Address : 29, boulevard Haussmann, 75009 Paris

Competent Authority of PRIIP Manufacturer : Comité de Surveillance du Secteur Financier
Production date of the key information document : 25/01/2023

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type : Mutual Fund

Objectives:

The Fund is actively managed and is not linked to a benchmark. The Fund aims to provide unitholders with exposure to the performance of a basket of investment units through the use of derivative instruments. The Fund invests in a derivative-based investment strategy that uses a dynamic hedging model to determine participation in the performance of a basket of equity, fixed income or commodity funds. Over the long term, the basket of funds is expected to generate a return equivalent to a portfolio consisting of 60%-80% equities and commodities and 20%-40% bonds. The participation in the performance of the basket of funds may vary - depending on market conditions - due to the dynamic hedging model.

In principle, the investor can redeem units in the fund on each valuation day. The income is reinvested in the Fund.

Derivatives may be used to offset price movements of the assets (hedging), to exploit price differences between two or more markets (arbitrage) or to increase profit opportunities, even if this also increases the risk of losses (leverage).

The base currency of the Fund is Euro.

This unit class of the Fund is suitable for investors who wish to invest their money over the medium term.

Intended retail investors: This unit of funds is open to dedicated investors.

Recommendation : The recommending holding period is 3 years.

What are the risks and what could I get in return?

Summary Risk indicator

The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a high risk class. Main risks not covered by the above indicator which could lead to a decrease in the net asset value of the Fund and which the Fund is authorized to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- Counterparty risk
- Risk of Financial derivative Instruments
- Operational risk

Performance Scenarios

Investment		1 year	3 years
Stress scenario	What the Investor might get back after costs	2 987.75€	2 423.05€
	Rendement annuel moyenAverage return each year (%)	-70.12%	-24.68%
Unfavorable scenario	What the Investor might get back after costs	7 464.15€	5 786.36€
	Average return each year (%)	-25.35%	-10.36%
Moderate scenario	What the Investor might get back after costs	9 379.35€	5 786.36€
	Average return each year (%)	-6.20%	-10.36%
Favorable scenario	What the Investor might get back after costs	11 322.10€	12 510.56€
	Average return each year (%)	13.22%	4.58%

This table shows the money you could get back at maturity, under different scenarios, assuming that you invest EUR 10,000.00. The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Issuer is unable to pay out?

Failure of the management company that manages the assets of your FCP would have no effect on your investment. The custody and custody of your FCP's assets are in fact provided by your FCP's custodian.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs borne by the Investor will have on his investment return. The total costs take into account one-off, ongoing and incidental costs. The amounts shown hereinafter are the cumulative costs of the Product itself. The figures assume the Investor invests €10,000 and are estimates subject to change in the future.

COSTS OVER TIME

Investment EUR 10 000	1 year	3 years
Total costs	744.89€	1 326.59€
Impact on return (RIY) per year	7.57%	3.29%

The costs shown in the table above represent how much the expected costs of the product would effect your return, assuming the Product performs in line with the moderate performance scenario. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

COMPOSITION OF COSTS

The table below shows:

- the impact of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories

This table shows the impact on return per year.			
One-off costs	Entry costs	5.00%	Costs the Investor pays when making its investments. This is the most the Investor will pay, and the Investor could pay less.
	Exit costs	0.00%	The impact of the costs of exiting the investment when it matures.
Ongoing costs	Management fees and other ongoing costs	2.46%	The impact of the costs that the Manager retains each year for managing your investments. This rate incorporates fixed ex-post costs more representative of the costs actually borne by the investor.
	Portfolio transaction costs	0.12%	The impact of the costs of us buying and selling underlying investments for the product.
Incidental costs	Performance fees	0.00%	The impact of performance fees.
	Carried interests	0.00%	The impact of carried interests retained when the investment has performed better than the preferred return.

How long should I hold it and can I take my money out early?
