MainFirst SICAV Luxembourg

MainFirst Avant-garde Stock Fund C

MainFirst Avant-garde Stock Fund is a sub fund of MAINFIRST SICAV

Objective & Investment Policy

The investment objective for the sub-fund to which share class C belongs, is to generate long-term capital growth while maintaining a reasonable distribution of risks by investing the sub-fund's assets mostly in equities and other equity securities of companies around the world. The investment focus will be placed on companies headquartered in Europe or which perform the bulk of their economic activities in Europe. In so doing, depending on the situation, the investment focus may be on large caps or also small and mid caps. In addition, up to 25% of the sub-fund's assets may be invested in: equities of

companies around the world which do not meet the above conditions, as well as bonds, convertible bonds and bonds with warrants with options on securities of companies around the world that are denominated in a freely convertible currency. Irrespective of the intended distribution of risks, the sub-fund's investments may temporarily have a country or industry-specific focus. Income from the sub-fund's share class C is not paid out, but is used for re-investment. Shares from the sub-fund's share class C can be redeemed on a daily basis.

Risks and Rewards

The data used to calculate the synthetic indicator is based on the historical performance of the sub-fund's share class C and cannot be used as a basis for the future risk and income profile of the sub-fund's share class C. The sub-fund is primarily subject to the price volatility of stock markets in Europe. The sub-fund's share class C falls under the risk and income category detailed above as its value can fluctuate as a result of the investment policy detailed above. Even the lowest risk and income category is not equivalent to a risk-free investment. The sub-fund invests its assets in shares and bonds issued by

companies. The insolvency of the respective companies can lead to impairment of the equities or bonds through to a total loss; investing in securities from smaller, less well-known companies bears greater risks and the possibility of greater share price volatility than investing in larger, more mature and better-known companies; the sub-fund's share class C is denominated in euros. However, the sub-fund can invest, to a certain extent, in securities that are denominated in other currencies, with the result that the share class can also be exposed to a corresponding exchange rate risk.
