What is this product?

Type

The product is a UCITS - Special property in accordance with German authorization.

Term

This product is an open-ended fund without predefined maturity. For information on redemption possibilities please refer to section "How long should I hold it and can I take out my money early?". The Company may, however, terminate its right to manage the fund by giving a minimum of six months' notice by way of an announcement in the Bundesanzeiger and additionally in the annual report or semiannual report. The RC share class of DeAM-Fonds BKN-HR was launched in 1981.

Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The fund's primary investment objective is to avoid risk, while at the same time achieving a reasonable annual distribution of income. In order to achieve this, the fund invests in bonds and securities that grant rights to creditors (together: interest-bearing securities) from issuers whose registered office is in a member country of the European Union, Iceland, Norway, Liechtenstein, Switzerland and in securitized financial instruments. The fund may invest over 35% of assets under management in bonds of diverse public issuers. The bonds held for the account of the investment fund must consist of at least six different issues; no more than 30% of the fund volume may be invested in one issue. Assets denominated in a currency of a member country of the European Union besides the euro may only be acquired in connection with a hedging transaction. Up to 49% of the value of the fund may be invested in bank balances and money market instruments. Investment fund units may not be acquired and borrowings may not be undertaken. Derivative financial instruments may only be used for hedging purposes. The selection of individual investments is at the discretion of the fund management. The return of the product can be derived from the share price that is calculated daily plus any distribution. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. More share classes may be available for this fund - please refer to the relevant section of the prospectus for further details. The depositary is State Street Bank International GmbH, Germany. More detailed information of this fund, such as the prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at www.dws.com/fundinformation/. These documents are available in English or German. The documents as well as other information (including the latest share prices) are available free of charge.

Intended retail investor

The fund is aimed at professional investors with a medium-term investment horizon and basic knowledge/experience and who can bear a financial loss. The fund can be used for general asset accumulation.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and very poor market conditions are very unlikely to impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Risks specific to funds of funds, Concentration risk. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10.00 years. Markets could develop very differently in the future.

What happens if DWS Investment GmbH is unable to pay out?

The assets of the fund are kept separately from the own assets of the management company DWS Investment GmbH. Investors of the fund cannot suffer any financial loss as a result of this separation due to a failure of the management company. In the event of a default by the depositary State Street Bank International GmbH, Germany, investors of the fund may suffer a financial loss if their deposits are not covered by the Deposit Guarantee Fund of the Bundesverband deutscher Banken e.V.. If deposits on the fund are made with other credit institutions, investors may also suffer a financial loss, provided that such deposits are not covered by any existing deposit guarantee schemes. The protection of deposits of the fund may also be limited in the case of existing deposit guarantee schemes, as they regularly have restrictions on the coverage of deposits in accordance with their statutes.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	54 EUR	162 EUR
Annual cost impact (*)	0.5 %	0.5 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.7% before costs and 0.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
