This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LGT Sustainable Bond Fund Global Inflation Linked (the "Fund") a sub-fund of the LGT Funds SICAV (the "UCITS") Class (USD) A – ISIN/Valor: LI0148578003/14857800

This Fund is managed by LGT Capital Partners (FL) Ltd (the "Manager").

1. Objectives and Investment Policy

The objective of this Fund is to achieve reasonable capital growth that is protected against inflation. The Fund will seek to achieve this by investing primarily in inflation-linked, interest-bearing debt securities or equivalent securities issued by private or public borrowers. Synthetic structures (i.e. through derivatives) may be utilised in order to achieve a broader diversification across debtors, a more flexible maturity management and protection against inflationary risks in markets without inflation-linked, interest-bearing debt securities. The Fund may invest in derivatives (financial instruments derived from other securities or assets) for hedging purposes, efficient portfolio management and / or investment purposes. Environmental, social and governance ("ESG") aspects are considered as part of the Fund's investment process. The Fund is actively managed in reference to its benchmark, the Bloomberg World Government Inflation-Linked Bonds 1 to 10 Year TR «hedged» Index (the "Benchmark"), by virtue of the fact that the investment manager uses the Benchmark to provide a framework for the Fund's main investable universe, for risk measurement metrics and for performance comparison purposes.

A proportion of the Fund's portfolio, such proportion to be defined by the investment manager from time to time, may be components of the Benchmark and the portfolio may have similar weightings to the Benchmark, however, the investment manager retains full discretion over the composition of the portfolio subject to the investment restrictions specified in the prospectus. Accordingly, the Fund may, at the investment manager's discretion, be invested in markets and constituents not referenced in the Benchmark to the extent and within such constraints as the investment manager determines appropriate. The Fund may have positions in cash and cash equivalents. Investors may on a daily basis subscribe for shares of the Fund and may on a daily basis redeem shares of the Fund. Any income generated by the Fund is distributed. The portfolio transaction costs may have a material impact on performance. The Fund may not be appropriate for investors who plan to withdraw their money within less than 3 years.

2. Risk and Reward Profile

Typically lower rewards and lower risk

Typically higher rewards and higher risk

- This risk indicator is based on historical data; future developments can therefore not be predicted. The classification of the Fund may change in the future and is not a guarantee.
- The lowest category does not mean "risk free".

For further information on the Fund's risks, please refer to the detailed description in the prospectus.

The Fund has been classified as **category 3**, as its unit price usually fluctuates little, which means that both the risk of loss and profit opportunities are low.

The following are typical risks to which the fund may be exposed:

- Market risks:** The risk of losses in an investment arising from adverse movements in market prices.
- Liquidity risks:** The risk that the Fund is unable to meet short term financing demands or has to sell investment securities at lower price levels under the condition of reduced market demand.
- Operational risks:** The risk of the Fund incurring losses as a result of inadequate or failed processes, people or systems failures, or from external or force majeure events.
- Political and legal risks:** The risk of change in rules and standards applied in the jurisdiction of an asset of the Fund. This includes restrictions on currency convertibility, the imposition of taxes or transaction controls, limitations on property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Credit / counterparty risks:** The risk that a counterparty fails to meet contractual financial obligations on a timely basis.
- Derivative risks:** The risk of losses from an investment in derivatives, due to high sensitivity to price movements of the underlying asset, and/or increased leverage.
- Issuer default risk:** The risk of losses of an investment in debt securities or equivalent due to the issuer becoming insolvent.
