What is this product?

Type: Shares of a Sub-Fund of MULTI UNITS FRANCE, a SICAV.

Term: The Sub-Fund has an unlimited duration. The Management Company may dissolve the Fund by means of liquidation or merger with another fund in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Not applicable

Objectives: The Fund is a passively managed index-based UCITS.

The objective of the Fund's management is to be inversely exposed with a daily rebalancing to the European stock market by replicating, both upwards and downwards, the development of the EURO STOXX 50® Daily Double Short strategy index (gross dividends reinvested) (the "Benchmark Index"), denominated in euro (EUR) and which is a short selling strategy (with a daily -2x leverage effect), with daily rebalancing, on the EURO STOXX 50® Total Return index (gross dividends reinvested) (the "Parent Index"), representative of the 50 largest assets belonging to euro zone member countries, with daily rebalancing, while keeping the tracking error (the "Tracking Error") between the performances of the Fund and those of the Benchmark Index to a minimum.

The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus.

Over a period of one working day, any appreciation in the value of the Parent Index shall lead to stronger depreciation of the net asset value of the Fund, meaning that investors will therefore not benefit from the appreciation in the value of the Parent Index.

However, for a period greater than one working day, due to the daily leverage readjustment conducted in the Benchmark Index, the performance of the Fund will not be equal to double the inverse of the performance of the Parent Index and may even follow an identical (i.e. not inverse) development.

The STOXX website (www.stoxx.com) provides more detailed information about STOXX indices.

The Fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (financial futures instruments, "FFIs").

The Fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark Index through FFIs.

The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com.

In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Intended retail investors: This product is intended for investors with an average knowledge of and some experience of investing in funds and who are prepared to take on a high level of risk to their original capital.

Redemption and transaction: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the MULTI UNITS FRANCE prospectus.

In accordance with the prospectus, net income and capital gains from sales may be capitalised or distributed at the discretion of the Management Company.

More information: Further information regarding the Sub-Fund, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management - 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of this Sub-Fund is available at www.amundi.fr.

Depository: SOCIETE GENERALE.

What are the risks and what could I get in return?

RISK INDICATOR

Lowest risk

Highest risk

The risk indicator assumes you keep the product for one day.

We have classified this product as 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

PERFORMANCE SCENARIOS

The unfavourable, intermediate and favourable scenarios presented are illustrations based on the worst, average and best performance of the sub-fund over the past one day. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

This type of scenario occurred for an investment using a suitable proxy.

What happens if Amundi Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of MULTI UNITS FRANCE. The assets and liabilities of the Sub-Fund are segregated from those of other funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

*On the secondary market: the Fund is an ETF, so investors who are not Authorised Participants must, in principle, buy or sell the Fund's shares on the secondary market. On the secondary market, investors may incur brokerage charges and/or transaction charges when they place their orders to buy/sell on the relevant stock exchange. These charges are collected by market intermediaries rather than being deducted by/paid to the Fund or the Management Company. Investors may also pay an additional sum amounting to the difference between the sale price and the purchase price of the Fund's shares (bid-ask spread).

On the primary market: Authorised Participants who subscribe to/redeem their shares directly from the Fund will pay the costs applicable to the Fund's primary market as described in the prospectus.

How long should I hold it and can I take money out early?

Recommended holding period: One day is based on our assessment of the risk and reward characteristics and costs of the sub-fund.

This product is designed for short-term investment; you should be prepared to stay invested for at least 0.00273 years. You can redeem your investment at any time, or hold the investment longer.

Order Schedule: Orders to buy and/or sell (redeem) units received and accepted by 5:00 pm on any business day in France are ordinarily processed on the same day (using the valuation of that day).
