WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS). It is a sub-fund of THEAM QUANT-, an open-ended investment company (société d'investissement à capital variable "SICAV") governed by the provisions of Part I of the Luxembourg Law of 17 December 2010 (the "2010 Law") relating to undertakings for collective investment as well as by UCITS Directive 2009/65.

Term

This Product has no maturity date.

BNPP AM France is not entitled to terminate the Product unilaterally. The board of directors has the authority to decide on the merger, split, liquidation or the closure of the sub-fund. Furthermore, the SICAV may be wound up by decision of an extraordinary general meeting of shareholders.

Objectives

The objective of the Sub-fund is (i) to increase the value of its assets over the medium term by being exposed to a dynamic basket of European investment grade corporate bonds, the components of which are chosen using a systematic selection method based on environmental, social and governance criteria (ESG) as well as a carbon emission and energy transition criteria and (ii) to offset its carbon footprint (Scopes 1 and 2).

In order to achieve its investment objective, the Sub-fund implements a quantitative investment strategy (the Strategy) through the BNP Paribas Bond Europe Climate Care Index TR (the Strategy Index). The investment universe is composed of European companies selected on the basis of their ESG Score, liquidity constraints, energy transition rating and financial robustness criteria. The application of ESG criteria, such as, but not limited to, energy efficiency, respect of human and workers' rights or board of directors independence, follows a best-in-class and selectivity approach which aims to select the leading companies in their sector by excluding at least 20% of the securities from the initial investment universe. Then the allocation algorithm follows a thematic investing approach in a manner which seeks to maximise the energy transition score of the resulting basket of bonds under principal constraints of risk mitigation, carbon footprint less than or equal to 50% of the carbon footprint of a European reference investment universe, while also conducting a control on the deviation of the portfolio compared to a portfolio representative of the European investment grade bonds market, with the objective of a controlled tracking error of up to 2%.

An extra-financial strategy may comprise methodological limitations such as the Risk related to ESG investment or the Risk related to a systematic allocation incorporating extra-financial criteria.

The Strategy Index is based on a systematic model developed by BNP Paribas and is rebalanced quarterly using a specific algorithm. The performance of the Strategy Index (and indirectly that of the Sub-fund) will be reduced by an annual replication costs linked to the quarterly rebalancing and innovation fees and liquidity costs equal to 0.60% p.a., applied to the exposure to the Strategy (i.e., approximately 100% of the NAV of the Sub-fund). The complete breakdown of the Strategy Index is available on the website: <https://indx.bnpparibas.com>. The index calculation method is available directly at: <https://indx.bnpparibas.com/nr/BNPIBECC.pdf>. A Carbon Footprint Offsetting is implemented by the Management Company via the use of a type of carbon credits, the VER (Verified Emission Reduction) as follows: the Management Company calculates the carbon footprint (Scopes 1 and 2) using the composition of the Sub-fund's Underlying Assets in order to establish the amount of VERs required to offset carbon emissions. All acquired VERs whereby offsetting will have been achieved will be cancelled so as to materialise the effective compensation. The list of VER underlying projects selected by the Management Company as well as their description are available at: <https://docfinder.bnpparibas-am.com/api/files/4E0A58B3-05C7-4008-86CE-FDB947DD5919>.

The Carbon Footprint Offsetting may be considered partial to the extent that (i) the Management Company does not take Scope 3 into account, and (ii) it only offsets carbon emissions related to the composition of the Strategy Index and not those related to the financial instruments held in the Fund's assets where a Synthetic Replication Policy is used.

The Strategy of the Sub-fund is deemed active. The Sub-fund does not have any benchmark for performance comparison purpose. The Strategy is implemented either according to a Synthetic Replication Policy, through the conclusion of OTC Derivatives (including TRS) or in cash by investing directly in the basket of corporate bonds that make up the Strategy.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 2 out of 7, which is a low risk class. The risk category is justified by the investment mainly in interest rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product not included in the summary risk indicator:

- Counterparty Risk: this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- Credit risk: the risk that the creditworthiness of an issuer may deteriorate or that it may default, potentially causing the value of the associated instruments to fall.
- Liquidity risk: this risk arises from the difficulty of selling a security at its fair value and within a reasonable period of time due to a lack of buyers.
- Risk linked to the use of financial derivative instruments: these instruments may involve a range of risks that may affect the net asset value.

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. The markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 3 years Example Investment: EUR 10,000		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	7,294.38 EUR	7,115.08 EUR
	Average return each year	-27.06%	-10.73%
Unfavourable	What you might get back after costs	8,247.19 EUR	8,190.51 EUR
	Average return each year	-17.53%	-6.44%
Moderate	What you might get back after costs	10,072.27 EUR	10,545.35 EUR
	Average return each year	0.72%	1.79%
Favourable	What you might get back after costs	10,854.59 EUR	11,581.39 EUR
	Average return each year	8.55%	5.02%

The below scenarios occurred for an investment using a suitable proxy.

The favorable scenario occurred for an investment between 2013 and 2016.

The moderate scenario occurred for an investment between 2016 and 2019.

The unfavourable scenario occurred for an investment between 2019 and 2022.

WHAT HAPPENS IF BNPP AM FRANCE IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM France.

In the event BNPP AM France would default, the assets of the SICAV, held by a depositary, would not be affected by this default.

In case of the default of the depositary, the risk of financial loss of the SICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/SICAV.

WHAT ARE THE COSTS?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total Cost	52 EUR	165.36 EUR
Annual Cost Impact (*)	0.52%	0.53%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.32% before costs and 1.79% after costs.

Composition of costs

One-off entry or exit costs	If you exit after 1 year	
Entry costs	We do not charge an entry cost.	0 EUR
Exit costs	We do not charge an exit cost.	0 EUR
Recurring costs levied annually		
Management costs and other administrative and operating costs	0.37% of the value of your investment per year. The amount is based on an estimate of the charges that will be taken out of your money.	37 EUR
Transaction costs	0.15% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	15 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	0 EUR

In case of conversion, the investors may be charged a maximum fee of 1.50%.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period ("RHP"): 3 years.

The RHP has been defined and based on the risk and reward profile of the Product.

Investors are able to redeem on a daily basis (on bank business days) and the redemption order will be executed according to the calendar described in the prospectus.

Any redemption occurring before the end of the RHP may adversely impact the performance profile of the Product.

HOW CAN I COMPLAIN?

For any complaints, investors are invited to contact their usual advisor at the establishment that advised them on the Product. They can also contact BNPP AM France via its website www.bnpparibas-am.fr (Complaints Management Policy in the footer at the bottom of the page), by sending a registered letter with acknowledgement of receipt to BNP PARIBAS ASSET MANAGEMENT France - Client Service - TSA 90007 - 92729 Nanterre CEDEX, France, or by sending an email to amfr.reclamations@bnpparibas.com.
