Investment objective

The fund aims to deliver capital growth and income over a three to five year period after fees have been deducted by investing in a diversified range of assets in emerging markets worldwide.

The fund is actively managed and invests at least two-thirds of its assets directly in equity and equity related securities, fixed income securities and Alternative Asset Classes of emerging markets countries worldwide or companies which derive a significant proportion of their revenues or profits from emerging markets countries worldwide.

The fund may actively allocate its assets in Money Market Investments and currencies especially to mitigate losses in falling markets.

The fund may invest: – in excess of 50% of its assets in below investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities; – in excess of 50% of its assets in emerging market debt (fixed and floating rate) securities; – up to 20% of its assets in asset backed securities and mortgage-backed securities; – up to 10% of its assets in alternative asset classes (as defined in appendix III of this prospectus) indirectly through Exchange Traded funds, REITs or open-ended Investment funds; and – up to 10% of its assets in open-ended Investment funds.

The fund may invest directly in China B-Shares and China H-Shares and may invest less than 25% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext. The fund may also invest in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct). The fund may hold cash.

The fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Where the fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and

floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund does not have a target benchmark.
