The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Funds - SMART Global Defensive Fund

a sub-fund of Fidelity Funds

I-ACC-Euro (Euro/USD hedged) (ISIN: LU1808853235 / WKN: A2JJ5K)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- The fund aims to provide stable long-term growth.
- The fund aims to manage the long term average volatility under normal market conditions within a range of 2 to 5% per annum.
- The fund will invest in a range of global asset classes including global government bonds, inflation-linked bonds, corporate bonds, (including investment grade, high yield and emerging market bonds), and shares of companies globally, based on their potential to generate moderate capital growth or reduce risk or fluctuation within the overall portfolio.
- The fund may invest up to 40% in shares of companies.
- The fund may invest up to 100% in government, corporate, inflation linked and emerging market bonds.
- Less than 30% of the fund's total net assets will be invested in hybrids and Cocos, with less than 20% of the total net assets to be invested in Cocos.
- The fund has the freedom to invest outside its principal geographies, market sectors, industries or asset classes.
- As this fund may invest globally, it may invest in countries considered to be emerging markets.
- The fund may invest up to 40% in global high yield bonds and up to 10% in hybrids, including contingent convertibles.
- The fund may also seek exposure of less than 30% in infrastructure securities, commodities and closed-ended real estate investment trusts (REITS).
- The fund's exposure to Distressed Securities is limited to 10% of its assets.
- The fund may make use of derivatives or use complex derivatives to meet its investment objectives in line with the fund's risk profile. The fund can use derivatives, including but not limited to, currency derivatives, futures (index, basket or single name), options (including covered call options), credit default swaps, total return swaps, interest rate swaps and contracts for difference, to achieve indirect exposure to the main assets listed above, to generate additional capital or income in line with the fund's risk profile or with the aim of risk or cost reduction.
- The reference currency of the fund is hedged to the reference currency of the share class. This hedging has the effect of translating (or "replicating") the returns expressed in the fund's reference currency into returns expressed in the reference currency of the share class.
- The fund is actively managed without reference to an index.
- Income earned by the fund is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- The class may only be acquired by institutional investors.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
