

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		\$10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	\$8190	\$8390
	Average return each year	-18.10%	-5.68%

Favourable scenario: this type of scenario occurred for an investment 2018 and 2021.

An appropriate benchmark of the Product was used to calculate the performance.

## What happens if AXA Funds Management S.A. is unable to pay out?

The product's underlying assets are held separately by the depositary. If we encounter financial difficulties, these assets will not be affected. If the Product suffers a loss due to the depositary default you may lose the whole or part of your investments. There is no compensation or guarantee scheme protecting you from a default of the Product's depositary.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	\$53	\$174
Annual cost impact (*)	0.5%	0.5% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.6% before costs and 3.0% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount when required by the applicable laws.
