### What is this product?

**Type** Distribution shares (shares that pay dividends to its holder) of a sub-fund of a SICAV, a regulated open-ended fund whose sub-funds are independent from a liability point of view.

### Investment objectives and policy

**Objective(s)** To increase the value of your investment over the long term by tracking the performance of the benchmark.

**Benchmark(s)** MSCI EMU SRI Net Return, an index that takes into account ESG factors. Usage: index replication.

**Investment policy** The sub-fund invests mainly in European equities.

The sub-fund may use derivatives to hedge against market fluctuations and to reduce its costs, and also to generate additional income.

**Investment process** As part of the passive management of the sub-fund, the manager uses an index strategy that aims to replicate the composition and performance of the benchmark.

**ESG approach** The manager is required to invest in the securities comprising the index.

**SFDR Category** Article 8.

**Base currency** EUR

**Plan your investment**

**Product availability** This sub-fund is available, with or without advice, for retail investors with basic financial knowledge and professional investors.

**Investor profile** This sub-fund is intended for investors who understand the risks of the sub-fund and:

- are seeking a passive investment focused on capital growth
- are interested in exposure to developed equity markets, either as a core investment or for diversification purposes
- have a high tolerance for risk and can withstand a substantial loss on this investment.

**Placing orders** You can buy, exchange or sell shares of the sub-fund on any full bank business day in Luxembourg.

### Terms to understand

**share** Financial security corresponding to a share of a company's capital and generally giving the right to dividends.

**article 8** Financial product that promotes environmental or social characteristics according to the European regulation (SFDR).

**ESG** Environmental, social and governance.

**derivative** Any financial security whose value is linked to one or more interest rates, indices, stocks, currencies, commodities or other underlying assets.

*Depository: Banque Degroof Petercam Luxembourg S.A.*

*For more information, including the prospectus and financial reports, see "Other relevant information" on page 3.*

### What are the risks and what could I get in return?

#### Risk indicator

The risk indicator assumes that you keep the product for at least **5 years**. The actual risk can vary significantly if you cash in before maturity and you may get back less.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay out as required. The risk indicator is not guaranteed and may change over time.

**All investments involve risk.** The value of your investment in this product can go up and down, and you could lose some or all of your investment. This product is rated at the medium-high risk level (5 out of 7). Poor market conditions are very likely to reduce the value of your investment.

The sub-fund's risk level reflects the following:

- Equity investments have a higher level of volatility and risk than bonds and money market instruments.

Other important risks partly or completely unreflected in the risk indicator:

• **If your currency as an investor is different from the subscription currency of this product, changes in currency exchange rates could reduce any investment gains or increase any investment losses.**

• Unusual market conditions or unforeseeable events may magnify risks or trigger other risks such as counterparty, liquidity and operational risks (a full description of these risks is available in the prospectus).

• If you place a request to sell (redeem) shares at a time when this product has received many other sell requests, the processing of your order may be delayed, which could affect the price you receive for your shares.

### Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest EUR 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you get out of this product depends on future market performance.

**Please note that future market performance is uncertain and cannot be accurately predicted.**

Recommended holding period:		5 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum			
Stress	<b>What you might get back after costs</b>	1 860 EUR	1 740 EUR
	Average return each year	-81.40%	-29.51%
Unfavourable	<b>What you might get back after costs</b>	7 650 EUR	9 390 EUR
	Average return each year	-23.50%	-1.25%
Moderate	<b>What you might get back after costs</b>	10 630 EUR	13 810 EUR
	Average return each year	6.30%	6.67%
Favourable	<b>What you might get back after costs</b>	15 010 EUR	17 260 EUR
	Average return each year	50.10%	11.53%

The unfavorable, intermediate and favorable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. The stress scenario shows what you might get back in extreme market circumstances. The markets could evolve very differently in the future.

Unfavorable scenario: this type of scenario occurred for an investment between 17/11/2021 and 29/12/2023.

Intermediate scenario: this type of scenario occurred for an investment between 31/03/2017 and 31/03/2022.

Favorable scenario: this type of scenario occurred for an investment between 31/08/2016 and 31/08/2021.

What happens if Degroof Petercam Asset Services S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from Degroof Petercam Asset Services S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less than what the investor paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

This table shows the amounts deducted from your investment to cover various costs. These amounts depend on the amount you invest, the duration of your investment and the performance of the sub-fund. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

- for the first year, you get back the amount you invested (0% annual return);
- for the other holding periods, the product evolves as indicated in the intermediate scenario;
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	<b>200 EUR</b>	<b>672 EUR</b>
<b>Annual cost impact (*)</b>	<b>2.0%</b>	<b>1.0% each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 7.70 % before costs and 6,67 % after costs.

## Composition of the costs
