

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Craton Capital Precious Metal Fund Class A (ISIN LI0016742681)

Is a subfund of Craton Capital Funds.
This Fund is managed by LLB Fund Services AG. LLB Fund Services is a member of the LLB-Group.

Objectives and Investment Policy

The objective of the Fund is to generate substantial increases in value. To achieve this, the Fund invests mainly in shares of companies active in the sectors of gold, platinum group metals, silver and diamonds. The fund management company is responsible for choosing the individual securities within this framework. The Fund may deploy derivative transactions in order to reduce possible losses resulting from price fluctuations, as well as in order to generate higher increases in value. The fees for the purchase and sale of securities are borne by the Fund. These are incurred in addition to the percentages shown below under "Costs", and may reduce the returns of the Fund. Earnings shall be retained by the Fund, and raise the value of the units. Investors may demand to redeem the units from the management company on a daily basis. The management company may however suspend the redemption if extraordinary circumstances means this appears necessary, taking account of investor interests.

Risk and Reward Profile

A **risk level 7** fund has no capital guarantee, with the highest potential level of gain or loss, and with the possibility for the amplification of trends due to the impact of financial techniques such as leverage. Due to the algorithm not all possible risks can be considered when the Synthetic-Risk-and-Reward Indicator is calculated. You can find more detailed information regarding the risks in the Prospectus. The following risks don't have a direct impact on the indicator, but could still have influence on the Fund:

- **Liquidity risks:** The Fund may invest a portion of its assets in securities that are not traded on an exchange or similar market. It may be difficult to find a buyer for these securities on short notice. This may increase the risk of a suspension of unit redemptions.
- **Counterparty risks:** The Fund may enter into various transactions with other contracting parties. If a contracting party become insolvent, it may no longer be able, or may be only partly able, to settle the Fund's open payment claims.
- **Credit risks:** The Fund may invest a substantial portion of its assets in sovereign and corporate bonds. The issuers of these bonds may become insolvent, such that the bonds may lose their value, either in whole or in part.
- **Risks from the use of derivatives:** The Fund is permitted to enter into transactions involving derivatives. The greater opportunities that this affords are accompanied by greater risks. Using derivatives to hedge against losses may reduce the Fund's profit-making chances.
- **Custodial risks:** The custodial safe-keeping of assets, particularly abroad, may be associated with a risk of loss that can result from the Custodian, or sub-custodian, becoming insolvent, breaching its duties of care and diligence, or acting in an unlawful manner.
- **Operational risks:** The Fund may become a victim of fraud or criminal activity. It may suffer losses as a result of misunderstandings or errors on the part of employees of the Management Company or outside third parties or may be damaged due to external events, such as natural catastrophes.
- **Currency risk:** The unit class is denominated in US Dollar, i.e. Eurozone investors are exposed to a currency risk. This generally results in a loss if investors hold a security denominated in a foreign currency and the underlying exchange rate drops. This risk likewise exists if the securities are traded on an exchange in euros.

More information about the risks could be found in the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
