OSSIAM SHILLER BARCLAYS CAPE® US SECTOR VALUE TR (UCITS ETF 1C(EUR)ISIN:LU1079841273) a sub-fund of OSSIAM LUX SICAV

Management Company: NGAM S.A., part of the Natixis group of companies
Investment Manager: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of OSSIAM SHILLER BARCLAYS CAPE® US SECTOR VALUE TR (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the Shiller Barclays CAPE® US Sector Value Net TR Index closing level.

The Shiller Barclays CAPE® US Sector Value Net TR Index (the "Index") is a total return index (net dividends reinvested) expressed in USD, calculated and published by Barclays (the "Index Provider").

The Shiller Barclays CAPE® US Sector Value Net TR Index reflects the performance of a dynamic long exposure to 4 US equity sectors which are selected every month according to their Relative CAPE® (Cyclically Adjusted Price Earnings) ratio and price variations over the prior 12 months (the "12-month price momentum").

Exposure to US equity sectors is achieved through S&P Select Sector Indices (the "Sub-Indices") which capture the performance of the US companies represented by S&P 500 Index.

Sector constituents of the Index will be selected on a monthly basis based on the Shiller Barclays CAPE® Index Family Methodology. Each of the 4 selected sub-indices is allocated the same weight (25%) at each rebalancing.

For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

Investment policy:

In order to achieve its investment objective, the Fund will primarily use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index or a related index, or a portfolio of its constituents through a swap agreement with a swap counterparty.

This method implies a counterparty risk as described in the below Risk and Reward Profile. The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swap will be a first class financial institution that specializes in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described.

The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from one of the above described policies to the other (i.e. synthetic replication vs. physical replication).

In both replication strategies, the Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries.

In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the US Dollar.

The UCITS ETF 1C(EUR) shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Luxembourg or, through a fund platform. Please contact your broker for additional information. The UCITS ETF 1C(EUR) Share Class is an accumulating Share Class therefore income derived from the Fund is reinvested. Please refer to the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Fund is ranked 5 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Fund may experience important volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

Special Risk Considerations

Index Risk: The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index

will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty risk: As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss.

The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the equity market.

Geographic concentration risk: Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments. Please refer to the full Prospectus for additional details on risks.
