Man Funds VIII ICAV General Information

Listed below is some general information for Man Funds VIII ICAV (the "ICAV"). For full details please refer to the Prospectus.

Prospectus

The last revised Prospectus is dated 1 July 2022. The ICAV filed the revised Prospectus with the Central Bank of Ireland (the "Central Bank"). The main changes made to the revised Prospectus were updates to the additional distribution and selling restrictions sections of the Prospecus to remove unnecessary jurisdications, updates to key personnel within AHL and a number of minor additional passage of time updates.

Pricing

There is a single price for buying and selling the Redeemable Participating Shares issued by the ICAV (the "Redeemable Participating Shares"). This is represented by the Net Asset Value, the calculation of which is the responsibility of Man Asset Management (Ireland) Limited acting as Alternative Investment Fund Manager (the "AIFM") and is undertaken by BNY Mellon Fund Service (Ireland) Designated Activity Company (the "Administrator").

Minimum investment

The minimum initial investment for the Redeemable Participating Shares is US\$10,000 (or EUR10,000/CHF10,000), unless otherwise determined by the Directors.

Dealing

Dealing in the Redeemable Participating Shares takes place daily on the first business day after the day on which a valuation point occurred.

Dividend policy

It is not intended to distribute to the ICAV's Redeemable Participating Shareholders any income or gains by way of dividend.

Man Funds VIII ICAV Investment Manager's Report

Market summary

The third quarter commenced with optimism that inflation had peaked and hence that there might be an early end to the current Federal Reserve (the 'Fed') rate hiking cycle. Whilst making remarks at the Jackson Hole Economic Symposium in late August, however, Fed Chair Powell dismissed the idea of a looming pivot to a less-aggressive policy, dashing hopes that the end of the rate hike cycle was in sight. Indeed, at the September Federal Open Market Committee ('FOMC') meeting, the Fed enacted a 75 basis points rise, and signalled a continuation along this path. During the last few days of the quarter there was considerable volatility in UK bonds and the British pound, after the new government announced swathing tax cuts without an explanation of how these might be funded. In much of the fourth quarter, however, markets were much more upbeat. The October and November US CPI readings surprised on the downside which kindled hopes of a dovish pivot. This was somewhat extinguished in mid-December, however, as deteriorating economic data and hawkish rhetoric from a plethora of central banks precipitated a sharp sell-off across global markets. As the year drew to a close, the Bank of Japan ('BoJ') seized the narrative, by altering its Yield Curve Control ('YCC') policy.

Performance review

In contrast to H1, Man Funds VIII ICAV (the "ICAV") found markets harder to navigate in H2, returning -3.39%¹ net of fees, with losses in commodities, credit, and equities overcoming gains in fixed income and FX.

Despite finishing H2 slightly in the black, equity markets saw significant rallies, then falls. Three months saw rallies in excess of 5%. Shorts before all three of these episodes were cut back and occasionally turned long, and performance was impacted negatively. Worst performers were European telecom and capital goods stocks, whilst the Hang Seng and MSCI EM indices were profitable. Credit markets oscillated similarly, and losses were concentrated in US indices.

Losses were experienced across all three commodity components. Energy trading lost out most, with carbon emissions the worst offender given rangebound prices with sharp reversals. European gas and electricity markets, on the other hand, benefitted from longs in Q3 on demand from Europe trying to wean itself off Russian supplies, then was able to profit from short positions in Q4 on milder weather and reports of full storage vessels. Within metals, silver and copper lost out most as prices rallied after falling in H1. In agriculturals, coffee prices fell on reports of a bumper crop in Brazil, which hurt the Fund's long position.

The US dollar's rise against a basket of its trading partners started to stall, then came to an abrupt halt after a better-than-expected CPI print in November when investor perception was that central banks may not have to hike rates as much as anticipated. Nevertheless, over H2 as a whole, the ICAV profited from a short Euro position against the US dollar, not giving back too much from November's reversal. In contrast, crosses against the Japanese yen generated losses after the significant moves around the YCC announcement.

Fixed income's profitable run from short positioning continued in H2. Top performers were UK gilts whose yields spiked higher in September after a chaotic "mini-budget" from the country's new government. Losses were seen in Japanese government bonds as the Bank of Japan first of all did not follow other central banks in raising rates, then changed tack suddenly in December with the YCC news.

Future outlook

We do not know what 2023 has in store. Whilst 2022 validated trend-following's credentials in a rising inflation environment, the strategy's continued success is not contingent on a continuation of this theme. Trend-following is an active strategy, a timing mechanism, which is informed by price moves and adjusts its positions accordingly. Historic analysis shows that the strategy should be able to perform irrespective of whether inflation has peaked. Entering into 2023, the Fund is positioned short fixed income, short USD, long credit (via short CDS) small long equities, and long commodities.

Details on the principal risks and investment or economic uncertainties that the ICAV might face are outlined in Note 6 of the audited financial statements for the year ended 30 June 2022.

AHL Partners LLP January 2023

¹Performance data is shown net of fees with income reinvested, as at 31 December 2022, and does not take into account sales and redemption charges where such costs are applicable. Returns are calculated net of (up to) 3% management fees and 20% performance fees for Man AHL Diversified DN USD share class. Other share classes may charge higher fees. Please consult the Prospectus or KIID for more information.

The above Investment Manager's Report is a commentary for the reporting period 1 July 2022 to 31 December 2022. It does not include or take account of any movements, returns or market information for subsequent periods. Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Certain indices/measures mentioned on this page have been provided for information purposes only. They are intended to provide a comparative indication of particular asset classes, investment sectors, or financial markets more widely ("market backdrop"). Unless indicated otherwise, the investment process of the Fund is independent of these indices/measures. The organisations and/or financial instruments mentioned are for reference purposes only. The content of this material should not be construed as a recommendation for their purchase or sale.

*Includes cash transfer of US\$2,277,063 from a fund managed by an entity of Man Group plc during August and September 2022.

The accompanying notes form an integral part of these financial statements.

1. General

Man Funds VIII ICAV (the "ICAV") is an umbrella-type Irish Collective Asset-Management Vehicle with segregated liability between sub-funds. The ICAV was previously organised under the laws of Ireland as an open-ended limited liability investment company with variable capital which provided facilities for the direct or indirect participation by the public and was authorised under the Companies Act 2014 and converted to an Irish Collective Asset-Management Vehicles Act 2015 and the AIFMD Regulations.

The ICAV is authorised by the Central Bank of Ireland. As at 31 December 2022, the ICAV includes the following sub-fund: Man AHL Diversified (the "Fund"). These financial statements present the results of the ICAV comprising of the Fund. The Redeemable Participating Shares of the ICAV are categorised as Class A Redeemable Participating Shares and Class B Redeemable Participating Shares which consist of the following:

Class A Redeemable Participating Shares Class DN USD Class DN H CHF Class DN H EUR Class B Redeemable Participating Shares Class DNR USD Class DNR H EUR Class DNR H CHF

The ICAV commenced trading in March 1996. Its investment objective is to achieve medium-term growth of capital while restricting the associated risks, by trading a diversified portfolio of investments on derivative and inter-bank currency markets through the AHL Diversified Programme which is managed by AHL. Furthermore, the ICAV also seeks exposure to the AHL Evolution Programme by allocating to a managed fund, AHL Evolution Ltd, which is managed by the same Investment Manager. AHL is an investment division of Man Group and it operates through various legal vehicles. AHL provides investors with highly liquid and efficient trading strategies which offer low correlation to more traditional investment disciplines. Man Group means Man Group plc and all or any of its subsidiaries and associates, as the context requires.

The ICAV aims to perform independently of traditional stock and bond investments thereby providing valuable diversification benefits and enhancing the risk/reward profile of a traditional investment portfolio. It is the objective of the ICAV to generate capital gains rather than interest. At any point in time no more than 15% of the Net Asset Value (the "NAV") will be applied towards margin requirements with respect to off-exchange contracts.

The ICAV's accounting year will end each year on 30 June. The ICAV's semi-annual accounting period will end each year on 31 December.

Terms defined in the prospectus (the "Prospectus") shall, unless the context otherwise requires, have the same meaning in these financial statements.

The ICAV is an Alternative Investment Fund ("AIF") in accordance with the Directive 2011/61/EU Alternative Investment Fund Managers Directive ("AIFMD") and of the Council of 8 June 2011 on Alternative Investment Fund Managers. Man Asset Management (Ireland) Limited is an authorised Alternative Investment Fund Manager ("AIFM").

The ICAV has adopted the corporate governance code for collective investment schemes and management companies (the "Code") issued by the Irish Funds (the "IF") (formerly known as The Irish Funds Industry Association).

The most recent applicable Prospectus of the ICAV is dated 1 July 2022.

2. Basis of preparation

The unaudited semi-annual financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union. These unaudited semi-annual financial statements have been prepared in accordance with International Accounting Standard 34: *Interim Financial Reporting* ("IAS 34"). The unaudited semi-annual financial statements have been prepared on an historical cost basis except for financial assets and liabilities held at fair value through profit or loss, that have been prepared based on fair value. The unaudited semi-annual financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the ICAV's annual financial statements as at 30 June 2022.

There were no recent accounting pronouncements applicable to the ICAV in the current period.

At the date of authorisation of the financial statements there were a number of other standards and interpretations which were in issue but not yet effective. Management anticipate that the adoption of these standards and interpretations in future periods will have no material impact on the financial statements of the ICAV.

Man Funds VIII ICAV Notes to the financial statements (continued) For the period from 1 July 2022 to 31 December 2022

3. Cash and cash equivalents, collateral balances with brokers and collateral balances due to brokers

At the period end, amounts disclosed as cash and cash equivalents, collateral balances with brokers and collateral balances due to brokers were held at BNP Paribas, The Bank of New York Mellon SA/NV (the "Banks") and The Bank of New York Mellon SA/NV, Citigroup, Credit Suisse AG, Goldman Sachs, HSBC Bank plc, J.P. Morgan, Merrill Lynch and Co., Inc, Morgan Stanley and NatWest Group plc (the "Brokers"). These include amounts transferred as collateral (which is subject to security interest) against open derivatives, deposits held at call with banks and, other short-term highly liquid investments with original maturities of three months or less.

4. Financial assets and liabilities at fair value through profit or loss

Fair value of financial instruments

The ICAV has established a framework with respect to the measurement of fair values. This includes a periodic review by the Investment Manager of all significant fair value measurements, including Level 3 fair values.

The Investment Manager regularly reviews significant unobservable inputs and valuation adjustments (if any). If third party information is used to measure fair values, the Investment Manager assesses the evidence obtained from the third parties to support the conclusion such that valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

The ICAV classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in determining the measurements in line with IFRS 13.

The fair value hierarchy has the following levels:

- Level 1 Quoted market price in an active market for an identical instrument.
- Level 2 Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques

Listed or publicly traded investment in equity securities, government bonds and derivatives

When fair values of listed or publicly traded equity securities, government bonds and derivatives are based on quoted market prices, or binding dealer price quotations, in an active market for identical assets without any adjustments, the instruments are included within Level 1 of the hierarchy.

OTC derivatives

The ICAV uses widely recognised valuation techniques for determining fair values of OTC derivatives. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including both credit risk and foreign exchange spot and forward rates and interest rate curves. For these financial instruments, inputs used are market observable and are, therefore, included within Level 2.

Unlisted managed funds

The ICAV invests in managed funds, managed by the same Investment Manager, which are not quoted in an active market and which may be subject to restrictions on redemptions such as lock up periods, redemption dates and side pockets. The Investment Manager considers the valuation techniques and inputs used in valuing these funds as part of its due diligence prior to investing, to ensure they are reasonable and appropriate and therefore the NAV of these funds may be used as an input into measuring their fair value. In measuring this fair value, the NAV of the funds is adjusted, as necessary, to reflect the restrictions on redemptions, future commitments and other specific factors of the investee fund and the investee fund's manager. In measuring fair value, consideration is also paid to any transactions in the shares of the ICAV. Depending on the nature and level of adjustments needed to the NAV and the level of trading in the fund, the ICAV classifies these funds as either Level 2 or Level 3.

Man Funds VIII ICAV Notes to the financial statements (continued) For the period from 1 July 2022 to 31 December 2022

4. Financial assets and liabilities at fair value through profit or loss (continued)

Valuation techniques (continued)

The following tables are a summary of the classification within the fair value hierarchy of the ICAV's financial instruments carried at fair value at 31 December 2022 and 30 June 2022:

| As at 31 December 2022 | Level 1 US\$ | Level 2 US\$ | Level 3 US\$ | Total Fair Value US\$ |

Total financial liabilities at fair value through profit or loss

Short term balances are excluded from the tables above as their carrying values at the period end approximates to their fair values.

Investments are reviewed at each period end to ensure that they are correctly classified between Level 1, 2 and 3 in accordance with the fair value hierarchy outlined above. Where an investment's characteristics change during the period and investments no longer meet the criteria of a given level, they are transferred into a more appropriate level at the end of the relevant financial reporting period. For the period/year ended 31 December 2022 and 30 June 2022, there were no transfers between Level 1 and Level 2.

(15,545,234)

(9,535)

(41,931,940)

Man Funds VIII ICAV Notes to the financial statements (continued) For the period from 1 July 2022 to 31 December 2022

4. Financial assets and liabilities at fair value through profit or loss (continued)

Valuation techniques (continued)

The following table includes a reconciliation of the amounts for the period/year ended 31 December 2022 and 30 June 2022 for financial instruments classified within Level 3:

| | 31 December 2022 Common stock US\$ | 31 December 2022 Total US\$ | 30 June 2022 Common stock US\$ | 30 June 2022 Total US\$ |
|---|--|-----------------------------------|--------------------------------------|-------------------------------|
| Financial assets and liabilities at fair value through profit or loss | | | | |
| Opening balance | (9,535) | (9,535) | 153 | 153 |
| Total gains and losses | | | | |
| Realised | | - | - | - |
| Unrealised | 6,993 | 6,993 | - | - |
| Purchases | - | - | - | - |
| Sales | - | - | - | - |
| Transfers into Level 3 | - | - | (9,535) | (9,535) |
| Transfers out of Level 3 | - | - | (153) | (153) |
| Closing balance | (2,542) | (2,542) | (9,535) | (9,535) |

All net realised and unrealised gains/(losses) in the tables above are reflected in the accompanying statement of comprehensive income. Net realised and unrealised loss amounts on Level 3 securities held as at 31 December 2022 was US\$6,993 (30 June 2022: US\$(14,106)).

The fair value of investments classified within Level 3 is based on unobservable inputs that may be subject to significant variability. Because of the inherent uncertainty of valuation with respect to such investments, the ICAV's estimate of fair value may differ significantly from fair values that would have been used had observable inputs been available for the valuation of such investments, and the differences could be material.

The following table presents additional information about valuation techniques and inputs used for investments that are measured at fair value and are categorised within Level 3 as at 31 December 2022 and 30 June 2022:

| | Fair value as at | | | |
|--------------|------------------|------------------------|--------------|--------------------------|
| | 31 December 2022 | | Unobservable | |
| Description | US\$ | Valuation techniques | inputs | Range (weighted average) |
| Common stock | (2,542) | Grey market quotations | N/A | N/A |
| | Fair value as at | | | |
| | 30 June 2022 | | Unobservable | |
| Description | US\$ | Valuation techniques | inputs | Range (weighted average) |
| Common stock | (9,535) | Grey market quotations | N/A | N/A |

Forward contracts

As part of its portfolio management techniques, the ICAV may use forward contracts to economically hedge any non-functional currency exposure (although formal hedge accounting is not used). Forward contracts may also be used for trading purposes. Forward contracts entered into by the ICAV represent a firm commitment to buy or sell an underlying asset, or currency at a specified value and point in time based upon an agreed or contracted quantity.

Forward contracts may expose the ICAV to the risks associated with the absence of an exchange market on which to close out an open position. The Investment Manager closely monitors the ICAV's exposure under forward contracts as part of the overall management of the ICAV's market risk.

Futures contracts

The ICAV is subject to interest rate, stock index and commodity risks in the normal course of pursuing its investment objectives. The ICAV may use futures contracts to gain exposure to, or hedge against changes in the value of interest rates, commodities or index. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. A futures contract is an exchange traded financial instrument and is often cash settled.

Equity swaps

Equity swaps represent agreements that obligate two parties to exchange cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or otherwise deemed notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Therefore amounts required for the future satisfaction of the equity swaps may be greater or less than the amount recorded. The ultimate gain or loss depends upon the prices recorded at the period end date.

4. Financial assets and liabilities at fair value through profit or loss (continued)

Derivative financial instruments

The ICAV is subject to both market and credit risk in trading derivative financial instruments. Market risk is the potential for changes in value due to changes in market interest rates, foreign exchange rates, indices and changes in the value of the underlying financial instruments. Credit risk is the possibility that a loss may occur if counterparties fail to perform according to the terms of the contract. Substantially all derivative contracts are transacted on a margin basis. Such transactions may expose the ICAV to significant off-balance sheet risk in the event margin deposits and collateral investments are not sufficient to cover losses incurred.

The Investment Manager manages the risk associated with these transactions by maintaining margin deposits and collateral investments with its brokers in compliance with individual exchange regulations and internal guidelines. The Investment Manager also takes an active role in managing and controlling the ICAV's market and counterparty risks and monitoring trading activities and margin levels daily, and, as necessary, deposits additional collateral or reduces positions.

Derivative financial instruments are generally based on notional amounts which are not recorded in the financial statements. These notional amounts represent the theoretical principal value on which the cash flows of the derivative transactions are based. Unrealised appreciation or depreciation, rather than notional amounts, of the derivatives traded by the ICAV are included in the statement of financial position.

As at 31 December 2022 and 30 June 2022, the ICAV was exposed, via its investments in derivative financial instruments, to underlying positions representing financial instruments for which notional amounts are summarised below. The notional value of derivative activity as at 31 December 2022 and 30 June 2022 is representative of the derivative trading during the period.

| | Notional Amounts | | | | | |
|----------------------------|------------------|------------------|---------------|--------------|--|--|
| | Long | Short | Long | Short | | |
| | 31 December 2022 | 31 December 2022 | 30 June 2022 | 30 June 2022 | | |
| | US\$ | US\$ | US\$ | US\$ | | |
| Commodity futures | 170,582,223 | 61,654,290 | 94,100,767 | 138,453,367 | | |
| Foreign exchange futures | 626,839 | - | 14,321,122 | - | | |
| Interest rate futures | 23,834,884 | 1,133,996,807 | 30,680,398 | 989,495,876 | | |
| Stock index futures | 53,221,656 | 38,667,113 | 7,128,361 | 94,529,869 | | |

8. Fees and expenses

Management fees

Man Asset Management (Ireland) Limited (the "AIFM") was appointed to carry out the management of the ICAV. The fees payable to the AIFM are calculated and paid quarterly in arrears. They are based on the following sliding scale and are calculated by reference to the NAV at the last valuation point in each quarter (being the last valuation point in March, June, September and December).

| Amount of the NAV to which the fee is applied (expressed in US\$) | Fee will comprise an amount equal to the sum of US\$12,500 per quarter and; additionally |
|--|--|
| 0 - 50,000,000 | One quarter of 0.30% of the NAV at that valuation point |
| 50,000,000.01 - 100,000,000 | An amount equal to one quarter of 0.20% of the NAV at that valuation point |
| 100,000,000.01 - 249,999,999.99 | An amount equal to one quarter of 0.125% of the NAV at that valuation point |
| 250,000,000 - 499,999,999.99 | An amount equal to one quarter of 0.10% of the NAV at that valuation point |
| 500,000,000 or more | An amount equal to one quarter of 0.05% of the NAV at that valuation point |

The AIFM is also entitled to receive the following transaction fees from the ICAV in consideration of the services provided by the Administrator:

- i. A fee of US\$75 per new investor account; plusii. A transaction fee of US\$50 per Shareholder transaction; plus;
- iii. An annual Shareholder maintenance fee of US\$25 per Shareholder account (subject to a minimum charge of US\$10,000); plus
- iv. An annual product complexity fee of US\$10 per Shareholder account (subject to a minimum charge of US\$10,000); plus
- v. US\$3,500 per annum as an annual administration fee; plus
- vi. An amount equal to 0.05% per annum of the nominal value of the securities held by Administrator subject to a minimum annual fee of US\$2,500 per annum plus out of pocket expenses
- vii. The sum of fees (i) to (iv) shall be subject to a cap of 20 basis points of NAV.

The AIFM pays fees to BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") for administration services provided.

The AIFM shall also be entitled to be reimbursed all reasonable and vouched expenses incurred in the performance of its duties under the management agreement (including those expenses incurred by third party service providers such as the Administrator).

Prime Brokers' fees

Each Prime Broker are entitled to receive fees for their respective services at normal commercial rates which shall not exceed, in respect of each of each Prime Broker, up to 1% per annum of the value of any securities loaned to the ICAV, in addition to interest charges on any financing provided by the relevant Prime Broker to the ICAV.

Man Funds VIII ICAV Notes to the financial statements (continued) For the period from 1 July 2022 to 31 December 2022

8. Fees and expenses (continued)

Investment management and performance fees

The ICAV has entered into an Investment Management Agreement pursuant to which AHL Partners LLP has been appointed Investment Manager.

The fees payable pursuant to the Investment Management Agreement comprise:

- (a) an investment management fee (calculated daily and payable monthly) in respect of Class DN Redeemable Participating Shares equal to a pro rata amount of 3% per annum of the Net Asset Value of such Class at each valuation Point;
- (b) an investment management fee (calculated daily and payable monthly) in respect of Class DNR Redeemable Participating Shares equal to a pro rata amount of 2% of the Net Asset Value of such Class at each valuation point; and
- (c) a performance fee (accrued daily, calculated daily and payable monthly) in respect of each Class of Shares equal to 20% of any net new profits attributable to that Class as determined at each valuation point.

The investment management and performance fees are paid to the AIFM, as commissionaire for the Investment Manager.

Introducing broker fees

Introducing broker fees are charged by the Introducing Broker at an amount calculated daily and payable monthly equal to one fifty second of 1% of the NAV at each valuation point.

Transaction and brokerage costs

Transaction and brokerage costs consist entirely of institutional charges for the periods ended 31 December 2022 and 31 December 2021 which cover exchange and other third party costs, that are payable to brokers. These costs have been netted against realised loss on investments.

Operating expenses

The Manager discharges, out of the assets of the ICAV, all of the ICAV's offering, operational and administrative expenses including legal, accounting filing, printing and registration fees.

Directors' fees and expenses

The Directors are entitled to receive a fee and remuneration for their services at a rate to be determined from time to time by the Directors. The Directors may also be paid, inter alia, for travelling, hotel and other expenses properly incurred by them in attending meetings of the Directors or in connection with the business of the ICAV. John Morton waived receiving Directors' fee for the period/year ended 31 December 2022 and 30 June 2022.

Depositary fees

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary") is entitled to receive remuneration for its services to the ICAV to the amount of 0.02% per annum of the NAV at the last valuation point in each month. In addition to such fee, the Depositary is also entitled to be reimbursed all reasonable expenses incurred by it in the exercise of its duties in connection with the Depositary Agreement. Such reimbursement of reasonable expenses is payable out of the assets of the ICAV. Any sub-Depositary fees incurred are paid out of the assets of the ICAV provided that such fees are at normal commercial rates. The remuneration which the Depositary shall be entitled to receive as remuneration for its services to the ICAV may be increased up to 0.03% per annum of the Net Asset Value at the last valuation point in each month without prior notification to Shareholders.

The Depositary fees amounted to US\$29,250 during the period (31 December 2021: US\$20,670).

Soft commission arrangements

The Investment Manager utilises various brokers and dealers to execute securities transactions. Portfolio transactions for the ICAV are allocated to brokers and dealers on the basis of best execution (in accordance with the rules of the Financial Conduct Authority ("FCA") based on a number of factors, including commissions/price, the ability of brokers and dealers to effect the transactions, the brokers and dealers facilities, reliability and financial responsibility. The Investment Manager need not solicit competitive bids and does not have an obligation to seek the lowest available commission cost. All such transactions will be undertaken in compliance with the rules of the FCA on inducements and the use of dealing commission. Accordingly, dealing commissions will be used only for the provision of execution or research services.

In addition, although soft dollars will be used for brokerage and research products and services with the Safe Harbor provided by Section 28 (e) of the US Securities Exchange Act of 1934, as amended, soft dollars may be generated in transactions and pursuant to arrangements not falling within the Section 28 (e) Safe Harbor. Soft dollars generated through transactions other than agency transactions in securities and riskless principal transactions in securities (e.g. transactions in rights, options, warrants or certificates to the extent that they relate to shares and principal transactions involving securities that are not riskless principal transactions) do not fall within the Safe Harbor created by Section 28 (e) and may be used to obtain brokerage and research products and services.

Brokers sometimes suggest a level of business they would like to receive in return for the various products and services they provide. Actual brokerage business received by any broker may be less than the suggested allocation, but can (and often does) exceed the suggested level, because total brokerage is allocated on the basis of all of the considerations described above. A broker is not excluded from receiving business because it has not been identified as providing research services or products. Research products and services received from the ICAV's brokers may be used by the Investment Manager in servicing all of its accounts, and not all such research products and services need to be used in connection with the ICAV. Nonetheless the Investment Manager believes that such investment information provides the ICAV with benefits by supplementing the research otherwise available to the ICAV. In accordance with the requirements of the Central Bank, benefits provided will assist in the provision of investment services to the ICAV.

8. Fees and expenses (continued)

Taxation

Under current Irish law and practice the ICAV qualifies as an investment undertaking under Section 739B of the Taxes Act 1997 and is not therefore chargeable to Irish tax on its relevant income or relevant gains. No stamp, transfer or registration tax is payable in Ireland on the issue, redemption or transfer of shares in the ICAV.

Distributions and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries. The ICAV may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreement in operation between Ireland and other countries. The ICAV may not, therefore, be able to reclaim withholding tax suffered by it in particular countries.

To the extent that a chargeable event arises in respect of a Shareholder, the ICAV may be required to deduct tax in connection with that chargeable event and pay the tax to the Irish Revenue Commissioners. A chargeable event can include dividend payments to Shareholders, appropriation, cancellation, redemption, repurchase or transfer of shares, or a deemed disposal of Shares every 8 years beginning from the date of acquisition of those Shares. Certain exemptions can apply. To the extent that Shareholders have appropriate tax declarations in place with the ICAV there may be no requirement to deduct tax.

IFRIC Interpretation 23, Uncertainty over Income Tax Treatment clarifies the accounting for income taxes when tax treatments involve uncertainty that affects the application of IAS 12 in the ICAV's financial statements.

Management evaluates such tax positions to determine whether, for all tax years still subject to assessment or challenge by the relevant taxation authorities, the tax positions are probable to be accepted on examination by the relevant tax authorities. If it is probable that the ICAV's tax positions are accepted the taxable profit (tax loss) should be consistent with the ICAV's tax filings. If not probable the ICAV must reflect the effect of the uncertainty in determining its taxable profit (tax loss). The effect of the uncertain tax treatment is determined by applying the expected value method or by applying the most likely method.

Management has analysed the ICAV's tax positions, and has concluded that no liability for unrecognised tax benefits should be recorded related to uncertain tax positions for the period/year ended 31 December 2022 and 30 June 2022.

Currently, the only other taxes recorded; if any, by the ICAV on its income were withholding taxes applicable to certain income. For the period/year ended 31 December 2022 and 30 June 2022, no other income tax liability or expense had been recorded in the accompanying financial statements.

9. Related party transactions

AHL Partners LLP – the Investment Manager and Introducing Broker of the ICAV, Man Investments AG – the Marketing Adviser and Representative in Switzerland of the ICAV, Man Asset Management (Ireland) Limited - the AIFM of the ICAV and Man Group Operations Limited are indirect wholly-owned subsidiaries of Man Group plc and all subsidiaries of Man Group plc are related parties.

Man Group Operations Limited pays for certain operating fees and expenses centrally on behalf of the ICAV, which are then periodically recharged back to the ICAV. Outstanding recharges as at 31 December 2022 amount to US\$6,692 (30 June 2022: US\$59,396) and have been included within accrued expenses and other liabilities.

Man Group plc companies are also involved, in varying capacities, in the management of the managed fund the ICAV has invested in. The ICAV invests in AHL Evolution Ltd, a managed fund within Man Group, as set out in Note 4.

Each of the Directors is or may become involved in other financial investment and professional activities which may cause conflicts of interest with the management of the ICAV. These activities include management or administration of other companies (including those with investment objectives similar to those of the ICAV or structures that may be related to Man Group plc sponsored investment funds), serving as directors, advisers and/or agents of other companies, including companies or legal structures in which the ICAV may invest and/or which may invest into the ICAV.

John Morton waived receiving Directors' fee for the period/year ended 31 December 2022 and 30 June 2022. John Morton is also the Chief Executive Officer and a director of the AIFM.

The net realised and unrealised gain/(loss) on transactions between the ICAV and the related managed funds during the period amounted to US\$7,579,953 (31 December 2021: US\$8,198,735) and US\$(14,940,836) (31 December 2021: US\$2,640,546) respectively, which are included in the statement of comprehensive income. There were purchases of US\$45,790,649 (31 December 2021: US\$16,245,781) and sales of US\$31,316,288 (31 December 2021: US\$29,099,277) during the period.

Included within subscriptions for the ICAV are subscriptions into Class DN USD Redeemable Participating Shares of US\$2,277,063 which were simultaneously redeemed out of Man GLG High Yield Opportunities Class IV H USD during August and September 2022. Man GLG High Yield Opportunities Class IV H USD is a related fund to the ICAV as it is manged by an entity of Man Group plc.

As at 31 December 2022, 0.03% (30 June 2022: 0.04%) of the outstanding Class DNR USD Redeemable Participating Shares, 0.16% (30 June 2022: 0.34%) of the outstanding Class DNR H EUR Redeemable Participating Shares, 0.27% (30 June 2022: 0.47%) Class DN H EUR Redeemable Participating Shares and 0.0004% (30 June 2022: 0.0004%) Class DN USD Redeemable Participating Shares were owned by Man Mash Limited, an entity affiliated with Man Group plc.

Management fees

Directors' fees

The above amounts are payable on demand and do not bear interest.

10. Share capital

Subscriber Shares

The ICAV has authorised 2 Subscriber Shares of no par value issued at €1.00 each. The Subscriber Shares may be repurchased by the ICAV at any time. The Subscriber Shares do not form part of the NAV. They are disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the ICAV's investment business.

Share capital

Directors

The holders of the subscriber shares shall:

Man Asset Management (Cayman) Limited

- i. On a poll be entitled to one vote per Subscriber Share;
- ii. Not be entitled to any dividends whatsoever in respect of their holding of Subscriber Shares; and,
- iii. In the event of a winding up or dissolution of the ICAV, be entitled to payment in respect of the nominal amount paid up thereon out of the assets of the ICAV, but shall not be entitled to any further or other amount.

Redeemable Participating Shares

The ICAV has an authorised share capital of 500,000,000,000 Shares of no par value which are available for issue as fully paid Redeemable Participating Shares. A Redeemable Participating Shareholder's Redeemable Participating Shares may be redeemed by the ICAV at the request of that Redeemable Participating Shareholder. At period end, the ICAV had issued 2,509,302 (30 June 2021: 2,767,315) Redeemable Participating Shares. The value of the capital attributable to the Redeemable Participating Shares is equal to the NAV.

The holders of the Redeemable Participating Shares shall:

- i. On a poll be entitled to one vote per Redeemable Participating Share;
- ii. Be entitled to such dividends as the Directors may from time to time declare; and,
- iii. In the event of a winding up or dissolution of the ICAV, be entitled (after payment to the holders of Subscriber Shares of the nominal amount paid thereon) to the remaining assets of the ICAV in proportion to the number of Redeemable Participating Shares held.

Redemptions may be made on a daily basis on a dealing day. Redemption Notices must be received by the Administrator at the latest, by 13:00 (Irish time) on the relevant dealing day. Payments of the Redemption Proceeds will normally be made within three business days after the calculation of the NAV on the relevant dealing day thereafter.

Share transactions in Redeemable Participating Shares for the periods ended 31 December 2022 and 31 December 2021 were as follows:

| 31 December 2022 | Class | Class | Class | Class | Class | Class |
|--|-----------|--------------|----------|----------------|-----------|----------------|
| | DN USD | DN H CHF | DN H EUR | DNR USD | DNR H EUR | DNR H CHF* |
| Opening Redeemable Participating Shares | 2,397,298 | 33,581 | 2,147 | 728,998 | 2,943 | 14,299 |
| Issue of Redeemable Participating Shares | 49,666 | 1,684 | 1,500 | 393,752 | 3,163 | 17,188 |

| Closing Redeemable Participating Shares | 2,452,916 | 33,094 | 150 | 22,284 | 858 |

In the event of a winding-up or dissolution of the ICAV or upon the distribution of capital, the holder of the Redeemable Participating Shares shall be entitled, following a payment to the shareholder(s) of Subscriber Shares of the par value thereof, to the return of the assets of the ICAV held in respect of that class and, thereafter, to share pro rata in the assets, if any, of the ICAV not held in respect of any class.

Capital management

The ICAV's objectives for managing capital include:

- investing the capital in investments meeting the description, risk exposure and expected return indicated by the ICAV's investment objective;
- achieving consistent returns while safeguarding capital by investing in diversified portfolios, by participating in derivative and other advanced capital markets and by using various investment strategies and hedging techniques;
- maintaining sufficient liquidity to meet the expenses of the ICAV, and to meet redemption requests as they arise; and
- maintaining sufficient size to make the operation of the ICAV cost-efficient.

Net Asset Value per Redeemable Participating Share

The NAV per Redeemable Participating Share is determined by dividing the NAV by the total number of Redeemable Participating Shares in issue. The NAV attributable to the holders of Redeemable Participating Shares as at period end and comparatives for previous periods are as follows:

| | | Percentage of | | |
|--|--|---|--|---|
| Class DN USD | NAV per Share US\$ | change in NAV per Share | NAV US\$ | Number of shares outstanding |
| 31 December 2022 | 150.78 | (3.39%) | 349,641,179 | 2,318,822 |

Past performance is no indication of current or future performance and the performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

11. Statement of changes in the portfolio

A complete statement of changes in the portfolio will be made available to Shareholders free of charge upon request.

12. Efficient portfolio management

The ICAV did not engage in any efficient portfolio management techniques during the period (30 June 2022: Nil).

13. Events during the period

There have been no significant events during the period.

14. Contingent liabilities and commitments

There were no contingent liabilities or commitments other than those already disclosed in these financial statements as at 31 December 2022 (30 June 2022: None).

15. Subsequent events

Since the period end and up to 17 February 2023, there have been subscriptions and redemptions as follows:

| | Subscriptions | Redemptions |
|-----------------|---------------|-------------|
| Class DN USD | 855,610 | (4,432,970) |
| Class DN H CHF | 438,380 | (410,780) |
| Class DN H EUR | 63,431 | (122,376) |
| Class DNR USD | 238,338 | (5,390) |
| Class DNR H CHF | 76,413 | (9,930) |

There were no other subsequent events after the period end requiring disclosure in these financial statements.

Man Funds VIII ICAV Supplementary information

Unaudited Total Expense Ratio ('TER')

The following Total Expense Ratio (TER) has been calculated in accordance with the Swiss Funds & Asset Management Association (SFAMA) Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment scheme dated 16 May 2008 as of 20 April 2015. This ratio expresses the sum of all costs and fees charged on an ongoing basis to the ICAV's assets (operating expenses) taken retrospectively as a percentage of the ICAV's assets.

Man Funds VIII ICAV Glossary For the period from 1 July 2022 to 31 December 2022

| | Indices definitions | | | | |
|----------------------------------|--|--|--|--|--|
| Russell 2000 | The Russell 2000 index is an index measuring the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States. <i>For more information go to <u>www.ftse.com</u></i> | | | | |
| S&P 500 | Index is a widely recognized gauge of the U.S. equities market. This index is an unmanaged capitalization- weighted index consisting of 500 of the largest capitalization U.S. common stocks. The returns of the S&P 500 include the reinvestment of dividends. <i>For more information go to <u>https://eu.spindices.com/</u></i> | | | | |
| | | | | | |
| | Glossary | | | | |
| Bond | A debt instrument issued for a period of more than one year with the purpose of raising capital by borrowing. Generally, a bond is a promise to repay the principal along with interest (coupons) on a specified date (maturity). Some bonds do not pay interest, but all bonds require a repayment of principal. When an investor buys a bond, he/she becomes a creditor of the issuer. | | | | |
| Credit Default Swap (CDS) | A credit default swap (CDS) is a financial derivative or contract that allows an investor to "swap" or offset his or her credit risk with that of another investor. For example, if a lender is worried that a borrower is going to default on a loan, the lender could use a CDS to offset or swap that risk. To swap the risk of default, the lender buys a CDS from another investor who agrees to reimburse the lender in the case the borrower defaults. Most CDS will require an ongoing premium payment to maintain the contract, which is like an insurance policy. | | | | |
| Credit rating | Ratings issued by credit ratings agencies which represent the agency's evaluation of qualitative and quantitative information for a company or government. Ratings are used to rank companies and governments on the probability of them defaulting on their obligations (i.e. to repay their debts). | | | | |
| Commodity | A physical substance, such as food, grains, and metals, which is interchangeable with another product of the same type, and which investors buy or sell, usually through futures contracts. The price of the commodity is subject to supply and demand. | | | | |
| Derivatives | Financial contracts such as futures, options and various securities that offer 'synthetic' access to an underlying asset such as a commodity, stock market or fixed income security. The price movements of a derivative generally follow the price movements of the underlying asset but derivatives generally require only small amounts of capital (margin) to gain exposure to the underlying asset. | | | | |
| Equity | An ownership right representing an interest in a company. | | | | |
| Financial Derivative instruments | See <i>Derivatives</i> | | | | |
| Fixed income | Term used to denote bonds and other debt instruments, because they normally pay a fixed interest rate | | | | |
| Futures contract | An agreement to buy or sell a stated amount of a security, currency or commodity at a specific future date and at a pre-agreed price. | | | | |
| Gilt | The name for a bond (fixed interest security) issued by the UK government to investors when it wants to borrow money. | | | | |
| Index | An index is a portfolio of stocks, chosen according to simple, pre-defined rules, and designed to capture a particular investment style. | | | | |
| Investment grade | A credit rating which means that a government or corporate bond has a relatively low risk of default. The lower the credit rating, the higher the probability or risk of default. Investment grade bonds are those awarded a certain rating or above. For example, S&P rates borrowers on a scale from AAA to D those rated between AAA and BBB are deemed to be investment grade. For Fitch Ratings it would a BBB or better rating. | | | | |
| Leverage | The process or effect of magnifying exposure to an investment strategy, manager or asset. Leverage can be achieved by borrowing capital or using derivatives. A leveraged investment is subject to a multiplied effect regarding the profit or loss that results from a comparatively small change in price. Thus leverage offers the opportunity to achieve enhanced returns, but at the same time typically involves greater risk and can result in a loss that is proportionally greater than the amount invested. | | | | |
| | | | | | |
| Liquidity | A relative term to describe the speed at which an asset or assets can be converted into cash (liquidated) and vice versa. | | | | |

Man Funds VIII ICAV Glossary (continued) For the period from 1 July 2021 to 31 December 2021

| Market capitalisation | Market value of a company's issued share capital – in other words. the number of shares multiplied by the current price of those shares on the stock market. Companies are ranked as large-cap, mid-cap and small- cap depending on their market capitalisation (market cap), though the actual criteria for classification depend on the market concerned. | |
|------------------------|--|--|
| Option | A derivative instrument that gives the holder the right, without obligation, to buy (call) or sell (put) a security or asset at a fixed price within a specified period or at a particular future date. | |
| Over the counter (OTC) | Generally refers to a stock (but can also refers to other financial instruments) that is not listed on an exchange and traded via a dealer network . | |
| Quantitative trading | A form of investing in which computers are used to sort through financial data and identify predictable patterns. Quantitative traders take advantage of modern technology, mathematics and the availability of comprehensive databases for making rational trading decisions to identify trading opportunities. | |
| Reference index | An index used as a benchmark for performance comparison purposes but which is not a formal benchmark a per fund's prospectus. | |
| Share | See <i>Equity</i> | |
| Short position | Fund managers use this technique to borrow a security and then sell it with the intention of buying it back for less when the price falls. The position profits if the security falls in value. Within UCITS funds, derivatives – such as contracts for difference (CFDs) – can be used to simulate a short position. | |
| Stock | See <i>Equity</i> | |
