While its components may differ, it is likely the Sub-Fund's performance and risk characteristics may bear some resemblance to that of its benchmark.

POLICIES

Main investment exposure At least 67% of assets invested in USD-denominated debt securities such as US Treasury securities, securities issued or guaranteed by the US government or its agencies, corporate debt securities and ABS (up to 15%). The Sub-Fund may enter into reverse repurchase transactions with highly rated counterparties collateralised with securities such as US Treasury securities, corporate securities, ABS and equities. Such collateral will be USD denominated only and restricted to investment grade where applicable. No maturity constraints apply to the collateral.

At the time of purchase, securities with a long-term rating are rated investment grade, with no more than 10% rated below A- by S&P or equivalent rating by at least one independent rating agency. Should ratings for a security differ between agencies, the highest rating will be used.

At time of purchase, securities with a short-term rating are rated at least A-2 by S&P (or equivalent rating). ABS are rated at least AAA by S&P (or equivalent rating) at the time of purchase. Such ABS will not include securities with significant extension risk.

The Sub-Fund may also invest in unrated securities of comparable credit quality to those specified above.

The weighted average duration of the portfolio will not exceed one year, and the initial or remaining maturity of each debt security will not exceed three years from the date of settlement. The initial or remaining average life of MBS/ABS will not exceed three years from the date of settlement.

At least 51% of assets are invested in issuers with positive environmental and/or social characteristics that follow good governance practices as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data.

The Sub-Fund invests at least 10% of assets excluding Ancillary Liquid Assets, deposits with credit institutions, money market instruments, money market funds and derivatives for EPM, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Management Company's Website (www.jpmanassetmanagement.lu).

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign and 90% of investment grade securities purchased.

Other investment exposures Up to 20% of net assets in Ancillary Liquid Assets for managing cash subscriptions and redemptions as well as current and exceptional payments.
