The Sales Prospectus including the Articles of Association, the Key Information Document and the Investment Company's financial statements and semi-annual reports are available free of charge by post or e-mail at the registered office of the Investment Company, or at the Depositary, Paying Agents or the distributors in the respective countries of distribution and the Swiss Representative. Additional information is available at the Investment Company at all times during regular business hours.

Shares subscriptions are valid only if they are made on the basis of the most recent version of the sales prospectus (including its appendices) in conjunction with the latest available financial statements and any subsequent semi-annual report.

# Report of the Board of Directors to the shareholders of BAKERSTEEL GLOBAL FUNDS SICAV

The Board of Directors (the "Board") of BAKERSTEEL GLOBAL FUNDS SICAV ("the Fund") is pleased to present the Annual Report including Audited Financial Statements (the "Annual Report") of the Fund for the year ended 31 December 2023.

#### **Activities and Performance**

As at 31 December 2023, there were two sub-funds in issue: BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund (the "Precious Metals Fund") and BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund (the "Electrum Fund"). During the year ended 31 December 2023, the net assets of the Fund decreased from EUR 977,239,046.69 to EUR 933,580,929.64, a decrease of EUR 43,658,117.05 or 4.47%, owing to difficult market conditions.

The main service providers of the Fund remained unchanged during the year.

The Board of Directors refers shareholders to the Investment Manager's reports of the Precious Metals Fund on page 3 and of the Electrum Fund on page 27 of the Annual Report.

#### Events during the reporting period

Shareholders are referred to note 12 on page 53 of the Annual Report.

#### Events after the reporting period

Shareholders are referred to note 13 on page 53 of the Annual Report.

#### **Corporate Governance**

The Board has put in place a framework for corporate governance which is consistent with the principles of good governance and a code of best practice in the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct for Luxembourg Investment Funds (the "Code"). The Code can be found on the ALFI's website www.alfi.lu.

#### The Board

The Directors of the Fund are responsible for supervising the Fund in accordance with its Articles of Incorporation, Prospectus, and laws and regulations applicable to Luxembourg investment funds. The names and affiliations of the four Directors are listed in the section of this Annual Report entitled "Management, distribution and advisory services". The remuneration of the Directors is summarised in note 3 on page 59 of the Annual Report.

The Board holds formal Board meetings at least four times a year. At the Board meetings, the Directors review the management of the Fund's assets and all other significant matters so as to ensure that the Directors maintain overall control and supervision of the Fund's affairs. There were four formal Board meetings held during the year on 20 March, 16 June, 22 September, and 14 December 2023.

The Board is responsible for the appointment and monitoring of all service providers to the Fund, including the Management Company. The Directors are kept fully informed by the service providers of investment and financial controls and other matters relevant to the business of the Fund. The Directors are responsible for ensuring the Fund's financial reporting is prepared in accordance with Luxembourg generally accepted accounting principles and applicable legal and regulatory requirements. The Board considers the Annual Report is fair and balanced and provides sufficient information for the Shareholders to assess the Fund's financial position as at 31 December 2023 and its performance during the year under review.

#### The Annual General Meeting ("AGM")

Last year's AGM of the Fund was held on Wednesday, 21 June 2023. All resolutions were approved by Shareholders. The next AGM of the Fund will be held in Luxembourg on the third Wednesday in June, in this case on 19 June 2024, at 11.00 a.m. CEST, for the purpose of considering this Annual Report, including the Audited Financial Statements for the year ended 31 December 2023.

Strassen, April 2024

The Board of Directors of BAKERSTEEL GLOBAL FUNDS SICAV

# Report of the Investment Manager of BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund

BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund ("Precious Metals Fund") rose +5.8% (D EUR class) during the year compared with the MSCI ACWI Select Gold Miners Index\* ("the Index") which rose +5.7% (in Euro terms).

The Precious Metals Fund delivered a slight outperformance of the Index during 2023. The mining sector has been in a period of consolidation for much of the year, due to the twin headwinds of rising interest rates and lacklustre global economic growth. 2023 delivered a range of surprises for investors as the US banking crisis, China's disappointing economic reopening, and multiple conflicts, buffeted markets. These events were accompanied by volatility caused by speculation over monetary policy direction, as central bankers, led by the US Federal Reserve, battled to tame rampant inflation. As we move into a new year the catalysts for the sector's recovery are gaining strength. Potential US interest rate cuts, a tempering of US dollar strength, and rising economic and geopolitical risk all present significant potential catalysts for gold and gold miners to enter a new bull market in 2024.

Performance was driven by our core holdings in mid-cap gold producers, including Resolute Mining, Harmony Gold and Kinross Gold. We continue to see significant upside potential in the mid- to large-cap portion of the market, which we believe will drive outperformance as the precious metals sector's new upcycle gains pace. Underperformers included selected silver and platinum group metals producers, including Fresnillo and Impala Platinum, as the prices of these commodities lagged the gold price. The Precious Metals Fund has maintained a high weighting to silver miners throughout 2023. We continue to see substantial undervaluation in silver equities, as well as significant upside potential for the silver sector as a whole as rising industrial demand, particularly for solar photovoltaics, and a lack of new production capacity, indicates a meaningful supply deficit for the coming years.

Overall, 2023 was a mixed year for gold and silver miners, however the precious metals sector starts 2024 in a strong position. The gold price has remained resilient throughout the US rate hike cycle, touching a new high in US dollar terms in December 2023, while silver prices have likewise recovered well from recent lows. We believe that gold is at a turning point. In previous up-cycles, gold equities have tended to deliver 2-5x leverage to the rising gold price, delivering potentially outsized returns over a short period of time. We expect to see positive sentiment return to the market as the US rate hike cycle turns, inflation fades and economic risks rise.

Luxembourg, April 2024

The Investment Manager of BAKERSTEEL GLOBAL FUNDS SICAV

The information stated in the report is historical and is not representative of future results.

<sup>\*</sup> Prior to 1 August 2023 the Index was EMIX Global Mining Gold Index.

# Report of the Investment Manager of BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund

BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund ("Electrum Fund") fell -6.5% (D EUR class) during the year, compared with the MSCI ACWI Select Gold Miners Index\* ("the Index") which fell -2.1% (both in Euro terms).

2023 was a challenging year for the speciality metals sector. Our key objective as active investment managers during this period has been to maintain the Fund's exposure to the fundamental upside potential we see in speciality and battery metals miners, while protecting against the downside risk without going defensive. While we believe we achieved this during 2023, the Fund still lagged its Index during the year due to the strong relative performance of bulk commodities, notably iron ore, which are heavily represented in the Index, along with the underperformance of battery metals, where temporary oversupply issues created price pressure.

The Fund's top performers included Cameco, a leading uranium producer which was boosted by a supply deficit and price momentum in the sector, and Century Aluminium, a leading producer of aluminium. Positions which detracted from performance included battery metals producers, which faced declining prices and oversupplied markets over the past year, alongside selected industrial metals miners. Largo, a vanadium miner and processor, and Albemarle, a leading lithium miner, were among the underperforming positions.

Significant changes were made to the portfolio's asset allocation during the year. With regard to battery-related metals, lithium exposure was increased during the first part of the year, from around 1% at the end of 2022 to around 16% at mid-year on the back of the restocking cycle but was then reduced again to around 10% at the end of 2023, as the restocking cycle tailed off and temporary oversupply began impacting the market. In contrast exposure to vanadium, nickel and cobalt decreased from around 11% to just 2% over the course of 2023, amid oversupply in these markets. In other sub-sectors we identified a stronger near-term outlook. The Fund's position in uranium miners increased from 3% at the start of the year to around 12% in Q3, as the sector appeared well-supported by increasing nuclear energy deployments and rising political support for new nuclear projects. Exposure to gold and silver metal miners also increased during the year from 28% at the end of 2022 to 36% at the end of 2023. We see an array of catalysts for precious metals in the months ahead as central banks move towards interest rate cuts and as economic and geopolitical risk remains elevated. The Electrum Fund also rebalanced its exposure to copper and aluminium to reflect the evolving supply demand dynamics for these metals.

As we approach what we believe will be a supportive environment for precious and speciality metals miners in 2024 and beyond, Baker Steel's team continues to deliver our unique and value driven investment approach, to the benefit of our clients, while adhering to sector leading ESG practices. Our value-driven investment philosophy, proprietary research tools and active investment remain central to our investment process. Furthermore, Baker Steel's Investment Team has expanded this year, ensuring our research capacity is growing with the strategy and with the sector's progress.

Luxembourg, April 2024

The Investment Manager of BAKERSTEEL GLOBAL FUNDS SICAV

The information stated in the report is historical and is not representative of future results.

\*Prior to 1 August 2023 the Index was EMIX Global Mining Index.

#### 1.) GENERAL

The Investment Company is a Luxembourg investment company (Société d'Investissement à Capital Variable) that has been established for an unspecified period in the form of an umbrella fund with sub-funds ("Investment Company") in accordance with Part I of the Luxembourg amended Law of 17 December 2010 on Undertakings for Collective Investment (the "Law of 17 December 2010").

The Investment Company ("Investment Company") described in this Sales Prospectus (plus Articles of Association and Annexes) was established on 10 April 2008. At the initiative of Baker Steel Capital Managers LLP it has appointed IPConcept (Luxemburg) S.A. as its management company ("Management Company"). The Investment Company is a limited company with variable capital (Société d'Investissement à Capital Variable), under Luxembourg law with its registered office at 4, rue Thomas Edison, L-1445 Strassen. Its Articles of Association were published on 30 April 2008 in the Mémorial, Recueil des Sociétés et Associations, the official journal of the Grand Duchy of Luxembourg ("Mémorial"). The Mémorial was replaced on 1 June 2016 by the new information platform "Recueil Électronique des Sociétés et Associations" ("RESA") of the Trade and Companies Register in Luxembourg. The Investment Company is entered in the commercial register in Luxembourg under registration number R.C.S. Luxembourg B137827. The latest amendment to the Articles of Association of the Investment Company came into effect on 1 March 2018 and were published in the RESA.

The Board of Directors of the Investment Company appointed the Management Company IPConcept (Luxemburg) S.A., a public limited company (Aktiengesellschaft) under the law of the Grand Duchy of Luxembourg with its registered office located at 4, rue Thomas Edison, L-1445 Strassen, Luxembourg, with the duties of asset management, administration and distribution of the shares of the Investment Company. The Management Company was incorporated for an unlimited period on 23 May 2001. Its Articles of Association were published in the Mémorial on 19 June 2001. The latest amendment to the Articles of Association of the Management Company came into effect on 27 November 2019 and was published in the RESA on 12 December 2019. The Management Company is listed in the commercial register in Luxembourg under registration number R.C.S. Luxembourg B 82183.

As at 31 December 2023, the BAKERSTEEL GLOBAL FUNDS SICAV consists of two sub-fund, the BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund and BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund.

#### 2.) SIGNIFICANT ACCOUNTING POLICIES

These financial statements are drawn up at the responsibility of the Board of Directors of the Investment Company in accordance with the legal provisions applicable in Luxembourg and the standards for the preparation and presentation of financial statements under the going concern basis of accounting.

- 1. The net assets of the Investment Company are shown in Euro (EUR) ("reference currency").
- 2. The value of a share ("net asset value per share") is denominated in the currency laid down in the Annex to the sales prospectus ("fund currency"), unless any other currency is stipulated for any other share classes in the Annex to the sales prospectus ("share class currency").
- 3. The net asset value per share is calculated by the Investment Company or a third party commissioned for this purpose by the Investment Company, under the supervision of the Depositary Bank, on each banking day in Luxembourg, with the exception of 24 and 31 December of each year ("valuation day"). The Board of Directors may decide to apply different regulations to individual funds, but the net asset value per share must be calculated at least twice each month.
- 4. A Business Day is a day on which banks are normally open for business in Luxembourg and London.
- 5. In order to calculate the net asset value per share, the value of the assets of each sub-fund, less the liabilities of each sub-fund ("net sub-fund assets") is determined on each day specified in the relevant Annex to the sales prospectus ("Valuation Day") and this is divided by the number of shares in circulation in the respective sub-fund on the Valuation Day. The Management Company can, however, decide to determine the share value on the 24 and 31 December of a year without these determinations of value being calculations of the share value on a Valuation Day within the meaning of the above clause 1 of this point 4. Consequently, the shareholders may not demand the issue, redemption or exchange of shares on the basis of a net asset value determined on 24 December and/or 31 December of a year.
- 6. Insofar as information on the situation of the net assets of the company must be specified in the annual or semi-annual reports and/or other financial statistics pursuant to the applicable legislative provisions or in accordance with the conditions of these Articles of Association, the value of the assets of each sub-fund will be converted to the reference currency. The net sub-fund assets will be calculated according to the following principles:
  - a) Securities which are officially listed on a stock exchange are valuated at the last available market price. If a security is officially listed on more than one stock exchange, the last available listing on the stock exchange which represents the major market for this security shall apply.

The Management Company may stipulate for individual sub-funds that transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets officially listed on a securities exchange are valued at the latest available closing price which provides a reliable valuation. Details on this can be found in the Annexes to the relevant sub-funds.

- b) Securities not officially listed on a securities exchange but traded on a regulated market will be valued at a price that may not be lower than the bid price and not higher than the offered price at the time of valuation and which the Investment Company deems in good faith to be the best possible price at which the securities can be sold.
  - The Management Company may, on behalf of individual sub-funds, determine that transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets which are not officially listed on a securities exchange (or whose stock exchange rate is not deemed representative, e.g. due to lack of liquidity) but which are traded on another regulated market, shall be valued at the latest available price there, and which the Management Company considers in good faith to be the best possible price at which the transferable securities, money market instruments, derivative financial instruments (derivatives) and other investments can be sold. Details on this can be found in the Annexes to the relevant sub-funds.
- c) OTC derivatives shall be evaluated on a daily basis using a method to be determined and validated by the Investment Company in good faith on the basis of the sale value that is likely attainable and using generally accepted valuation models which can be verified by an auditor.
- d) UCITS and UCIs are valued at the most recently established and available redemption price. In the event that the redemption of the investment units is suspended, or no redemption prices are established, these units together with all other assets will be valued at their appropriate market value, as determined in good faith by the Management Company and in accordance with generally accepted valuation standards approved by the auditors.
- e) If the prices in question are not fair market prices, if the financial instruments under (b) are not traded on a regulated market, and if no prices are set for financial instruments different from those listed under (a)–(d), then these financial instruments and the other legally permissible assets shall be valued at their current market value, which shall be established in good faith by the Management Company on the basis of generally accepted and verifiable valuation rules (e.g. suitable valuation models taking account of current market conditions).
- f) Liquid funds are valued at their nominal value plus interest.
- g) The market value of securities and other investments which are denominated in a currency other than the currency of the relevant sub-fund shall be converted into the currency of the sub-fund at the last mean rate of exchange (WM/Reuters fixing at 4 pm London time). Gains and losses from foreign exchange transactions will on each occasion be added or subtracted.
  - The Management Company may stipulate for individual sub-funds that the transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets denominated in a currency other than that of the sub-fund shall be converted into the sub-fund currency at the exchange rate of the trading day. Profits and losses from foreign exchange transactions shall, on each occasion, be added or subtracted. Details on this can be found in the Annexes to the relevant sub-funds.
- h) Liabilities are valued with their anticipated settlement amount.
- Any distributions paid out to sub-fund shareholders will be deducted from the net assets of the sub-fund.
- 7. The net asset value per share is calculated separately for each sub-fund pursuant to the aforementioned criteria. However, if there are different share classes within a sub-fund, the net asset value per share will be calculated separately for each share class within this fund pursuant to the aforementioned criteria. The composition and allocation of assets always occurs separately for each sub-fund.

The tables published in this report may, for arithmetical reasons, contain rounding differences which are higher or lower than a unit (currency, percentage, etc.).

#### 3.) TAXATION

#### **Taxation of the Investment Company**

The Company's assets are not subject to taxation on their income and profits in the Grand Duchy of Luxembourg. The Company's assets are only subject to the "taxe d'abonnement" currently amounting to 0.05% p.a. A reduced "taxe d'abonnement" of 0.01% p.a. is applied to (i) the sub-funds or share classes, the shares of which are issued exclusively to institutional shareholders within the meaning of Article 174 of the Law of 17 December 2010, (ii) sub-funds whose sole purpose is to invest in money market instruments, in time deposits with credit institutions or both. The "taxe d'abonnement" is payable quarterly, based on the Company's net assets reported at the end of each quarter. The amount of the "taxe d'abonnement" is specified for each sub-fund or share class in the relevant Annex to the Sales Prospectus. An exemption from the "taxe d'abonnement" applies, inter alia, to the extent that the fund assets are invested in other Luxembourg investment funds, which in turn are already subject to the "taxe d'abonnement".

Income received by the Fund (in particular interest and dividends) may be subject to withholding or investment tax in the countries in which the relevant (sub-)fund assets are invested. The Fund may also be taxed on realised or unrealised capital gains of its investments in the source country. Neither the Depositary nor the Management Company are obliged to collect tax certificates.

### Taxation on income from shares of the investment fund for the investor

Shareholders who are or were not resident in the Grand Duchy of Luxembourg for tax purposes and have no permanent establishment or permanent representative there are not subject to Luxembourg income tax on their income or capital gains from their shares in the Fund. Natural persons who are resident in the Grand Duchy of Luxembourg for tax purposes are subject to progressive Luxembourg income tax. Companies that are resident in the Grand Duchy of Luxembourg for tax purposes are subject to corporation tax on the income from the fund shares.

Interested parties and investors are recommended to find out about laws and regulations which are applied to the taxation of corporate assets, the subscription, the purchase, the ownership, the redemption or the transfer of shares and to call on the advice of external third parties, especially a tax adviser.

#### 4.) USE OF INCOME

Further details on the use of earnings are provided in the sales prospectus.

#### 5.) INFORMATION RELATING TO FEES AND EXPENSES

Please refer to the current sales prospectus for information regarding management and depositary bank fees.

#### 6.) FORMATION EXPENSES

Costs incurred for the founding of the Investment Company and its respective subfund and the initial issue of shares will be amortised over the first five financial years against the assets of the sub-funds existing at the time of formation. The set-up costs and the aforementioned costs that are not directly attributable to a specific sub-fund shall be allocated to the respective sub-fund assets on a pro rata basis. Costs incurred as a result of the launching of additional sub-funds will be amortised over a period of a maximum of five financial years after launch against of the assets of the sub-fund to which these costs can be attributed.

#### 7.) TOTAL EXPENSE RATIO (TER)

Total expense in fund currency
TER = -----x 100
Average total net assets (basis: daily TNA\*)

The TER indicates the level of expenses charged to the fund. It covers management and depositary fees and the "taxe d'abonnement" as well as all other costs with the exception of transaction costs incurred by the fund. It shows the total amount of these costs as a percentage of the average total net assets in the reporting period. (Any performance fees are shown separately in direct relation to the TER.)

#### 8.) TRANSACTION COSTS

Transaction costs include all costs which, during the financial year, were shown or calculated separately on behalf of the Fund and which are directly connected with the purchase or sale of assets.

#### 9.) INCOME AND EXPENSE EQUALISATION

The income equalisation is included in the ordinary net income. This covers net income arising during the period under review which the purchaser of shares pays for as part of the issue price and the seller of shares receives as part of the redemption price.

### 10.) CURRENT ACCOUNTS (CASH AT BANK/LIABILITIES TO BANKS) OF THE SUB-FUNDS

All current accounts of the sub-funds (even if they are in different currencies) which constitute in fact and at law merely elements of a single indivisible current account, are disclosed as one indivisible current account in the statement of net assets. Current accounts in foreign currencies, if existing, are converted in the fund currency. The conditions of the individual account apply with respect to interest calculation.

#### 11.) STATEMENT OF CHANGES IN THE SECURITIES PORTFOLIO

A statement detailing all purchases and sales made during the financial year is available free of charge on request at the registered office of the Management Company.

<sup>\*</sup> TNA = Total net assets

#### 12.) EVENTS DURING THE REPORTING PERIOD

With effect from 1 January 2023 the following amendments were made to the Sales Prospectus of the Funds:

In addition to the editorial changes and the model adjustments, the following changes were made:

- Implementation of the requirements of the 2nd level of the Disclosure Regulation 2019/2088 (Sustainable Finance Disclosure Regulation - SFDR)
- Change in the methodology of the performance-related remuneration
- Launch of 4 new share classes (X USD, X EUR, X GBP and Z USD) in each of the two sub-funds BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund and BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund

With effect from 1 August 2023 the following amendments were made to the Sales Prospectus of the Funds:

- Addition of the respective minimum share with regard to investments with an environmental objective and social objective in accordance with the interpretation of Delegated Regulation (EU) 2022/1288 in Annexes 1.B and 2.B
- Adaptation of the Sales Prospectus to the current template of the RTS Annex in accordance with the requirements of Delegated Regulation (EU) 2023/363
- Changes to the comparative benchmarks (of both sub-funds) used to calculate the performance fee

In addition, the sales prospectus was adapted to the management company's model documents and editorial changes were made. No other changes were made to the content.

#### Russia/Ukraine conflict

The impact on the fund's assets resulting from the ongoing conflict in Ukraine cannot be anticipated. In the Management Company's opinion, at the time this report was prepared, there were no indications that the fund and its sub-funds would not continue as a going concern, and there were no valuation or liquidity problems. The Management Company has set up appropriate monitoring measures and controls in order to assess the effects on the fund and its sub-funds in a timely manner.

There were no further significant events during reporting period.

#### 13.) EVENTS AFTER THE REPORTING PERIOD

There were no further significant events after reporting period.

#### 14.) PERFORMANCE FEE

The Investment Manager will receive a Performance Fee of up to 15% of the Gross Unit Value performance which exceeds the performance of the Benchmark MSCI ACWI Select Gold Miners IMI Index [Bloomberg code: MXWDS1MI, Price Index] (BAKERSTEEL GLOBAL FUNDS SICAV – Precious Metals Fund) respectively MSCI ACWI Metals & Mining Index [Bloomberg code: MXWD0MM Price Index] (BAKERSTEEL GLOBAL FUNDS SICAV – Electurm Fund Fund) provided both of the following conditions are met:

- (i) the Gross Unit Value performance during the Calculation Period exceeds the performance of the Benchmark during the Calculation Period (Outperformance); and
- (ii) any underperformance of the units previously incurred against the Benchmark during the Performance Reference Period has been clawed back.

If the Gross Unit Value performance at the end of an accounting period is below that of the Benchmark, then the Investment Manager will not receive a performance fee. This calculated underperformance as a percentage will now be carried forward to the next accounting period as a negative amount ("negative carry forward").

For the next accounting period, the Investment Manager will only receive a performance fee if the positive relative outperformance, as a percentage, at the end of this accounting period exceeds the negative carry forward. In this case, the Performance Fee entitlement is calculated from the percentage difference of both amounts. If the relative outperformance as a percentage from the current accounting period does not exceed the negative carry forward, both percentage amounts are netted off. The remaining underperformance percentage amount will then be carried forward to the next accounting period as a new "negative carry forward". If there is another negative benchmark deviation at the end of the following accounting period, then the existing negative carry forward as a percentage will be added to the underperformance as a percentage calculated from this negative benchmark deviation. Any out- and underperformance percentage amounts carried over from the previous four accounting periods, in addition to the current accounting period, together comprising the Performance Reference Period, shall be taken into account when calculating the annual entitlement to performance fees. This means that underperformance from accounting periods arising from accounting periods five years or earlier than at the prevailing year end is disregarded when calculating Performance Fee entitlement. If less than five previous accounting periods exist for the share class, all previous accounting periods will be taken into account.

Beginning with the start of each Calculation Period, the Performance Fee is calculated on each valuation day on the basis of the aforementioned Gross Unit Value performance, the Benchmark performance and the units in circulation during the Calculation Period. As a basis of calculation, data from the previous valuation day (at financial year-end on the same day) is used. An increase in the Performance Fee accrual caused by subscription of new shares will be eliminated. Any decrease in the Performance Fee accrual caused by redemptions of existing shares will be crystallised.

On valuation days during the Calculation Period on which the Gross Unit Value performance is greater than the Benchmark performance and any negative carry forward has been offset, a Performance Fee will accrue (and the accrued total amount changes pursuant to the method presented above). On valuation days on which the Gross Unit Value is lower than the benchmark performance, the accrued total Performance Fee amount is eliminated. In this regard, the difference between Gross Unit Value performance is considered with respect to the performance of the benchmark, respectively. The amount calculated on the last valuation day of the accounting period may, if a performance fee is accrued, be paid out from the relevant unit class of the sub-fund within 10 business days of the end of the financial year. If the performance of the benchmark is negative, the Investment Manager has agreed that it will only be entitled to a performance fee based on the positive performance of the Gross Unit Value. For the avoidance of doubt, if the performance of the Gross Unit Value is negative during the Calculation Period, the Investment Manager will not earn a performance fee.

For the financial year ending 31 December 2023, the actual performance fee accrued and the corresponding performance fee percentage (calculated on the basis of the respective average net assets of the sub-funds) for the respective sub-funds are as follows:

Sub-fund / share class	ISIN	Performance Fee		
		in EUR	in %	
BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund D (CHF)	LU2294852020	0.43	0.00	

## 15.) EFFECTS OF THE VALUATION AT CLOSING PRICES AT THE END OF THE REPORTING PERIOD FOR THE VALUATION OF THE ASSETS OF THE SUB-FUNDS OF BAKERSTEEL GLOBAL FUNDS SICAV

As of 31 December 2023, securities in the investment portfolios of the sub-funds of BAKERSTEEL GLOBAL FUNDS SICAV were valued at the last available price of the preceding valuation day (28 December 2023; last net asset value calculation as of 29 December 2023) as described in the sales prospectus. If the assets had been valued at the closing price at the end of the reporting period, this would have resulted in a lower share price value of -1.01% for the sub-fund BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund and -0.94% for the sub-fund BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund.

### 16.) CLASSIFICATION ACCORDING TO SFDR REGULATION (EU 2019/2088)

Article 8 of Regulation (EU) 2019/2088 apply to both sub-funds.

Further information in connection with the promotion of ecological and/or social characteristics and, if applicable, sustainable investment objectives of the fund manager in accordance with Article 8 of Regulation (EU) 2019/2088 can be found in appendix the appendix according to the Disclosure and Taxonomy Regulation (unaudited) on page 62.

#### **Audit report**

To the Shareholders of BAKERSTEEL GLOBAL FUNDS SICAV

#### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of BAKERSTEEL GLOBAL FUNDS SICAV (the "Fund") and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### What we have audited

The Fund's financial statements comprise:

- the statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2023;
- the statement of changes in net assets for the Fund and the statement of changes in net assets for each of the sub-funds for the year then ended;
- the statement of operations for the Fund and the statement of operations for each of the sub-funds for the year then ended;
- the statement of investments for each of the sub-funds as at 31 December 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

#### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

#### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

#### Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
  control:
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

Luxembourg, 25 April 2024

Björn Ebert

#### 1.) RISK MANAGEMENT

The Management Company employs a risk management process enabling it to monitor and assess the risk connected with the investment holdings, as well as their share in the total investment portfolio risk profile of the funds it manages, at all times. In accordance with the Law of 17 December 2010 and the applicable prudential supervisory requirements of the Commission de Surveillance du Secteur Financier ("CSSF"), the Management Company reports regularly to the CSSF about the risk management process used. Within the framework of the risk management process and using the necessary and appropriate methods, the Management Company ensures that the overall risk associated with derivatives of the funds managed does not go beyond the total net value of their portfolios. To this end, the Management Company makes use of the following methods:

#### Commitment approach

With the "commitment approach", the positions from derivative financial instruments are converted into their corresponding (possibly delta-weighted) underlying equivalents or nominal values. In doing so, the netting and hedging effects between derivative financial instruments and their corresponding underlying instruments are taken into account. The total of these underlying equivalents may not exceed the total net value of the relevant sub-fund's portfolio.

The commitment approach was used to monitor and measure the total risk associated with derivatives for the sub-funds BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund and BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund during the period from 1 January 2023 to 31 December 2023.

#### 2.) CORPORATE GOVERNANCE

The Board of Directors confirms adherence to principles of the ALFI Code of Conduct for Luxembourg investment funds.

#### 3.) DIRECTORS FEES

The Directors who are employees of the Management Company and Investment Manager do not receive additional compensation in respect of their roles as Directors of the Fund. The independent Director receives remuneration at a flat rate of EUR 30,000 per annum. There is no variable element.

#### 4.) INFORMATION ON THE REMUNERATION SYSTEM

have a significant impact on the risk profile of the UCITS:

The Management Company IPConcept (Luxemburg) S.A. has established a remuneration system that complies with legal and regulatory requirements. It is consistent with and conducive to sound and effective risk management and does not encourage or prevent risk-taking that is incompatible with the risk profiles, contractual rules or articles of incorporation of the managed undertakings for collective investment in transferable securities (hereinafter "UCITS"), nor prevents IPConcept (Luxemburg) S.A. from acting according to its duty in the best interests of the UCITS.

The remuneration system is in line with the business strategy, goals, values and interests of IPConcept (Luxemburg) S.A. and the UCITS considers the principles of avoiding conflicts of interest.

IPConcept (Luxemburg) S.A. distinguishes between remuneration based on individual contracts and the collective agreement for bank employees as amended, as well as remuneration systems for employees not covered by collective agreements and for identified employees.

Non-tariff employees are subject to the remuneration system for non-tariff employees of IPConcept (Luxemburg) S.A. The remuneration of non-tariff employees is made up of an appropriate fixed annual salary and variable performance and results-based remuneration, with the emphasis on fixed remuneration. Each non-tariff position is evaluated on the basis of defined criteria and assigned to one of four responsibility levels. Non-tariff employees receive an individual reference bonus that is linked to the relevant level of responsibility. The bonus system for non-tariff employees links the reference bonus to the individual performance of the employee, the development of the respective segment and the success of IPConcept (Luxembourg) S.A.

The identified employees are subject to the remuneration system for identified employees of IPConcept (Luxembourg) S.A. This is derived from the remuneration system for non-tariff employees, but provides for a maximum bonus in the area of variable remuneration. The target agreement system takes quantitative and qualitative targets into account. The variable remuneration of identified employees is withheld in part when a defined threshold is reached and is subject to a vesting period.

As at 31 December 2023, the total remuneration of the 50 employees of IPConcept (Luxemburg) S.A. as a Management Company is EUR 6,535,175.29 This is divided into:

Fixed remunerations: EUR 5,964,761.69

Variable remuneration: EUR 570,413.60

For those at the Management Company in management roles whose activities have a significant impact on the risk profile of the UCITS:

EUR 1,234,472.80

For Management Company employees whose activities

EUR 0.00

The remuneration shown above relates to all the UCITS and alternative investment funds managed by IPConcept (Luxemburg) S.A. All employees are collectively employed to manage all of the funds, so it is not possible to break the remuneration down by fund.

At least once a year, a central and independent internal audit is carried out to determine whether the remuneration policy is implemented in accordance with the remuneration regulations and procedures defined by the Supervisory Board of IPConcept (Luxemburg) S.A.. The review has shown that the remuneration systems of IPConcept (Luxemburg) S.A. are appropriately structured with regard to the defined audit objects. The Supervisory Board has taken note of the report on the central and independent review of the implementation of the 2023 remuneration policy.

No changes were made to the remuneration system compared to the previous year.

#### INFORMATION ON EMPLOYEE REMUNERATION IN THE EVENT OF OUTSOURCING

The Management Company has outsourced the fund management to **Baker Steel Capital Managers LLP**. The Management Company does not pay any direct remuneration from the Fund to employees of the outsourcing company. The total remuneration paid to the partners of **Baker Steel Capital Managers LLP** in the year 2023 amounted to **2,223,080 GBP**.

#### 5.) TRANSPARENCY OF SECURITIES FINANCING TRANSACTIONS

IPConcept (Luxemburg) S.A. is acting as a management company of undertakings for collective investment in transferable securities ("UCITS") and alternative investment fund manager ("AIFM") and thus falls by definition within the scope of Regulation (EU) 2015/2365 of the European Parliament and of the Council of November 25th, 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 ("SFTR").

During the financial year of the investment fund no investments have been undertaken in securities financing transactions or total return swaps as defined in this regulation. Therefore, the notes specified in Article 13 of this regulation will not be disclosed in the Annual Report. Detailed information on the investment fund's investment strategy and the financial instruments used can be found in the current sales prospectus and on the Management Company's website (www.ipconcept.com).

#### 6.) INFORMATION FOR SWISS INVESTORS

#### a.) General Information

The Sales Prospectus including the Articles of Association, the Key Information Document and the Investment Company's financial statements and semi-annual reports as well as a statement detailing all purchases and sales made during the financial year are available free of charge by post or e-mail at the Swiss Representative.

#### c.) Total Expense Ratio (TER)

The commissions and fees incurred for managing the collective capital investments must be reported in the indicator known internationally as the total expense ratio (TER). This indicator expresses the total of all commission and fees regularly incurred (operating expenses) by the capital of the collective investment retrospectively as a percentage of the net assets; in principle, it is calculated using the following formula:

According to the guidelines of the Asset Management Association Switzerland of 16 May 2008 (version of 5 August 2021), the following TER was calculated in per cent for the period from 1 January 2023 to 31 December 2023:

Sub-fund	Share class	Without	With

### d.) Changes to the prospectus in the financial year

Publications of amendments to the prospectus during the financial year shall be made available for consultation www.swissfunddata.ch.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

#### Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that

the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic  ${\bf activities}. \ {\sf That}$ Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Product name: BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals

Legal entity identifier: 529900GCPGDL74TU3W75

#### **Environmental and/or social characteristics**

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sub-fund invests in the equities of precious metals mining companies, with a primary focus on gold and silver, and preferentially allocates capital to companies who operate in a sustainable way and who minimise GHG emissions, energy and water use and who minimise environmental and social harm and, where reasonable to do so, promote positive social impact on their surrounding communities.

#### How did the sustainability indicators perform?

The sub-fund collected, assessed and recorded 45 sustainability indicators and collated these into a consolidated ESG score for each investee company. The primary sustainability indicators used by the sub-fund to measure and assess the attainment of the ESG characteristics promoted were greenhouse gas emissions intensity (scope 1 and scope 2 GHG emissions in metric tonnes of CO2 equivalent/revenue); water use intensity (cubic metres/revenue); energy use intensity (gigawatt hours/revenue); and the level of compliance with the environmental management system (EMS) ISO 14001 standard (percentage of operations certified). The development of the sustainability indicators was calculated and provided by the outsourced fund management or by the investment advisor used.

BAKERSTEEL GLOBAL FUNDS SICAV - Precious Metals Fund

#### Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The weighted average ESG score for the sub-fund at year end was 75%, indicating good ESG performance

The development of the sustainability indicators was calculated and provided by the outsourced fund management or by the investment advisor used.

#### ...and compared to previous periods?

No investments were aligned with the EU Taxonomy in the reference period or previous reference periods.

Period	2023	2022
#1 Aligned with E/S characteristics	91.84%	NaN%
#1A Sustainable	51.89%	NaN%
Other environmental	23.57%	%
Social	28.32%	%

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sub-fund's sustainable investments is to encourage a reduction of greenhouse gas emissions intensity in the precious metals mining industry, along with a reduction in water use intensity, energy use intensity and an increase in the usage of renewable energy sources. The sub-fund contributes to this objective by preferentially investing in companies that exhibit good ESG practices and behaviours and to thereby encourage the promulgation of these good ESG practices across the industry. The sub-fund defines a good company as one that scores 65% or higher in our proprietary ESG scoring system, which as described above directly measures and assesses these sustainability indicators, along with over 40 other sustainability indicators, and produces a blended ESG score that represents the company's ESG score with respect to sustainability.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The principle adverse impact indicators set out in Annex I of the Regulatory Technical Standards (the "PAI indicators") are collected, assessed and recorded for all investee companies and feed into our proprietary ESG scoring system as described above. As noted above, in order to qualify for inclusion in the portfolio as a sustainable investment, an investee company must score at least 65%, where this scoring incorporates several similar indicators to the PAI and is designed to prevent any company that causes significant harm to any environmental or social sustainable investment objective from being included. The PAI indicators are also separately collated, tracked and periodically reported on at portfolio level to confirm that no significant harm is being caused at the aggregated level. Manual checks are also undertaken and where any significant harm is identified to any environmental or social sustainable investment objective the investment would not qualify for inclusion in the portfolio as a sustainable investment. This may be necessary for example where there is any negative publicity relating to an investee company, as a result of press releases made by the company or where issues are identified through our direct engagement with senior management. The nature of any assessment here would depend on the nature of the issues identified, but would consist of the investment team assessing the issue and gaining sufficient comfort that no significant harm is being caused by our investment. With regard to selected PAI indicators the sub-fund targets positive impact and with respect to the remaining PAI indicators the sub-fund seeks to mitigate or minimise any adverse impacts by identifying where these are occurring and excluding the companies to which they relate from the portfolio.

#### \_ How were the indicators for adverse impacts on sustainability factors taken into account?

As noted above, the PAI indicators set out in Annex I of the Regulatory Technical Standards are collected, assessed and recorded where available for all investee companies. This information is obtained from third party data provider – Sustainalytics combined with other data sources. Where this is the case, these are treated as exclusion factors at investment level. These scores are also weighted, with water use, energy use and emissions intensity being the

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse impacts

most heavily weighted environmental PAI indicators and health and safety metrics being most heavily weighted of the social PAI indicators. This is on the basis that these PAI indicators are the most relevant indicators for the natural resources sector.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of our ESG due diligence process, we obtain information on whether investee companies commit to the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, any identified violations of these standards are recorded. Where companies do not commit to adhere to these standards or where violations are identified then the company is excluded from consideration as a sustainable investment. This information can be obtained from Sustainalytics and in many cases can be established by direct review of information published by the investee companies.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

the Investment Manager commits to consider principle adverse impacts at entity level under Article 4 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088 ("SFDR"). As an integral part of this, the sub-fund considers principal adverse impacts on sustainability factors at sub-fund level in accordance with Article 7 of SFDR and will publish information on the principal adverse impacts on sustainability factors in its periodic reports in accordance with Article 11. Further, as noted above, the sub-fund uses the PAI indicators to assess whether the sustainable investments in the portfolio cause significant harm to any environmental or social sustainable investment objective. This is done for all PAI indicators listed in Annex 1 of the Regulatory Technical Standards, and these indicators are tracked at both investment level and at portfolio level. See above for further details.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023 - 31/12/2023

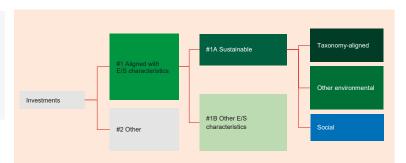

Largest Investments	Sector	% Assets	Country
Kinross Gold Corporation	MINING AND QUARRYING	4.99	Canada
Pan American Silver Corporation	MINING AND QUARRYING	4.75	Canada
Coeur Mining Inc.	MINING AND QUARRYING	4.64	United States of America
B2Gold Corporation	MINING AND QUARRYING	4.49	Canada
OceanaGold Corporation	MANUFACTURING	4.28	Canada
Resolute Mining Ltd.	MANUFACTURING	4.25	Australia
Fresnillo Plc.	MINING AND QUARRYING	4.19	Great Britain
Regis Resources Ltd.	MINING AND QUARRYING	4.14	Australia
Wheaton Precious Metals Corporation	MINING AND QUARRYING	3.98	Canada
Harmony Gold Mining Co. Ltd. ADR	REAL ESTATE ACTIVITIES	3.94	South Africa

lamgold Corporation	MINING AND QUARRYING	3.78	Canada
Centerra Gold Inc.	MINING AND QUARRYING	3.60	Canada
Barrick Gold Corporation	MINING AND QUARRYING	3.40	Canada
Endeavour Mining Plc.	MINING AND QUARRYING	3.25	Great Britain

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. The share of these investments as of the reporting date is 96.86%.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The share of these investments as of the reporting date is 7.70%.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments. The share of these investments as of the reporting date is 60.60%.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments. The share of these investments as of the reporting date is 39.95%.

#### In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	Other financial service activities, except insurance and pension funding n.e.c.	0.28
MANUFACTURING	Aluminium production	4.28
MANUFACTURING	Manufacture of basic precious and other non- ferrous metals	4.50
MANUFACTURING	Precious metals production	2.69
MINING AND QUARRYING	Mining and quarrying n.e.c.	1.54
MINING AND QUARRYING	Mining of non-ferrous metal ores	29.04
MINING AND QUARRYING	Mining of other non-ferrous metal ores	38.97
MINING AND QUARRYING	Other mining and quarrying	6.90
MINING AND QUARRYING	Support activities for other mining and quarrying	4.07
REAL ESTATE ACTIVITIES	Buying and selling of own real estate	3.94

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

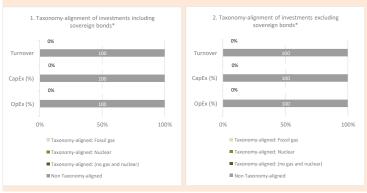

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The share of taxonomy-compliant investments was calculated on the basis of the total portfolio or the total portfolio excluding government issuers. The evaluation of the investments with regard to the previously mentioned asset allocation in "#1 Aligned with environmental or social characteristics", "#2 Other investments" and "#1A Sustainable investments" was not taken into account.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

Yes	
In fossil gas	In nuclear energy
<b>X</b> No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Enabling Activities: not specified

Transitional Activities: not specified

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The weighted average ESG score for the sub-fund at year-end was 75%, indicating good ESG performance. This compares to a weighted average ESG score of 74% at year-end 2022.

Period	2023	2022
Taxonomy-aligned	NaN%	NaN%

are sustainable

investments with an environmental

objective that do not

take into account the criteria for

environmentally sustainable economic

activities under

Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Environmental/social features are advertised with the financial product, but no sustainable investments are made. The value at the reporting date was  $23,57\,\%$ .

#### What was the share of socially sustainable investments?

Environmental/social features are advertised with the financial product, but no sustainable investments are made. The value at the reporting date was 28,32~%

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At least 85% of the sub-fund's assets are invested in investments that have been subject to our proprietary ESG due diligence process and which have received an ESG score of 50% or more. The purpose of the remaining 15% is to cover situations where the ESG screening and scoring process cannot be completed at the time of investment. This includes situations such as corporate actions, including spin-offs, which may result in portfolio holdings arising outside the immediate control of the Investment Manager. Such holdings would then be ESG screened and scored as soon as is reasonably practicable. Additional situations that may not permit ESG screening and scoring to take place, or for meaningful results to be obtained, include cash holdings and physical commodity holdings. There may also be situations where illiquid assets are held that cannot easily be disposed of, even where their ESG status changes or where an ESG screening cannot be undertaken. The minimum environmental and social safeguard in place with respect to this remaining 15% is the fact that they will be subject to ESG screening at the earliest opportunity and where this screening process is not passed then efforts will be made to dispose of the asset or to engage with the issuer.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

A multi-component exclusion strategy shortlisted the investible universe and this was integrated within the investment strategy. The initial exclusion factor screening consisted of 3 stages: market capitalisation screening (only companies with a market capital exceeding \$100M USD were usually considered), stock exchange screening (only companies listed on major primary stock exchanges in Europe, North America, Japan, Hong Kong, Australia and South Africa were considered) and ESG factor screening. The ESG factor screening incorporated key sustainability metrics that were non-negotiable (including the presence of policies covering the following: ethics, human rights, anti-bribery and corruption, anti-forced labour and anti-child labour). The Investment Manager applied additional exclusion criteria and metrics covering weapons, including white phosphorus; fossil fuels, including thermal coal (threshold of 30% of revenue from the production of thermal coal); tobacco; alcoholic beverages; adult entertainment; and serious violations to the UN Global Compact principles. These exclusion criteria are aligned with and enable the sub-fund to comply with accepted industry standards including LuxFLAG ESG Label eligibility criteria and BVI.

The ESG performance of companies shortlisted within the investible universe was screened and scored to ensure a minimum acceptable standard of ESG performance was maintained. The ESG scores generated for the companies were incorporated into the stock selection process within an ESG integration strategy. At least 85% of the sub-fund's assets were invested in securities whose issuers have been selected on the basis of environmental, social and governance criteria and who scored at least 50% in our proprietary ESG scoring system.

In addition, the sub-fund only invested in listed companies ensuring an appropriate standard of transparency on governance. The Investment Manager aimed to invest only in listed companies which maintained a majority of independent directors so as to ensure a higher standard of corporate governance. The Investment Manager assessed Board structure, competence and independence; sustainability governance; gender diversity; compensation; nomination; audit risk and oversight; and shareholder rights. This information was generally obtained directly from information published by the investee company and through interactions with that company.

The Investment Manager engaged regularly with each of the sub-fund's portfolio companies on ESG issues and encouraged adherence to best practice. The Investment Manager undertook site visits to portfolio companies during which verification of compliance with the ESG principles were undertaken. The Investment Manager also utilised voting rights, when deemed necessary, to align portfolio companies' operations more directly with its ESG principles.

## How did this financial product perform compared to the reference benchmark?

No reference value was determined as part of the sustainability strategy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

The sub-fund's reference benchmark is not constructed based on ESG characteristics, and no separate ESG reference benchmark has been specified at this time.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The sub-fund's reference benchmark is not constructed based on ESG characteristics, and no separate ESG reference benchmark has been specified at this time.

How did this financial product perform compared with the reference benchmark?

No reference value was determined as part of the sustainability strategy.

How did this financial product perform compared with the broad market index?

No reference value was determined as part of the sustainability strategy.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Product name: BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund

Legal entity identifier: 529900UTJA84OAOUKN83

#### **Environmental and/or social characteristics**

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sub-fund invests in the equities of primary resources companies, and preferentially allocates capital to companies that operate in a sustainable way; minimise GHG emissions, energy and water use; minimise environmental & social harm; and, where reasonable to do so, promote positive social impact on their surrounding communities. The term "primary resources companies" refers to businesses whose objective is the extraction, processing and marketing of resources that are physically present, e.g. water, precious and industrial metals and agricultural commodities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

The sub-fund collected, assessed and recorded 45 sustainability indicators and collated these into a consolidated ESG score for each investee company. The primary sustainability indicators used by the sub-fund to measure and assess the attainment of the ESG characteristics promoted were greenhouse gas emissions intensity (scope 1 and scope 2 GHG emissions in metric tonnes of CO2 equivalent/revenue); water use intensity (cubic metres/revenue); energy use intensity (gigawatt hours/revenue); and the level of compliance with the environmental management system (EMS) ISO 14001 standard (percentage of operations certified). The

development of the sustainability indicators was calculated and provided by the outsourced fund management or by the investment advisor used.

The weighted average ESG score for the sub-fund at year end was 72%, indicating good ESG performance

The development of the sustainability indicators was calculated and provided by the outsourced fund management or by the investment advisor used.

#### ...and compared to previous periods?

No investments were aligned with the EU Taxonomy in the reference period or previous reference periods.

Period	2023	2022
#1 Aligned with E/S characteristics	93.11%	NaN%
#1A Sustainable	51.53%	NaN%
Other environmental	40.60%	%
Social	10.93%	NaN%

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sub-fund's sustainable investments is to promote  $CO_2$  emissions reduction by allocating capital to companies whose products enable carbon reduction technologies to be adopted on a mass scale. We measure this impact by looking at the investee companies scope 4 emissions profile. A minimum of 25% of the portfolio will be allocated to companies that have a positive scope 4 emissions profile. This minimum allocation will at any time be sufficient to ensure a better positive scope 4 score for the portfolio then the benchmark index and in most circumstances a positive scope 4 for the portfolio is achieved. The objective of these sustainable investments is to enable  $CO_2$  reduction technologies to be built. We quantify the impact of each investment in this regard as well as the companies direct and indirect emissions via estimating its scope 4 emissions score. The Investment Manager has undertaken significant proprietary analysis to establish the scope 4 emissions profiles of the primary resources companies within its investment universe

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The principle adverse impact indicators set out in Annex I of the Regulatory Technical Standards (the "PAI indicators") are collected, assessed and recorded for all investee companies and feed into our proprietary ESG scoring system as described above. In order to qualify for inclusion in the portfolio, an investee company must score at least 50%, where this scoring incorporates several similar indicators to the PAI and is designed to prevent any company that causes significant harm to any environmental or social sustainable investment objective from being included. The PAI indicators are also separately collated, tracked and periodically reported on at portfolio level to confirm that no significant harm is being caused at the aggregated level. Manual checks are also undertaken and where any significant harm is identified to any environmental or social sustainable investment objective the investment would not be eligible for inclusion in the portfolio. This may be necessary for example where there is any negative publicity relating to an investee company, as a result of press releases made by the company or where issues are identified through our direct engagement with senior management. The nature of any assessment here would depend on the nature of the issues identified, but would consist of the investment team assessing the issue and gaining sufficient comfort that no significant harm is being caused by our investment.

#### \_ How were the indicators for adverse impacts on sustainability factors taken into account?

As noted above, the PAI indicators set out in Annex I of the Regulatory Technical Standards are collected, assessed and recorded where available for all investee companies. This information is obtained from third party data provider – Sustainalytics combined with other data sources. Where this is the case, these are treated as exclusion factors at investment level. These scores are also weighted, with water use, energy use and emissions intensity being the

BAKERSTEEL GLOBAL FUNDS SICAV - Electrum Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

most heavily weighted environmental PAI indicators and health and safety metrics being most heavily weighted of the social PAI indicators. This is on the basis that these PAI indicators are the most relevant indicators for the natural resources sector.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of our ESG due diligence process, we obtain information on whether investee companies commit to the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, any identified violations of these standards are recorded. Where companies do not commit to adhere to these standards or where violations are identified then the company is excluded from consideration as a sustainable investment. This information can be obtained from Sustainalytics and in many cases can be established by direct review of information published by the investee companies.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

the Investment Manager commits to consider principle adverse impacts at entity level under Article 4 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088 ("SFDR"). As an integral part of this, the sub-fund considers principal adverse impacts on sustainability factors at sub-fund level in accordance with Article 7 of SFDR and will publish information on the principal adverse impacts on sustainability factors in its periodic reports in accordance with Article 11. Further, as noted above, the sub-fund uses the PAI indicators to assess whether the sustainable investments in the portfolio cause significant harm to any environmental or social sustainable investment objective. This is done for all PAI indicators listed in Annex 1 of the Regulatory Technical Standards, and these indicators are tracked at both investment level and at portfolio level. See above for further details

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/01/2023 - 31/12/2023

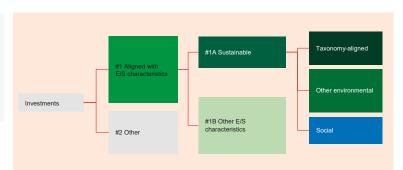

Largest Investments	Sector	% Assets	Country
Norsk Hydro ASA	MANUFACTURING	4.33	Norway
Freeport-McMoRan Inc.	MINING AND QUARRYING	4.01	United States of America
Champion Iron Ltd.	MINING AND QUARRYING	3.82	Australia
Pan American Silver Corporation	MINING AND QUARRYING	3.77	Canada
Cameco Corporation	MINING AND QUARRYING	3.49	Canada
Albemarle Corporation	MANUFACTURING	3.36	United States of America
Livent Corporation	MANUFACTURING	3.33	United States of America
Kinross Gold Corporation	MINING AND QUARRYING	3.23	Canada
Lundin Mining Corporation	MINING AND QUARRYING	2.93	Canada
Newcrest Mining Ltd.	MINING AND QUARRYING	2.93	Australia
Agnico Eagle Mines Ltd.	MINING AND QUARRYING	2.91	Canada
Hudbay Minerals Inc.	MINING AND QUARRYING	2.91	Canada
Coeur Mining Inc.	MINING AND QUARRYING	2.86	United States of America
Wheaton Precious Metals Corporation	MINING AND QUARRYING	2.81	Canada
Barrick Gold Corporation	MINING AND QUARRYING	2.78	Canada

### What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. The share of these investments as of the reporting date is 91.89%.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The share of these investments as of the reporting date is 6.53%.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments. The share of these investments as of the reporting date is 55.53%.

   The sub-category #1B Other E/S characteristics covers investments aligned with the environmental
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental
  or social characteristics that do not qualify as sustainable investments. The share of these investments
  as of the reporting date is 41.58%.

### In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	Activities of holding companies	0.71
FINANCIAL AND INSURANCE ACTIVITIES	Other credit granting	0.25
FINANCIAL AND INSURANCE ACTIVITIES	Other financial service activities, except insurance and pension funding n.e.c.	1.87
MANUFACTURING	Aluminium production	6.51
MANUFACTURING	Copper production	1.04
MANUFACTURING	Manufacture of basic precious and other non-ferrous metals	3.97
MANUFACTURING	Manufacture of batteries and accumulators	3.33
MANUFACTURING	Manufacture of chemicals and chemical products	3.36
MANUFACTURING	Manufacture of electronic components	0.35
MANUFACTURING	Other manufacturing n.e.c.	0.00
MANUFACTURING	Precious metals production	0.50
MINING AND QUARRYING	Extraction of crude petroleum and natural gas	0.00
MINING AND QUARRYING	Mining and quarrying n.e.c.	0.62
MINING AND QUARRYING	Mining of chemical and fertiliser minerals	2.70
MINING AND QUARRYING	Mining of iron ores	0.11
MINING AND QUARRYING	Mining of lignite	0.00
MINING AND QUARRYING	Mining of non-ferrous metal ores	19.98
MINING AND QUARRYING	Mining of other non-ferrous metal ores	34.71
MINING AND QUARRYING	Mining of uranium and thorium ores	8.33
MINING AND QUARRYING	Other mining and quarrying	2.52
MINING AND QUARRYING	Support activities for other mining and quarrying	2.46
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	Activities of head offices	0.39
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	Business and other management consultancy activities	2.84

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

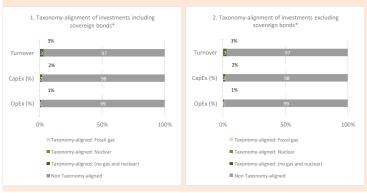

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The share of taxonomy-compliant investments was calculated on the basis of the total portfolio or the total portfolio excluding government issuers. The evaluation of the investments with regard to the previously mentioned asset allocation in "#1 Aligned with environmental or social characteristics", "#2 Other investments" and "#1A Sustainable investments" was not taken into account.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes	
In fossil gas	In nuclear energy
<b>X</b> No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Enabling Activities: not specified

Transitional Activities: not specified

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The weighted average ESG score for the sub-fund at year-end was 72%, indicating good ESG performance. This compares to a weighted average ESG score of 74% at year-end 2022.

Period	2023	2022
Taxonomy-aligned	0.00%	NaN%

are sustainable

investments with an environmental

objective that do not

take into account the criteria for

environmentally sustainable economic

activities under

Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Environmental/social features are advertised with the financial product, but no sustainable investments are made. The value at the reporting date was  $40.6\,\%$ .

#### What was the share of socially sustainable investments?

Environmental/social features are advertised with the financial product, but no sustainable investments are made. The value at the reporting date was 10,93 %

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At least 85% of the sub-fund's assets are invested in investments that have been subject to our proprietary ESG due diligence process and which have received an ESG score of 50% or more. The purpose of the remaining 15% is to cover situations where the ESG screening and scoring process cannot be completed at the time of investment. This includes situations such as corporate actions, including spin-offs, which may result in portfolio holdings arising outside the immediate control of the Investment Manager. Such holdings would then be ESG screened and scored as soon as is reasonably practicable. Additional situations that may not permit ESG screening and scoring to take place, or for meaningful results to be obtained, include cash holdings and physical commodity holdings. There may also be situations where illiquid assets are held that cannot easily be disposed of, even where their ESG status changes or where an ESG screening cannot be undertaken. The minimum environmental and social safeguard in place with respect to this remaining 15% is the fact that they will be subject to ESG screening at the earliest opportunity and where this screening process is not passed then efforts will be made to dispose of the asset or to engage with the issuer.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

A multi-component exclusion strategy shortlisted the investible universe and this was integrated within the investment strategy. The initial exclusion factor screening consisted of 3 stages: market capitalisation screening (only companies with a market capital exceeding \$100M USD were usually considered), stock exchange screening (only companies listed on major primary stock exchanges in Europe, North America, Japan, Hong Kong, Australia and South Africa were considered) and ESG factor screening. The ESG factor screening incorporated key sustainability metrics that were non-negotiable (including the presence of policies covering the following: ethics, human rights, anti-bribery and corruption, anti-forced labour and anti-child labour). The Investment Manager applied additional exclusion criteria and metrics covering weapons, including white phosphorus; fossil fuels, including thermal coal (threshold of 30% of revenue from the production of thermal coal); tobacco; alcoholic beverages; adult entertainment; and serious violations to the UN Global Compact principles. These exclusion criteria are aligned with and enable the sub-fund to comply with accepted industry standards including LuxFLAG ESG Label eligibility criteria and BVI.

The ESG performance of companies shortlisted within the investible universe was screened and scored to ensure a minimum acceptable standard of ESG performance was maintained. The ESG scores generated for the companies were incorporated into the stock selection process within an ESG integration strategy. At least 85% of the sub-fund's assets were invested in securities whose issuers have been selected on the basis of environmental, social and governance criteria and who scored at least 50% in our proprietary ESG scoring system.

In addition, the sub-fund only invested in listed companies ensuring an appropriate standard of transparency on governance. The Investment Manager aimed to invest only in listed companies which maintained a majority of independent directors so as to ensure a higher standard of corporate governance. The Investment Manager assessed Board structure, competence and independence; sustainability governance; gender diversity; compensation; nomination; audit risk and oversight; and shareholder rights. This information was generally obtained directly from information published by the investee company and through interactions with that company.

The Investment Manager engaged regularly with each of the sub-fund's portfolio companies on ESG issues and encouraged adherence to best practice. The Investment Manager undertook site visits to portfolio companies during which verification of compliance with the ESG principles were undertaken. The Investment Manager also utilised voting rights, when deemed necessary, to align portfolio companies' operations more directly with its ESG principles.

## How did this financial product perform compared to the reference benchmark?

No reference value was determined as part of the sustainability strategy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

The sub-fund's reference benchmark is not constructed based on ESG characteristics, and no separate ESG reference benchmark has been specified at this time.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The sub-fund's reference benchmark is not constructed based on ESG characteristics, and no separate ESG reference benchmark has been specified at this time.

How did this financial product perform compared with the reference benchmark?

No reference value was determined as part of the sustainability strategy.

How did this financial product perform compared with the broad market index?

No reference value was determined as part of the sustainability strategy.
