KEY INFORMATION DOCUMENT

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Date of production: 28.02.2024

Ossiam ESG Opportunity Fund

EA (EUR) | ISIN: IE000NGJAI70

Manufacturer: Ossiam, part of the Natixis group of companies · **Regulator:** Autorité des Marchés Financiers (AMF) · **Contact:** www.ossiam.com | +33 1 84 79 42 70 This product is authorised in Ireland and is regulated by the Central Bank of Ireland in respect of this Key Information Document.

1. What is this product?

Product Type: The Fund is an actively managed Undertakings for Collective Investments in Transferable Securities (UCITS) under Irish law in the form of a sub-fund of an Irish Collective Asset-management Vehicle (ICAV).

Maturity: This product has no specific maturity date. However, this product may be dissolved or merged, in which case you will be informed by any appropriate means provided for by the regulations.

Objectives: The objective of the Fund is to outperform money market rates over the five (5) years recommended investment horizon, while consistently integrating environmental, social and governance ("ESG") matters. The Fund will be exposed, on leverage, to a portfolio of equities (the "Portfolio") selected for their performance, in accordance with the Management Company's proprietary ESG machine learning model (the "Model"), while hedging exposure to equity market risk. Although the Fund aims to achieve its investment objective, there is no guarantee that this will be achieved. The Fund's capital is at risk, meaning that the Fund could suffer a decrease in value and the value of your investment would decrease as a result. The Fund is actively managed and does not replicate or seek to replicate the composition of any index or benchmark. The composition of the Portfolio will be determined at least on a quarterly basis as follows:
(i) the Investment Universe is constituted of stocks listed and traded on major developed markets' exchanges globally (the "Investment Universe"). The Model evaluates the Investment Universe using financial criteria and non-financial criteria. (ii) The Model first applies a normative filter, to exclude from the Investment Universe securities of companies involved in serious violation of widely accepted international norms of responsible corporate behaviour and controversial business activities (the "Normative Filter"). (iii) Securities that pass the Normative Filter are screened to identify those which represent potential investment opportunities as opposed to potential investment risks, by using machine learning techniques to select patterns showing a significant link between ESG characteristics and financial performance. Securities classified as "investment opportunity" constitute the "Eligible Universe".

Investment Policy: The Fund Portfolio will be a subset of the Eligible Universe and will be constructed by the Model on the basis of securities' financial data (e.g., but not limited to, historical prices and liquidity) and ESG data (e.g., but not limited to, ESG ratings and greenhouse gas emissions). At least 90% of the Fund's portfolio will be subject to such extra-financial analysis. The Fund will hedge a significant portion of its equity market risk, through dynamically traded financial derivatives (DFIs) (listed in the Fund Supplement) on global equity indices representative of the Investment Universe. Hedging is expected to average between 120% and 180% of the Fund's Net Asset Value, with a maximum of 200%. DFIs will be used to expose the Fund to the Portfolio, hedge equity market risk and neutralize certain risks. The Fund may generate leverage when DFIs are used. This leverage is expected to vary between 240% and 360% of the Fund's Net Asset Value, with a maximum of 400%. The Fund may hold up to 100% of its assets in liquid assets, in accordance with UCITS regulations, in order to support margin requirements arising from its investment in DFIs.

SFDR Category: Article 8

Allocation of distributable amounts: Capitalization.

Intended Investors: Investors who understand the Fund's risks and plan to invest for the long term (minimum 5 years). The Fund is aimed at investors who: (i) are looking for a growth-oriented investment with a sustainable investment approach, (ii) are interested in exposure to developed equity markets, either as a core investment or for diversification purposes, (iii) have a high risk profile and can withstand significant losses. The shares of this Fund have not been registered under the "US Securities Act of 1933" and may not be offered or sold directly or indirectly for the account or benefit of a "U.S. Person" as defined by US "Regulation S" and/or the "Foreign Account Tax Compliance Act".

In view of the provisions of EU Regulation No. 833/2014 and EU Regulation 2022/398 the subscription of shares in this Fund is prohibited to any Russian or Belarusian national, any natural person residing in Russia or Belarus or any legal person, entity or body established in Russia or Belarus except nationals of a Member State and natural persons holding a temporary or permanent residence permit in a Member State.

Depositary: The Bank of New York Mellon SA/NV, Dublin Branch

Additional information: The Fund's regulations and annual and semi-annual reports are available on the management company's website and free of charge on written request to info@ossiam.com. The net asset value is available on the management company's website. www.ossiam.com

Processing requests: Subscription and redemption orders are received no later than 3:00 p.m. (Dublin time). Investors can subscribe or sell units on any trading day in Ireland. For further information, please refer to the Prospectus and/or contact your broker.

2. What are the risks and what could I get in return?

Risk Indicator 1 2 3 4 5 6 7 LOWER RISK HIGHER RISK

The risk indicator assumes that you hold this product **for 5 years.** The real risk may be very different if you opt to exit before maturity, and you may get less in return. The risk indicator allows you to assess the level of risk of this product compared with others. It indicates the probability of this product incurring losses in the event of market movements or our inability to pay you.

We have classified the Fund in risk class 3, which is a medium-low risk class. In other words, the potential losses linked to the product's future results are at a medium-low level, and if the situation were to deteriorate on the markets, it is possible that our ability to pay you is unlikely to be affected.

The market liquidity risk could amplify the variation of product performances.

Beware of currency risk. If the sums paid to you are in another currency, your final profit will depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator.

In addition to the risks included in the risk indicator, other risks may influence the Fund's performance. Please refer to the Fund's prospectus.

As this Product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

Performance Scenarios

		1 year	5 years (recommended holding period)
Stress Scenario	What you might get back after costs	EUR 7 650	EUR 7 238
	Average annual return	-23.5%	-6.3%
Unfavorable Scenario	What you might get back after costs	EUR 9 626	EUR 9 676
	Average annual return	-3.7%	-0.7%
Moderate Scenario	What you might get back after costs	EUR 9 963	EUR 9 797
	Average annual return	-0.4%	-0.4%
Favorable Scenario	What you might get back after costs	EUR 10 443	EUR 10 741
	Average annual return	4.4%	1.4%

Favorable Scenario: this type of scenario occurred for an investment between 31/01/2019 and 31/01/2024.

Moderate Scenario: this type of scenario occurred for an investment between 29/07/2016 and 30/07/2021.

Unfavorable Scenario: this type of scenario occurred for an investment between 31/10/2018 and 31/10/2023.

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will receive from this product depends on future market performance. Future market trends are random and cannot be accurately predicted. The unfavorable, moderate and favorable scenarios presented represent examples using the best and worst performances, as well as the average performance of the product over the last 10 years. Markets may evolve very differently in the future. The stress scenario shows what you could achieve in extreme market situations.

3. What happens if the Issuer is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of the latter's default, the product's assets held by the custodian will not be affected. In the event of the custodian's default, the risk of financial loss to the product is mitigated by the legal segregation of the custodian's assets from those of the product.

4. What are the costs?

The person selling or advising you on this Fund may ask you to pay additional costs. If this is the case, they will tell you about these costs and show you how they affect your investment. Reduction in yield (RIY) shows the impact of the total costs you pay on the return on investment you could achieve. Total costs take into account one-off, ordinary and ancillary costs.

Cost over time

	Total Cost	Impact on return (RIY) per year*
If you cash in after 1 year	EUR 301	3.0%
If you cash in at the end of the recommended holding period	EUR 304	0.6%

The tables show the amounts deducted from your investment to cover the various types of costs. These amounts depend on the amount you invest, the period of time you hold the product and the product's performance. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- That in the first year you would get back the amount you invested (0% annual return). That for the remaining holding periods, the product evolves as indicated in the moderate scenario.
- EUR 10.000 invested
- *This illustrates the extent to which costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per annum is expected to be 0.2% before deducting costs and -0.4% after deducting costs.

Composition of costs

This table shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

			If you cash in after 1 year
One-off costs	Entry costs*	Up to 3.00% of the amount you receive when you enter the investment.	EUR 300
	Exit costs*	Up to 0.00% of the amount you receive when you exit the investment.	EUR 0
Ongoing costs	Portfolio transaction costs	0.01% of the value of your investment per year.	EUR 1
	Other ongoing costs	0.5% of the value of your investment per year.	EUR 50
Incidental costs	Performance fees	There is no performance fee for this product.	
	Carried interests	There is no carried interest for this product.	

^{*} Secondary Market: because the Fund is an ETF, Investors who are not Authorized Participants will generally only be able to buy or sell shares on the secondary market. Accordingly, investors will pay brokerage fees and/or transaction costs in connection with their dealings on stock exchange(s). These brokerage fees and/or transaction costs are not charged by, or payable to, the Fund nor the Management Company but to the investor own intermediary. In addition, the investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold.

Primary Market: Authorized Participants dealing directly with the Fund will pay related primary market transaction costs.

5. How Long should I hold it and can I take my money out earlier?

Recommended holding Period: 5 Years.

This product has no required minimum Recommended Holding Period (RHP) but is designed for long term investment. Any investment should be considered according to your specific investment needs and appetite for risk. Ossiam does not consider the suitability or appropriateness of this investment for your personal situation. If you are in any doubt about the suitability of this product to your needs, you should seek professional advice.

6. How can I complain?

You may make a complaint about the product or the conduct of (i) the Management Company (ii) a person who provides advice about the product, or (iii) a person who sells the product by sending an e-mail or a letter to the following persons, as appropriate:

- If your complaint concerns the product itself or the conduct of the Management Company: please contact the Management Company, by post, for the attention of OSSIAM Compliance or by e-mail at info@ossiam.com. A complaints handling procedure is available on the management company's website www.ossiam.com
- If your complaint concerns a person who advises on or offers the product, please contact that person directly.

7. Other relevant information

Precontractual information: To understand how the Fund promotes environmental and/or social characteristics (article 8 of the SFDR), consult the appendix on sustainability available at www.ossiam.com.

Past performance and performance scenarios: Go to www.ossiam.com. Please note that past performance does not predict future returns.

Number of years for which past performance data are presented: 10 years depending on the creation date of the share class.

Life Insurance: When this product is used as a unit-linked carrier in a life insurance or capitalization contract, additional information on this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contact in the event of a claim and what happens in the event of default by the insurance company are presented in the key information document for this contract which must be provided by your insurer or broker or any other insurance intermediary in accordance with its legal obligation.
