

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Concept Kaldemorgen, a sub-fund of the SICAV DWS Concept

Share class NC Security code: DWSK02 ISIN: LU0599947198

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

## Objectives and investment policy

The objective of the investment policy is to achieve sustainable capital growth. In order to achieve this, the fund invests primarily in equities of international issuers, fixed- and floating-rate securities issued by governments and money market instruments. In addition, the fund employs derivative strategies. The selection of individual investments is at the discretion of the fund management. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Concept Kaldemorgen is EUR, the currency of the NC share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

## Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of default is continuously present and can cause your investment to suffer a loss. The fund concludes derivative transactions with various contractual partners to a significant extent. If the contractual partner cannot afford any payments (e.g. due to insolvency), this can cause your investment to suffer a loss. The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate within a short period of time.

## Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.
