What is this product?

Type: This investment fund is a sub-Fund of Legal & General SICAV, an umbrella type open-ended investment company incorporated as a société d'investissement à capital variable. The Fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Term: There is no fixed maturity date.

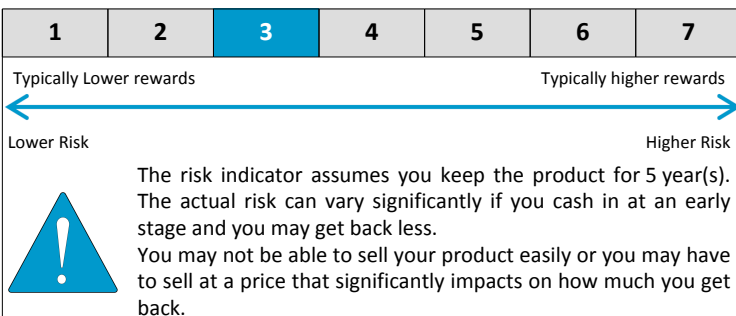

Objectives: The Fund aims to provide investors with a combination of growth and income. The Fund aims to deliver this objective while decarbonising the portfolio over time, targeting a 50% reduction in weighted average carbon intensity by 2030, compared to a December 2019 baseline level. The Fund will invest predominantly in fixed income securities (investments that provide a certain level of income). These include corporate bonds and other debt instruments, issued in the UK or overseas. In addition to decreasing the weighted average carbon intensity over time, the Fund promotes a range of environmental and social characteristics by:

- Excluding investments in bonds issued by companies in the LGIM Future World Protection List ("FWPL").
- Excluding companies from the Fund which do not meet the Manager's "Climate Impact Pledge", in order to encourage strong governance and sustainable strategies.

The Fund will invest primarily in debt rated by a recognised rating agency as investment grade (rated as lower risk). The minimum credit rating at the time of purchase shall be no less than investment grade, although the Fund may retain bonds which are downgraded below investment grade after purchase. The fund will limit its investment in sub-investment grade debt to 10% of its Net Asset Value. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. The Fund may also invest in unrated bonds which have not been rated by a credit rating agency. The Fund may also invest in other transferable securities, including but not limited to, depository receipts, permitted deposits, money market instruments, cash, near cash and units in collective investment schemes. Derivatives may also be used to protect or enhance the value of the Fund or to seek to reduce the risks of certain investments. Derivatives are financial instruments whose values are based upon the price of one or more other asset(s). Some investments held by the Fund may be issued in currencies other than Sterling. The Fund may use a technique known as currency hedging to seek to protect against exchange rate movements between other currencies and Sterling. The Fund may invest up to 20% of its assets in asset-backed securities (ABS) and mortgage-backed securities (MBS). The Fund may invest up to 20% of its assets in contingent convertible debt securities. The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies. The Fund promotes a range of environmental and social characteristics. Further information on how such characteristics are met by the Fund can be found in the Supplement. The depository of the Fund is Northern Trust Global Services SE. Further information about the Fund and the share class can be obtained from the Fund's prospectus and the annual and semi-annual reports, which are available, in addition to the latest prices for the unit class and details of any other unit classes, free of charge at: www.lgim.com.

Intended retail investor: This Fund is designed for investors looking for income or growth from an investment in fixed income securities. You can buy or sell units on any normal business day. If we receive your instruction before 2pm (Irish time), units will be bought or sold at the next business day's price. Whilst investors can redeem at any time this Fund may not be appropriate for those who plan to withdraw their money within 5 years. The Fund's base currency is denominated in sterling (GBP).
