This annual report does not constitute an offer to sell or a solicitation of an offer to buy shares in any of the sub-funds ("Funds") of First Sentier Investors Global Umbrella Fund plc (the "Company"). Subscriptions are to be made only on the basis of the information contained in the Company's prospectus, and the relevant key investor information document, as supplemented by the latest semi-annual and annual reports.

Please note that the Prospectus is a document used globally and therefore also contains information of the following Funds which are not authorised by the SFC and are not available to the public in Hong Kong as per the Supplement for Hong Kong investors to the Prospectus dated 9 December 2021, as of 31 December 2021:

FSSA All China Fund FSSA Asia Pacific All Cap Fund First Sentier Emerging Markets Bond Fund First Sentier Global Credit Income Fund First Sentier Responsible Listed Infrastructure Fund First Sentier US High Yield Bond Fund First Sentier US High Yield Quality Bond Fund Stewart Investors Asia Pacific and Japan Sustainability Fund Stewart Investors Latin America Fund Stewart Investors Indian Subcontinent Sustainability Fund Stewart Investors Worldwide Sustainability Fund Stewart Investors Global Emerging Markets Leaders Sustainability Fund Stewart Investors European Sustainability Fund

As at 31 December 2021, Stewart Investors Global Emerging Markets Leaders Sustainability Fund had not yet launched.

Directors, Report

The Directors submit their Annual Report for the financial year ended 31 December 2021.

Activities, Business Review and Future Prospects

The Directors have directed the affairs of the Company in accordance with the Companies Act, 2014. A detailed business review and future prospects are outlined in the Investment Managers' Reports.

Risk Management Objectives and Policies

Investment in the Company involves a number of risks. Details of the general and specific risks are contained in the Prospectus. Details of the risks associated with financial instruments are included in Note 8.

Principal risks and uncertainties

The Company is an umbrella fund with segregated liability between sub funds. The principal risks facing the Company relate primarily to the holding of financial instruments and markets in which it invests. The most significant types of financial risk to which the Company is exposed to are market risk, credit risk and liquidity risk. Market risk includes other price risk, currency risk and interest rate risk. Details of the risks associated with financial instruments are included in Note 8.

Results and Dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 307-318. Details of the dividends declared during the financial year in respect of certain Funds by the Directors are shown in the Distribution Statement on pages 337-360. The Directors did not declare or pay dividends on any of the Funds not mentioned in the Distribution Statement.

Directors

Ms Bronwyn Wright, Mr Kevin Molony, Mr Adrian Hilderly, Ms Clare Wood and Mr Terrence Yodaiken are the Directors of the Company. Directors of the Company are detailed on page 556.

Directors' Responsibility Statement

Company law requires the directors to prepare Company financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with Irish Law and International Financial Reporting Standards (IFRS's) as adopted by the European Union ("EU") and applicable law.

Irish company law requires the Directors to prepare financial statements for each financial year that give a true and fair view of the assets, liabilities and financial position of the Company and of the Statement of Comprehensive Income of the Company for that financial year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS as adopted by the EU and ensure that they contain additional information required by the Companies Act, 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

Directors[,] **Report (continued)**

Directors' Responsibility Statement (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Irish Companies Act, 2014 (the "Companies Act") and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the Depositary for safe-keeping. In carrying out this duty, the Directors have delegated custody of the Company's assets to HSBC Continental Europe.

The Directors are responsible for the maintenance and integrity of the financial statements which are included on the Company's website (www.firstsentierinvestors.com). Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The financial statements of the Company may be included on the website of First Sentier Investors (www.firstsentierinvestors.com). The work carried out by the auditors does not involve consideration of the maintenance and integrity of the Company's financial information which has been included on the aforementioned website. Accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the aforementioned website.

Adequate Accounting Records

The Directors are responsible for keeping adequate accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements are prepared in accordance with International Financial Reporting Standards (IFRS's) as adopted by the EU and comply with the Irish Companies Act, 2014 and the Central Bank UCITS Regulations.

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. To this end the Directors have engaged HSBC Securities Services (Ireland) DAC as Administrator and Matsack Trust Limited as Secretary. The accounting records are kept at the administrator's office at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2 and the registered office at 70 Sir John Rogerson's Quay, Dublin 2, Ireland.

Corporate Governance Code

The Board of Directors adopted the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies as published by Irish Funds (the "Code") in November 2012. The Board of Directors has assessed the corporate governance practices and procedures set out in the Code and has determined that the Company followed those practices and procedures during the financial year ended 31 December 2021.

Directors[,] **Report (continued)**

Directors and Secretary's Interests in the Share Capital of the Company

The Secretary did not hold any interest, beneficial or otherwise, in the share capital of the Company during or at the end of the financial year.

Details of Directors Interests in the Share Capital of the Company are disclosed in Note 14 to these financial statements.

Connected persons

In accordance with the requirements of the Central Bank UCITS Regulations, all transactions carried out with the Company by the management company or depositary of a UCITS, and the delegate or subdelegates of such a management company or depositary (excluding any non-group company subdepositaries appointed by a depositary), and any associated or group companies of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements in place to ensure that the obligations set out in the Central Bank UCITS Regulations are applied to all transactions with connected persons and transactions with connected persons entered into during the period complied with the obligations set out in the Central Bank UCITS Regulations.

Article 11 SFDR Disclosures

Please see the Appendix for the Company's disclosures under Article 11 of the Sustainable Finance Disclosures Regulation (SFDR), including the extent to which the environmental or social characteristics of Article 8 and 9 Funds are met. The Company has disclosed on a voluntary basis against certain of the expected "level 2" requirements which will apply from 1 January 2023.

The Company is currently assessing the alignment with the EU Taxonomy Regulation ((EU) 2019/2088) of the Funds referred to in the Appendix. Disclosures will be made in accordance with the applicable regulatory technical standards, which are expected to come into force on 1 January 2023.

Please note that, for the Article 8 Funds in the Appendix, the "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of those Funds do not take into account the EU criteria for environmentally sustainable economic activities. For Funds which do not qualify as Article 8 or 9 Funds under SFDR, the investments underlying those Funds do not take into account the EU criteria for environmentally sustainable economic activities.

COVID-19 outbreak

FSI has had to respond to the outbreak of the COVID-19 virus, which has affected many countries around the globe, including countries in which FSI operates and countries in which FSI invests on behalf of its clients. FSI continues to closely monitor the developments and the implications of the spread of the COVID-19 virus, the advice from health and government authorities and the World Health Organisation, as well as taking advice from external advisers on international security (International SOS). FSI will continue to make adjustments to how its business operates during this time with the aim of continuing to provide the best possible services to its clients.

Directors, Report (continued)

Significant events during the financial year

Details of significant events during the financial year are disclosed in Note 17 to these financial statements.

Subsequent Events

Details of significant events after the Statement of Financial Position date are disclosed in Note 18 of the financial statements.

Audit Committee

In accordance with section 167(1) to 167(3) of the Companies Act, 2014 there is a requirement for certain companies to establish an audit committee and the decision to do so, or not to do so, must be documented and explained in the Directors' report. As the Company satisfies all the criteria to be called a "large company", the Company has established an audit committee. The members of the audit committee are Bronwyn Wright, Kevin Molony and Clare Wood.

Independent Auditors

The independent auditors, Deloitte Ireland LLP, have indicated their willingness to continue in office in accordance with section 383(2) of the Companies Act, 2014.

Directors Compliance Statement

The Directors confirm, in accordance with Section 225 of the Companies Act, 2014 that the following has been completed:

- a compliance policy document has been drawn up that sets out policies that, in our opinion, are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
- appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
- during the year ended 31 December 2021, the arrangements or structures referred to above have been reviewed.

We acknowledge that we are responsible for securing the Company's compliance with its relevant obligations.

Directors[,] **Report (continued)**

Audit Information Statement

As per Section 330 of the Companies Act, 2014

- so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- the Directors have taken all the steps that they ought to have taken as directors in order to make them aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Over the past 12 months, the top contributors to performance included Tech Mahindra as it reported decent earnings results and strong client deal wins. Growth and margins were better than expected across its business lines. MediaTek outperformed as the company reported better than expected earnings, strong sales momentum and a hike in the cash dividend payout. On the negative side, Largan Precision was lower on concerns about slower revenue growth and increased competition in the lenses industry. Nonetheless, in more recent months the share price has rebounded on expectations of easing supply constraints as well as a brighter outlook for smartphone lens upgrades. Dairy Farm International Holdings continued to underperform due to ongoing headwinds from pandemic-related restrictions.

Activity

New purchases over the year included Nippon Paint, Asia's largest paint company. Paint, being a consumer business, has high return characteristics and attractive cash flows; and we believe the company will be materially larger in a decade. Importantly, the ownership was restructured in January 2021 with the Goh family's direct control of the Asian businesses swapped into a larger holding at the parent company level. This ensures that the alignment between the owners, shareholders and the business is now much clearer and, in our view, better than the complicated structure of the past.

The Fund also purchased Colgate-Palmolive after seeing improvements in its competitive positioning and revenue growth. In addition, new CEO, Ram Raghavan, has brought a renewed focus on growth, which bodes well for Colgate's portfolio of toothpastes.

The Fund divested Uni-President China Holdings to consolidate the portfolio into higher-conviction holdings, and sold Tencent Holdings on concerns about slowing growth amid China's "Common Prosperity" goals.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Techtronic Industries, which reported better than expected earnings for 1H2021. The company's sales growth outlook also looks rosy, as it should benefit from the proposed USD 2trn infrastructure bill in the US. ENN Energy Holdings rose as gas volumes continued to grow at a robust pace and its integrated energy sales strategy seemed on track. Alibaba Group Holding weakened after Beijing proposed new regulations aimed at curbing anti-competitive practices among internet firms, while Ping An Insurance declined on overall insurance industry demand weakness.

Activity

Significant purchases over the year included Shenzhen Mindray Bio-Medical Electronics, China's largest domestic medical devices company and a market leader in patient monitors and life support systems. The company has a strong track record and has been gaining market share from global leaders as it expands its presence overseas. We believe there are significant growth opportunities ahead, as the penetration level of medical devices in China is still low and there is a growing preference for import substitutions. The Fund also bought Ping An Insurance, a leading financial holding company with diversified business segments in life insurance, banking, securities, trust services, asset management and others. The risk-reward profile looked reasonable, as the insurance business is good quality and seemed undervalued.

The Fund sold Hangzhou Hikvision Digital Technology on political concerns, and 51Job.com as its price neared the privatisation offer (an offer price made by the company to shareholders to delist the shares and make the company privately owned).

Investment Manager's Report (Unaudited) (continued)

Outlook

China is eyeing a broad-based albeit bumpy recovery, as concerns about policy risk have hurt market sentiment and increased market volatility in the short term. The recent reserve requirement ratio (RRR) cuts signalled that Beijing is willing to add some cushion to the slowing economy.

We expect further policy actions to come but the government will remain prudent and fine-tuned, as the goal is stability. Our strategy against this backdrop is to be selective in our investments, seeking to buy good quality companies to hold for at least 3-5 years or more. We continue to see attractive opportunities in China's increasing urbanisation, consumption upgrading, technical innovation, and the rise in healthcare spending.

*Inception Date – 05 February 2018

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

Performance

The Fund has provided a positive return over 3, 5 and 10 years to 31 December 2021. It also provided a positive return over the twelve months to 31 December 2021. The Fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies and low interest rates. The investment manager invests with capital preservation in mind, meaning they define risk as losing client money, rather than deviation from a benchmark index.

Activity

Major purchases over the period included Old Dominion Freight Lines. The company focuses on less-than-truckload freight services, moving small items across the United States quickly, using a complex network of their own trucks and warehouses; and Natura & Co Holdings, a Brazilian home and personal care company which we have invested in for long periods in the past. We have always loved Natura's leadership on sustainability issues, ranging from living wages to engagement with smallholder suppliers. We also purchased Cognex, a research and development driven franchise that should continue to benefit from the growth tailwinds of automation and inspection across a variety of industries. As their products and services help improve manufacturing quality and reduce waste, we expect plenty of growth in the years ahead.

We sold imperfect giant, Nestlé, during the year, after holding the company for seven years in the strategy. Despite improvements in Nestlé's product portfolio, and its commitment to tackling plastic packaging, we were concerned over the level of future growth the investment offered in tandem with high valuations. We sold Microsoft on concerns over potential future regulatory risks and Novozymes on valuation concerns.

Investment Manager's Report (Unaudited) (continued)

Outlook

Over a period that continued to set new market highs, we remain wary of valuations that seem evermore stretched. We continue to search for well-stewarded businesses, with competent management teams that are focussed on delivering long-term growth in franchises where sustainability considerations are central to the decision making. This we believe will deliver long-term, positive returns for clients.

(Performance calculation is based on official dealing Net asset value (NAV) per share)

*Inception date is 7 April 2020 and liquidation date is 23 December 2020.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Techtronic, which reported better than expected earnings for 1H2021. The company's sales growth outlook also looks rosy, as it should benefit from the proposed USD 2trn infrastructure bill in the US. ENN Energy Holdings rose as gas volumes continued to grow at a robust pace and its integrated energy sales strategy seemed on track. Alibaba Group Holding weakened after Beijing proposed new regulations aimed at curbing anti-competitive practices among internet firms, while Ping An Insurance declined on overall insurance industry demand weakness.

Activity

Significant new purchases included Vinda International, China's largest producer of tissue paper. The Group has been managed well historically and enjoys the combination of foreign ownership by Swedish personal care company Essity (around 52%) and the Chinese founder (approximately 23%). This combines local knowledge and experience with the professionalism and sustainability focus of a multinational corporation. We believe growth will come from further market share gains and customers buying premium products, as consumption per capita in mainland China is around half that of other developed economies and still has plenty of room to grow. The Fund also bought Ping An Insurance, a leading financial holding company with diversified business segments in life insurance, banking, securities, trust services, asset management and others. The risk-reward profile looked reasonable, as the insurance business is good quality and seemed undervalued.

The Fund divested Hengan International Group to switch to other companies that had fallen in price.

Outlook

As the US Federal Reserve tapers its stimulus, interest rates should rise – not just in the US but also in Asia – and liquidity will tighten. This will likely affect Hong Kong markets as well, given the city's currency and interest rates linkage to the US.

As always, we continue to focus on quality companies with proven management, dominant franchises and conservative financials. Key holdings include China Mengniu Dairy and Midea Group, which should continue to benefit from the structural trend of customers buying premium products as disposable incomes rise. The conservative lending practices at China Merchants Bank mean that it is well positioned to benefit from the economic recovery, while AIA Group, which has been expanding its footprint in China, should gain from the rising penetration of insurance and protection products.

First Sentier Investors (Hong Kong) Limited January 2022

Performance Table as of 31 December 2021 (Unaudited)

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Top contributors over the year included ICICI Bank, which continues to deliver strong loan growth, improving asset quality and returns. Its digital offerings have helped the bank gain market share. Its competitive position is likely to continue strengthening as large state-owned banks and smaller non-bank finance companies struggle with weak balance sheets and poor asset quality. Mahindra Lifespace Developers gained following strong demand for residential property in Mumbai, its key operating market. The company is expected to benefit from the government's focus on affordable housing and rising income levels and the management has communicated its plans to accelerate the company's growth.

Bajaj Auto detracted from performance as sales were weak and margins were under pressure. Higher commodity prices raised input costs, while a resurgence in Covid cases hurt demand. Solara Active Pharma Sciences declined due to concerns about price inflation on its key raw materials. However, our discussions with the management reassured us that the long-term prospects are still bright, with the CEO stating an ambition to grow revenues nearly four-fold over the coming five years.

Activity

The Fund bought Mahindra & Mahindra, an Indian conglomerate with businesses in Farming and Autos, IT (Tech Mahindra), Real Estate (Mahindra Lifespaces), Financial Services (M&M Financial Services), Hospitality (Mahindra Holidays) and Logistics (Mahindra Logistics). We believe the new management is making positive changes in regard to capital allocation. The company plans to exit some underperforming businesses and focus on those which generate at least 18% ROE (or have a clear path to that target).

Divestments included Dabur India and SKF India, due to expensive valuations.

Investment Manager's Report (Unaudited) (continued)

Outlook

The last decade has been a difficult period for Corporate India. After muddling through the stress of multiple scandals as well as severe asset quality issues in the banking industry, companies have faced a number of obstacles including demonetisation (taking certain banknotes out of circulation as legal tender), the introduction of the Goods and Services Tax (GST), a liquidity crisis following the bankruptcy of a large infrastructure financier, and finally, a pandemic.

Our portfolio consists of many dominant companies which have used this opportunity to strengthen their market position in the categories they operate. As the country recovers from the pandemic, we believe these companies are well positioned to capture strong growth from the current cyclical lows.

(Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Most major fixed income markets generated negative returns in 2021, owing to rising bond yields. The Fund declined in value by 7.01% over the year, which compared to a return of -6.97% from the FTSE World Government Bond Index benchmark.

Developments in the US set the tone. Inflation in the US quickened to an annual rate of 7.0% during the year, the fastest pace since the early 1980s. The acceleration was attributed to rising energy prices, as well as bottlenecks and other supply disruptions associated with lockdowns. Initially, Federal Reserve officials insisted the spike in prices would prove temporary and that inflation would ease as economic activity levels started to normalise. Later they conceded that inflationary pressures were likely to be more persistent than initially thought. This was an important change in tone, as it increased the likelihood that accommodative policy settings would be tightened in 2022.

For now, cash rates in the US remain at emergency low levels, but it has become increasingly clear that interest rates will be raised this year. These evolving expectations were reflected in the bond market – after starting 2021 below 1.00%, yields on 10-year Treasuries in the US had risen above 1.50% by the end of December. Bond prices fell as a result, both in the US and elsewhere. Similar themes were playing out in other key regions. In the UK, for example, cash rates were raised in December as officials tried to dampen rising inflation. Again, this resulted in an increase in gilt yields and meant returns from the UK bond market were negative.

Activity

For much of the year, active positions were in place in anticipation of rising government bond yields. While some of these strategies added value, they were unable to prevent the Fund from losing ground. . Overall, we maintained an underweight position in US rates and an overweight in Chinese rates. We believe the strength of the economic recovery and high inflation in the US will prompt Federal Reserves to quicken the pace of policy tightening and raise interest rates quite aggressively in 2022. Meanwhile, economic growth in China shows signs of slowing down after a sharp recovery in 2020. The central bank eased policy settings twice, in July and December, to support economic growth. On the back of this, Chinese government bond yields moved lower over the year. We took partial profits on the Chinese duration position, and also closed the Fund's overweight position in the yuan.

Credit markets fared reasonably well overall, with corporate securities outperforming comparable government bonds. A gradual relaxation in virus-related restrictions as vaccines were rolled out brightened the outlook for corporate profitability, which in turn supported sentiment towards credit. Indeed, the release of pleasing results from companies in a wide range of industry sectors underlined the financial strength of most corporates, and suggests default rates will remain low for the foreseeable future. Against this supportive backdrop, the Fund maintains exposure to credit markets. This allocation benefited performance over the year, and helped preserve capital.

Investment Manager's Report (Unaudited)

Specifically, investments in short-dated, high quality USD credit were maintained to help enhance the yield of the portfolio. During the year we purchased Naver Corporation (an internet conglomerate), Korea Midland Power (a state-owned utility), and Hyundai Motor, all in South Korea.

Outlook

The outlook remains a little uncertain, although irrespective of prevailing market conditions we expect to be presented with opportunities to add value to the portfolio through active positioning. At year end the Fund was positioned in anticipation of a further increase in US Treasury yields, for example.

First Sentier Investors (Hong Kong) Limited January 2022

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Most major fixed income markets generated negative returns in 2021, owing to rising bond yields. The Fund declined in value by 0.98% over the year, which compared to a return of -1.75% from the Bloomberg Barclays US Government/Credit Index.

Developments in the US set the tone. Inflation in the US quickened to an annual rate of 7.0% during the year, the fastest pace since the early 1980s. The acceleration was attributed to rising energy prices, as well as bottlenecks and other supply disruptions associated with lockdowns. Initially, Federal Reserve officials insisted the spike in prices would prove temporary and that inflation would ease as economic activity levels started to normalise. Later they conceded that inflationary pressures were likely to be more persistent than initially thought. This was an important change in tone, as it increased the likelihood that accommodative policy settings would be tightened in 2022.

For now, cash rates in the US remain at emergency low levels, but it has become increasingly clear that interest rates will be raised this year. These evolving expectations were reflected in the bond market – after starting 2021 below 1.00%, yields on 10-year Treasuries in the US had risen above 1.50% by the end of December. Bond prices fell as a result, both in the US and elsewhere. Similar themes were playing out in other key regions. In the UK, for example, cash rates were raised in December as officials tried to dampen rising inflation. Again, this resulted in an increase in gilt yields and meant returns from the UK bond market were negative.

Activity

For much of the year, active positions were in place in anticipation of rising government bond yields. While some of these strategies added value, they were unable to prevent the Fund from losing ground overall.

Credit markets fared a little better, with corporate securities outperforming comparable government bonds. A gradual relaxation in virus-related restrictions as vaccines were rolled out brightened the outlook for corporate profitability, which in turn supported sentiment towards credit. Indeed, the release of pleasing results from companies in a wide range of industry sectors underlined the financial strength of most corporates, and suggests default rates will remain low for the foreseeable future.

Within the credit allocation, a bias towards Asian names over those in the US was maintained, as the spread pick up remained attractive. Issuers with A ratings and above are favoured in this portfolio and holdings typically fared quite well over the year.

Investment Manager's Report (Unaudited)

Haohua is a good example – the company was the subject of US sanctions early in the year and at the time, we believed the ongoing merger plan with Sinochem would be supportive. The valuation subsequently improved and we took profits on the bonds. We also sold Chinese sovereign bonds and Sinopec, a China state-owned oil and gas company, as the spreads tightened to expensive levels.

On the buy side, the Fund participated in a few new deals in the primary market, including Chiba Bank (Japan), Santos, and Commonwealth Bank Tier 2 (both Australia), as well as Naver Corporation and Korea Resources (both South Korea) in the secondary market. All of these bonds were attractively valued we are comfortable with the fundamentals.

Outlook

The outlook remains a little uncertain, although irrespective of prevailing market conditions we expect to be presented with opportunities to add value to the portfolio through active positioning. At year end the Fund was positioned in anticipation of a further increase in US Treasury yields, for example.

(Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Most major fixed income markets generated negative returns in 2021, owing to rising bond yields. The Fund declined in value by 3.19% over the year, which compared to a return of -3.82% from the FTSE US Government 5+ Year Index benchmark.

Developments in the US set the tone. Inflation in the US quickened to an annual rate of 7.0% during the year, the fastest pace since the early 1980s. The acceleration was attributed to rising energy prices, as well as bottlenecks and other supply disruptions associated with lockdowns. Initially, Federal Reserve officials insisted the spike in prices would prove temporary and that inflation would ease as economic activity levels started to normalise. Later they conceded that inflationary pressures were likely to be more persistent than initially thought. This was an important change in tone, as it increased the likelihood that accommodative policy settings would be tightened in 2022.

For now, cash rates in the US remain at emergency low levels, but it has become increasingly clear that interest rates will be raised this year. These evolving expectations were reflected in the bond market – after starting 2021 below 1.00%, yields on 10-year Treasuries in the US had risen above 1.50% by the end of December. Bond prices fell as a result, both in the US and elsewhere. Similar themes were playing out in other key regions. In the UK, for example, cash rates were raised in December as officials tried to dampen rising inflation. Again, this resulted in an increase in gilt yields and meant returns from the UK bond market were negative.

Activity

For much of the year, active positions were in place in anticipation of rising government bond yields, and the Fund's duration was shorter than that of the benchmark. While some of these strategies added value, they were unable to prevent the Fund from losing ground overall.

Credit markets fared a little better, with corporate securities outperforming comparable government bonds. A gradual relaxation in virus-related restrictions as vaccines were rolled out brightened the outlook for corporate profitability, which in turn supported sentiment towards credit. Indeed, the release of pleasing results from companies in a wide range of industry sectors underlined the financial strength of most corporates, and suggests default rates will remain low for the foreseeable future.

No credit securities were added to the portfolio during the year, and existing positions were maintained. The Fund's exposure to credit is predominantly through holdings in high quality bonds, with AA and A ratings. Names owned include Taiwan Semiconductor, Singapore Telecom, Singapore Power, and HK Airport Authority.

Investment Manager's Report (Unaudited)

Outlook

The outlook remains a little uncertain, although irrespective of prevailing market conditions we expect to be presented with opportunities to add value to the portfolio through active positioning. At year end the Fund was positioned in anticipation of a further increase in US Treasury yields, for example.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing, driven by improved profitability and solid sales growth guidance. The company has increased capital expenditure and added capacity, as it continues to see strong customer demand. Techtronic gained as it reported better than expected earnings for 1H2021. The company's sales growth outlook also looks rosy, as it should benefit from the proposed USD 2trn infrastructure bill in the US. On the negative side, Alibaba Group Holding weakened after Beijing proposed new regulations aimed at curbing anti-competitive practices among internet firms, while Ping An Insurance declined on worries about its exposure to property companies in the investment book, as well as concerns about new regulations that would require insurers to increase capital and cash to meet a higher solvency ratio.

Activity

Significant new purchases included Shenzhen Inovance Technology, an industrial automation company that increased market share amid the pandemic last year. While the business is cyclical and valuations are not cheap, we believe the company stands out in terms of its stable management team, its energetic drive and its hungry "wolf culture". We believe further uplift could come from new reforms, as it plans to improve its corporate structure (similar to Huawei), reduce wastage through better strategy and planning, and enhance processes to reduce working capital. The Fund also bought Ping An Insurance, a leading financial holding company with diversified business segments in life insurance, banking, securities, trust services, asset management and others. The risk-reward profile looked reasonable, as the insurance business is good quality and seemed undervalued.

The Fund sold Hangzhou Hikvision Digital Technology on political concerns, and divested Beijing Thunisoft to control our risk exposure after reports that the chairman was under investigation for suspected bribery.

Investment Manager's Report (Unaudited) (continued)

Outlook

China is eyeing a broad-based albeit bumpy recovery, as concerns about policy risk have hurt market sentiment and increased market volatility in the short term. The recent reserve requirement ratio (RRR) cuts signalled that Beijing is willing to add some cushion to the slowing economy.

We expect further policy actions to come but the government will remain prudent and fine-tuned, as the goal is stability. In setting monetary policy, China will need to balance tempering supply-side inflation with a slowing economy, ageing population, and weak sentiment in the property sector. But overall, as rates start to tighten elsewhere, China may look more attractive to global investors as the government turns more pro-growth.

Our strategy against this backdrop is to be selective in our investments, seeking to buy good quality companies to hold for at least 3-5 years or more. We continue to see attractive opportunities in China's increasing urbanisation, consumption upgrading, technical innovation, and the rise in healthcare spending.

(Performance calculation is based on official dealing NAV per share)

*Inception date – 17 December 2021

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Over the past 12 months, key contributors to performance included iFast, a leading investment platform for consumers and financial advisors in Singapore, Hong Kong and increasingly, Malaysia. The online platform offers a wide selection of funds at low cost and has plenty of room for market share gains and margin improvement. DBS Group Holdings reported strong earnings results due to higher fee income and lower provisions, indicating a more optimistic recovery outlook and confidence in their loan books. On the negative side, ACE Hardware Indonesia declined as renewed Covid restrictions dampened sales activity. Dairy Farm International Holdings continued to underperform due to ongoing headwinds from pandemic-related restrictions.

Activity

The portfolio's mandate has been changed to incorporate the broader Southeast Asia universe, which has led to a number of new positions and divestments.

New positions over the year included FPT, an IT services and fixed broadband provider in Vietnam. Valuations were reasonable and there is a decent runway of growth ahead – the IT services business contributes half of earnings and is expected to grow at 20-25% per annum in the medium term.

The Fund also purchased Vietnam Dairy Products (Vinamilk) at attractive valuations. Vinamilk has capable management, a strong brand franchise, consistent and steady cash flows, and high returns on capital. It is the leading brand of milk products in Vietnam, while additional growth optionality could come from its expansion into new categories, such as ready-to-drink coffee, products for senior citizens and probiotic drinks. While the dairy segment in Vietnam is not particularly high growth, we believe Vinamilk should compound steadily in the long run.

The Fund divested United Overseas Bank to consolidate the portfolio into higher-conviction ideas. City Developments was sold on concerns about its poor capital allocation.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

First Sentier Investors (Hong Kong) Limited January 2022

Performance Table as of 31 December 2021 (Unaudited)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Over the past 12 months, the top contributors to performance included Tech Mahindra as it reported decent earnings results and strong client deal wins. Growth and margins were better than expected across its business lines. MediaTek outperformed as the company reported better than expected earnings, strong sales momentum and a hike in the cash dividend payout. On the negative side, Largan Precision was lower on concerns about slower revenue growth and increased competition in the lenses industry. Nonetheless, in more recent months the share price has rebounded on expectations of easing supply constraints as well as a brighter outlook for smartphone lens upgrades. Dairy Farm International Holdings continued to underperform due to ongoing headwinds from pandemic-related restrictions.

Activity

New purchases over the year included Nippon Paint, Asia's largest paint company. Paint, being a consumer business, has high return characteristics and attractive cash flows; and we believe the company will be materially larger in a decade. Importantly, the ownership was restructured in January 2021 with the Goh family's direct control of the Asian businesses swapped into a larger holding at the parent company level. This ensures that the alignment between the owners, shareholders and the business is now much clearer and, in our view, better than the complicated structure of the past.

The Fund also purchased Colgate-Palmolive after seeing improvements in its competitive positioning and revenue growth. In addition, new CEO, Ram Raghavan, has brought a renewed focus on growth, which bodes well for Colgate's portfolio of toothpastes.

The Fund divested Uni-President China Holdings to consolidate the portfolio into higher-conviction holdings, and sold Tencent Holdings on concerns about slowing growth amid China's "Common Prosperity" goals.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

Performance

Over the past 12 months, the top contributors to performance included Taiwan Semiconductor Manufacturing, driven by improved profitability and solid sales growth guidance. The company continues to see strong customer demand and capacity remains full. Mphasis BFL rose to a record high after acquiring US-based Blink UX, a user experience research, strategy and design firm, for a total consideration of USD 94m. The acquisition is expected to provide access to Blink's top-tier clients, strengthen Mphasis' experience business and leadership team, and is revenue accretive. On the negative side, Tencent Holdings weakened on concerns about the regulatory environment and a slowdown in revenue growth. LG Household & Health Care posted lower than expected operating margins after heavy spending in the China online marketing channel.

Activity

New additions over the year included JD.com, a Chinese e-commerce retailer that owns the bulk of its own infrastructure (rather than just facilitating third-party sales). The company is still growing strongly, and profitability should continue to improve with economies of scale. The Fund also purchased Ping An Insurance, a leading financial holding company with diversified business segments in life insurance, banking, securities, trust services and asset management, and others. We believe the risk-reward profile looks reasonable, as the insurance business is good quality and seems undervalued.

The Fund disposed of Jardine Matheson Holdings to consolidate the portfolio into higher-conviction holdings. Axis Bank was sold to consolidate the portfolio's holdings into higher quality Indian private banks such as ICICI Bank.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units. No Benchmark for 2019 & 2020 & 2021.

Performance

Asian credit had performed very well in the second half of 2020, recovering admirably from the Covid shock earlier in the year. Unfortunately, the market was unable to maintain this upward momentum in 2021, and lost ground over the year. In the 12-month period, the Fund declined in value by 10.49%.

The weakness was largely attributable to the introduction of new rules in the Chinese property sector. Developers were forced to lower their financial leverage, which caused widespread problems in the sector as firms tried to sell assets to raise cash and comply with the new requirements. It became increasingly difficult for property firms to sell new bonds to raise fresh capital, as rising risk aversion among potential investors meant the cost of debt became prohibitive. In turn, the financial position of several Chinese developers became perilous and some high profile names defaulted on their bond repayments towards the end of the year. This had a meaningful impact on credit valuations in the sector, and adversely affected the market as a whole. The Fund's allocation to high yield Chinese property names weighed on the Fund's overall return, specifically Kaisa Group and Evergrande Group. Both companies have defaulted on their offshore bonds. Given the seriousness of these unforeseen events, below we provide a summary of developments and expected recovery values.

Kaisa Group

Following troubles at Evergrande, Kaisa and other similarly-rated bonds were sold down relentlessly as they faced a liquidity crunch, affecting their ability to refinance. Downgrades by rating agencies exacerbated refinancing concerns and prompted Kaisa to launch a bond exchange in late November – the company was seeking to exchange US\$400 million of debt maturing in December 2021 for new securities maturing in 2023. This proposal failed to receive sufficient bondholder support, which led to an eventual default. The company has since started work on restructuring its offshore debt of US\$12 billion.

Our base case scenario is that Kaisa will pursue with a debt restructuring process, similar to its previous restructuring back in December 2014. It is worth highlighting that Kaisa's previous restructuring took about 30 months, and featured 1:1 exchanges with tenor extensions. The principal recovery for bondholders was close to 100%. This time around, we expect the following:

	Lower end	Higher End
FSI estimates	US\$35	US\$100
Market estimates	US\$38	US\$61

Evergrande Group

Evergrande's liquidity woes started surfacing in the September quarter, notwithstanding S&P revising its rating outlook for the company from 'negative' to 'stable' in April on the back of a 20% reduction in debt. Despite making every effort to honor its maturing debt and raising US\$8.0 billion of fresh capital in the second half of the year, Fitch placed the company in its restricted default category during December. This category of default means the company had formally defaulted, but had yet to enter into any form of bankruptcy filing, liquidation or other processes that would stop its operations.

Evergrande said it would 'actively engage' its foreign creditors to come up with a plan for restructuring. The company also said officials from several state-backed institutions are forming a risk committee to help the company restructure itself.

Our base case scenario is that Evergrande will continue to work on a feasible debt restructuring outcome, with coordination from the provincial government. We are currently expecting the following principal recovery rates:

	Lower end	Higher End
FSI estimates	US\$35	US\$100
Market estimates	US\$40	US\$70

Some observers suggested issues in the property sector could spill over into other areas of the market, potentially destabilising the financial system more broadly. Policymakers remained resolute, however, making it clear that they would not step in to bail out failing companies. Consequently, investors reined in their risk appetite and high yield issuers meaningfully underperformed their higher quality, investment grade counterparts.

Overall performance was also hampered by an increase in US Treasury yields. By year end, inflation in the US had quickened to an annual pace of 7.0%; raising the probability that cash rates will be lifted in 2022. This resulted in an increase in government bond yields and weighed on the performance of fixed income markets worldwide, including Asian credit. Ultimately, while credit fundamentals for many corporate issuers in Asia remain supportive, Treasury yields will impair total returns if they continue to trend higher.

Activity

An underweight position in US rates was held, as we believe the strength of the economic recovery and high inflation will prompt the Federal Reserves to quicken the pace of policy tightening and raise interest rates quite aggressively in 2022. This strategy helped provide a degree of capital preservation as government bond yields rose as anticipated, and remained in place at year end.

In credit, we increased the Fund's exposure to Chinese high yield names early in the year and continued to diversify within the sector. With investment grade spreads so low, an allocation to selected high yield names can help enhance prospective returns. Unfortunately, some of these names were adversely affected by developments in the property sector as overall confidence levels deteriorated.

Some issuers in other countries fared much better and we took profits on Vedanta (a high yield commodity company in India) and Lippo Karawaci (a high yield property firm in Indonesia).

In the investment grade space, we held an overweight position in Huarong and increased exposure at the height of the sell-off in the name. Huarong is strategically important to China and systemically important to the financial industry, in our view, and hence we held on to the position despite some mark-to-market losses. We also added some exposure to Huarong 2027 bonds during the year, and captured strong gains in the issue after state-led support for the company was announced.

Outlook

Encouragingly, the rapid rollout of vaccines against Covid-19 has enabled virus-related restrictions to be eased. This has brightened the outlook for corporate profitability in most areas of the market. Moreover, increasing numbers of governments in Asia have indicated a willingness to 'live alongside Covid', rather than try to eliminate the virus. This has been well received, as it reduces the likelihood of further disruptive lockdowns being introduced and should help support corporate profitability in 2022 and beyond.

Performance

Volatility in Asian credit markets picked up in 2021. The Fund declined in value by 1.79% over the year, which compared to a return of -0.01% from the JACI Investment Grade Index benchmark.

Some competing forces affected Asian credit markets during the year. Positively, the rapid rollout of vaccines against Covid-19 enabled virus-related restrictions to be eased. This brightened the outlook for corporate profitability and helped support sentiment towards risk assets. Moreover, as the year progressed, increasing numbers of governments in the region indicated a willingness to 'live alongside Covid', rather than try to eliminate the virus. Again, this was well received as it reduced the likelihood of further disruptive lockdowns being introduced.

On the negative side, an increase in regulation in various industry sectors in China caused unease among investors. Beijing officials announced various new initiatives, including greater scrutiny over online and digital firms. They also amended financial rules in the property sector, requiring developers to reduce leverage. While the new rules did not affect many investment grade corporate issuers directly, they eroded sentiment towards the market as a whole; particularly as several companies in the high yield sub-sector defaulted on debt repayments towards the end of the year.

Separately, overall returns were hampered by rising US Treasury yields. By year end, inflation in the US had quickened to an annual pace of 7.0%; increasing the likelihood that cash rates will be raised in 2022. This resulted in an increase in government bond yields and weighed on the performance of fixed income markets worldwide, including Asian credit. Ultimately, while credit fundamentals of corporate issuers in Asia remain supportive, Treasury yields will impair total returns if they continue to trend higher.

Investment Manager's Report (Unaudited) (continued)

Activity

An underweight position in US rates was held, as we believe the strength of the economic recovery and high inflation will prompt the Federal Reserves to quicken the pace of policy tightening and raise interest rates quite aggressively in 2022. This strategy helped provide a degree of capital preservation as government bond yields rose as anticipated, and remained in place at year end.

In credit, the Fund was positioned quite cautiously given the stream of negative news flow. The Huarong saga dominated headlines in the first half of the year, while liquidity issues in the Chinese property sector adversely affected sentiment later.

The Fund held an overweight position in Huarong and increased exposure at the height of the sell-off in the name. Huarong is strategically important to China and systemically important to the financial industry, in our view, and hence we held on to the position despite some mark-to-market losses. We also added some exposure to Huarong 2027 bonds during the year, and captured strong gains in the issue after state-led support for the company was announced.

Exposure to the Chinese property sector was increased in the first half of the year. The Fund gradually added Shimao Property Holdings, which at the time had ratings of BBB- and BB+ with different rating agencies. We believed the company was likely to attain investment grade ratings with all major agencies given its stable profitability, a growing recurring income, good liquidity and a track record of deleveraging. However, the credit crunch in the sector affected higher-quality names including Shimao and Country Garden, as well as high yield firms. Shimao valuations fell after the company looked to extend trust loans and after its rating was downgraded to B-. This position therefore hampered performance over the year. Exposure to both Shimao and Country Garden was subsequently lowered, given the likelihood that liquidity in the sector will remain tight for some time.

Elsewhere, duration in the Philippines was added in mid-2021, after we observed that spreads were converging with Indonesia. The supply of offshore bonds is quite scarce, which should prove supportive of valuations. Later, we reduced the Fund's exposure to Indonesian credit through sales of Pertamina. We had also previously purchased Indofood, a major Indonesian food company. These longer-dated bonds subsequently performed well and we took profits on these securities.

Outlook

Despite facing numerous challenges throughout 2021 – including a clampdown on China's technology sector and the ongoing liquidity crisis in the property sector – Asian credit spreads (excluding property) are currently close to historical tights. This leaves us with little buffer to cushion against likely interest rate hikes in the US. Against this background our total return expectations for 2022 are relatively subdued and the portfolio is cautiously positioned as we await new opportunities to emerge.

Investment philosophy

We aim to invest in quality companies trading at reasonable valuations which should provide positive returns for investors over the long term.

Performance

The Fund has provided a positive return over 3, 5 and 10 years to 31 December 2021. It also provided a positive return over twelve months to 31 December 2021.

Activity¹

Over the period we purchased HeidelbergCement India, one of the world's largest cement and aggregate producers owned by the highly competent family steward, Ludwig Merckle. The majority of the company's capacity is located in emerging markets, including Indonesia, India and Egypt. We also purchased Largan Precision, a highly specialised manufacturer of camera lenses for smartphones, controlled by the founding Lin family. Largan has remained extremely focused on its area of expertise and maintained a very strong balance sheet, allowing the company to invest throughout demand cycles and grow over the long term, regardless of the long-term viability of its underlying clients. We also initiated a position in one of our favourite Latin American companies, Natura & Co Holdings, which had fallen to an acceptable valuation. Natura is backed by strong family stewards and comes with impressive sustainability credentials reflected in its B-Corp status.

¹ The Fund also sold NewGold which is an exchange traded fund. This was a route to facilitate the repatriation of monies from Nigeria back into the currency of the Fund, via South Africa.

Investment Manager's Report (Unaudited) (continued)

We sold our shares in Dr. Reddy's Laboratories, the Indian-listed generic drugs manufacturer which sells mainly to the US. The company remains a quality, cash-generative business, with a competent steward but the franchise is a complex one that operates in a highly regulated sector and we decided to sell on account of these risks after a period of share price strength. We sold Taiwanese AsusTek Computer, on concerns the company's core PC business isn't a first-class franchise and may face deflationary headwinds. We also sold Polish banking group Pekao during the year. Whilst we admire the bank's conservative culture and high market share in mortgages and corporate lending, at its current valuation our preference is for other emerging market banks and we took the decision to sell our position.

Outlook

Quality companies remain expensive across emerging markets. Our focus is simply on owning the best companies we can find, where we believe a business is governed effectively and in the interests of all stakeholders, and where valuations are acceptable. We continue to run a truly diversified portfolio of quality companies, with robust balance sheets managed by competent stewards.

Market Review

In what was a successful year for property securities, the FTSE EPRA/NAREIT Developed Index (USD) increased 26.09%. Property securities continued to be supported by accommodative central bank policy and quantitative easing measures. The status of the pandemic continued to influence property types positioned for a greater reopening of the economy during the year. Markets were also concerned by a rise in treasury yields which didn't seem to materially affect property securities, given the strong calendar year performance. Optimism remained in property markets as investors saw the asset class being supported into 2022 by the low cost of debt and a continuation of strong underlying property fundamentals.

Performance

The Fund posted a gain of 25.52% in the year, compared to 26.09% for the FTSE EPRA/NAREIT Developed Index, the Fund's benchmark.

The largest positive contributors to the funds' performance were the positions in the grocery-anchored, US shopping mall REIT, Weingarten Realty Investors and in the US single-family housing REIT, American Homes 4 Rent. During the year, Kimco Realty acquired Weingarten Realty Investors at a premium to its then current share price. The acquisition, along with added operational synergies contributed to Weingarten Realty Investor's performance. Meanwhile, American Homes 4 Rent outperformed due to strong occupancy levels throughout the year, driven by limited new housing supply and a structural rental market imbalance driven by the aging millennials.

The largest detractors from the Fund's performance were exposures to GDS Holdings and ESR. GDS Holdings, a Chinese Data Centre Company and ESR Cayman, a pan Asian logistics owner/developer/fund manager, both underperformed for the year. ESR Cayman's proposed purchase of a large funds management business weighed on the stock. With regards to GDS Holdings, investor fears over exposures to Chinese markets stemmed from a government announcement of regulatory changes to its private education (after school tutoring) sector which turned the sector into a "non-profit" sector overnight. The impacts from this announcement were felt both off-shore and on-shore. The panic sell-off saw the Nasdaq Golden Dragon China index down 22% in July and the Hang Seng down 9.6% in July which impacted the funds' performance.

Investment Manager's Report (Unaudited) (continued)

Activity

The Fund participated in the IPO of Digital Core REIT in December, a data centre REIT, managed by Digital Realty with assets in the US and Canada. The Fund also initiated a position in the largest German residential company Vonovia in the year. Vonovia underperformed after the Deutsche Wohnen deal announcement, which made the valuation more attractive. We also initiated a position in self-storage REIT, Life Storage in the year. Life Storage remains well placed to continue to drive growth as a result of the strong housing market and new hybrid work environment. The Fund added to its position in American Homes 4 Rent in the year which increased our exposure to the single family housing market. We exited our position in Apartment Income Real Estate Investment Trust and recycled the capital into Equity Residential during the year due to Equity Residential's greater exposure to the Boston and New York recovering markets. The Fund also exited its position in Invitation Homes in the year due to its relative valuation and year-to-date outperformance to peers. We also took the opportunity to rotate our healthcare REIT weighting to seniors housing REIT Ventas from Welltower given Ventas' relative underperformance which we believed to be unwarranted. We also exited our position in Essex Property Trust, the West Coast apartment REIT, due to strong year-to-date performance and growing concerns over California's response to the spread of the Delta variant. We recycled Essex's proceeds into Equity Residential to maintain exposure to US apartments.

Outlook

The outlook for the sector is positive. We expect real estate securities markets to be supported by a global economic recovery in 2022, underpinned by low interest rates, globally coordinated fiscal stimulus and the normalisation of economic activity as the world is progressively inoculated against Covid-19.

The Fund maintains a positive outlook on residential assets, logistical warehousing, data centres and the healthcare sector, which should continue to benefit from a number of strong structural tailwinds. Meanwhile, the Fund has a cautious outlook for Central Business District (CBD) office buildings, given the expected secular shifts towards more flexible working arrangements in the future, as well as shopping malls, given the long term structural headwind from online retailing.

Market Review

Despite a challenging year, the FTSE EPRA/NAREIT Developed Asia Index (USD) increased 3.86%. The country specific performances (all in local currency terms) were mixed, with Australia (+18.5%) and Japan (+14.5%) the outperformers, while Hong Kong (+3.6%) was a laggard in the region. Property securities were supported by accommodative central bank policy and extensive fiscal stimulus. The government's Covid financial support package has also helped the Australian economy during the pandemic, which was evidenced in Australian REITs' stable rental collection and earnings results. On the other hand, zero-Covid policy and poor vaccination rates, together with uncertain political outlook in China and Hong Kong, were the main reasons for Hong Kong's underperformance.

Performance

The Fund posted a gain of 5.30% in the year, beating its benchmark index FTSE EPRA/NAREIT Developed Asia Index (USD) by 1.44%.

The largest positive contributors to performance were the Fund's positions in the industrial and self-storage sectors. In Australia, Goodman Group - industrial property - and National Storage Real Estate Investment Trust - selfstorage - reported solid earnings results and forecasts. Demand for logistics warehouses has increased in-line with an increase in E-commerce trade which supported Goodman Group during the year. The self-storage sector globally has proved to be a resilient asset class with National Storage's performance reflecting similar attributes with rental rates, occupancy levels and revenue per available unit growth across the board. ESR Real Estate Investment Trust and SOSiLA Logistics Real Estate Investment Trust also contributed to the Fund's performance.

The largest detractors from the Fund's performance were exposures to GDS Holdings and Mitsubishi Estate. GDS Holdings, a datacentre developer and operator in China, underperformed for the year. Despite strong underlying fundamentals of the datacentre sector in China, with a superior earnings growth outlook, however the country's uncertain political outlook and regulatory policy triggered fear towards China equity exposure. The panic sell-off saw the Nasdaq Golden Dragon China index down 22% and the Hang Seng down 9.6% in July, which impacted the funds' performance. Disruptions caused by a prolonged "State of Emergency" in Japan during the year negatively impacted Japan large cap names, including Mitsubishi Estate.

Investment Manager's Report (Unaudited) (continued)

Activity

A position was established in Hong Kong listed CK Asset Holdings in the year. CK Asset Holdings added to the Fund's relative performance post its announcement of share buybacks and further acquisitions of infrastructure assets in the UK and Europe. The Fund participated in the IPO of Digital Core Real Estate Investment Trust in December, a data centre REIT managed by Digital Realty Real Estate Investment Trust with assets in the US and Canada. With a quality manager and a large pipeline for possible future acquisitions, the REIT is well positioned for income and asset growth over the medium term. The Fund also initiated a position in Sydney airport during the year after news of an acquisition offer.

The Fund reduced its positions in Growthpoint Properties Real Estate Investment Trust and Mirvac Group. The outlook for Growthpoint properties remained capped relative to peers in the industrial sector with stronger development pipelines, hence we reduced our position. The fund took profit in exiting its position in Mirvac as its valuation looked stretched. Any future earnings upgrade looks confined to the residential development business and more specifically its land subdivision business which is exposed to tighter funding measures. We also took the chance to exit our position in Sosila Logistics REIT in the year after a strong performance year-to-date.

Outlook

Our overall strategy in Asia is to have a balanced portfolio with a focus on low risk balance sheet and strong earnings and dividend growth potential in the region.

In Hong Kong, local consumption has been stable, however property fundamentals remain challenged for the office and retail sector due to closures of the Hong Kong international border and stricter quarantine measures. The Hong Kong retail sector relies heavily on tourism from mainland China, where we have seen muted improvements as the Chinese Government maintains its strong view on a zero coronavirus case policy. The Fund maintains its strategy of selected exposure to the Hong Kong property sector with an expectation that property fundamentals will remain weak in the short and medium term.

In Singapore, we anticipate a good recovery in the retail and lodging sectors as the country has met its vaccine immunity rate earlier than planned and are looking to stimulate tourism inflows in the near future. At the same time, we remain selective on quality industrial and datacentre exposures with superior income and valuation growth.

In Australia, the quarterly operational updates saw guidance reiterated for many REITS. We remain positive on the logistics and self-storage sector in Australia.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Over the past 12 months, key contributors to performance included China Merchants Bank, which reported decent earnings results and a quality loan book. CMB continues to focus on growing its wealth management business, which has the potential to improve returns in the medium to long term. MediaTek rose after reporting strong sales growth and market share gains in smartphone chips. On the negative side, Alibaba Group Holding weakened after Beijing proposed new regulations aimed at curbing anti-competitive practices among internet firms, while TAL Education Group* fell after new regulations on the education sector destroyed its business model. *No longer owned in the portfolio.

Activity

Significant new purchases over the year included purchased Haier Smart Home, a leading home appliances company with more than half of its revenue coming from overseas markets. While its profitability lags behind Midea and Gree, it has streamlined its structure in recent years (especially over the past year) and showed signs of improving profitability.

The Fund also bought Shenzhen Mindray Bio-Medical Electronics, China's largest domestic medical devices company and a market leader in patient monitors and life support systems. The company has a strong track record and has been gaining market share from global leaders as it expands its presence overseas. We believe there is significant growth opportunities ahead, as the penetration level of medical devices in China is still low and there is a growing preference for import substitutions.

The Fund sold Hangzhou Hikvision Digital Technology on political concerns, and 51Job.com as its price neared the privatisation offer (an offer price made by the company to shareholders to delist the shares and make the company privately owned). Additionally, we switched our positions in JD.com and ZTO Express from American Depositary Receipts (ADRs) to Hong Kong-listed shares, due to policy uncertainties in the Chinese ADR market.

Outlook

China is eyeing a broad-based albeit bumpy recovery, as concerns about policy risk have hurt market sentiment and increased market volatility in the short term. The recent reserve requirement ratio (RRR) cuts signalled that Beijing is willing to add some cushion to the slowing economy.

We expect further policy actions to come but the government will remain prudent and fine-tuned, as the goal is stability. Our strategy against this backdrop is to be selective in our investments, seeking to buy good quality companies to hold for at least 3-5 years or more. We continue to see attractive opportunities in China's increasing urbanisation, consumption upgrading, technical innovation, and the rise in healthcare spending.

Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Market Review

Global Listed Infrastructure gained during the year as pandemic-related movement restrictions lifted and economic activity levels improved. Financial market optimism was tempered somewhat by the emergence of the Delta and Omicron coronavirus variants.

Performance

The First Sentier Global Listed Infrastructure Fund is actively managed, and integrates the assessment of material Environmental, Social and Governance factors into its investment process. The First Sentier Global Listed Infrastructure Fund rose by 12.43% after fees in US dollar terms over the twelve months. Its benchmark index gained 14.88% over the same period. The largest positive contributors to Fund performance were SBA Communications and American Tower, which gained on the view that the rollout of next-generation communications networks would be supportive of tower earnings growth. NextEra Energy also rose as strong demand for renewables development underpinned healthy earnings results.

Investment Manager's Report (Unaudited) (continued)

China Gas was affected by two gas pipeline accidents, along with concerns that the slowdown in China's property sector may reduce demand for new gas connections. Rubis underperformed on a lack of investor appetite for its specialist energy supply and storage operations. China-listed water utility Guangdong Investments lagged after lower than expected profits on new water projects overshadowed the company's stable cash flows and healthy balance sheet.

Activity

Sempra Energy was added to the portfolio after a period of share price underperformance moved it higher in our investment process, providing a good entry point into quality assets. A position was initiated in US electric utility Entergy. The company is positioned to benefit from increased load growth, improving operational efficiencies and a robust capital expenditure program. Atmos Energy was also added to the portfolio after a period of underperformance created an attractive entry point.

East Japan Railway was divested after a more positive outlook for passenger numbers drove significant share price gains. US pipeline operator Magellan Midstream Partners and US electric and gas utility Nisource were also sold after respective periods of strong performance reduced mispricing in both stocks.

Outlook

The outlook for the asset class is positive. We are optimistic about the substantial investment opportunities associated with the decarbonisation of the world's energy needs. Utilities, which represent about a half of the global listed infrastructure opportunity set, are positioned to derive steady, regulated earnings growth by building solar and wind farms, and by upgrading and expanding the networks needed to connect these new power sources to the end user. In the transport infrastructure space, there remains further scope for traffic / haulage / passenger recovery as vaccine and booster rollouts continue.

First Sentier Investors (Hong Kong) Limited January 2022

Performance

Over the past 12 months, the top contributors to performance included ICICI Bank as it continued to focus on changing its culture, improving processes and customer service, and lending to the best customers. We believe its competitive position is likely to continue strengthening as large state-owned banks and smaller non-bank finance companies struggle with weak balance sheets and poor asset quality. Bharti Airtel rose after the Indian government announced reforms in the telecom sector. When Reliance Jio entered the market in 2016 there was intense price competition among the telecoms providers, which led to industry-wide weakness and falling revenues. However, the industry has now stabilised, with tariff hikes since 2019. On the negative side, Ping An Insurance declined on overall insurance industry demand weakness. LG Household & Health Care posted lower than expected operating margins after heavy spending in the China online marketing channel.

Activity

New positions over the year included Hindustan Unilever, India's largest fast-moving consumer goods (FMCG) company. Its leading brand franchise and strong pricing power should help it gain market share in a rising inflation environment. The Fund also purchased Bajaj Auto, a leading motorcycle and 3-wheeler manufacturer in India. While rising raw materials prices could be a margin headwind in the short term, we believe there is significant growth potential here with electric bikes, and the KTM brand and other premium bikes.

The Fund divested Taiwan Semiconductor Manufacturing on concerns about the semiconductor industry seemingly at a cyclical high and the company trading at lifetime-high valuations. Dabur India was sold on portfolio consolidation.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units. There is no benchmark for 2020.

Performance

Demand for yielding securities among income-oriented investors remained firm. More than US\$1.5 trillion of new corporate bonds were sold in 2021, the second highest annual total ever. This level of interest supported valuations and helped the Fund appreciate by 1.38% over the year.

Even during various Covid-related lockdowns, corporate issuers typically performed well financially. Earnings consistently beat consensus earnings during 2021, as firms in various industry sectors benefited from a rebound in discretionary spending. As well as the strong results, forward-looking earnings estimates for this year and beyond have been raised.

Activity

Typically, there is minimal activity in this portfolio, with holdings often held to maturity. New investments during the year included Apple, British Telecom, Fox Corporation, Naver Corporation and SK Hynix.

That said, holdings can be sold if a company's credit outlook deteriorates or if valuations rise strongly. Amgen, Commonwealth Bank of Australia, Dexus Property Group, Donnelley Financial Solutions and FedEx were among holdings removed from the portfolio in 2021, for example.

Overall, the portfolio remained reasonably well diversified. At year end, the Fund's assets were invested in 76 issuers, across 12 different countries.

Outlook

It has become increasingly clear that interest rates in the US will be raised this year, which will increase the cost of debt for corporate borrowers. Nonetheless, most companies can comfortably afford to service their debt repayment obligations currently. Revenues are holding up well in most industry sectors and firms continue to focus on cost control in order to support profitability. All of this suggests corporate default rates will remain low in 2022.

Covid-related concerns are persisting, but sentiment towards risk assets is being supported by a gradual relaxation of restrictions in most key regions. With the vaccine booster rollout continuing, officials in several countries have indicated that the spread of the newest variant of the virus, Omicron, is not expected to derail the economic recovery. Many governments now appear willing to 'live alongside Covid' rather than try to eliminate the virus. Economic activity levels are likely to be adversely affected by ongoing disruptions in the first quarter, at least, but projections suggest conditions will improve during the course of this year as activity levels normalise and as travel corridors reopen. All of this augurs well for corporate profitability and could help support sentiment towards credit markets.

Investment Manager's Report (Unaudited)

Outlook (continued)

Diligent portfolio management will remain critical, as there will almost certainly be some divergence in performance between individual companies. Our dedicated credit analysts continue to monitor individual issuers and how they are being affected by evolving market conditions. The intention is always to remove deteriorating issuers from the portfolio before rising default risk starts to affect valuations.

*Inception date – 4 September 2019

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Over the past 12 months, the top contributors to performance included NVIDIA, as its data centre and gaming businesses benefitted from the "work from home" and "stay at home" trend. Nvidia is the world's largest provider of discrete graphics processing units (GPUs) and a pioneer in accelerated computing. ASML Holding outperformed, with strong demand for its machines and a growing backlog of orders. Revenue growth continues to beat expectations as customers demand faster capacity expansion. On the negative side, TAL Education Group fell after new regulations on the education sector destroyed its business model. Yihai International Holding declined after reporting weaker than expected earnings results.

Activity

New positions over the year included JD.com, a Chinese e-commerce retailer that owns the bulk of its own infrastructure (rather than just facilitating third-party sales). The company is still growing strongly, and profitability should continue to improve with economies of scale. The Fund also purchased Wuxi Biologics, China's largest contract development and management company (CDMO). The company is poised to gain market share from incumbents in Europe and the US due to its cutting-edge technology platforms, fast execution, flexible processes and superior customer services.

The Fund disposed of China Mengniu Dairy on expensive valuations, and sold Housing Development Finance, to switch to HDFC Bank instead.

Outlook

The outlook for Asian equities remains uncertain. Persistently high inflation, monetary tightening from the US Federal Reserve and a slowdown in global growth all have the potential to weigh on financial markets. Meanwhile, Covid variants, rolling lockdowns and border closures mean that a recovery in international tourism and consumer spending will remain challenging, though we expect the situation to normalise gradually after the pandemic-related events of the last two years.

Against this backdrop, we continue to adhere to our investment philosophy, and have ensured that the portfolio is well diversified ahead of any changes in the market climate. Our conviction in the long-term growth story for Asia remains unchanged. We believe that investing in high-quality companies across the region should deliver attractive absolute returns in the long run.

First Sentier Investors (Hong Kong) Limited January 2022

Performance Table as of 31 December 2021 (Unaudited)

Financial period	Total net asset value	Net asset value per share

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Lasertec, with reports of accelerated orders for its next-generation machine and major customers planning investments ahead of schedule. Tokyo Electron rose on solid earnings results and a stronger-than-expected upward full-year guidance revision, driven by higher growth expectations for the wafer fab equipment market into the following year. Meanwhile, Monotaro was lower on weaker-than-expected sales growth and concerns about inflationary pressure on procurement costs. Workman declined on decelerating same-store sales, against a high base of demand during the pandemic.

Activity

New positions over the year included Fuso Chemical, as its valuation looked attractive considering its monopolistic position in ultra-pure silica, which is necessary for semiconductor production, as well as decent track record on par with leading chemical manufacturers. The Fund also bought KeePer Technical Laboratory, the largest after-market auto coating material supplier in Japan. The business generates superior returns within the niche market with limited competition and its track record suggests it is a countercyclical business.

Investment Manager's Report (Unaudited) (continued)

The Fund sold TechnoPro Holdings as the recent hiring freeze is likely to limit mid-term growth and valuations had already recovered to a historically high range. The Fund also divested Fast Retailing due to its challenges sustaining growth in the midst of a prolonged Covid situation. Meanwhile, China sales slowed recently in tandem with weaker apparel spend – new strategies may be needed in order to boost its product appeal under such a competitive landscape.

Outlook

Given the uncertainties around the global outlook, our Japan portfolio is positioned predominantly towards companies with exposure to domestic demand. The companies we like to own are managed by strong management teams and can generate sustainable earnings growth and return on equity without relying on leverage or the macro environment. We also own regional consumer companies, global industrials and medical equipment/services companies with dominant franchises, strong balance sheets and steady cash flow. These businesses should remain relatively defensive in the event of a recession.

Market Review

Responsible Listed Infrastructure gained during the year as pandemic-related movement restrictions lifted and economic activity levels improved. Financial market optimism was tempered somewhat by the emergence of the Delta and Omicron coronavirus variants.

Performance

The First Sentier Responsible Listed Infrastructure Fund rose by 12.2% after fees in US dollar terms over the twelve months. Its benchmark index gained 14.9% over the same period. The largest positive contributors to Fund performance were SBA Communications and American Tower, which gained on the view that the rollout of next-generation communications networks would be supportive of tower earnings growth. NextEra Energy also rose as strong demand for renewables development underpinned healthy earnings results.

On the negative side, China Gas was affected by two gas pipeline accidents, along with concerns that the slowdown in China's property sector may reduce demand for new gas connections. Danish renewables developer Ørsted underperformed on concerns for its growth outlook, following very strong gains during the previous 12-month period. China water utility Guangdong Investments lagged after lower than expected profits on new water projects overshadowed the company's stable cash flows and healthy balance sheet.

Activity

Sempra Energy was added to the portfolio after a period of share price underperformance, despite its good quality assets, moved it higher in our process. A position was initiated in Republic Services. The company's waste management operations have high barriers to entry and strong pricing power, with over half of its revenues linked to inflation. The Fund also built a position in Canadian National Railway. Set to benefit from a strengthening US economy, the company offers an efficient, lower carbon alternative to long haul truck traffic.

A position in French toll road operator Eiffage was sold on concerns that the rise of Delta variant coronavirus cases may slow the French path to recovery. US electric and gas utility Nisource and water utility Essential Utilities were also sold after respective periods of strong performance reduced mispricing in both stocks.

Investment Manager's Report (Unaudited) (continued)

Outlook

The outlook for the asset class is positive. We are optimistic about the substantial investment opportunities associated with the decarbonisation of the world's energy needs. Utilities, which represent about a half of the global listed infrastructure opportunity set, are positioned to derive steady, regulated earnings growth by building solar and wind farms, and by upgrading and expanding the networks needed to connect these new power sources to the end user. They could also provide a pathway towards achieving several of the United Nation's Sustainable Development Goals, including SDG 7 (Affordable and Clean Energy).

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units

Performance

Over the past 12 months, key contributors to performance included Alsea, as positive news about vaccine rollouts in Mexico and South America suggest a recovery may be on the way. ICICI Bank performed well over the year as it continued to focus on changing its culture, improving processes and customer service, and lending to the best customers. We believe its competitive position is likely to continue strengthening as large state-owned banks and smaller non-bank finance companies struggle with weak balance sheets and poor asset quality. Meanwhile, Prosus N.V. weakened as the market absorbed news of its recently announced Prosus/Naspers share swap, and Despegar fell after the latest Omicron variant of Covid-19 hurt the outlook for a travel recovery.

Activity

New positions over the year included Prosus N.V., a spin-off from Naspers that owns stakes in Tencent, Delivery Hero, C-Trip, and other internet services companies. It is an attractive way to own the underlying companies, and the group have proven to be good investors overall. The Fund also purchased Naver, which operates the top search portal in Korea. The company has been expanding into the domestic e-commerce market, as well as in overseas countries, with its mobile messaging service 'LINE'. The company has a good track record in terms of growth and returns, and management engagement has historically been encouraging.

Astra International was sold on concerns about its franchise quality and ESG credentials, while Bank Rakyat Indonesia was divested with the proceeds going towards a larger position in Bank Central Asia, a higher quality bank.

Investment Manager's Report (Unaudited) (continued)

Outlook

Looking ahead, we continue to be optimistic about the prospects of our holdings. Despite ongoing headwinds — whether from the pandemic, or concerns about higher inflation, or a stock market that is hooked on stimulus that appears to be withdrawing — we believe these factors are transitory in nature and should eventually stabilise.

More importantly, our portfolio is made up of high-quality companies with a track record of navigating challenging environments as demonstrated over the past two years, which allows us to sleep well at night. We continue to expect our holdings to deliver 14-15% annualised earnings and free cash flow growth over the mid-to-long term, which should mean resilience in the face of adverse headwinds. Strong competitive advantages, defensive balance sheets, attractive growth opportunities and solid management teams — the core, timeless pillars of our investment philosophy — should continue to make our holdings well positioned to generate attractive risk-adjusted returns in the coming years.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

Performance

The Fund provided a positive return over the twelve months to 31 December 2021. The Fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies and low interest rates The investment manager invests with capital preservation in mind, meaning they define risk as losing client money, rather than deviation from a benchmark index.

Activity

Major purchases over the period included Adyen, a company which is helping to streamline and reduce costs in the payments processing ecosystem. The company is growing rapidly in emerging markets, where payments have historically been complex, expensive and insecure. We purchased Cognex, a research and development-driven franchise that should continue to benefit from the growth tailwinds of automation and inspection across a variety of industries. As their products and services help improve manufacturing quality and reduce waste, we expect plenty of growth in the years ahead. We also purchased Synopsys, a market leader in design software for digital integrated circuits.

Investment Manager's Report (Unaudited) (continued)

During 2021 we sold Unilever. The company has been a long-term investment on the strength of its core brands and affordable hygiene products, and though there is much we still like about the company, the balance sheet has deteriorated and it has struggled to evolve a modern product portfolio, resulting in our decision to sell. We also sold Austrian-listed Lenzing as well as Taiwan Semiconductor Manufacturing on concerns over future growth potential. We have held Taiwan Semiconductor since 2016 and although we remain believers in the investment case of this quality company, we believe the company may struggle with future growth due to the cyclicality of the semiconductor industry.

Outlook

We remain mindful that asset values will be challenged by the unwinding of assistance from central banks and government actions, and the inconsistent health of the real economy. That said, we are positive about the prospects for sustainable, quality companies as the Fund enters 2022, where a delicate balance remains between bond yields, interest rates and the fragility of real and consistent economic growth.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

Performance

The Fund has provided a positive return over the twelve months to 31 December 2021. The Fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies and low interest rates. The investment manager invests with capital preservation in mind, meaning they define risk as losing client money, rather than deviation from a benchmark index.

Activity

Major purchases over the period included Indian global consulting and IT services company, Infosys Technologies. Infosys has a high-quality, net-cash balance sheet as well as resilient cash flows. The company is well placed for growth as companies, globally, spend on digitising their businesses. We purchased Chinese multinational conglomerate, Tencent, as we believed the company to be well positioned for future returns, however we sold the company towards the end of the year as it faced increased regulation and challenges to its core gaming franchise. We also purchased Techtronic Industries, a well-stewarded industry leader that is replacing high polluting, fossilfuelled products with environmentally friendly, clean, cordless powered technology.

Investment Manager's Report (Unaudited) (continued)

During 2021 we sold Unilever. The company has been a long-term investment on the strength of its core brands and affordable hygiene products, and though there is much we still like about the company, the balance sheet has deteriorated and it has struggled to evolve a modern product portfolio, resulting in our decision to sell. We sold Samsung Electronics, primarily due to the cyclicality of the company's earnings, and we sold much admired Avast, as the company's announced merger with US-listed NortonLifeLock meant the combined entity would not be suitable for the emerging markets portfolio.

Outlook

As we hopefully move beyond COVID-19, through 2022 and beyond, we are optimistic about the opportunities for long-term returns through owning high-quality companies in emerging markets. Our focus remains on finding well-run, cash-generative companies which are reasonably valued and meet the Fund's sustainability criteria.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

Performance

The Fund has provided a positive return over the twelve months to 31 December 2021. The Fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies and low interest rates. The investment manager invests with capital preservation in mind, meaning they define risk as losing client money, rather than deviation from a benchmark index.

Activity

During the period we purchased Australian-listed Altium which boasts a substantial market share in printed circuit board design software, an essential component for electronic goods. We purchased Tata Communications, a leading IT infrastructure provider, particularly in digital, security and cloud services. We also re-purchased a leading Japanese paint franchise¹ which we had sold previously on what we believed was an inflated valuation. We took advantage of more attractive valuations later in the year to reinvest in this high-quality company.

¹ Only those new investments with a portfolio weight over 1% as at 31 December 2021 are named in this commentary.

Stewart Investors Asia Pacific Leaders Sustainability Fund

Investment Manager's Report (Unaudited) (continued)

Major disposals included MediaTek and ASML Holding, as we reduced a number of semiconductor-related holdings in the portfolio on questions over valuation, sustainability positioning and the cyclicality of many companies operating within the semiconductor supply chain. We also sold Asian Paints on valuation concerns.

Outlook

The Asian region is home to some of the highest-quality stewards, and first-rate franchises, globally, with many avenues for long-term growth. We continue to believe sustainability tailwinds combined with high-quality business models are a powerful formula for long-term success. Paired with our disciplined, independent investment approach, we aim to protect and grow clients' investments over the long term.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

Performance

The Fund has provided a positive return over the twelve months to 31 December 2021. The Fund's long-term performance has been satisfactory in the context of expensive valuations of our favourite quality companies and low interest rates. The investment manager invests with capital preservation in mind, meaning they define risk as losing client money, rather than deviation from a benchmark index.

Activity

Major purchases over the period included leading New Zealand-listed logistics provider Mainfreight. The company has a truly unique, long-term culture and we believe they are well positioned to flourish domestically, as well as in the Asian and US markets.

We bought Australian-listed Altium which boasts a substantial market share in printed circuit board design software, an essential component for electronic goods. We also purchased Tata Communications, a leading IT infrastructure provider, particularly in digital, security and cloud services.

Major disposals over the year included MediaTek as we reduced a number of semiconductor-related holdings in the portfolio on questions over valuation, sustainability positioning and the cyclicality of many companies operating within the semiconductor supply chain. We also sold Square Pharmaceuticals and OCBC Bank, in order to incrementally add to those companies, we believe have better long-term sustainable and structural tailwinds of growth for the decade ahead.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Asian region is home to some of the highest-quality stewards and first-rate franchises globally with many avenues for long-term growth. We continue to believe sustainability tailwinds combined with high-quality business models are a powerful formula for long-term success. Paired with our disciplined, independent investment approach, we aim to protect and grow clients' investments over the long term.

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which reported decent earnings results and a quality loan book. The bank continues to focus on growing its wealth management business, which has the potential to improve returns in the medium to long term. Zhejiang Weixing New Building Materials rose as the government signalled an easing of real estate market restrictions and lowered the reserve requirement ratio (RRR). On the negative side, Midea Group detracted from performance as rising raw material costs put pressure on margins. On a longer-term basis, we believe it should be able to pass through additional costs – either by increasing prices or by upgrading the product mix. Ping An Insurance declined on worries about its exposure to property companies in the investment book, as well as concerns about new regulations that would require insurers to increase capital and cash to meet a higher solvency ratio.

Activity

Significant new purchases over the year included Jiangsu Hengrui Medicine, one of the leading pharmaceutical companies in China. Hengrui has a comprehensive range of oncology drugs and is building a franchise in other categories such as diabetes, autoimmune and antiviral drugs. The Fund also bought Beijing New Building Materials, the largest gypsum board company in China. The company has a strong franchise, with limited competition, resilient demand and more than 60% market share in both high-end and mass markets. Gypsum board is a good, low-cost building material and is lightweight, fireproof and a heat insulator. Consumption in China is low at 2.5 square metres (sqm) per capita, compared to the US (7 sqm), Europe (6 sqm) and Japan (4 sqm), which implies plenty of room to grow. The company also plans to build new capacity in overseas markets, and recently acquired a few companies to expand into the waterproofing business.

The Fund divested Beijing Thunisoft to control risk exposure after reports that the chairman was under investigation for suspected bribery. Shanghai Aiyingshi was sold on portfolio consolidation.

Investment Manager's Report (Unaudited) (continued)

Outlook

We expect a gradual normalisation after the pandemic-related events of the last two years. The recent RRR cuts signalled that Beijing is willing to add some cushion to the slowing economy. We expect further policy actions to come but the government will remain prudent and fine-tuned, as the goal is stability. We also expect policies in certain industries such as property and energy to become more prudent and rational.

The portfolio remains well positioned to benefit from domestic consumption demand in China, with diversified holdings in home appliances, home decoration, wealth management, pharmacies, e-commerce/express delivery, and industrial components. We see sustainable business models in these sectors, and policies are supportive. Amid an uncertain outlook, we continue to adhere to our disciplined investment process to identify high-quality companies with reasonable valuations.

(Performance calculation is based on official dealing NAV)

* Inception date – 10 June 2021

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment philosophy

We are long-term investors and seek to invest our clients' capital in high-quality companies with strong management teams that are well positioned to contribute to, and benefit from, sustainable development.

About the Fund

The Stewart Investors European Sustainability Fund was launched on 10th June 2021. It comprises companies we consider to be among the very best sustainable companies in Europe (including the United Kingdom).

Company selection is driven by fundamental, bottom-up analysis of quality and sustainability considerations, without reference to any benchmarks or sustainability indices.

We seek to hold companies with strong and competitive franchises, exceptional people and cultures, and resilient financials. Individually and collectively, these companies are capable of helping make the world healthier, cleaner, and more productive.

Performance

Since inception in June 2021, the Fund has provided a positive return.

Activity

Since portfolio inception, we have added new holdings Sartorius, Inficon and Jerónimo Martins.

Sartorius is a 150-year old, family-controlled, German-listed supplier of laboratory instruments, consumables and services to the bio-pharmaceutical industry. Inficon is a family-controlled, Swiss-listed maker of gas detection equipment, sensors and analytical software used in ultra-clean production environments. Jerónimo Martins is a 230-year old, family-controlled, responsible operator of good-value supermarkets in Poland, Portugal and Colombia.

Investment Manager's Report (Unaudited) (continued)

We sold Knorr-Bremse, the German-listed maker of brakes for rail and commercial vehicles, after a failed merger in July left us questioning the direction of the company's commercial strategy. We also sold Avast, the UK-listed provider of cybersecurity applications, because a proposed merger with US company NortonLifeLock means the combined entity would not be suitable for the portfolio. And we sold Novo Nordisk, the Danish-listed makerof biological medicines, because we became concerned about excessive optimism towards obesity drugs that seem to be a rehash of diabetes treatments.

Outlook

Equity markets are likely to be dominated by concerns about the development of the COVID pandemic, inflationary pressures and rising interest rates; tapering of central bank bond purchasing and government schemes to support consumption; and uncertainty about the prospects for ongoing strong earnings growth.

Rather than try to second-guess the duration and impact of market forces, our focus will be making sure the portfolio is as resilient as possible in good times and bad. We will do this by holding adaptable, long-term focused, high-quality, great sustainability companies, whose stewards and leaders are both risk-aware and opportunistic.

First Sentier Investors (Hong Kong) Limited January 2022

1. Organisation

First Sentier Investors Global Umbrella Fund plc (the "Company") was incorporated on 18 June 1998 and registered as an open-ended umbrella investment company with variable capital in Ireland under the Companies Act, 2014. The authorised share capital of the Company is five hundred billion shares of no par value initially designated as unclassified shares.

The sole objective of the Company is the collective investment in transferable securities and/or in other liquid financial assets referred to in the Central Bank UCITS Regulations of capital raised from the public and which operates on the principle of risk spreading.

2. Principal accounting policies

(a) Basis of presentation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board (IASB), and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB.

The financial statements are prepared under a going concern basis.

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. If in the future such estimates and assumptions, which are based on management's best judgement at the date of the financial statements deviate from the actual outcome, the original estimates and assumptions will be modified as appropriate in the financial year which the circumstances change.

The financial statements have also been prepared in accordance with the Central Bank (Supervision and Enforcement Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations") and the Hong Kong Securities and Futures Commission ("SFC") Code on Unit Trust and Mutual Funds (the "Code").

The financial statements are based on the valuations prepared at 11:00 a.m. (Irish time) on the final business day of the financial year (31 December 2021). These valuations are based on prices and include investment transactions up to 11:00 a.m. (Irish time). The securities listed or dealt in on a Regulated Market shall be valued on the basis of the mid of bid/offer market price (if bid and offer prices are available) as at 11.00 a.m. (Irish time) on the relevant Dealing Day, or if there is no mid of bid/offer market price available at such time (i.e. there are no bid and/or offer prices available), at the last traded price available as at 11.00am (Irish time) on the relevant Dealing Day. This method is in accordance with the valuation policies outlined in the Company's prospectus.

2. Principal accounting policies (continued)

(a) Basis of presentation (continued)

For financial statement purposes, where the difference between the fair value of investments as at the valuation point and close of business on the final business day of the financial year (31 December 2021) is deemed material, the financial statements have been updated. In addition, all dealing in the Company's shares on the final business day of the financial year is incorporated in the financial statements for all funds. There is an impact on the NAV (Net Asset Value) per share from these transactions. A table showing the reconciliation to the published NAV per share and the impact on the NAV per share is included in Note 11 for the fund impacted by the material valuation point pricing differences.

All references to net assets in the financial statements refer to net assets attributable to redeemable participating shareholders unless otherwise stated.

The format and certain wordings of the financial statements have been adapted from those contained in IFRS as adopted by the European Union and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

New/Changes in accounting standards

Interest Rate Benchmark Reform - Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)

On August 27, 2020, the International Accounting Standards Board (IASB) published "Interest Rate Benchmark Reform - Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)" with amendments that address issues that might affect financial reporting after the reform of an interest rate benchmark, including its replacement with alternative benchmark rates. Phase 1 dealt with pre-replacement issues, Phase 2 of the project deals with replacement issues.

The amendments relate to the modification of financial assets and financial liabilities, specific hedge accounting requirements, and disclosure requirements applying IFRS 7 to accompany the amendments regarding modifications and hedge accounting.

• Modification of financial assets or a financial liability: A Company will apply IFRS 9 to account for a change in the basis for determining the contractual cash flows of a financial asset or financial liability that is required by IBOR reform – i.e. update the effective interest rate of the financial asset or financial liability. For this purpose, a change is required if necessary as per the Reform or, the new basis for determining the contractual cash flows is economically equivalent to the previous basis (i.e. the basis immediately before the change). If there are other changes to the basis for determining the contractual cash flows, then a Company first applies the practical expedient to the changes required by IBOR reform and then other applicable requirements of IFRS 9. An insurer applying IAS 39 will also apply similar amendments.

• Additional reliefs for hedging relationships (if applicable): When the Company ceases to apply the IBOR Phase 1 amendments to a hedging relationship, it will apply the following exceptions:

- The Company will amend the designation of a hedging relationship to reflect the changes from Reform by the end of the reporting period and will not result in a discontinuation of the hedge or designation of a new hedging relationship.

2. Principal accounting policies (continued)

(a) Basis of presentation (continued)

New/changes in accounting standards (continued)

Interest Rate Benchmark Reform - Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16) (continued)

- When a hedged item in a cash flow hedge is amended to reflect the changes from reform, the amount accumulated in the cash flow hedge reserve will be deemed to be based on the alternative benchmark rate on which the hedged future cash flows are determined. A similar exception is also provided for a discontinued cash flow hedging relationship.

- When a group of items is designated as a hedged item and an item in the group is amended to reflect the changes from reform, the hedged items will be allocated to sub groups based on the benchmark rate being hedged, and designate the benchmark rate for each sub-group as the hedged risk. Each sub-group to be assessed separately to determine if its eligible to be a hedged item. If any sub group is not eligible to be a hedged item, the hedging relationship is discontinued prospectively in its entirety. In addition, all other hedge requirements – including the requirements for hedge ineffectiveness – are applied to the hedging relationship in its entirety.

- If the Company reasonably expects that an alternative benchmark rate will be separately identifiable within a period of 24 months, it can designate the rate as a non-contractually specified risk component even if it is not separately identifiable at the designation date. This is applied on a rate-by-rate basis and also applicable to a new hedging relationship.

- When performing a retrospective hedge effectiveness assessment under IAS 39, a company may reset the cumulative fair value changes of the hedged item and hedging instrument to zero immediately after ceasing to apply the Phase 1 relief on a hedge-by-hedge basis.

The amendment applies to businesses acquired in annual reporting periods beginning on or after 1 January 2021. The standard has not had a significant impact on the financial statements of the Company.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

The amendments aim to help entities provide accounting policy disclosures that are more useful by:

• Replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies.

• Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

In the absence of a definition of the term 'significant' in IFRS, the Board decided to replace it with 'material' in the context of disclosing accounting policy information. 'Material' is a defined term in IFRS and is widely understood by the users of financial statements, according to the IASB.

- 2. Principal accounting policies (continued)
- (a) Basis of presentation (continued)

New/changes in accounting standards (continued)

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2 (continued)

In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and the nature of them.

The amendments may impact the accounting policy disclosures of entities. Determining whether accounting policies are material or not requires use of judgement. Therefore, entities are encouraged to revisit their accounting policy information disclosures to ensure consistency with the amended standard.

The amendments will be effective for annual periods beginning on or after 1 January 2023. The standard is not expected to have a significant impact on the Company's financial statements.

Definition of Accounting Estimates - Amendments to IAS 8

The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors.

The amendments are intended to provide preparers of financial statements with greater clarity as to the definition of accounting estimates, particularly in terms of the difference between accounting estimates and accounting policies. Although the amendments are not expected to have a material impact on entities' financial statements, they should provide helpful guidance for entities in determining whether changes are to be treated as changes in estimates, changes in policies, or errors.

The amendments will be effective for annual periods beginning on or after 1 January 2023. Earlier application is permitted. The standard is not expected to have a significant impact on the Company's financial statements.

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

To promote consistency in application and clarify the requirements on determining if a liability is current or non-current, the International Accounting Standards Board (the Board) has amended IAS 11.

2. Principal accounting policies (continued)

(a) Basis of presentation (continued)

New/changes in accounting standards (continued)

Classification of Liabilities as Current or Non-current - Amendments to IAS 1 (continued)

Under existing IAS 1 requirements, companies classify a liability as current when they do not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. As part of its amendments, the Board has removed the requirement for a right to be unconditional and instead, now requires that a right to defer settlement must have substance and exist at the end of the reporting period.

A company classifies a liability as non-current if it has a right to defer settlement for at least twelve months after the reporting period. The Board has now clarified that a right to defer exists only if the company complies with conditions specified in the loan agreement at the end of the reporting period, even if the lender does not test compliance until a later date. This new requirement may change how companies classify rollover facilities, with some becoming non-current.

The amendments state that settlement of a liability includes transferring a company's own equity instruments to the counterparty. In light of this, the amendments clarify how a company classifies a liability that includes a counterparty conversion option, which could be recognised as either equity or a liability separately from the liability component under IAS 32. Generally, if a liability has any conversion options that involve a transfer of the company's own equity instruments, these would affect its classification as current or non-current.

The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2023. Earlier application is permitted. Although the amendments are not effective until 2022, companies will need to consider including IAS 8 disclosures in their next annual financial statements. The standard is not expected to have a significant impact on the Company's financial statements.

(b) Financial assets and liabilities designated at fair value through profit or loss

The Company has designated its investments as financial assets and liabilities designated at fair value through profit or loss. There are two categories of investments:

- Financial assets and liabilities held for trading these are acquired or incurred principally for the purpose of selling or repurchasing in the short term, and
- Financial assets and financial liabilities designated by management at fair value through profit or loss at inception these are financial instruments that are not classified as held for trading, but are managed and their performance are evaluated on a fair value basis in accordance with the Company's documented investment strategy.

All investments have been categorised as financial assets and liabilities designated at fair value through profit or loss at inception.

2. Principal accounting policies (continued)

(b) Financial assets and liabilities designated at fair value through profit or loss (continued)

Purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value and are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership. Subsequent to initial recognition, all financial assets and financial liabilities designated at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities designated at fair value of the Statement of Comprehensive designated at fair value through profit or loss' category are included in the Statement of Comprehensive Income ("SCI") in the financial year in which they arise with the realised gains and losses calculated using a First-in, First-out ("FIFO") method.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities of securities listed or dealt in on a regulated market shall be valued on the basis of the mid of bid/offer (if bid and offer prices are available) as at 11.00 a.m. (Irish time) at the financial year end date or if there is no mid of bid/offer price available at such time (i.e. there are no bid and/or offer prices available), at the last traded price available as at 11.00am (Irish time). Where a security is listed or dealt in on more than one regulated market, the Directors may at their absolute discretion, select any one of these regulated markets for such purposes.

The Board of Directors has appointed a Fair Value Pricing Committee ("FVPC") to ascertain the value of relevant securities in the event that market prices are unavailable, that they do not represent probable realisation value or are not listed.

Futures contracts are recorded on the trade date and are valued at the applicable 11.00 a.m. (Irish time) mid of bid/offer prices on the last business day of the period. Forward foreign exchange contracts are recorded on the trade date and are valued at the applicable foreign exchange rates on the last business day of the period. Interest rate swaps and credit default swaps are valued at estimated fair values as determined by the swap counterparties. Certificates of deposit investments are based on the underlying cash originally invested in the certificate which approximates fair value.

The difference between the original contract amount and the fair value of open positions is the unrealised appreciation or depreciation and is reflected in financial assets and liabilities designated at fair value through profit or loss on the Statement of Financial Position ("SFP") and as a net change in unrealised appreciation or depreciation in financial assets and liabilities designated at fair value through profit or loss in the Statement of Comprehensive Income ("SCI").

Realised gains or losses are recognised on the closing, maturity, expiry or trade date of the contract and are included in realised gain/(loss) on financial assets and liabilities designated at fair value through profit or loss in the SCI.

Further details on derivative contracts are included in Note 9.

2. Principal accounting policies (continued)

(c) Valuation of financial assets and liabilities

Holdings in other investment funds are valued at the last available net asset value per unit or share or other similar participation or the last available traded price. These investments are recorded on their trade date in financial assets and liabilities designated at fair value through profit or loss in the SFP. The change in fair value is recorded as an unrealised gain/(loss) within net changes in unrealised appreciation/(depreciation) on financial assets and liabilities designated at fair value through profit or loss in the SFP is recognised as a realised gain or loss in realised gain/(loss) on financial assets and liabilities designated at fair value through profit or loss in the SFP is recognised as a realised gain or loss in realised gain/(loss) on financial assets and liabilities designated at fair value through profit or loss in the SFP is recognised as a realised gain or loss in the SCI.

At the financial year-end date, the Company has also valued certain less liquid investments using a quote from a single broker as an estimate of fair value. Because of their inherent uncertainty, estimated fair values may differ significantly. These less liquid investments have a greater amount of risk and exposure to market volatility than many other investments. These less liquid investments are classified as level 3 investments within the fair value hierarchy (please refer to note 6).

These investments trade in a limited market and may not be able to be immediately liquidated at these estimated fair values if needed. Furthermore, the estimated net realisable value of a Fund's investments may be affected by economic and political developments in a specific country or region and those effects could be material to the financial statements.

(d) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the SFP when there is a legally enforceable right to set-off recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liability simultaneously.

(e) Foreign currency translation

(i) Functional and presentation currency

The Board of Directors considers the US Dollar the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The US Dollar is the currency in which the Company measures its performance and reports its results, as well as the currency in which it principally receives subscriptions and redemptions from its investors. The Company has adopted the US Dollar as its presentation currency except for the Stewart Investors European Sustainability Fund, for which the presentation currency is Euro.

(ii) Transactions and balances

Monetary assets and liabilities denominated in currencies other than the presentation currency are translated into the presentation currency at the closing rates of exchange at financial year end. Transactions during the financial year, including purchases and sales of securities, income and expenses, are translated at the rate of exchange prevailing on the date of the transaction. In SFP, year end exchange rate is used to translate Euro balances of the Stewart Investors European Sustainability Fund to US Dollar and include its amount in total and in SCI, average exchange rate for the period is used to translate its amounts and include in the total amount.

2. Principal accounting policies (continued)

(e) Foreign currency translation (continued)

(ii) Transactions and balances (continued)

Foreign exchange gains and losses arising from translation are included in the SCI. Foreign exchange gains/losses relating to cash and cash equivalents are presented in the SCI within "Net (Loss)/Gain on foreign exchange" and foreign exchange gains/losses relating to financial assets and liabilities carried at fair value through profit or loss are presented in the SCI within "Net Changes in Unrealised Appreciation/(depreciation) on financial assets and liabilities designated at fair value through profit or loss".

(f) Income

Interest income/expenses are recognised in the SCI for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Dividend income is credited to the SCI on the date on which the relevant securities are listed as "exdividend". Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the SCI, and net of any tax credits. Dividends from US real estate investment trusts ("REITs") are recognised as distributable revenue when the securities are quoted ex-dividend. On receipt of the capital/revenue split in the following calendar year, the allocation of the dividend is adjusted within the Financial Statements.

(g) Expenses

Expenses are accounted for on an accruals basis and are charged to the SCI when incurred.

Shareholders should note that 100% of the investment management fees and operational expenses of the FSSA Asian Equity Plus Fund, the First Sentier Asian Property Securities Fund, the First Sentier Global Credit Income Fund, the First Sentier Global Listed Infrastructure Fund, the First Sentier Global Property Securities Fund, and the First Sentier Responsible Listed Infrastructure Fund Bond Fund will be charged to the capital of the relevant Fund. The reason for charging these expenses against capital is to seek to increase the amount of distributable income but this may be achieved by foregoing the potential for future capital growth. This will have the effect of lowering the capital value of your investment. Thus on redemptions of holdings, shareholders may not receive back the full amount invested.

(h) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and bank. Cash and cash equivalents are measured at amortised cost with the relevant interest accrued and charged to the SCI when incurred

2. Principal accounting policies (continued)

(i) Due to and from brokers

Amounts due to/from brokers represent payables for investments purchased and receivables for securities sold that have been contracted for but not yet delivered or settled by the end of the financial year.

These amounts are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment for amounts due from brokers. As per IFRS 9 expected credit loss assessment, a provision for impairment of amounts due from brokers is established when there is objective evidence that the Company will not be able to collect all amounts due from the relevant broker. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and defaults in payments are considered indicators that the amount due from brokers is impaired. Once a financial asset or group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

(j) Distributions to holders of redeemable participating shares

Distributions to holders of redeemable participating shares are recognised in the SCI as finance costs when they are appropriately authorised and no longer at the discretion of the Company. The Directors do not intend to declare or pay any dividends, except in the case of the distributing share classes.

Dividends may be paid out of net revenue (including interest and dividends) plus realised and unrealised profits on the disposal/valuation of investments and other funds, less realised and unrealised losses (including fees and expenses).

Shareholders should note that in the case of some funds that 100% of the investment management fees and operational expenses are charged to capital to increase the amount of distributable income – refer to note (g) for a list of the relevant Funds.

The dividends which accrue monthly shall normally be paid at the end of each month. The dividends which accrue for the half year periods ending 30 June and 31 December shall normally be paid by the end of August and February respectively in each year. The dividends which accrue for the quarter year periods ending 31 March, 30 June, 30 September and 31 December shall normally be paid by the end of February, May, August and November respectively in each year.

In the case of monthly distributing share classes in First Sentier Asian Quality Bond Fund and First Sentier Asia Strategic Bond Fund, the monthly dividend rate per share is calculated by the Investment Manager based on the estimated income attributable to those share classes. Any fees and expenses relating to these share classes are charged against capital to increase the amount of distributable income but this may be achieved by foregoing the potential for future capital growth. In maintaining a regular monthly dividend payment, a Fund may at times pay dividends out of capital of the Fund instead of income which may have different tax implications from the payment of dividends out of income and may also result in an erosion of the capital invested.

Whilst the monthly distributing share classes provide the benefit of a regular dividend payment, shareholders should be aware that in some cases an adjustment to the payment may be required, and this may result in a decrease or increase in dividend rate and payment. The Investment Manager will review the dividend rate for each such share class at least semi-annually, but may adjust the dividend rate more frequently if necessary to reflect changes in the expected income levels.

2. Principal accounting policies (continued)

(k) Redeemable participating shares

The Company issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the SFP date if the holder exercises the right to put the share back to the Company.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Company's net asset value per share at the time of issue or redemption. The Company's NAV per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares with the total number of outstanding redeemable participating shares. In accordance with the provisions of the Company's Articles of Association, investment positions are valued based on the last traded price for the purpose of determining the net asset value per share for subscriptions and redemptions.

The Company has minimum initial investment, minimum subsequent investment amounts and minimum holdings in relation to each share class as detailed in the prospectus. In the interests of shareholder protection, the Directors may limit the number of participating shares of any Fund redeemed on any dealing day to 10% of the total number of participating shares of that Fund in issue. The limitation will apply pro rata to all shareholders wishing to redeem the participating shares on that dealing day. The participating shares not redeemed but which would otherwise have been redeemed will be carried forward for redemption on the next and successive dealing day until all of the shares to which the original request related have been redeemed. The relevant movements are shown on the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

Each Fund will maintain an equalisation account with a view to ensuring that the level of dividends payable on shares (or the reportable income arising in respect of any class approved as a reporting Fund) is not affected by the issue and redemption of such shares during an accounting period.

The subscription price of such shares will therefore be deemed to include an equalisation payment calculated by reference to the accrued income of the Fund and the equalisation payment will be refunded to the shareholders as part of their first distribution, but for tax purposes will be treated as a return of capital. The redemption price of each share will also include an equalisation payment in respect of the accrued income of the Fund up to the date of redemption.

(I) Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and any deemed disposal of shares for Irish tax purposes arising as a result of the holding of shares for an eight-year period or more. No Irish tax will arise on the Company in respect of chargeable events in respect of:

2. Principal accounting policies (continued)

(l) Taxation (continued)

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations and such authorisation has not been withdrawn; and

(b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Capital Gains Tax accruals for unrealised gains are in place for securities held in India and Bangladesh. The Manager continues to monitor changes in tax regimes across other jurisdictions but, as at the date of these financial statements, all other overseas capital gains tax is recognised when paid, and no provision is made for this.

(m) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs for all financial assets carried at fair value through profit and loss are included in the SCI. These include fees and commissions paid to brokers and counterparties and have been classified within gains and losses. Transaction fees paid to the Depositary on trade settlement are expensed as incurred and included in the SCI. Transaction costs are detailed in Note 6.

n) Collateral

Cash collateral provided by the Company is identified in the SFP as margin cash and is not included as a component of cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Fund classifies that asset in its SFP separately from other assets and identifies the asset as pledged collateral.

Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

As at 31 December 2021 and 31 December 2020, there was no collateral held by the Funds other than cash.

(o) Preliminary expenses

Expenses incurred in the formation of new sub-funds are amortised over five years.

As at 31 December 2021, unamortised preliminary expenses amounting to \$935, \$1,110, \$1,172 \$1,172, \$1,172, \$1,172 and \$10,034 is included in other receivables in relation to the Responsible Listed Infrastructure Fund, Global Emerging Markets Focus Fund, Worldwide Sustainability Fund, Global Emerging Markets Sustainability Fund, Asia Pacific Leaders Sustainability Fund, Asia Pacific Sustainability Fund and China A Shares Fund.

2. Principal accounting policies (continued)

(o) Preliminary expenses (continued)

As at 31 December 2020, unamortised preliminary expenses amounting to \$1,335, \$1,577, \$1,628, \$1,628, \$1,628, \$1,628, \$1,628 and \$14,122 is included in other receivables in relation to the Responsible Listed Infrastructure Fund, Global Emerging Markets Focus Fund, Worldwide Sustainability Fund, Global Emerging Markets Sustainability Fund, Asia Pacific Leaders Sustainability Fund, Asia Pacific Sustainability Fund and China A Shares Fund.

3. Fees and expenses

Investment management fees

First Sentier Investors (Hong Kong) Limited (the "Investment Manager") is entitled to a fee up to a rate of 3% per annum of the net asset value of each Fund.

The below table shows the current rates per annum of investment management fees of each Fund of the Company for Class I, II, III, III(G) and IV shares as at 31 December 2021:

Funds	Class I	Class II	Class III	Class III (G)	ClassIV

The Investment Manager is also entitled to reimbursement of any expenses reasonably incurred to enable it to perform its duties in relation to the Company. The investment management charge for the financial year for each Fund is disclosed in the SCI on pages 307-318. The total amount due to the Investment Manager at 31 December 2021 was US\$25,054,751 (2020: US\$22,197,780).

The Investment Manager may delegate the investment management function to Sub-Investment Managers. The Investment Manager will pay out of its investment management fee the fees and out of pocket expenses of the Sub-Investment Managers.

3. Fees and expenses (continued)

Waivers and Reimbursement

The Investment Manager and the Company have agreed that the operating expenses of the Class II shares of the following Funds should be set at the following rates as measured by the percentage of net assets:

Funds	2021	2020
Class II		
FSSA Asian Growth Fund	2.30%	2.30%
FSSA China Growth Fund	2.25%	2.25%
FSSA Indian Subcontinent Fund	3.00%	3.00%

When the normal operating expenses of a Fund fall below the set expense rates, the Fund is not required to pay the difference to the Investment Manager. When the normal operating expenses of a Fund exceed these expense rates, the Investment Manager will waive all or some of its fees and absorb other expenses of the Fund to maintain the set expense rate.

Subscription charges

The Investment Manager is entitled to a preliminary charge of up to 7% relating to subscriptions in the Company. The sales charge for all Classes except Class I and Class IV Shares for all Funds reduced from "up to 7.0%" to "up to 5.0%" from 9 December 2021 per the new Prospectus. For the financial year ended 31 December 2021 the income accruing to the Investment Manager relating to subscriptions in the Company amounted to Nil (2020: Nil).

Depositary and administration fees

HSBC Continental Europe (the "Depositary") and HSBC Securities Services (Ireland) DAC (the "Administrator") are entitled to a composite fee out of the assets of each Fund at a rate of 0.0485% per annum based on the net asset value of each Fund as of each dealing day for all classes with the exception of Class III Shares for which the composite fee shall be US\$5,000 per annum in respect of trustee and administration services provided. This provision is being retired with effect from 9 December 2021 and the umbrella level fee applied to all other classes will be now applicable to class III shares too.

The Administrator is entitled to a transaction fee of US\$15 for processing of subscriptions, redemptions, transfers and other shareholder-related transactions. The Depositary is also entitled to a safe-keeping fee from the Company for all Classes of shares, of up to 0.45% per annum on the asset value of securities depending on the location of the assets held.

Directors' fees

Directors are entitled to remuneration for their services as Directors.

The Directors are entitled to be reimbursed for any reasonable out of pocket expenses incurred in execution of their duties. The total Directors fees for the financial year ended 31 December 2021 were US\$119,175 (2020: US\$107,807).

Auditors' fees

Fees accrued to the statutory auditors, Deloitte Ireland LLP, in respect of the financial year ending 31 December 2021 and 31 December 2020 are as follows:

	2021	2020
	US\$*	US\$*
Audit of financial statements	264,901	283,669
Total	264,901	283,669

5. Soft commission

All research and advisory services are paid by the Managers/Sub-Managers and there are no soft commissions as part of trading.

6. Financial assets and liabilities designated at fair value through profit or loss

In determining an instrument's placement within the fair value hierarchy, the Directors separate the Company's investment portfolio into two categories: investments and derivative instruments. Each of these categories can further be divided between financial assets or financial liabilities.

Investments

Investments whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include active listed equities and bonds, certain U.S. government and sovereign obligations, and certain money market securities. The Directors do not adjust the quoted price for such instruments, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include certain U.S. government and sovereign obligations, most government agency securities, certain mortgage products, investment-grade corporate bonds, certain bank loans and bridge loans and less liquid listed equities, bonds state, municipal and provincial obligations and investments in other funds. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments include certain investments valued using an estimate of fair value. When observable prices are not available for these securities, the Directors use one or more valuation techniques (e.g., the market approach or the income approach) for which sufficient and reliable data is available. Within Level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors. The Level 3 investments are priced by the relevant competent party and the method is approved by the Directors.

Level 3 valuations are reviewed on a monthly basis by the FVPC. The FVPC considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognised as standard within the industry.

As of 31 December 2021, the Company held Level 3 securities which are manually priced. Hughes Satellite Systems 6.625% 01/08/2026 is held in First Sentier Global Credit Income Fund. Additionally, the FVPC believe that there will be a devaluation in the Nigerian Naira and as such, Nigerian equities and cash are subject to reduction in value.

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

Derivative contracts

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as warrants and future contracts, and OTC derivatives, such as forward currency contracts, credit default swaps and interest rate swaps, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

The Company considers the transfers between different levels to occur when there is a change in significant observable and unobservable inputs for a particular investment.

The Company's assets and liabilities (by class) not measured at fair value but for which fair value is disclosed have the following levels: Level 1 - cash and cash equivalents, margin accounts, bank overdrafts, Level 2 - remaining classes of financial assets and liabilities on the Statement of Financial Position. These assets and liabilities are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

The following table presents the financial instruments carried on the Statement of Financial Position by caption and by level within the valuation hierarchy as at 31 December 2021 and 31 December 2020.

[#]NewGold Issuer has been purchased in order to facilitate repatriation of Nigerian Naira. It is bought with the intention of converting the Nigerian line to the South African line. The South African line will then be sold. Therefore, it is appropriate to price in line with the South African line, as this represents the amount which will be received once sold. Hence it is classified as level 2.

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

The following table shows the reconciliation of investments transferred in/out of Level 3.

*The FVPC believe that there will be a devaluation in the Nigerian Naira. Therefore, equities and cash are subject to reduction in value. From 17th April 2020 to 22nd October 2020, the devaluation calculation was based upon the difference between spot and forward rates. From 22nd October 2020 to 10th November, the calculation was based upon the midpoint between the spot sell rate and the unofficial rate. From 11th November 2021, the devaluation was based on the published discount on Global X MSCI Nigeria ETF. The Nigerian Naira assets are therefore classified as Level 3 as at 31 December 2021. At 31 December 2021, had the unobservable inputs used in valuing the level 3 investments increased or decreased by 5%, with all other variables held constant, the increase or decrease in net assets attributable to redeemable participating shareholders would have been +/- US\$88,877 (31 December 2020: US\$247,780).

7. Incorporation and share capital

The initial share capital of the Company is 30,000 subscriber shares of EUR 1.25 each and the Company may issue up to 500,000,000,000 participating shares of no par value. Subscriber shares are not entitled to any dividends or to participate in the profits of the Company beyond the amount of capital paid up on issue. Subscriber shares in issue at 31 December 2021 have not been included in the financial statements. Subscriber shareholders are entitled to one vote per share held in matters relating to the Company. The subscriber shareholders are First Sentier Nominees (Hong Kong) Ltd and First Sentier Investors (Hong Kong) Ltd.

Holders of participating shares of the Funds are entitled to one vote per participating share. Participating shares of the Funds are also entitled to share in any dividends and profits of those specific Funds, and are redeemable at the option of the shareholder.

An anti-dilution adjustment may be payable by the shareholders from time to time as determined by the Investment Manager in respect of net subscriptions or net redemptions in a Fund. The amount of the antidilution levy is intended to cover dealing costs in order to protect continuing shareholders in that Fund.

Transactions in shares during the financial year were as follows:

Subscriber shares	At	At
	31 Dec 2021	31 Dec 2020
Issued at a price of €1.25	3	3

FSSA Hong Kong Growth Fund	60,034	60,034
Total	851,757	852,924

8. Risk arising from financial instruments

The Company's investment objective is to seek capital growth and/or dividend income from a portfolio of securities in respect of the Funds. The holding of securities and investment activities undertaken pursuant to this objective involves certain inherent risks. Below is a description of the principal risks inherent in the Company's activities along with the actions it has taken to manage these risks.

8. Risk arising from financial instruments (continued)

The Company's assets and liabilities comprise financial instruments which include:

- investments including equity shares, fixed income securities, floating rate securities, investment funds, warrants, future contracts, forward currency contracts, credit default swaps and interest rate swaps. These are held in accordance with a Fund's investment objective and policies; and
- cash, liquid resources and short-term debtors and creditors that arise directly from its investment activities;

As an investment fund, the Company buys, sells or holds financial assets and liabilities in order to take advantage of changes in market prices or rates.

The main risks arising from the Company's operations are market risk comprising equity price risk, foreign currency risk, interest rate risk, credit risk and liquidity risk. The Board of Directors review and agrees policies for managing each of these risks and they are summarised below. These policies have remained substantially unchanged since the beginning of the financial year to which these Financial Statements relate.

The Company is also exposed to custody risk. Custody risk is the risk of loss of securities held in custody occasioned by the insolvency or negligence of the depositary. Although an appropriate legal framework is in place that seeks to reduce the risk of loss of value of the securities held by the depositary, in the event of its failure, the ability of the Company to transfer securities might be temporarily impaired.

The Depositary is under a duty to take into custody and to hold the property of each Funds of the Company on behalf of its shareholders. The Central Bank of Ireland requires the Depositary to hold legally and separately the non-cash assets of each Funds and to maintain sufficient records to clearly identify the nature and amount of all assets that it holds, the ownership of each asset and where the documents of title to such assets are physically located. When the Depositary employs a Sub-Depositary, the Depositary retains responsibility for the assets of the Funds.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Funds. Therefore, in such jurisdictions, there is a risk that if a Sub-Depositary becomes bankrupt or insolvent, the Funds beneficial ownership of the assets held by such Sub-Depositary may not be recognised and consequently the creditors of the Sub-Depositary may seek to have recourse to the assets of the sub-funds. In those jurisdictions where the Funds beneficial ownership of its assets is ultimately recognised, the Funds may suffer delay and cost in recovering those assets. The Funds may invest in markets where custodial and/or settlement systems are not fully developed, where the assets of a Fund which are traded in such markets have been entrusted to sub-depositaries, in circumstances where the use of such sub-depositaries is necessary and may be exposed to risk in circumstances whereby the Depositary will have no liability.

(a) Price risk

Price risk is the risk that the fair values of equities or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk).

8. Risk arising from financial instruments (continued)

(a) Price risk (continued)

The investments of the Company are subject to market fluctuations and the risks inherent in investment in international securities markets and there can be no assurances that appreciation will occur. It is the policy of the Investment Manager to maintain a diversified portfolio of investments for each Fund so as to minimise risk.

The Company strives to invest in strong businesses with quality management and at sensible prices. The Company's preferred strategy is to hold equity investments for the medium-to-long term. The Investment Manager is therefore not concerned by short-term equity price volatility with respect to its investments provided that the underlying business, economic and management characteristics of its investments remains favourable.

The carrying values of investments subject to equity price risk are, in almost all instances, based on quoted market prices as of the Statement of Financial Position dates. Market prices are subject to fluctuation and, consequently, the amount realised in the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investment, the relative price of alternative investments and general market conditions. Furthermore, amounts realised in the sale of a particular security may be affected by the relative quantity of the security being sold.

The Investment Manager manages the exposure to equity price risk by constructing a diversified portfolio from which it expects the underlying companies it invests in to perform differently in reaction to different risk influences. The Investment Manager monitors the equity price risk in a Fund's portfolio through both the volatility of the underlying holdings and their combined volatility. The Investment Manager expects portfolios to carry a certain level of equity price risk and uses such risk measurement to highlight unintended risks in the portfolio.

The investment concentrations within the portfolio for each Fund are disclosed in the schedule of investments by investment type. The following table summarises the effect on the net assets attributable to redeemable participating shareholders for equity funds, as at 31 December 2021 and 31 December 2020 of a reasonably possible change in the benchmark as applied to the respective beta.

The reasonably possible change in the benchmark has been determined by using the last five-year annualised benchmark returns. Where a Fund has a history of less than one year, since inception benchmark returns and beta will be used for calculation.

Also, the five-year annualised benchmark returns and beta are not available for some of the Funds, therefore, two and three-year data has been applied for calculation. For the First Sentier Responsible Listed Infrastructure Fund and FSSA Global Emerging Markets Focus Fund, the hypothetical change in the benchmark has been determined by using the 3-year benchmark return and beta for calculations. For the Stewart Investors Worldwide Sustainability Fund, Stewart Investors Global Emerging Markets Sustainability Fund, Stewart Investors Asia Pacific Leaders Sustainability Fund and Stewart Investors Asia Pacific Sustainability Fund and FSSA China A Shares Fund, the hypothetical change in the benchmark has been determined by using the 2-year benchmark return and the beta for calculations. For the Stewart Investors European Sustainability Fund, the hypothetical change in the benchmark has been determined by using the 1-year benchmark return and beta for calculations.

The performance of the equity Funds below does not necessarily follow the relevant benchmark and the holdings of the Funds might be different to the benchmark.

8. Risk arising from financial instruments (continued)

(a) Price risk (continued)

The below sensitivity analysis is a relative estimate of risk. Please note that past performance should not be used as a guide to future performance as future market conditions could vary significantly from those experienced in the past.

Fund*	+5.43%	108	-	-
* Stewart Investors European Sustainability Fund was launched	d on 10 June 2021			

An equal change in 5-year annualised benchmark in the opposite direction would have decreased or increased the net assets attributable to redeemable participating shareholders by an equal but opposite amount.

The Company may employ investment techniques and instruments including but not limited to futures, forward contracts, options, interest rate swaps, contracts for difference and credit default swaps for the efficient portfolio management purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Funds with an appropriate level of risk, taking into account the risk profile of the Funds. Only the First Sentier Global Credit Income Fund may invest in financial derivative instruments for investment purposes.

Details of the Company's investment portfolio and derivatives at the SFP date are disclosed in the Schedules of Investments.

The Company uses the absolute value at risk ("VaR") model to calculate the First Sentier Global Credit Income Fund's global exposure. The Fund's global exposure, using the absolute VaR approach, is calculated on the following basis:

- Calculation frequency: Daily
- Absolute VaR limit: 20%
- Confidence level: 99%
- Holding period: 1 month (20 Business Days)
- Historical observation period: More than 1 year (250 Business Days). A shorter observation period may be used if justified by a significant increase in price volatility (example in case of extreme market conditions)
- Quarterly data set updates, or more frequent when market prices are subject to material changes
- Model: Enhanced Historical VaR

8. Risk arising from financial instruments (continued)

(a) Price risk (continued)

The below table provides an analysis of the VaR measures and leverage levels for the Company for the financial year ended 31 December 2020 and 31 December 2019.

	First Sentier Global Credit Income Fund		
	31 December 2021 31 December 20		
VaR as at the financial year end	1.86%	4.91%	
Lowest VaR limit utilised during the financial year	1.37%	0.96%	
Highest VaR limit utilised during the financial year	4.96%	24.94%	
Average VaR limit utilised during the financial year	2.55%	9.83%	
Leverage level employed during the financial year	58.7%	55.6%	

An inherent limitation of VaR is that it seeks to analyse historical experiences to assess risk. Risk events may occur that are significantly different to those historically encountered. It may lead to an underestimation of the loss estimate.

The Company uses the commitment approach to calculate the other Funds' global exposure to ensure that the use of financial derivative instruments is within limits specified by the Central Bank of Ireland. Please be advised that there were no breaches of 20% absolute VaR during the reporting period.

(b) Foreign currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Net Asset Value of each Fund is computed in the functional currency of that Fund, whereas the Fund's investments may be acquired in other currencies. The value in terms of the functional currency of the investments of a Fund may rise or fall due to exchange rate fluctuations of individual currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. It may not be possible or practicable to hedge against the consequent currency risk exposure in all circumstances. The international nature of a Fund's investment activities gives rise to a currency risk which is inherent in the performance relative to its base currency of its non-US Dollar denominated investments. It is generally not a Fund's policy to hedge this risk on a continuing basis, but the Fund may do so from time to time. No foreign currency risk was calculated on Funds terminated during the year.

Monetary assets and liabilities are those fixed by contract or by their nature. They include monetary assets such as cash, debtors and debt securities, and exist as money or as claims to specified sums of money. Non-monetary items are assets and liabilities such as equity securities. The foreign exchange exposure relating to non-monetary assets and liabilities is considered to be a component of market price risk not foreign currency risk and is therefore not included in the sensitivity analysis below. Currency risk will only be significant on the fixed income funds which are heavily invested in monetary assets and liabilities.

8. Risk arising from financial instruments (continued)

(b) Foreign currency risk (continued)

The First Sentier High Quality Bond Fund and First Sentier Long Term Bond Fund acquire their investments in the functional currency; all other Funds acquire investments in a range of currencies other than the functional currency. The following tables set out the total exposure to foreign currency risk in all Funds with non-US Dollar exposure at 31 December 2021 with comparative figures as at 31 December 2020. These tables also show the effect of an estimated 5% change in the underlying exchange rates applied immediately and uniformly across all currencies. In considering this analysis however, it should be noted that the Investment Manager has not applied this 5% change to the Hong Kong Dollar as this currency is strongly linked to the US Dollar. Therefore, the Investment Manager would expect this currency to move in line with the US Dollar. The changes in value do not necessarily reflect the best or worst case scenarios and actual results may differ.

8. Risk arising from financial instruments (continued)

(c) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of markets interest rates on the fair value of financial assets and liabilities and future cash flow.

Any cash and cash equivalents, time deposits and bank overdrafts held by the Funds are held in the short term market rates and therefore are not exposed to significant amounts of interest rate risk. The majority of the assets of the Funds are equity shares which neither pay interest nor have a maturity date apart from the bond funds: First Sentier Global Bond Fund, First Sentier High Quality Bond Fund, First Sentier Long Term Bond Fund, First Sentier Asia Strategic Bond Fund, First Sentier Asian Quality Bond Fund and First Sentier Global Credit Income Fund.

The fair values of the Company's fixed income investments will fluctuate in response to changes in market interest rates. Increases and decreases in prevailing interest rates generally translate into decreases and increases in fair values of those instruments. Additionally, fair values of interest rate sensitive instruments may be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions. Fixed interest rate investments may be more sensitive to interest rate changes than variable rate investments.

The Company's strategy is to acquire fixed income securities that are attractively priced in relation to the perceived credit risk. The Investment Manager recognises and accepts that losses may occur.

The Investment Manager mitigates interest rate risk by constructing a diversified portfolio of fixed income securities with differing modified duration and term to maturity characteristics, which acts to reduce the Funds' overall exposure to interest rate risk. The Investment Manager constantly monitors its view of the Funds' exposure to interest rate risk and makes decisions accordingly about the composition of the Funds' portfolio of fixed income securities in order to ensure the interest rate risk in the portfolio is maintained at an appropriate level.

The First Sentier Global Bond Fund, First Sentier High Quality Bond Fund, First Sentier Long Term Bond Fund, First Sentier Asia Strategic Bond Fund, First Sentier Asian Quality Bond Fund and First Sentier Global Credit Income Fund hold a majority of their assets in bonds. The following tables set out the interest profile of these financial assets at 31 December 2021 with comparative figures as at 31 December 2020. An estimate is also given of the effects of a hypothetical 100 basis points increase and decrease in interest rates on assets that are subject to interest rate risk. The sensitivity analysis includes both fixed and floating rate debt securities.

The basis of the calculation is using the modified duration of the Fund as a whole (being a weighted average of the modified duration of each security). No specific assumptions have been made on the durations other than that all securities make coupon and capital payments in line with their contractual requirements. In using this method to show sensitivity to interest rate movements, it has been assumed that an interest rate movement on the scale shown is replicated for each security to the same amount.

This last assumption is the key limitation of using this methodology, since any general movement in interest rates may result in a different movement in the rate for different securities; however, it is believed to be the most appropriate method of illustrating the effect of a theoretical movement in rates and therefore the overall interest rate sensitivity of each Fund.

At 31 December 2021, should interest rates have lowered by 100 basis points with all other variables remaining constant, the increase in net assets attributable to holders of redeemable shares for the financial year would amount to approximately US\$1,569,892 arising substantially from the increase in market values of debt securities (31 December 2020: US\$1,541,337). An increase in interest rates of 100 basis points would have had an equal but opposite effect.

The Company uses the absolute value at risk ("VaR") model to calculate the First Sentier Global Credit Income Fund's global exposure. Risk on the fund is driven by credit spreads with the team using the Total Return Swap, sometimes as an overlay and sometimes as a hedge, for beta management.

(d) Credit risk

The Company takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due.

The Company's investments in fixed income securities are subject to credit risk. Credit risk reflects the possibility that a borrower will not be able to meet its obligation to make payments of interest or principal when they fall due. The Investment Manager analyses the credit risk of the Company's fixed income investments prior to purchase and continues to monitor developments in credit quality subsequently.

The Company is also exposed to counterparty credit risk on trading derivative products. To reduce the Company's counterparty credit exposures, securities trading is primarily conducted on recognised exchanges and on a delivery-versus-payment basis. In addition, the Investment Manager seeks to enter into netting agreements with counterparties that would allow receivables and payables to that counterparty to be offset. The counterparty has no right to sell or re-pledge this collateral asset received.

To measure and manage the Company's credit exposures, the Investment Manager primarily uses credit limits. While the Company's investment activities expose it to many different industries and counterparties, the Company routinely executes a high volume of transactions with counterparties in the financial services industry, including brokers and dealers and commercial banks, resulting in significant relative credit concentration with respect to this industry. In the ordinary course of business, the Company may also be subject to a concentration of credit risk to a particular counterparty, borrower or issuer; however, the Investment Manager controls this exposure through the use of counterparty, credit and issuer limits. In general, the limits applied (expressed as a value of each Fund) are 10% to individual issuers, 20% to deposit taking financial institutions, 5% (or 10% if an approved bank) to OTC derivative counterparties, and 20% to combined issuers/counterparties. Lower limits may be applied to individual issuers or counterparties if the Investment Manager feels it prudent to do so.

8. Risk arising from financial instruments (continued)

(d) Credit risk (continued)

The Company's assets are safeguarded and held by the Depositary. The Investment Manager analyses the credit risk of the Company's Depositary prior to appointment and continues to monitor developments in its credit quality subsequently. In addition, the Investment Manager makes use from time to time of money market or exchange-traded funds or the placing of monies on deposit both in order to maximise return and to diversify the exposure of such assets. The Depositary has a short-term credit rating of P-1 (2020: P-1) as per Moody's. Further details of the cash and cash equivalents are shown in Note 10.

The central counterparty used, during the financial years, 2021 and 2020, is CME, a financial market company operating an options and futures exchange.

All transactions in listed securities are settled/paid for upon delivery using the Depositary or its Sub-Depositaries. The risk of default is considered minimal, as delivery of securities sold is only made once the Depositary has received payment. Payment is made on a purchase once the securities have been received by the Depositary. The trade will fail if either party fails to meet its obligation. Substantially all of the securities and cash of the Company are held by HSBC Continental Europe. Bankruptcy or insolvency of HSBC Continental Europe, may cause the Company's rights with respect to securities and cash held by HSBC Continental Europe, to be delayed or limited. The Company's securities and other positions are segregated from the assets of the Depositary. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's assets are segregated from those of the Depositary. The Company, will, however, be exposed to the credit risk of the Depositary or sub-Depositary. The Company's cash is segregated from that of the Depositary, however in the event of the insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

The below table shows the credit ratings for major counterparties of the Company as of 31 December 2021 and 31 December 2020 as provided by Standard & Poor's.

	2021	2020
Citi	A+	-
HSBC Bank	A+	A+
Standard Chartered Bank	A+	А
ANZ Banking Group Limited	AA-	AA-
JP Morgan	A+	A+
UBS	A+	A+

The carrying amounts of the financial assets best represent the maximum credit risk exposure at the SFP date. Details of the Company's financial assets exposed to credit risk are shown in the assets section of the current and prior financial year SFP on pages 295-306.

The Investment Manager monitors the Fund's credit position on daily basis. There were no changes in the credit risk management policies and procedures from the prior financial year ended 31 December 2020.

8. Risk arising from financial instruments (continued)

(e) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities.

The capital of the Company is represented by the net assets attributable to holders of redeemable shares. The amount of net assets attributable to holders of redeemable shares can change significantly on a daily basis as the Company is subject to daily subscriptions and redemptions at the discretion of shareholders. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Company.

As the Company may be exposed to daily cash redemptions of redeemable shares, it therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a stock exchange. The Company's listed securities are considered readily realisable as they are listed on major stock exchanges. What is more, in the interests of shareholder protection, the Directors may limit the number of participating shares of any Fund redeemed on any dealing day to 10% of the total number of participating shares of that Fund in issue as discussed in Note 2 (k).

The number of shareholders in each Fund who held 20% or more shares in issue as at the financial year ended 31 December 2021 and 31 December 2020 are disclosed in Note 16.

The Company's policy with regard to liquidity is to ensure continuity of funding. Short term flexibility is achieved through overdraft facilities. The Company's assets comprise mainly of readily realisable securities which can be sold freely to meet funding commitments if necessary.

The following tools may be employed by the Investment Manager to manage liquidity risks:

- (i) the Directors may limit the number of Shares of any Fund redeemed on any Dealing Day to 10% of the total number of Shares of that Fund in issue;
- (ii) where a redemption request would result in more than 5% of the Net Asset Value of the Shares of any Fund being repurchased on any Dealing Day, the Company may satisfy the redemption request in whole or in part by a distribution of investments of the relevant Fund in specie;
- (iii) the Directors may suspend redemption under exceptional circumstances as set out under the heading entitled "Suspension of Calculation of Net Asset Value" in the section headed "VALUATION OF THE COMPANY" in the Prospectus; and
- (iv) an Anti-Dilution Adjustment may be payable by the Shareholders from time to time as determined by the Investment Manager (which Anti-Dilution Adjustment shall not exceed 2% of the subscription or redemption monies (as the case may be) obtained on the Dealing Day on which the subscription or redemption (as the case may be) is effected). The amount of the Anti-Dilution Adjustment is paid into the Funds for the protection of continuing Shareholders in the Funds. For further details, please refer to the sub-sections headed "Buying Shares" and "Redeeming Shares" under the section headed "BUYING, SELLING AND SWITCHING SHARES" in the Prospectus.

8. Risk arising from financial instruments (continued)

(e) Liquidity risk (continued)

The Investment Manager monitors the liquidity positions on a daily basis and takes action as necessary to maintain an adequate level of liquidity to meet all known funding requirements. The Liquidity Risk Management policy was updated in Q4 2021. As documented within the policy, the Investment Manager uses liquidity stress tests in accordance with ESMA LST guidelines.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Derivatives settled gross include forward currency contracts. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant. The balances with no stated maturity are expected to be settled in less than 12 months. This analysis has been prepared on the basis of the Company as a whole rather than for each Fund as the majority of the financial liabilities for each respective Fund are due within one month and have common contractual maturity dates. The financial liabilities at fair value through profit or loss due within one month relate to forward contracts on Global Bond Fund, Global Listed Infrastructure Fund, Japan Equity Fund, Asian Equity Plus Fund, Asian Quality Bond Fund and Asia Strategic Bond Fund.

9. Derivative contracts

Future contracts

Future contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily. Future contracts have little credit risk because the counterparties are futures exchanges. Future contracts result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates, indices, and securities' values underlying these instruments. In addition, because of the low margin deposits normally required in relation to notional contract sizes, a high degree of leverage may be typical of a futures account.

As a result, a relatively small price movement in an underlying of a futures contract may result in substantial losses to the Company.

Futures trading may also be illiquid. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

Notional amounts are the underlying reference amounts to stock exchange indices, equities and foreign currencies upon which the fair value of the futures traded by the Company are based. While notional amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the Company's futures, the underlying price changes in relation to the variables specified by the notional amounts affect the fair value of these derivative financial instruments. The fair value of future contracts entered into by the Company as at 31 December 2021 is disclosed in the Schedule of Investments. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI. The counterparty for all futures contracts is JP Morgan Securities LLC.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Funds may enter into forward foreign exchange contracts to manage the currency risk arising from the Funds' investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI. The counterparties for all the forward contracts are ANZ Banking Group Limited, HSBC Bank, Standard Chartered Bank and Citi Bank.

Interest rate swaps

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. Interest rate swaps relate to contracts taken out by the Company with major brokers in which the Company either receives or pays a floating rate of interest in return for paying or receiving a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Company may obtain interest rate swaps for the purposes of efficient portfolio management and to hedge against interest rate risk. Realised and unrealised gains or losses on derivatives are disclosed separately in the SCI.

9. Derivative contracts (continued)

Warrants

Warrants are recorded as an asset or liability at their fair value on the SFP. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the SCI. Realised gains or losses on warrants are shown in the SCI. On the expiry of a warrant the amount previously recognised in the SFP is recognised in the SCI as a realised gain or loss.

10. Cash and cash equivalents/margin accounts

Bank balances were held with HSBC Bank plc, HSBC Institutional Trust Services (Asia) Limited (a wholly owned subsidiary of HSBC Holdings plc), The Hong Kong & Shanghai Banking Corporation (India, Indonesia, Japan, New Zealand, Philippines, Singapore, Seoul, South Korea, Taipei, Taiwan), HSBC Bank Australia Limited, HSBC Bank (China) Company Limited, HSBC Trinkaus & Burkhardt (Germany), HSBC Bank Malaysia Berhad (Malaysia), HSBC Mexico SA (Mexico), HSBC Bank Middle East Limited (Palestine), HSBC Bank AS (Turkey) and HSBC Securities Services (Ireland).

Margin cash represents margin deposits or payables held in respect of open exchange-traded futures contracts and swap positions. Margin accounts held with JP Morgan as at 31 December 2021 amounted to US\$9,068,057 (2020: US\$1,950,136). This includes collateral of US\$9,068,057 (2020: US\$1,950,136) for futures positions held in respect of First Sentier Global Bond Fund, First Sentier Asia Strategic Bond Fund, First Sentier High Quality Bond Fund, First Sentier Asian Quality Bond Fund and First Sentier Global Credit Income Fund.

Any temporary overdraft balances are secured by way of a charge on the cash and securities of the relevant Fund. The Company has no other borrowing other than the bank overdraft which is disclosed separately in the SFP.

11. Reconciliation of net assets attributable to holders of redeemable shares to the published net asset value

Certain Funds' investments are valued in the financial statements at last traded prices at close of business on the final business day of the year. These prices are different from the prices obtained at 11:00 a.m. (Irish time) as utilised in the published NAV in accordance with the prospectus. In addition, the impact of dealing in the Company's shares on the final business day of the year (2021: 31 December 2021) is incorporated in the financial statements. As at 31 December 2021 there were no differences between the published NAV and the NAV shown in the SFP for any of the funds. The following table reconciles the published NAV to the NAV shown in the SFP for the prior year ending 31 December 2020.

12. Cross liability

The Company is an umbrella fund with segregated liability between the various sub funds. As such the Company generally will not be liable as a whole to third parties as there is no cross-liability between the Funds.

13. Delegation to sub-investment managers

The Investment Manager has delegated the investment management of certain Funds to First Sentier Investors (UK) IM Limited, First Sentier Investors (Singapore), First Sentier Investors (Australia) RE Ltd, First Sentier Investors (Australia) IM Ltd. and First Sentier Investors (US) LLC.

The table below sets out the details of the Funds which are managed or co-managed by the Investment Manager and are delegated to each of the sub-investment managers:

Investment manager/ Sub-investment managers

The Investment Manager may conduct cross trades with other sub funds which are also managed by the Investment Manager. During the year ended 31 December 2021, the Company transacted with another sub fund which is also managed by the Investment Manager. The transaction was carried out at the fair value of the investment on the date of the transaction. The decision was in the best interest of the Fund and fell within the investment objectives and policies of the Fund.

14. Related parties (continued)

Connected parties

In accordance with the requirements of the Central Bank UCITS Regulations and SFC Code, all transactions carried out with the Company by the promoter, manager, depositary, investment adviser and associates/group companies ("connected parties") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements in place to ensure that the obligations set out in the Central Bank UCITS Regulations and SFC Code are applied to all transactions with connected parties and transactions with connected parties entered into during the period complied with the obligations set out in the Central Bank UCITS Regulations and SFC Code.

15. Contingent liabilities and commitments

The Directors are not aware of any existing contingent commitments or liabilities as at 31 December 2021 and 31 December 2020. As at 31 December 2021 and 31 December 2020, the Board is not aware of any restriction regarding free negotiability or any asset which is restricted by statutory or contractual requirements.

16. Significant shareholders

The table below represents the number of shareholders who had an entitlement of 20% or more in shares in issue of the Funds of the Company as at 31 December 2021 and 31 December 2020.

17. Significant events during the financial year

The investment management fees for FSSA Asia Pacific All Cap Fund and FSSA Japan Equity Fund were reduced as follows with effect from 9 March 2021.

			Investment management fee
		Current investment	with effect from 9 March
Fund	Class	management fee	2021
	Class I	1.75%	1.50%
FSSA Asia Pacific All Cap	Class III	1.25%	1.00%
Fund	Class VI	1.25%	1.00%
	Class I	1.75%	1.55%
	Class III	1.00%	0.80%
FSSA Japan Equity Fund	Class VI	1.00%	0.80%

A new prospectus was issued on 9 March 2021.

Stewart Investors European Sustainability Fund launched on 10 June 2021.

A new prospectus was issued on 9 December 2021.

The name of FSSA Singapore and Malaysia Growth Fund changed to FSSA ASEAN All Cap Fund on 9 December 2021. The Fund changed its strategy to actively invest in the Association of South East Asian Nations (ASEAN) which includes Singapore, Malaysia, Thailand, Indonesia, the Philippines, Vietnam, Brunei, Cambodia, Laos and Myanmar.

The provision for a composite Depositary and Administration Fee is changed with effect from 9 December 2021 to unbundled and bespoke fees, with no material change to these fee types overall.

The investment management fees for Class IV of the following sub-funds changed on 9 December 2021.

	Previous investment	Revised investment
Fund	management fee	management fee
FSSA Asian Growth Fund	2.00%	1.50%
FSSA China Focus Fund	2.00%	1.75%
FSSA Greater China Growth Fund	2.00%	1.50%
Stewart Investors Global		
Emerging Markets Leaders Fund	1.70%	1.45%

17. Significant events during the financial year (continued)

FSI has had to respond to the outbreak of the COVID-19 virus, which has affected many countries around the globe, including countries in which FSI operates and countries in which FSI invests on behalf of its clients. FSI continues to closely monitor the developments and the implications of the spread of the COVID-19 virus, the advice from health and government authorities and the World Health Organisation, as well as taking advice from external advisers on international security (International SOS). FSI will continue to make adjustments to how its business operates during this time with the aim of continuing to provide the best possible services to its clients.

There were no other events, other than the above, significant to the period that require disclosure in the financial statements.

18. Subsequent events

The Company declared the following dividends subsequent to the year ended 31 December 2021.

18. Subsequent events (continued)

Stewart Investors Global Emerging Markets Leader Sustainability Fund launched on 18 January 2022.

FSSA All China Fund launched on 24 February 2022.

Whilst the sub-funds have no direct exposure to Russian, Belarusian or Ukrainian securities, the Directors acknowledge the situation in Ukraine and its potentially adverse economic impact on the issuers of the instruments in which the Fund invests. This is an additional risk factor which could impact the operations and valuation of the Fund's assets after the year end.

The Directors are actively monitoring developments closely. Given the nature of the on-going developments, there is a high degree of uncertainty and it is not possible at this time to predict the extent and nature of the overall future impact on the Fund, if any.

There were no other events, other than the above, subsequent to the year end and up to 20 April 2022, the date the financial statements were approved by the Board of Directors, that require disclosure in the financial statements.

19. Approval of the financial statements

The financial statements were approved by the Board of Directors on 20 April 2022.

The Articles of Association of the Company, the Prospectus, the Supplements and Key Investor Information Documents for each sub fund and the annual and semi-annual reports of the Company can be obtained, free of charge from the Swiss Representative and Paying Agent, the Distributor and the Administrator.

Appendix – Unaudited

Remuneration Disclosures

The table below provides an overview of the following:

- Total remuneration paid by the Company to its entire staff all of whom are fully or partly involved in the activities of the Company for this financial year.
- Total remuneration of those staff of the Company and its delegates who are fully or partly involved in the activities of the Company.
- Aggregate amount of remuneration broken down by senior management and members of staff who have a material impact on the risk profile of the Company.

		Total Remuneration

Other Code Staff	45	43,128,922
Fixed remuneration		4,974,409
Variable remuneration		38,154,513

UCITS V Remuneration

In line with the requirements of the UCITS Regulations, the Company has adopted a remuneration policy which is consistent with the principles outlined in the ESMA guidelines on sound remuneration policies under the UCITS Directive (the "Remuneration Guidelines"). The remuneration policy is appropriate to the Company's size, internal organisation and the nature, scope and complexity of its activities. The Company's remuneration policy and its implementation were reviewed during the period. The review did not identify any irregularities and the policy was not amended following the review.

The Company's remuneration policy applies to certain identified staff whose professional activities have a material impact on the risk profile of the Company. As at 31 December 2021 the Company did not have any employees and the relevant remuneration requirements mentioned above apply to the management body of the Company (i.e. board of directors) and those categories of staff whose professional activities have a material impact on the risk profile of the Company.

Appendix – Unaudited (continued)

UCITS V Remuneration (continued)

Those directors who are independent and not affiliated with the Investment Manager receive a fixed annual fee which is set out in the table above (all two directors served the full year). Fee levels are in line with the fees paid by other Irish funds and compensates these directors for their tasks, expertise and responsibilities in relation to their service to the Company. Those directors who are also employees of the Investment Manager (or an affiliate) do not receive any fees for their services as directors of the Company.

The Remuneration Guidelines require that the Company must ensure that, where investment management functions are delegated, the delegates are subject to regulatory requirements on remuneration that are equally effective as those that apply under the Remuneration Guidelines or that appropriate contractual arrangements are in place with those entities to ensure there is no circumvention of the Remuneration Guidelines. The Company has ensured with respect to each relevant delegate that this is the case.

Cybersecurity Risk

Cybersecurity breaches may occur allowing an unauthorized party to gain access to assets of the Funds, Shareholder data, or proprietary information, or may cause the Company, the Investment Manager, the Distributor, the Administrator or the Depositary to suffer data corruption or lose operational functionality.

The Funds may be affected by intentional cybersecurity breaches which include unauthorized access to systems, networks, or devices (such as through "hacking" activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws). A cybersecurity breach could result in the loss or theft of Shareholder data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs. Such incidents could cause the Company, the Investment Manager, the Distributor, the Administrator, the Depositary, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Shareholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which a Fund invests, and thereby cause a Fund's investments to lose value, as a result of which investors, including the relevant Fund and its Shareholders, could potentially lose all or a portion of their investment with that issuer.

The Securities Financing Transaction Regulation Disclosure

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the Securities Financing Transaction Regulation ("SFTR") as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2021, the Company did not hold any type of SFT.

Product name: FSSA ASEAN All-Cap Fund **Legal entity identifier:** 5493009FP6QE07BQYA98

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the following characteristics:

Environmental characteristics:

- reductions in greenhouse gas emissions,
- reduction in fossil fuel exposure and deforestation, and
- improvements to biodiversity.

Social characteristics:

- human health, and
- exclusions of certain activities with adverse social impacts and human rights.

How did the sustainability indicators perform?

The Fund's sustainability indicators and performance against them is shown below:

	Environmental Indicators		
Greenhouse gas	• Scope 1 and 2 GHG emissions		
emissions			
Fossil fuel	Coal revenues		
exposure			
Environmental	Adherence to Roundtable Sustainable Palm Oil		
Protection	(RSPO) standards		
	• No Deforestation, No Peat, No Exploitation (NDPE)		
	policies (deforestation and biodiversity protection)		
Social Indicators			
Human health	Number of companies with tobacco revenues		
Adverse social	• Number of companies which primarily operate in		
impacts	the gambling industry		
	• Number of companies involved in the production of		
	pornography		
Human rights	Number of companies that are involved in the		
_	production or development of cluster munitions,		
	anti-personnel mines, small arms, biological		
	weapons, chemical weapons or uranium		
	ammunitions		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

E	Coal	Companies with direct exposure to coal mining or processing where it is a key part of the business. For those companies, we impose a 10% maximum revenue threshold when measured on a rolling average over 3 years.	# of companies with revenues from coal	2	Jardine Cycle & Carriage Ltd has a 5% 2- year revenues from coal average and Jardine Matheson Holdings Limited has a 2% 2-year revenues from coal average (FY19-FY20), which is below our threshold. The business segment was not reported on in FY18; thus, revenue threshold was calcuated on a 2-year average.
	RSPO	Consumer staples companies with current RSPO membership within the fund	% of compliant consumer companies	9.1%	
	NDPE	Consumer staples companies with partial or full NDPE policy in place within the fund	% of compliant consumer companies	27.3%	
	Human health	Companies with tobacco revenues	# of companies	0	
	Adverse social impacts	Companies operating primarily in gambling	# of companies	0	
5	Adverse social impacts	Companies operating primarily in production of pornography	# of companies	0	
	Human rights	Companies involved in production or development of munitions and weapons	# of companies	0	

Product name: FSSA Asia Focus Fund **Legal entity identifier:** 549300LAC4P0KXGYJG33

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the following characteristics:

Environmental characteristics:

- reductions in greenhouse gas emissions,
- reduction in fossil fuel exposure and deforestation, and
- improvements to biodiversity.

Social characteristics:

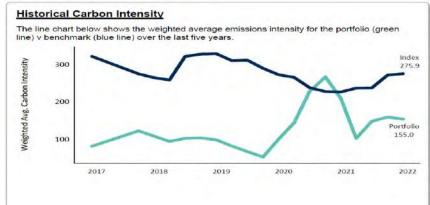

- human health, and
- exclusions of certain activities with adverse social impacts and human rights.

How did the sustainability indicators perform?

The Fund's sustainability indicators and performance against them is shown below:

	Environmental Indicators
Greenhouse gas emissions	• Scope 1 and 2 GHG emissions
Fossil fuel exposure	Coal revenues
Environmental Protection	Adherence to Roundtable Sustainable Palm Oil (RSPO) standards
	• No Deforestation, No Peat, No Exploitation (NDPE) policies (deforestation and biodiversity protection)
	Social Indicators
Human health	Number of companies with tobacco revenues
Adverse social impacts	• Number of companies which primarily operate in the gambling industry
	• Number of companies involved in the production of pornography
Human rights	• Number of companies that are involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons, chemical weapons or uranium munitions

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Greenhouse gas emissions – Scope 1 and 2

Rank	Security Name	% of Total Exposure Weight	%Contribution	
1	Indocement Tungaal Prakarsa	2.7%	76.8%	113.0

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the following characteristics:

Environmental characteristics:

- reductions in greenhouse gas emissions,
- reduction in fossil fuel exposure and deforestation, and
- improvements to biodiversity.

Social characteristics:

- human health, and
- exclusions of certain activities with adverse social impacts and human rights.

How did the sustainability indicators perform?

The Fund's sustainability indicators and performance against them is shown below:

	Environmental Indicators
Greenhouse gas emissions	• Scope 1 and 2 GHG emissions
Fossil fuel exposure	Coal revenues
Environmental Protection	Adherence to Roundtable Sustainable Palm Oil (RSPO) standards
	• No Deforestation, No Peat, No Exploitation (NDPE) policies (deforestation and biodiversity protection)
	Social Indicators
Human health	Number of companies with tobacco revenues
Adverse social impacts	• Number of companies which primarily operate in the gambling industry
	• Number of companies involved in the production of pornography
Human rights	• Number of companies that are involved in the production or development of cluster munitions, anti-personnel mines, small arms, biological weapons, chemical weapons or uranium munitions

How did the sustainability indicators perform?

Environmental: For utility companies, demonstrating declining carbon intensity (as measured by tons of carbon emitted per MWh of electricity generated) over rolling five year periods; or carbon intensity at least 25% below the industry average

Power generated by utilities typically represents around 85% of portfolio emissions. Emissions per MWh declined by 17% over the preceding 5 years.

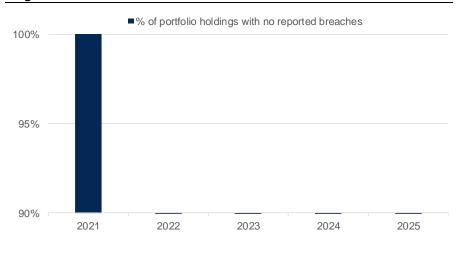

Adjusting for changes in corporate structure, each utility in the portfolio reduced their carbon intensity over this period.

Carbon emissions per MWh 0.70 0.60 0.50 0.40 0.30 0.20 0.10 0.10 0.00 2016 2017 2018 2019 2019 2020

Carbon Intensity

Social: Alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises.

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

Alignment with UN GC and OECD Guidelines

Product name:

First Sentier Responsible Listed Infrastructure Fund

Legal entity identifier: 549300E7HMFL0HQCAU90

Sustainable investment objective

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the following characteristics;

Environmental characteristics: climate change mitigation (via a reduction in carbon intensity (measured as carbon emissions per MWh), the establishment of energy infrastructure required for enabling the decarbonisation of energy systems, and the production of clean and efficient fuels from renewable or carbon-neutral sources); and climate change adaptation (by preventing or reducing the risk of the adverse impact of the current climate and the expected future climate on people, nature or assets).

The alignment of investee companies with the United Nations' environmentally-focused Sustainable Development Goals, namely:

- SDG 6: Clean Water and Sanitation
- SDG 7: Affordable and Clean Energy
- SDG 12: Responsible Consumption and Production
- SDG 13: Climate Action

Social characteristics: The protection of labour rights, and the provision of safe and secure working environments for all workers

The alignment of investee companies with the United Nations' socially-focused Sustainable Development Goals, namely:

- SDG 9: Industry, Innovation and Infrastructure
- SDG 11: Sustainable Cities and Communities

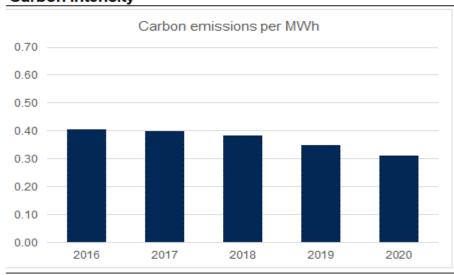

How did the sustainability indicators perform?

Environmental:

For utility companies, demonstrating declining carbon intensity (as measured by tons of carbon emitted per MWh of electricity generated) over rolling five year periods; or carbon intensity at least 25% below the industry average

Power generated by utilities typically represents around 85% of portfolio emissions. Emissions per MWh declined by 23% over the preceding 5 years.

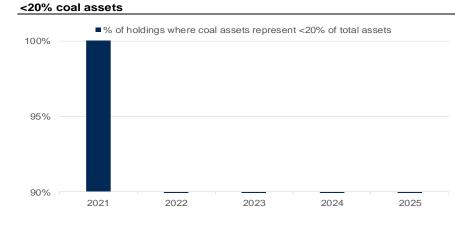

Adjusting for changes in corporate structure, each utility in the portfolio reduced their carbon intensity over this period.

Carbon Intensity

20% limit to coal generation exposure (as measured by the proportion of a company's overall assets that consist of coal-fired generation assets)

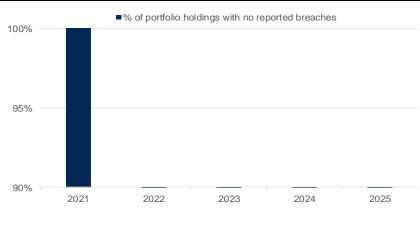

Each electricity-generating utility held by the portfolio during the reference period was compliant with this sustainability indicator.

Social:

Alignment with the Ten Principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises.

Based on analysis from our external data provider, none of the portfolio's holdings were deemed to be in violation of either the UN Global Compact, or of the OECD Guidelines for Multinational Enterprises, during the reference period.

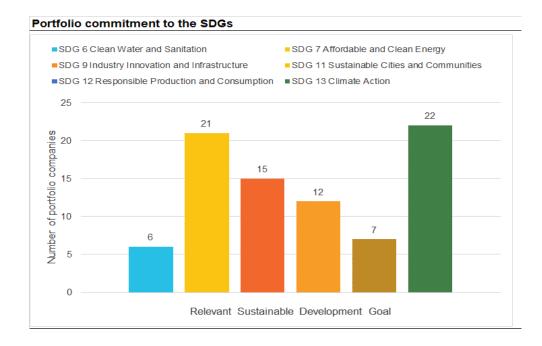

Alignment with UN GC and OECD Guidelines

Both environmental and social:

Alignment with the United Nations' Sustainable Development Goals.

The portfolio's holdings were all compliant with this sustainability indicator during the reference period.

The following chart illustrates how many portfolio holdings align with each Sustainable Development Goal. Some portfolio holdings aligned with more than one SDG.

Product name: Stewart Investors Asia Pacific Leaders Sustainability Fund **Sustainable investment objective** **Legal entity identifier:** 549300VKJEPJT5Q4V960

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to achieve long-term capital appreciation by investing in companies which both contribute to and benefit from sustainable development, achieving positive social and environmental sustainable outcomes.

Positive social sustainability outcomes include the enablement of improved health and wellbeing; access to income-generating and enterprise opportunities; fair employment and workplace safety; access to education and learning opportunities; communication and access to information; financial inclusion; sustainable transport and mobility; better access to housing, water, sanitation and electricity; and social inclusion and reduced inequality.

Positive environmental sustainability outcomes include more careful, efficient and productive use of natural resources; reduced waste and improved waste management; the wider adoption of circular economy practices and measures; the adoption of renewable and cleaner energy technologies; reduced greenhouse gas emissions; reduced water, air and other environmental pollution; a slowing in the rate of land degradation, land use change and loss of forests and biodiversity; and measures and technologies that enable climate change adaptation and resilience.

The Fund only invests in companies that are sustainable investments which contribute to a social and/or environmental objective. The contribution of the Fund's investments to the social and environmental objectives are assessed by reference to two framework indicators – the manager's human development pillars and Project Drawdown climate change solutions.

Human development pillars

The manager has determined 10 broad pillars which they believe encapsulate the essence of human development and which can be mapped to companies. Each investee company must be contributing in a tangible way to at least one of the following pillars:

- Nutrition
- Healthcare and hygiene
- Water and sanitation
- Energy
- Housing
- Employment
- Finance
- Standard of living
- Education
- Information

As at 31 December 2021, the Fund held **45** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, companies were contributing towards **126** pillars.

environmental or

companies follow good governance

investment

characteristics promoted by the financial product are attained.

Climate change solutions

Project Drawdown is a non-profit organisation, founded in 2014, which has mapped, measured and modelled over 80 different solutions to global warming, with the ultimate goal of reaching drawdown – i.e. the point in the future when emissions stop increasing and start to steadily decrease. Each Fund investment is mapped by the manager against the c.80 solutions (which are captured in eight broader solutions of Buildings, Circular economy / industry, Conservation / restoration, Energy, Food system, Human development, Transport and Water). The manager's focus is on whether the companies themselves are making a meaningful contribution and will have meaningful involvement with the delivery of any of those solutions. Where the companies in which the Fund invests do contribute to any of the solutions, they will be involved in making products and delivering services directly, by enabling/supporting those solutions, or indirectly.

As at 31 December 2021, the Fund held **45** companies. **26 companies (58%)** were contributing towards **climate change solutions**. These companies were contributing towards **26** different solutions and **80** solutions in total.

These frameworks, alongside the manager's own bottom-up analysis, lean on measurable and reportable outcomes as evidence for determining a company's meaningful contribution to sustainable development.

Meaningful company contribution:

1. Demonstrates a clear link to the underlying issue and solution, including whether the contribution is direct, enabling/supporting or indirect.

2. Is relevant for the company either as a revenue/growth driver, as strategic initiatives backed by research and development or capital expenditure, or a function of strong culture or behaviours and 'how they do things' e.g. for equality and diversity.

3. Recognises negative impacts from the company, including contradictions and risks of perverse outcomes.

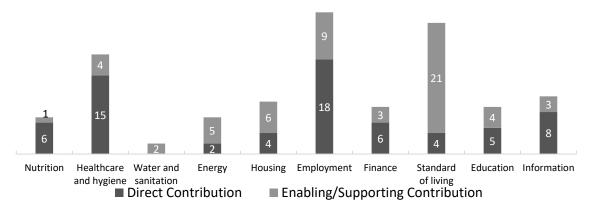

How did the sustainability indicators perform?

Companies can contribute in many different ways to a better future for people and planet. To align with their bottom-up investment approach, the manager provides descriptions on their website, via their interactive Portfolio Explorer tool, on how they believe each company is contributing towards sustainable development. Click on the link below to access the tool.

Product name:

Stewart Investors Global Emerging Markets Sustainability Fund **Sustainable investment objective** **Legal entity identifier:** 549300V44ENSGLMQBN36

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to achieve long-term capital appreciation by investing in companies which both contribute to and benefit from sustainable development, achieving positive social and environmental sustainable outcomes.

Positive social sustainability outcomes include the enablement of improved health and wellbeing; access to income-generating and enterprise opportunities; fair employment and workplace safety; access to education and learning opportunities; communication and access to information; financial inclusion; sustainable transport and mobility; better access to housing, water, sanitation and electricity; and social inclusion and reduced inequality.

Positive environmental sustainability outcomes include more careful, efficient and productive use of natural resources; reduced waste and improved waste management; the wider adoption of circular economy practices and measures; the adoption of renewable and cleaner energy technologies; reduced greenhouse gas emissions; reduced water, air and other environmental pollution; a slowing in the rate of land degradation, land use change and loss of forests and biodiversity; and measures and technologies that enable climate change adaptation and resilience.

The Fund only invests in companies that are sustainable investments which contribute to a social and/or environmental objective. The contribution of the Fund's investments to the social and environmental objectives are assessed by reference to two framework indicators – the manager's human development pillars and Project Drawdown climate change solutions.

Human development pillars

The manager has determined 10 broad pillars which they believe encapsulate the essence of human development and which can be mapped to companies. Each investee company must be contributing in a tangible way to at least one of the following pillars:

- Nutrition
- Healthcare and hygiene
- Water and sanitation
- Energy
- Housing
- Employment
- Finance
- Standard of living
- Education
- Information

Sustainable investment means an investment in an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

As at 31 December 2021, the Fund held **52** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, companies were contributing towards **142** pillars.

Climate change solutions

Project Drawdown is a non-profit organisation, founded in 2014, which has mapped, measured and modelled over 80 different solutions to global warming, with the ultimate goal of reaching drawdown – i.e. the point in the future when emissions stop increasing and start to steadily decrease. Each Fund investment is mapped by the manager against the c.80 solutions (which are captured in eight broader solutions of Buildings, Circular economy / industry, Conservation / restoration, Energy, Food system, Human development, Transport and Water). The manager's focus is on whether the companies themselves are making a meaningful contribution and will have meaningful involvement with the delivery of any of those solutions. Where the companies in which the Fund invests do contribute to any of the solutions, they will be involved in making products and delivering services directly, by enabling/supporting those solutions, or indirectly.

As at 31 December 2021, the Fund held **52** companies. **30 companies (58%)** were contributing towards **climate change solutions**. These companies were contributing towards **29** different solutions and **75** solutions in total.

These frameworks, alongside the manager's own bottom-up analysis, lean on measurable and reportable outcomes as evidence for determining a company's meaningful contribution to sustainable development.

Meaningful company contribution:

1. Demonstrates a clear link to the underlying issue and solution, including whether the contribution is direct, enabling/supporting or indirect.

2. Is relevant for the company either as a revenue/growth driver, as strategic initiatives backed by research and development or capital expenditure, or a function of strong culture or behaviours and 'how they do things' e.g. for equality and diversity.

3. Recognises negative impacts from the company, including contradictions and risks of perverse outcomes.

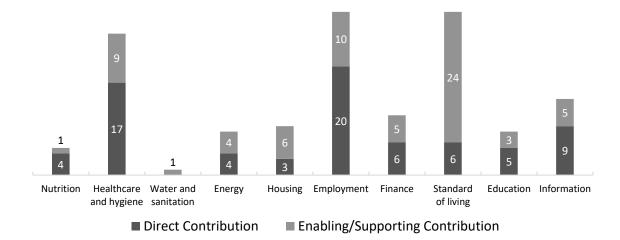

• How did the sustainability indicators perform?

Companies can contribute in many different ways to a better future for people and planet. To align with their bottom-up investment approach, the manager provides descriptions on their website, via their interactive Portfolio Explorer tool, on how they believe each company is contributing towards sustainable development. Click on the link below to access the tool.

■ Direct Contribution ■ Enabling/Supporting Contribution ■ Indirect Contribution

Product name:

Stewart Investors Worldwide Leaders Sustainability Fund Sustainable investment objective **Legal entity identifier:** 5493003C0PDCQZH4VL30

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to achieve long-term capital appreciation by investing in companies which both contribute to and benefit from sustainable development, achieving positive social and environmental sustainable outcomes.

Positive social sustainability outcomes include the enablement of improved health and wellbeing; access to income-generating and enterprise opportunities; fair employment and workplace safety; access to education and learning opportunities; communication and access to information; financial inclusion; sustainable transport and mobility; better access to housing, water, sanitation and electricity; and social inclusion and reduced inequality.

Positive environmental sustainability outcomes include more careful, efficient and productive use of natural resources; reduced waste and improved waste management; the wider adoption of circular economy practices and measures; the adoption of renewable and cleaner energy technologies; reduced greenhouse gas emissions; reduced water, air and other environmental pollution; a slowing in the rate of land degradation, land use change and loss of forests and biodiversity; and measures and technologies that enable climate change adaptation and resilience.

The Fund only invests in companies that are sustainable investments which contribute to a social and/or environmental objective. The contribution of the Fund's investments to the social and environmental objectives are assessed by reference to two framework indicators – the manager's human development pillars and Project Drawdown climate change solutions.

Human development pillars

The manager has determined 10 broad pillars which they believe encapsulate the essence of human development and which can be mapped to companies. Each investee company must be contributing in a tangible way to at least one of the following pillars:

- Nutrition
- Healthcare and hygiene
- Water and sanitation
- Energy
- Housing
- Employment
- Finance
- Standard of living
- Education
- Information

545

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the

Sustainable

and that the investee companies follow good governance practices.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

As at 31 December 2021, the Fund held **40** companies. **All companies (100%)** were contributing to at least one **human development pillar** and, in total, companies were contributing towards **102** pillars.

Climate change solutions

Project Drawdown is a non-profit organisation, founded in 2014, which has mapped, measured and modelled over 80 different solutions to global warming, with the ultimate goal of reaching drawdown – i.e. the point in the future when emissions stop increasing and start to steadily decrease. Each Fund investment is mapped by the manager against the c.80 solutions (which are captured in eight broader solutions of Buildings, Circular economy / industry, Conservation / restoration, Energy, Food system, Human development, Transport and Water). The manager's focus is on whether the companies themselves are making a meaningful contribution and will have meaningful involvement with the delivery of any of those solutions. Where the companies in which the Fund invests do contribute to any of the solutions, they will be involved in making products and delivering services directly, by enabling/supporting those solutions, or indirectly.

As at 31 December 2021, the Fund held **40** companies. **27** companies (68%) were contributing towards climate change solutions. These companies were contributing towards **27** different solutions and **71** solutions in total.

These frameworks, alongside the manager's own bottom-up analysis, lean on measurable and reportable outcomes as evidence for determining a company's meaningful contribution to sustainable development.

Meaningful company contribution:

1. Demonstrates a clear link to the underlying issue and solution, including whether the contribution is direct, enabling/supporting or indirect.

2. Is relevant for the company either as a revenue/growth driver, as strategic initiatives backed by research and development or capital expenditure, or a function of strong culture or behaviours and 'how they do things' e.g. for equality and diversity.

3. Recognises negative impacts from the company, including contradictions and risks of perverse outcomes.

Annual Depositary Report to the Shareholders

We, HSBC Continental Europe, Ireland, appointed Depositary to First Sentier Investors Global Umbrella Fund Plc (the "Company") provide this report solely in favour of the Shareholders of the Company for the year ended 31 December 2021 (the "Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Company for the Accounting Period and we hereby report thereon to the Shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

Report on the audit of the financial statements

Opinion on the financial statements of First Sentier Investors Global Umbrella Fund Plc ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2021 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 19, including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs (Ireland), we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence
 obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's
 ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our
 auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our

Deloitte.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND PLC

opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause the entity (or where relevant, the group) to cease to continue as a going concern.

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that the auditor identifies during the audit.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.
