This key information document is accurate as at 24th February 2023.

What is this product?

TYPE OF PRODUCT

The product is a sub-fund of Dynasty SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

The objective of the Class A EUR shares of "Dynasty Bond Euro Short Term" (the "Sub-Fund") is to provide positive returns over the short term, through the selection of a portfolio of fixed income asset classes, markets and fixed income financial instruments offering an attractive yield considering the issuer's credit risk.

The Sub-Fund has no benchmark and is actively managed.

The Sub-Fund does not offer any form of guarantee with respect to investment performance and no form of capital protection applies.

The investment policy of the Sub-Fund consists in holding a portfolio of fixed-income securities. Such securities will have, at the time of their acquisition, an attractive yield, taking into account the creditworthiness of their issuer.

The Sub-Fund's average interest rate sensitivity (duration) will range between 0 and 1 year.

The Sub-Fund will invest in fixed-rate, floating-rate, reviewable, indexed or convertible bonds, participating securities, subordinated securities with no fixed maturity and negotiable debt securities, within the authorized sensitivity range.

The Sub-Fund is authorized to invest in all categories of bonds. The SubFund will invest principally its net assets in investment grade securities and up to 10% of its net assets in non-rated bonds or bonds with a rating of less than BBB- (or equivalent).

The Sub-Fund will not invest in contingent convertible bonds ("Cocos") or in equity securities.

The average equity sensitivity (delta) of the Sub-Fund via its exposure to convertible bonds only will be below 3% of its net assets.

The fixed-income securities are only denominated in euros and issued mainly by European issuers (50% minimum). Up to 50% can be invested in bonds issued by non-European issuers.

The selection of fixed income instruments will essentially depend on the analysis of their issuer's creditworthiness, based on a thorough analysis of their solvability.

The Management Company relies on its own credit analysis to assess the credit quality of the fixed income securities.

The income of the Class A EUR Shares is reinvested. The Class A EUR share is denominated in EUR.

The investor can obtain redemption of his shares on a simple demand transmitted by 4 p.m. one Luxembourg business day before each valuation day to the register and transfer agent. Orders are executed on the basis of the NAV calculated on the relevant valuation day. Settlement will occur on the same business day as the relevant valuation day.

The return of the product is determined using the net asset value calculated by the Central administration. This return depends mainly on the market value fluctuations of the underlying investments.

The Sub-Fund's assets are segregated from assets of other Sub-Funds of the Fund. The assets of the Sub-Fund cannot be used to pay debts of other sub-funds.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

What happens if Dynasty AM S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with UBS Europe SE, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

Investment of EUR 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 71	EUR 214
