M&G (Lux) Optimal Income Fund

a sub-fund of M&G (Lux) Investment Funds 1

USD Class X-H – Accumulation shares ISIN no. LU2402425677

Managed by M&G Luxembourg S.A.

Objective and investment policy

The fund aims to provide a combination of capital growth and income based on exposure to optimal income streams in investment markets.

Core investment: The fund typically invests directly in a mix of assets within the following investment limits:

- at least 50% in fixed income securities (including bonds and asset-backed securities);
- up to 20% in company shares.

The fund invests in bonds issued by governments, government-related institutions and companies from anywhere in the world, including emerging markets. These bonds can be denominated in any currency. The fund may invest in bonds of any credit quality, including up to 100% in lower quality bonds. A minimum of 80% of the fund is typically invested in assets denominated in euro or in other currencies hedged back to euro.

Norms-based exclusions apply to the fund's direct investments. These are investments assessed to be in breach of commonly accepted standards of behaviour related to human rights, labour rights, environment and anti-corruption. The fund maintains a weighted average ESG rating above the average ESG rating of the benchmark.

Other investments: Contingent convertible debt securities, other funds and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief:

- Investment approach: The fund is a flexible global bond fund. The investment manager selects investments based on an assessment of macroeconomic, asset, sector and stock-level factors. Spreading investments across issuers and industries is an essential element of the fund's strategy. In seeking an optimal income stream from investments, the investment manager may invest in a company's shares if they present a more attractive investment opportunity relative to its bonds. Consideration of ESG factors is fully integrated into credit analysis and investment decisions.

- Responsible investment approach: The fund applies a positive ESG tilt approach, as defined in the prospectus.

Benchmark: A composite index comprising:

- 1/3 Bloomberg Global Aggregate Corporate Index EUR Hedged
- 1/3 Bloomberg Global High Yield Index EUR Hedged
- 1/3 Bloomberg Global Treasury Index EUR Hedged

The benchmark is a comparator used solely to measure the fund's performance and reflects the scope of the fund's investment policy but does not constrain portfolio construction. The fund is actively managed. The fund's holdings may deviate significantly from the benchmark's constituents. The benchmark is not an ESG benchmark and is not consistent with the ESG Criteria.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 13:00 Luxembourg time will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 3 because its simulated Net Asset Value has shown low to medium rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.

- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

- High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

- The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

- The hedging process seeks to minimise, but cannot eliminate, the effect of movements in exchange rates on the performance of the hedged share class. Hedging also limits the ability to gain from favourable movements in exchange rates.

- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

- ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.lu/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0,00%
Exit charge	3,00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	2,35%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases you may pay less. The exit charge will reduce to 2% after the investment has been held for one year, and will subsequently reduce by 1% per year until year three. From year four, the exit fee is set at 0%.

The ongoing charge figure shown here is an estimate of the charges because the share class has only recently launched. The fund's annual report for each financial year will include details on the exact charges made. This figure may change from year to year. It excludes portfolio transaction costs.

The audit fees and custody transaction charges are borne by M&G until the fund size increases to above 200 million.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.lu/literature

Past performance

The share class launched on 23 November 2021. There is insufficient information available to provide a useful indication of past performance. Past performance information will be shown when the share class has been in existence for a complete calendar year.
