What is this product?

Type: Units of a Sub-Fund of Amundi S.F., an Undertaking for Collective Investments in Transferable Securities (UCITS), established as an FCP.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: Seeks to increase the value of your investment and provide income over the recommended holding period.

The Sub-Fund invests primarily in a broad range of investment grade bonds of eurozone issuers, including governments and corporations, and in money market securities. These are denominated in euro or in other currencies, provided that the currency exposure is hedged back to the euro. The Sub-Fund aims to reduce interest rate risk through the use of floating rate bonds, short-term bonds and interest rate hedging techniques using derivative instruments such as interest rate swaps or futures. The Sub-Fund seeks to maintain interest rate duration in the range of -2 and +2 year. The Sub-Fund may invest up to 35% of its assets in below-investment grade bonds, excluding securities unrated by an international credit rating agency. The Sub-Fund may invest up to 20% of its assets in asset-backed securities, and up to 10% in contingent convertible bonds. The Sub-Fund may invest in subordinated securities primarily by corporate issuers based in the eurozone. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management or as a way to gain exposure to various assets, markets or income streams.

Benchmark: The Sub-Fund is actively managed. The Euro short-term rate serves a posteriori as an indicator for assessing the Sub-Fund's performance and for the relevant unit classes calculating the performance fees. There are no constraints relative to the benchmark restraining portfolio construction.

The Sub-Fund has not designated the benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

Management Process: The Sub-Fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in section "Sustainable Investment" of the Prospectus.

The investment manager uses a combination of market analysis and analysis of individual bond issuers to identify those bonds that appear to offer the best return for their risk level.

This is a non-distributing unit class. Investment income is reinvested.

The minimum recommended holding term is 3 years.

Investors may sell on demand on any business day in Luxembourg.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment and to receive income over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: Units may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the Amundi S.F. prospectus.

Distribution Policy: As this is a distributing unit class, investment income is distributed.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi S.F. prospectus.

PERFORMANCE SCENARIOS

What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of Amundi S.F.. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.
