Risk and reward profile

Historical data, such as is used in calculating this indicator, may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The fund is rated 5 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

- **Equities risk:** The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local,

regional or global political, social or economic instability and currency fluctuations.

- **Liquidity risk:** Some securities, primarily unlisted securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.
- **Operational risk:** This fund may invest in markets where settlement systems are less well organised than those of developed

markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.

- **Counterparty risk:** Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.
