments that contribute to the achievement of the environmental and/or social characteristics within the scope of the investment strategy. The majority of the Fund's assets were used to meet the environmental or social characteristics promoted by this Fund. A low portion of the Fund contained assets which did not promote environmental or social characteristics. Examples of such instruments are derivatives, cash and deposits, some Target Funds and investment with temporarily divergent or absent environmental, social, or good governance qualifications.

## What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

Some business activities may contribute to more than one sustainable sub-category (social, taxonomy aligned or other environmental). This can lead to situations, in which the sum of the sustainable sub-categories does not match to overall number of the sustainable category. Nonetheless, no double counting is possible on the sustainable investment overall category.

### ● In which economic sectors were the investments made?

The table below shows the shares of the Fund's investments in various sectors and subsectors at the end of the financial year. The analysis is based on the NACE classification of the economic activities of the company or issuer of the securities in which the financial product is invested. In case of the investments in target funds, a look-through approach is applied so that the sector and sub-sector affiliations of the underlying assets of the target funds are taken into account to ensure transparency on the sector exposure of the financial product.

The reporting of sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council is currently not possible, as the evaluation includes only NACE classification level I and II. The fossil fuels activities mentioned above are considered aggregated with other activities under sub-sectors B5, B6, B9, C28, D35 and G46.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The Taxonomy-aligned investments included debt and/or equity investments in environmentally sustainable economic activities aligned with the EU-Taxonomy. Taxonomy-aligned data is provided by an external data provider. Taxonomy-aligned data was, only in rare cases, data reported by companies in accordance with the EU Taxonomy. The data provider derived Taxonomy-aligned data from other available equivalent company data.

Taxonomy-aligned activities are activities that meet the criteria of the EU taxonomy. If an investment is not aligned with the EU taxonomy because the activity is not or not yet covered by the EU taxonomy or the positive contribution is not significant enough to comply with the Taxonomy technical screening criteria, such an investment can still be considered as an environmentally sustainable investment provided it complies with all the related criteria.

The data were not subject to an assurance provided by auditors or a review by third parties.

The data on taxonomy-alignment is only in rare cases data reported by companies according to the EU Taxonomy. The data provider has derived the data on taxonomy-alignment from other available equivalent public data.

As of the reporting date the reliable data on taxonomy-alignment was available only for the degree to which the aggregated investments were in environmentally sustainable economic activities based on turnover. Therefore, the corresponding values for operational and capital expenditures are displayed as zero.

The share of investments in sovereigns was 84,25 % (calculated based on the look-through approach).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

- Yes:
- In fossil gas                       In nuclear energy
- No

The breakdown of the shares of investments by environmental objectives in fossil gas and in nuclear energy is not possible at present, as the data is not yet available in verified form.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Environmental objective of the EU Taxonomy	In % of Assets
Transitional activities	0,00 %
Enabling activities	0,00 %

The breakdown of the shares of investments by environmental objectives is not possible at present, as the data is not yet available in verified form.

● **What was the share of investments made in transitional and enabling activities?**

Activities	In % of Assets
Transitional activities	0,00 %
Enabling activities	0,00 %

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance

The breakdown of investment shares by environmental objectives is currently not possible due to the lack of reliable taxonomy data. Non-financial undertakings will disclose information on the taxonomy-alignment of their economic activities in the form of pre-defined KPIs, indicating to which environmental objective activities contribute and whether it is a transitional or enabling economic activity, only starting from 01 January 2023 (financial undertakings - from 01 January 2024). This information is a mandatory basis for this evaluation.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0,76 %.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 1,92%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Under "#2 Other" investments which were included were Cash, share of non-sustainable investments of Targets Funds, or Derivatives. Derivatives were used for efficient portfolio management (including risk hedging) and/or investment purposes, and Target Funds to benefit from a specific strategy. There were no minimum environmental or social safeguards applied to these investments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To ensure that the financial product fulfils its environmental and social characteristics, the binding elements were defined as assessment criteria. The adherence to binding elements was measured with the help of sustainability indicators of the Fund. For each sustainability indicator, a methodology, based on different data sources, has been set up to ensure accurate measurement and reporting of the indicators. To provide for actual underlying data, the Sustainable Minimum Exclusion list was updated at least twice per year by the Sustainability Team and based on external data sources.

Technical control mechanisms have been introduced for monitoring the adherence to the binding elements in pre- and post-trade compliance systems. These mechanisms served to guarantee constant compliance with the environmental and/or social characteristics of the Fund. In case of identified breaches, corresponding measures were performed to address the breaches. Example of such measures are disposal of securities which are not in line with the exclusion criteria or engagement with the issuers. These mechanisms are an integral part of the PAI consideration process.

In addition, AllianzGI engages with investee companies. The engagement activities were performed only in relation to direct investments. It is not guaranteed that the engagement conducted includes issuers held by every Fund. The Investment Manager's engagement strategy rests on 2 pillars: (1) risk-based approach and (2) thematic approach.

The risk-based approach focuses on the material ESG risks identified. The size of exposure is a material criterion for triggering the assessment. Significant votes against company management at past general meetings, controversies connected to sustainability or governance and other sustainability issues are in the focus of the engagement with investee companies

The thematic approach focuses on one of the three AllianzGI's strategic sustainability themes- climate change, planetary boundaries, and inclusive capitalism- or to governance themes within specific markets. Thematic engagement prioritizes the size of AllianzGI's holdings and factors in the priorities of clients.

## How did this financial product perform compared to the reference benchmark?

No reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund was designated.

- **How does the reference benchmark differ from a broad market index?**  
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not applicable
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable
- **How did this financial product perform compared to the broad market index?**  
Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Allianz Europazins

Frankfurt am Main, 14 April 2023

Allianz Global Investors GmbH

---

Management Board

# NOTE FROM THE INDEPENDENT AUDITOR

To Allianz Global Investors GmbH

## Audit Opinion

We have audited the annual report prepared according to the section 7 KARBV of the Investment Fund Allianz Europazins – consisting of the activity report for the financial year from 1 January 2022 to 31 December 2022, balance sheet and statement of net assets as at 31 December 2022, statement of operations, development statement for the financial year from 1 January 2022 to 31 December 2022 as well as the comparative overview of the last three financial years, schedule of the transactions concluded during the reporting period, insofar as these are no longer part of the statement of net assets, and the Annex.

In our opinion, based on the findings of our audit, the enclosed annual report in accordance with section 7 KARBV complies in all material respects with the provisions of the German Capital Investment Code (KAGB) and the relevant European regulations and, taking these provisions into account, provides a comprehensive picture of the actual circumstances and developments of the Investment Fund.

## Basis for the opinion

We have conducted our audit of the annual report in accordance with section 7 KARBV in accordance with section 102 KAGB in compliance with the German generally accepted standards for the audit of financial statements promulgated by the Institut der Wirtschaftsprüfer (IDW). Our responsibility under these rules and policies is further described in the section “Responsibility of the auditor for the audit of the annual report in accordance with section 7 KARBV” of our note. We are independent of Allianz Global Investors GmbH (hereinafter referred to as the “Capital Management Company”) in accordance with German commercial and professional law and have fulfilled our other German professional obligations in accordance with these requirements. We are of the opinion that the audit evidence we have obtained is sufficient and suitable to serve as the basis for our opinion on the annual report in accordance with section 7 KARBV.

## Other Information

The legal representatives are responsible for other information. Other information includes the “Annual Report” publication – without further cross-references to external information – with the exception of the audited annual report pursuant to section 7 KARBV (Investment Accounting and Valuation Regulation) and our note.

Our audit opinions on the annual report in accordance with section 7 KARBV do not extend to the other information and accordingly we do not give any opinion or any other form of audit conclusion.

In connection with our audit we have the responsibility to read the other information and to assess whether the other information contains

- inconsistencies with respect to the annual report in accordance with section 7 KARBV or
- our knowledge acquired during the audit appear significantly misrepresented.

## Responsibility of the legal representatives for the annual report according to section 7 KARBV

The legal representatives of the capital management company are responsible for the preparation of the annual report pursuant to section 7 KARBV, which complies with the provisions of the German KAGB and the relevant European regulations in all material respects and ensures that the annual report pursuant to section 7 KARBV allows them to comply with these regulations, to obtain a comprehensive picture of the actual circumstances and developments of the investment fund. In addition, the legal representatives are responsible for the internal audits that they have determined to be necessary in accordance with these Regulations in order to facilitate the preparation of an annual report pursuant to section 7 KARBV which is free from material misstatement, whether intentional or unintentional.

When preparing the annual report in accordance with section 7 KARBV, the legal representatives are responsible for including events, decisions and factors that could significantly influence the further development of the investment fund in the reporting. Among other things, this means that the legal representatives have to assess the continuation of the fund by the management company in the preparation of the annual report pursuant to section 7 KARBV and are responsible for disclosing facts in connection with the continuation of the fund, if relevant.

The legal representatives are also responsible for providing the sustainability-related information in the annex in accordance with the KAGB, Regulation (EU) 2019/2088, Regulation (EU) 2020/852 and the delegated acts of the European Commission that implement these, and with the specific criteria set out by the legal representatives. In addition, the legal representatives are responsible for the internal checks that they have deemed necessary to make sure that the sustainability-related information is free from material misrepresentations due to fraudulent activities or errors.

The aforementioned European regulations contain wording and terms that are subject to considerable doubt with regard to their interpretation and for which no relevant comprehensive interpretations have yet been published. The legal representatives have therefore indicated their interpretations of the relevant wording and terms in the annex. The legal representatives are responsible for the validity of these interpretations. Since such wording and terms can be interpreted differently by regulators or courts, the lawfulness of these interpretations is unreliable.

#### [Responsibility of the auditor for the audit of the annual report according to section 7 KARBV](#)

Our objective is to obtain reasonable assurance as to whether the annual report pursuant to section 7 KARBV as a whole is free from material misstatement – whether intentional or unintentional – and a note containing our opinion on the annual report in accordance with section 7 KARBV.

Sufficient security is a high level of assurance, but there is no guarantee that a test conducted in accordance with KAGB section 102 in compliance with the generally accepted German standards for the audit of financial statements promulgated by the Institut der Wirtschaftsprüfer (IDW) that will always reveal a significant misstatement. Misrepresentations may result from any breach or inaccuracy and will be considered material if it could reasonably be expected that they would individually or collectively affect the economic decisions of addressees made on the basis of this Annual Report under section 7 KARBV.

During the audit, we exercise due discretion and maintain a critical attitude. Furthermore

- we identify and assess the risks of material misstatement – whether intentional or unintentional – in the annual report in accordance with section 7 KARBV, plan and perform audit procedures in response to such risks and obtain sufficient and appropriate audit evidence to serve as the basis for our opinion. The risk that material misrepresentations will not be detected is higher for violations than for inaccuracies, as violations may include fraudulent interaction, counterfeiting, intentional incompleteness, misrepresentations or overriding internal controls.
- We gained an understanding of the internal control system relevant for the audit of the annual report pursuant to section 7 KARBV in order to plan audit procedures that are appropriate in the given circumstances, but not with the aim of expressing an opinion on the effectiveness of this system of the management company.
- We assessed the appropriateness of the accounting policies used by the legal representatives of the management company in preparing the annual report in accordance with section 7 KARBV and the reasonableness of the estimates and related information provided by the legal representatives.

- We draw conclusions on the basis of audit evidence obtained as to whether there is material uncertainty in connection with events or circumstances that may give rise to significant doubts as to the continuation of the Fund by the Management Company. If we conclude that there is a material uncertainty, we are obliged to draw attention in the note to the pertinent information in the annual report pursuant to section 7 KARBV or, if this information is inappropriate, to modify our opinion. We draw our conclusions based on the audit evidence obtained up to the date of our endorsement. However, future events or circumstances may result in the Fund being discontinued by the Management Company.
- We assess the overall presentation, structure and content of the annual report in accordance with section 7 KARBV including the information and whether the annual report in accordance with section 7 KARBV represents the underlying transactions and events such that the annual report pursuant to section 7 KARBV complies with German regulations KAGB and the relevant European regulations make it possible to obtain a comprehensive picture of the actual circumstances and developments of the investment fund.
- We assess the suitability of the specific interpretations made by the legal representatives with regard to the sustainability-related information as a whole. As explained in the section "Responsibility of the legal representatives for the annual report according to section 7 KARBV", the legal representatives have interpreted the wording and terms contained in the relevant regulations; the lawfulness of these interpretations is subject to inherent doubt as described in the section "Responsibility of the legal representatives for the annual report according to section 7 KARBV". This inherent doubt in the interpretation will also apply accordingly to our audit.

Among other things, we discuss with those charged with governance the planned scope and timing of the audit, as well as significant audit findings, including any deficiencies in the internal control system identified during our audit.

## Information for investors in the Republic of Austria

The public sale of units of Allianz Europazins in the Republic of Austria has been registered with the Finanzmarktaufsicht (Vienna) pursuant to section 140 InvFG. Erste Bank der österreichischen Sparkassen AG acts as Paying and Information Agent in Austria in accordance with section 141 sub-section 1 InvFG. Redemption requests for units of the aforementioned fund can be submitted to the Austrian paying and information agent.

All necessary information for investors is also available at the Austrian paying and information agent free of charge, including: the prospectus, the investment terms and conditions, the annual and semi-annual reports, the key investor information and the subscription and redemption prices.

Prior to acquiring units of the fund, investors are recommended to ascertain whether the income data on the unit class that is required for tax purposes is published by the Oesterreichische Kontrollbank AG.

# Further information (not covered by the auditor's certificate)

## Information for investors in Switzerland

### 1. Representative and Paying Agent in Switzerland

BNP Paribas, Paris, Succursale de Zurich, Selnaustrasse 16, CH-8002 Zurich, is Representative and Paying Agent in Switzerland for the units distributed in Switzerland.

### 2. Place where the Relevant Documents may be obtained

The prospectus, the key investor information, the investment terms and conditions and the annual and semi-annual reports may be obtained without charge from the Representative in Switzerland.

### 3. Publications

Publications in Switzerland are made at [www.fundinfo.com](http://www.fundinfo.com). In Switzerland, subscription and redemption prices and/or the net asset value (with the indication "commissions excluded") of the units are published daily at [www.fundinfo.com](http://www.fundinfo.com).

### 4. Payment of retrocessions and rebates

#### Retrocessions:

The Management Company and its agents may pay retrocessions as remuneration for distribution activity in respect of units in or from Switzerland. This remuneration may be deemed payment for the following services in particular:

- setting up processes for subscribing, holding and safe custody of the units;
- keeping a supply of marketing and legal documents, and issuing the said documents;
- forwarding or providing access to legally required publications and other publications;
- performing due diligence delegated by the Management Company in areas such as money laundering, ascertaining client needs and distribution restrictions;
- mandating an authorised auditor to check compliance with certain duties of the Distributor, in particular with the Guidelines on the Distribution of Collective Investment Schemes issued by the Swiss Funds & Asset Management Association SFAMA;

- operating and maintaining an electronic distribution and/or information platform;

- clarifying and answering specific questions from investors pertaining to the funds or the Management Company or the Sub-Investment Manager;

- drawing up fund research material;

- central relationship management;

- subscribing for units as a "nominee" for several clients as mandated by the Management Company;

- training client advisors in collective investment schemes;

- mandating and monitoring additional distributors.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

The recipients of the retrocessions must ensure transparent disclosure and inform the investor, unsolicited and free of charge, about the amount of remuneration they may receive for distribution.

On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned.

#### Rebates:

In the case of distribution activity in or from Switzerland, the Management Company and its agents may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question.

Rebates are permitted provided that:

- they are paid from fees received by the Management Company and therefore do not represent an additional charge on the fund assets;

- they are granted on the basis of objective criteria;

- all investors who meet the objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the Management Company are:

- the volume subscribed by the investor or the total volume they hold in the collective investment scheme or, where applicable, in the product range of the promoter;

- the amount of the fees generated by the investor;

- the investment behaviour shown by the investor (e.g. expected investment period);

- the investor's willingness to provide support in the launch phase of a collective investment scheme.

At the request of the investor, the Management Company must disclose the amounts of such rebates free of charge.

## 5. Place of Performance and Jurisdiction

The place of performance and jurisdiction for units distributed in Switzerland is at the registered office of the Representative in Switzerland.

**Allianz Global Investors GmbH**
